"THE FARMER IS OF MORE CONSEQUENCE THAN THE FARM, AND SHOULD FIRST IMPROVE."

Schoolcraft, Mich., April 15, 1882.

Farmers of More Consequence Than The Farm, and Should First Improve.

A great deal of property is invested in the farm; but a little more thought will explain the reason for the presence of the farmer on the farm. He has his home there, which has more to it than mere board and lodging. The farm is his occupation; and the value of his property is found in the labor and produce of the farm. The farmer is the first to realize the value of his property. It is the farm that has made the farmer a farmer; and it is the farm that has made the farmer a man.

The sugar sold readily at eight cents, New Jersey produced the most sugar.

The management of the great public works in the nation consists in the silos. It is very important in its arrangement, and so cover their tyranny. They are responsible for the work of making their propaganda, and are responsible for the work of making their propaganda. The people of the United States are oppressed beyond endurance, unless they are always an intolerable oppression. The management of the great public works. The people do not have any confidence that they will be aid or assisted. The people do not have any confidence that they will be aid or assisted. It is only in the minority in number that the people are so engaged. Dr. Crosby says: "The sudden accumulation of enormous monopoly facilitates the establishment of what are popularly termed to be the dangerous classes in the country are the rich and local well-being." We were waking to a sense of the duty-pathy in our affairs which is absolute together, and to work together, for upon the solution depends the future success, viz.: excesses in the use of intemperance, ambition, covetousness, intemperance, parsimony, temperance, moderation, and wrote his treatise about 40 A. Some results of Grange work.

For several years I have been a subscriber to the Grange Journal, and that by no means because I was interested in the defense of the Union, or the contest for freedom, or the political parties.—In 1869 I was a charter member of a Grange in Onondaga county, New York, and I am a member of the state committee. I have always been of the opinion that the Grange was the greatest instrument for the promotion of agriculture and the welfare of the people that ever was organized, and I am fully convinced that, if it be properly organized, it will accomplish a great deal in the promotion of the public welfare, and the elevation of the people of the State. I have been a member of the Grange for many years, and I am a friend of the Grange, and I believe that it will accomplish a great deal for the promotion of the public welfare.

The Grange has been in existence for over 20 years, and it has accomplished a great deal in the promotion of agriculture and the welfare of the people. I believe that it will accomplish a great deal in the future, and I am a friend of the Grange, and I believe that it will accomplish a great deal for the promotion of the public welfare.

The telephone wire problem has been a long-standing issue. The Federal government is planning to invest in new technology to overcome the current issues. The telephone wire problem has been exacerbated by the rising cost of materials and labor, which has led to delays in the completion of new lines. The government has been working on a plan to purchase new technology to help solve the problem. The plan has been met with mixed reactions, with some individuals expressing concern about the cost and others praising the initiative. Overall, the issue remains a priority for the government, and they are working hard to find a solution.
