I have now paid out that stage and have let the matter go. I do prefer a supply of this oil to anything else, and I think it is the best for my purpose. We have had its use on all my land and on many other lands, and it has been very satisfactory. It is not a cure, but it is a preventive.

Now, here is something to consider in this stage. What is the most important thing? Is it to make the best use of our land? Or is it to keep our land in production? I have seen many farmers who have used this oil, and they have all said that it is the best thing they have ever used. It is the only thing that has ever stood up to the test of time. It is the only thing that has ever stood up to the test of scientific investigation.

We have had the oil used in this way for many years, and it has been very satisfactory. It is the only thing that has ever stood up to the test of scientific investigation. It is the only thing that has ever stood up to the test of time. It is the only thing that has ever stood up to the test of scientific investigation.

ANDERSON'S DEPARTED.

The German government has been for many years endeavoring to

keep the peace, as far as the possible. The impression of a warlike spirit

might have been avoided by a more conciliatory tone of speech.

Germany was an important part of the pre-war diplomacy, and

the German government has been active in seeking to maintain that

position. The German government has been in a position to

influence the international situation, and has done so to a marked
