LETTER TO THE POSTMAN.

The Postman—Recollections for "The Boy's Paper."—We are sometimes blamed when we write a letter to the Postman, "The Boy's Paper," that we are not more accurate in our statements. We desire to do this because we feel that the public is entitled to accurate information, and that it is our duty to furnish it. We have no wish to mislead the public, and we do not wish to be accused of being inaccurate.

The Human Pulse.

History of the human pulse is one of the most interesting topics in the study of medicine. The pulse is a measure of the heart's activity, and it is important to understand its function and how it is affected by various factors.

The human pulse has been studied by many famous scientists, and it has been the subject of many experiments and observations. The pulse is affected by many factors, including age, gender, and health status.

The human pulse is important in the diagnosis of many diseases and conditions. It can be used to detect the presence of an infection, to assess the severity of a cardiac condition, and to monitor the effectiveness of treatment.

The human pulse is also important in the study of the body's response to various stimuli. The pulse can be used to measure the body's response to exercise, to detect the presence of an allergic reaction, and to assess the body's response to pain.

The human pulse is a valuable tool in the study of the body's response to various stimuli. It is important to understand the factors that affect the pulse and to be able to interpret the pulse accurately.

The human pulse is a valuable tool in the study of the body's response to various stimuli. It is important to understand the factors that affect the pulse and to be able to interpret the pulse accurately.

FRATERNITY CANONCE AFTER A FEAST.

With attendants and the bridegroom and the flower girls and the band, etc.

By Miss Mary H. Stevens, of Brookings, Mich.

At 10 o'clock the united beauteous throng gathered at the county courthouse in that fine city, where the Quakers have their meetinghouse, and there the officiating clergyman pronounced the holy marriage vows.

I have been so long since I contributed to the columns of the Visitor, that I hope you will find me a stranger to you. I have been a member of the Quaker church for 20 years, and have been doing missionary work in the dry lands of the West for 10 years.

Since the beginning of the year, I have the pleasure of knowing several very fine and intelligent young women who have written for this paper. I have been writing for it myself for some time, and now I have the pleasure of meeting some of the writers.

Among the best of these young women are Mrs. A. L. Pearsall, of Grand Rapids, and Mrs. E. R. Voorhees, of New York. They are all very kind and considerate, and I am glad to have them as friends.

I am glad to hear from Mrs. A. L. Pearsall, who writes:

"I have been, and will be, glad to see your pages. I have no time to write, but I will do so, if you will excuse me."

I wish to say that I have written many pages for the Visitor, but I have not the time to do so now. I have been very busy, and have not had time to write. I am glad to see your pages, and will do so, if you will excuse me.

I am glad to hear from Mrs. E. R. Voorhees, of New York, who writes:

"I have been, and will be, glad to see your pages. I have no time to write, but I will do so, if you will excuse me."

I wish to say that I have written many pages for the Visitor, but I have not the time to do so now. I have been very busy, and have not had time to write. I am glad to see your pages, and will do so, if you will excuse me.
THE GRANGE VISITOR.

FEBRUARY 1, 1884.

* * *

**The Gorham Apple.**

To the Gorham apple the Grange would certainly give a vote, for its commercial excellence. It is so lately furnished that we can only refer readers to the description given of it last year, and we can but repeat that it is the most saleable on the long list of pears. It is a strong and vigorous tree, attaining a height of twelve or fifteen feet in three or four years, and it bears large masses of fruit of great size and beauty. The large varieties in combining all the qualities of apples, the Gorham is one of the latest acquired by the tahoe brotherhood. Its choice place is under a row of pears, where it will be protected from the wind, and the season will be long enough to ripen the fruit to perfection. It is a self-pollinating variety, and the fruits are of such excellent size and quality as to make it a favorite both with the fruit grower and the consumer. The Gorham apple is especially adapted to the northern states, and in the state of Michigan, where it was first grown, it has shown a remarkable degree of hardiness and resistance to disease. It is a variety of great promise, and we urge all apple growers to give it a trial in their orchards.

**Cluster, the Miami being the best of black, Doolittle, Miami, and Mammoth new berry, Reader's seedling, for early.**

In currants the cherry takes the lead in flavor, and pleasure. That class will take of the Sharpless—one of the latest acquisitions. We have a large variety of currants, and moderate firmness gives its size, beautiful glossy red color, fair flavor.

THE HAND OF LINCOLN.

In the time of need and the hour of sorrow, the mind naturally turns to the great one who, so recently, met his end amid the draped pall of mourning, and to the memories of that great life which has been encompassed by the embracing arm of death.

This was the great task that has been set before us. Mr. Lincoln was in every. way a man of the people. He understood them, and they understood him.

The people of the United States have a right to express their grief and to express their appreciation of the great man who has been removed. They have a right to express their admiration for the great man who has been removed.

The people of the United States have a right to express their grief and to express their appreciation of the great man who has been removed. They have a right to express their admiration for the great man who has been removed.
