The Farmer Is More Consequence Than the Farm, and Should Be First Improved

Schoolcraft, Mich., September 1, 1884.

The article in Ten Years, July 13th, is a valuable one, and the &#39;twas very interesting reading. Unfortunately, the few pages that are necessary to give the substance of the whole article, have not yet come in, and I must continue to write as though all the rest were on hand. It is not easy to find time to write, and yet it is necessary to do so in order to keep up with the times.

I have been writing a great deal about the importance of education, and the necessity of it being made as universal as possible. I think that education is the most important thing that can be done for the improvement of mankind, and that it is the key to all other improvements.

I have been writing about the importance of the Orange Order, and the necessity of it being made as universal as possible. I think that the Orange Order is the most important thing that can be done for the improvement of mankind, and that it is the key to all other improvements.

I have been writing about the importance of the Grange, and the necessity of it being made as universal as possible. I think that the Grange is the most important thing that can be done for the improvement of mankind, and that it is the key to all other improvements.

I have been writing about the importance of the Grange, and the necessity of it being made as universal as possible. I think that the Grange is the most important thing that can be done for the improvement of mankind, and that it is the key to all other improvements.

The Grange Visitor

Volume 2

No. 8

February 5, 1885

DEPARTMENT OF NEWS

Dear Sir:—We have just received your letter and the number of the paper you refer to, which we have carefully read.

We are pleased to learn that you have been able to secure a number of new subscribers, and we hope you will continue to succeed.

Yours truly,

[Signature]

DEPARTMENT OF ADVERTISEMENTS

Advertisements are inserted at the rate of ten cents per line. Checks or Post Office money orders to be drawn on New York, payable to the order of The Grange Visitor.

DEPARTMENT OF SOCIETY

The first meeting of the Grange, which was held in February, was attended by a large number of members. The success of the movement is evident, and we are confident that it will continue to grow.

DEPARTMENT OF ECONOMY

The economy of the agricultural class is the subject of much discussion at present. The need of a system of education for farmers is often mentioned, and there is a strong feeling that the government should take steps to promote the education of the agricultural class.

SCHOOL DEPARTMENT

The school department of the Grange is making good progress. The members are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF TEMPERANCE

The temperance movement is gaining ground. The prohibitionists are making headway, and there is a strong feeling that the government should take steps to promote the education of the agricultural class.

SUNDAY SCHOOL DEPARTMENT

The Sunday school department of the Grange is making good progress. The members are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF WISCASSET

The Wiscasset branch of the Grange is making good progress. The members are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF ANTI-SLAVERY

The anti-slavery movement is gaining ground. The abolitionists are making headway, and there is a strong feeling that the government should take steps to promote the education of the agricultural class.

DEPARTMENT OF LABOR

The labor movement is gaining ground. The workers are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF ARTS AND CRAFTS

The arts and crafts movement is gaining ground. The artisans are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF SCIENCE

The science movement is gaining ground. The scientists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF ARMED FORCES

The armed forces movement is gaining ground. The soldiers are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF POLITICAL SCIENCE

The political science movement is gaining ground. The politicians are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF LITERATURE

The literature movement is gaining ground. The writers are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF MUSIC

The music movement is gaining ground. The musicians are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF HISTORY

The history movement is gaining ground. The historians are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF GEOGRAPHY

The geography movement is gaining ground. The geographers are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF LITERATURE AND ARTS

The literature and arts movement is gaining ground. The writers and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF SCIENCE AND ARTS

The science and arts movement is gaining ground. The scientists and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF POLITICAL SCIENCE AND ARTS

The political science and arts movement is gaining ground. The politicians and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF HISTORY AND ARTS

The history and arts movement is gaining ground. The historians and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF GEOGRAPHY AND ARTS

The geography and arts movement is gaining ground. The geographers and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF LITERATURE, SCIENCE, AND ARTS

The literature, science, and arts movement is gaining ground. The writers, scientists, and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

DEPARTMENT OF POLITICAL SCIENCE, HISTORY, AND ARTS

The political science, history, and arts movement is gaining ground. The politicians, historians, and artists are enthusiastic in their support, and there is a strong feeling that the education of the agricultural class should be fostered.

God_pity us all! Time too soon will tumble God pity us all as we jostle each other; And mighter far for woe than for weal. 

SEPT. 1, 1884.
People have long been taught to wash the fruit before eating it. Indeed, if your grapes are of a variety that have been exposed to the sun and air, you should wash them before eating. This is especially important for any grapes that have been kept in boxes or barrels in the damp, when they are somewhat hard (when they pick). The last I regard as one of the best.

If you wish to try, I will help you. I love them.

Many thanks to the author for providing this insightful piece on grape care and preparation.

Improvement in our School System.

I have no doubt that more of our schools are really making more progress than is generally supposed to be the case, but I have equally no doubt that the schools in which improvement is most rapidly being made are those which are under an immediate and intelligent supervision. When we look at the statistics of the schools which have been fortunate enough to have them, we are greatly struck with the results. Improvement in the schools is not the result of mere wishful thinking, but of actual purpose in the minds of those who have charge of them. And this is especially true in the case of those schools which are under the supervision of some one who is an actual teacher. The teacher is the one who has the most direct interest in the success of the school, and who is most likely to be able to see the need of improvement.

In our schools we have had too long a period of carelessness and lack of thoroughness. We have been content to let things go as they may, and to hope that the schools will improve of their own accord. But this is no way of doing business. We must have a systematic and thorough system of school management, if we desire to have any improvement in our schools. And this can only be accomplished by having a proper supervision of the schools. It is not enough to have a system of school management, if we do not have a teacher who is thoroughly acquainted with it. The teacher is the one who can best judge of the need of improvement, and who can best make provision for it.

The second error is the employing of those who are not fitted for the work. It requires but little experience to see that the children of well-to-do people are taught by those who are not fitted for the work. The teacher is the one who has the most to gain by thoroughness, and who is most likely to be able to see the need of improvement. And this is especially true in the case of those schools which are under the supervision of some one who is an actual teacher. The teacher is the one who has the most direct interest in the success of the school, and who is most likely to be able to see the need of improvement.

The teacher is the one who can best judge of the need of improvement, and who can best make provision for it.
The Grange Visitor.

September 7, 1884

The Grange Visitors are numerous, and there is a great desire among our young people to get out in the matter of the movement. A great part of the sugar is used for the making of syrup, for the making of jam, for the making of preserves, and for the making of marmalade. However, it is not best for us to be habitually overburdened with the care of the house. We must be careful to receive her friends' visits so as to feel thoroughly comfortable and dignified hostess. And she who can under-stand the art of the cheerful entertainment; and she who can understand, is that the real worth of our Visiter.

A New Book Reviewed.

It has been my pleasure during the past winter to make the most of the reading material available for the benefit of our young friends. It is a tasty dish, and one that piques the interest of the reader. My feelings, I should say, are not too high at being given this review of "The Merry Lear," by W. Thackeray, and the history student would do well to read it, for it is a valuable addition to the study of English literature. In reading a mere review of the book, I have found a few misprints, which are not difficult to correct.

In a recent issue of the "Daily Mirror," I have read a review of "The Merry Lear," by W. Thackeray, and the history student would do well to read it, for it is a valuable addition to the study of English literature. In reading a mere review of the book, I have found a few misprints, which are not difficult to correct.

CENTRAL MISSION TIMES.

PLANT AT FACTORY PRICES.

We pay the freight and sell you at the lowest wholesale factory prices, the same as if you came to the factory. We were the first company that sold to Farmers, and we don't want more imported trade now. -Brother H. H. Thomas, Secretary Pennsylvania State Grange says: "Many of our members have more than saved their Grange expenses for a year; by producing your own. It saves hundreds longer than any other plan, and would be cheaper at twice the price per gallon." Brother Thomas is the only one known to produce, and has adopted this plan, and now they have a complete line of chemicals supplied with code of specimens of the different articles, with prices and directions for the paint, and colors for the whole Grange. All chemists should adopt Farmers' Paint Works, 58 Fulton Street, New York, and receive back, "Everybody their own Painter".
