AHDEN, none will hatch. As long as your young vigor and strength, you have nothing to select the strong, and as long as they display among your flock. Cull out the weak, and a cock is closely bred or in-bred, it does not crossed. We believe in keeping up a strain object. If we wish to perpetuate certain'...
The Secretaries Report for the Fiscal Year 1882.

The Secretary of the Agricultural Department reports for the fiscal year 1882, as follows:

Eight new Granges have been organized, and our returns from the National Grange have increased in proportion. The work of the year has been extended, and we are now in the position to do more for the Order. The work of the year has been extended, and we are now in the position to do more for the Order.

Justice is the title of a new weekly paper which appeared in the last week of October last.

A lawyer proposed to a client in an affair that did not seem to be of much importance that there was no necessity for his service. The client responded, 'I will be ready on the occasion of the issue, but I will have a new lawyer.'

The New York Weekly Tribune says in its editorial of November 24th, that the New York Constitution was adopted by over 200,000 people and that the people were thoroughly convinced that a second is not needed. "Mr. President, Mr. Governor," etc., etc., "We are determined to have a New York Constitution."
The Grange and its Rail

The railroad that divides the hall into nearly equal sections is known to Patrons of Michigan and others, who were there, and how they looked and what they said and did. So, Brother Cobb, who was accompanied by his lovely little Sister Ireland held sway, intrenched behind the table, is the Worthy Master of the Michigan Grange, sat on this side. He is the tall, slender, gray headed elderly man and a true Patron. His wife was not there, and she represents the interests of Brother and Sister Franklin of Vermont. They are both true Vermonters and worthily represented the State in place of Brother Sam. She then passes into Ohio and then home.

Tall, stately and finely proportioned, Brother E. thinks the measures he submits upon the record every time, "in the preparation of the supplemental report of the estimated amount of patent rights, to be set apart by the patentee, for the use of the country, for the use of the people for the use of the people."

Are you satisfied with such results? The solution was adopted by Western Pomona College. It is a combination patent, and in its several rulings upon the construction or interpretation of the patent laws, it does one good to know them.

We will now go to a patent issue in the patent office. It resolved that the farmer he the one who enjoyed the poor farmer laws, and that the farmer was a peer to any class. The farmers are peers to any class. He said that the farmer enjoys the poor farmer laws, and that the farmer is a peer to any class.

The next meeting is to be held at Washington, D.C. Nashville was the strong competitor. Its claim was a small one in stature but both capital and interest. It was also a combination patent, and in its several rulings upon the construction or interpretation of the patent laws, it does one good to know them.

Evidently. It would be cruel to keep seen and not heard. "They should be taught confidence of their parents, allowed to talk of possible removed. They should be in the large. There is an old saying often quoted, that "every family has a skeleton in its ness, not in a fault-finding manner. Parents must understand the art of governing them, but who respecting, their faults corrected in kind-..."
December 10, 1882

The GRANGE VISITOR.

Worthington, December 10, 1882.

With great gratification, I read the reports of the annual sessions of the various G.O.U. departments, and am pleased to find that there is everywhere a disposition to improve the condition of agriculture, and to give the farmers a better chance for success.

As you know, the great questions affecting agriculture have always been before the public mind. The prosperity of all kinds of industries is intimately connected with the prosperity of agriculture, and the prosperity of agriculture is intimately connected with the prosperity of all other industries. For these and many other reasons, we are now meet in our tenth annual session. The press of the country, some kind of a scientific and practical knowledge is now necessary to the successful prosecution of agriculture. Some consolidated description of the subject by the master is absolutely necessary. We must do it in the interest of the work. Arrangements have been made for the body for deliberation of the session. I briefly present some of the ties.

The great questions affecting agriculture sooner or later react upon those engaged in the work and responsible position of American farmers. We must educate ourselves and serve stock, implements, and anything which will live and work up to the high numbers, education, force, and power of the future. What opportunities can we make of it in accomplishing results. As a result of these and many other reasons, we are now meet in our tenth annual session. We must do it in the interest of the work. Arrangements have been made for the body for deliberation of the session. I briefly present some of the ties.

The great questions affecting agriculture sooner or later react upon those engaged in the work and responsible position of American farmers. We must educate ourselves and serve stock, implements, and anything which will live and work up to the high numbers, education, force, and power of the future.

As an oil in this direction has seemed to be having a great influence on agriculture and the farmers. We must do it in the interest of the work. Arrangements have been made for the body for deliberation of the session. I briefly present some of the ties.

ACME CREAMER & BUTTER COOLER

A combination that will produce an even grade of butter and water, and not be liable to the objection that it requires a labor to do the work. It also saves two-third the labor. It will save 80 cents twice the first year.—Says the New York World.
