Agricultural Department

The Farmer Is of More Consequence Than the Farm, and Should Be First Improved.

Schoolcraft, Mich., October 19, 1883.

This subscription will expire on Nov. 15th.

Schoolcraft, Mich.

THE BATTLE.

Wading through the mud of a field, the young farmer contrives to make a pathway for his team. The harness is still muddy, and the horses walk slowly over the field. In front of the farmer is a pile of manure, and he signals his team to stop until they can be let loose while he steps out. He walks first to the nearest manure pile, then to the next, and so on until he has cleared the field of manure. When he reaches the end of the field, he turns his team around and heads back towards the barn. The sun is setting, and the clouds are growing darker.

He finds that he must work faster to get the field done in time to keep the sun out of his eyes and the wind from blowing into his face. The wind is blowing hard and the grass is whipping across his face. The farmer is hot and sweaty, but he is determined to finish the job. He signals his team again to continue and they start walking back towards the barn.

The farmer is tired, but he knows that he must keep going. He looks at his watch and sees that he only has a few more minutes to finish the job. He signals his team again and they start walking back towards the barn.

The farmer is happy that he has finished the job. He looks up at the sky and sees that the sun is setting and the clouds are growing darker. He knows that he will have to work fast if he wants to get the field done in time.

The farmer is a hard worker, and he knows that he must work hard to succeed. He has a lot of work to do, but he is determined to get it done.

The farmer is a hard worker, and he knows that he must work hard to succeed. He has a lot of work to do, but he is determined to get it done.

The farmer is a hard worker, and he knows that he must work hard to succeed. He has a lot of work to do, but he is determined to get it done.
I}
I every hour of the day and night. This is a mere question of fact. It is true from month to month with vessels for fairness of the charge, foiled to present fee or toll for a given service, and the only by invoking penal legislation, anuses. He does not deny the fact of the powers which they now enjoy, "Powers and duties," they say, "and in trying to re-States was guilty of Communism and abation is true. The accused themselves sessed, they have perverted, misused with certain powers large enough to highways belong; that they are public interest of the public, to whom the ever quarter of the continent. Gases solve at once, and you, gentlemen, If it is false, this league ought to dis-
They were a nuisance to the men, if Paul had been a pioneer, that 'twas not best for men to marry. In the rude wilderness to make, in these fair farms their hands have cleared. Have furrowed brows that once were fair. These frosty locks so thin and gray transmit them to your children too. The tree beneath whose sheltering shade these noble farms the homesteads dear. For where we owe a sacred claim, and walk eight miles to get it then.

Think of men working half a day with theirs, in pioneering days with luxuries from land and tide, wrought out, from nature's stern array changing the savage wilderness a noble record will be read. Fighting their way through smoke and fire and brighter light, the true meaning. We allow outside dealers to put down upon us wherever a chick appears and political and social hawks to swoop after trade, and then acknowledge to his credit what he did and why. The plan was, first, to sell at lower prices. Their plan was, first, to sell at lower prices. This question can and should be regulated by those who consume them. Consumers and supplifiers of a community, and when entering—those who enter here are members, or by a license from the government, or by purchase, or by engrossing the articles in market and when this was unsold, we have valued, and the committee of three which estimated the value of this and valued the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this. We have valued, and the committee of three which estimated the value of this.
Women have more to do, and must do it better, than men.

When women come to the polls in numbers, what a difference it makes! Then the men are not to be so mighty or so bold in their actions. They must be more careful and more thoughtful. They must take more pains to please and to satisfy. They must be more willing to submit to the will of others in things of lesser importance, and more and more to submit in things of greater importance.

To this, we must take time for thought and for planning. We must think of what is best for ourselves and for our families. We must think of what is best for the community and for the nation. We must think of what is best for the world.

We must not let our emotions control us. We must not let our passions rule us. We must not let our prejudices sway us. We must let our reason guide us. We must let our wisdom direct us.

We must be patient and persevering. We must be gentle and loving. We must be kind and considerate. We must be humble and meek. We must be humble and meek.

We must not be afraid to speak our minds. We must not be afraid to express our opinions. We must not be afraid to stand up for what we believe in. We must not be afraid to fight for what we believe in.

We must be willing to make sacrifices. We must be willing to give up our comfort. We must be willing to give up our ease. We must be willing to give up our pleasures. We must be willing to give up our pleasures.

We must be willing to work hard. We must be willing to work long. We must be willing to work for the good of others. We must be willing to work for the good of others.

We must be willing to be patient. We must be willing to be patient. We must be willing to be patient. We must be willing to be patient.

We must be willing to be humble. We must be willing to be humble. We must be willing to be humble. We must be willing to be humble.

We must be willing to let others be right. We must be willing to let others be right. We must be willing to let others be right. We must be willing to let others be right.

We must be willing to forgive others. We must be willing to forgive others. We must be willing to forgive others. We must be willing to forgive others.

We must be willing to love others. We must be willing to love others. We must be willing to love others. We must be willing to love others.

We must be willing to be kind to others. We must be willing to be kind to others. We must be willing to be kind to others. We must be willing to be kind to others.

We must be willing to be considerate of others. We must be willing to be considerate of others. We must be willing to be considerate of others. We must be willing to be considerate of others.

We must be willing to be patient with others. We must be willing to be patient with others. We must be willing to be patient with others. We must be willing to be patient with others.

**NATURE'S TRIUMPH AS A FERTILIZER.**

CARBONATES OF LIME have been used by farmers for many years. During the last 10 years, they have been

rushed to the market in large quantities, and have

invariably met with marked success. The lime of this

water is as good as any in the world, and as it

omits the cost of transportation, it is

good for any farm. Lime of the same

quality, if brought from

Europe, would cost $10.00 a ton,

and would be worth only 75c

a ton. We have in our

warehouse 50 tons of

the best quality Carbonate of

Lime, which we sell

at $1.00 a ton.

**GERMAN HORSES AND COW POWDERS.**

This powder has been in the use of farmers for many years, and is said to be the best in the world. It does

extreme good, and is sold at a very low price.

It is

better and cheaper than coal or

charcoal. It is

used in the

same way, and can be

applied in the same way,

but it does not

cost as much

as coal or

charcoal.

It is

sold by the

bag, and

can be

had for

$2.00 a

bag.
