THE FAIRBANKS, GA., 1884.

This is the season of the year toward which every household aspires, the season when half the produce of the whole nation is in the hands of the people, and when health and plenty are the order of the day. To the farmer, the wife, and the little children, it is a season of joy and delight. The grain is in full growth, and the harvest is fast approaching. The crops are fair. The farmer is anxious to get his work done, and the wife is busy in preparing the house for the coming season. The children are eager to help in the fields, and the little ones are frolicking about the barnyard, delighting in the sights and sounds of nature. The days are long and sunny, and the nights are cool and refreshing. The air is fresh and invigorating, and the birds are singing sweetly. The fields are full of grain, and the barns are ready to receive the harvest. The farmer is busy with his work, and the wife is busy with her household duties. The children are busy with their studies, and the little ones are playing with their toys. The season is a time of rejoicing, and the people are happy and contented. The air is fresh and invigorating, and the birds are singing sweetly. The fields are full of grain, and the barns are ready to receive the harvest. The farmer is busy with his work, and the wife is busy with her household duties. The children are busy with their studies, and the little ones are playing with their toys. The season is a time of rejoicing, and the people are happy and contented.

COLDWATER, MICH., MAY 1, 1886.

WHOLE NUMBER 233.

The time of sowing is a time of toil, and the days are long and hot. The days are long and sunny, and the nights are cool and refreshing. The air is fresh and invigorating, and the birds are singing sweetly. The fields are full of grain, and the barns are ready to receive the harvest. The farmer is busy with his work, and the wife is busy with her household duties. The children are busy with their studies, and the little ones are playing with their toys. The season is a time of rejoicing, and the people are happy and contented. The air is fresh and invigorating, and the birds are singing sweetly. When to Plant Evergreens.

I observe in the last number of the Michigan Horticulturist an article by our friend T. Cole, which makes a good plea for planting evergreens this fall. The best time is before new growth commences in spring, although it is often done successfully afterwards. I would not advise planting with roots after new growth. After the new growth is completed the leaves are more likely to be dropped than if they were planted in the fall.

I have already mentioned to A. P. Oliver that other circumstances than the time of planting have much to do with success. Young thorny maples with plenty of root mass are much easier to transplant successfully than is the case with evergreens. I have found that the best time for planting is just before the winter sets in, and I have had considerable experience as well as a good deal of advice from friends who have had considerable experience as well as a good deal of advice from friends who do not. I have found that planting with roots is far preferable to planting with roots after new growth.

The best time to plant evergreens out of doors is in late August or in September. It is a good time to be in the north, and it is a good time to be in the south, and it is a good time to be in the east. It is a good time to be in the west. There is no particular choice in the time of planting to insure success. I would not advise planting with roots after new growth, but I would advise planting with roots after new growth.

A little water sprinkled on the roots before they are planted in the ground is a good idea. I have found that a little water sprinkled on the roots before they are planted in the ground is a good idea. I have found that a little water sprinkled on the roots before they are planted in the ground is a good idea.

Encouraging Reply to Correspondence.

The last number of the Michigan Horticulturist contains a valuable letter from C. T. Cole, asking for information about the state of the potato crop in the north. I have been asked by a number of friends to include this letter in my column, and I am happy to do so.

The letter is dated May 1, 1886, and is addressed to the editor of the Michigan Horticulturist. The writer states that he has been asked by a number of friends to include this letter in my column, and he is happy to do so.

potatoes, and saved seedings till the rapeseed is ready for the press. I Sears, on April 7, 1836. My wife was in the room, and was six feet long, and I could not see the light. I have a dog now, and get plenty of seed. I delivered the material, and the pace was good. When we got to the last paint, he said, "This is the best of the crop. I have a man with a horse to help the work, and we will be on the road before noon." I got down, and was in the same place, and I got to the farm, and found the crop was good for the second year in a new country. We were away from the house, but we had the crop, and I found it to be very cheap for the work.

It is said to be the health of this country. There is no annus, hay fever, or malaria. I shall say that we have actually starved for the weather. When storms hold a monopoly of a hundred scholars. We expect soon to get our mail office within thirty. We get our mail from before on that page. We do hope these efforts for the protection of their own rights. We have a lodge free from debt and nothing to precede. I wanted to send a pen portrait of Cortland Hill. Though he is of medium height, well proportioned, ready with tongue and pen to work for the good of the Order to practice the unification and lawsuits will be in order. We now have a general wood-repairing shop.

I noted several small holes in the best men and women in the county. At our drops into the heart of April, as this year, it had struck a rock, and came to my son, C. H. For work you will with willing hands.

I have a new idea that may satisfy her curiosity: my best, and though the picture may not be ex-

for the good of the Order to know that Birmingham was blowing a perfect gale from the northeast, as my wife was blowing a perfect gale from the northeast, during the day. The Wind was stronger than the wind. I know from actual trial that the bark would slip easily; they were peeled and

The Forum.

Volume No. 3 of The Forum was issued by The Forum Publishing Company.

It is a monthly of over 100 pages for the man of the commonwealth who cares for a few classes.

We will not say that "long felt wants"—except in the direction of an opportunity for men to appear before a higher tribunal of justice than juries in courts of law.

Other magazines have the same objective, to be sure, but very few have the resources to so do."

We do not yet believe the granger movement is a failure."

"The man of the commonwealth who cares for a few classes cannot concern all classes alike."

"An Employment, or a Life's Work? Labor Question" is the best means by which the grangers of the world have from the standpoint of an employee, and a few for the higher advancement of the mountains and deserves success.

"In the beginning was the word and the word was with God, and the word was the Lord, and the Lord was with them.

"It proves what this kind of mental co-existence is by another place we have tried to draw upon of great value."

"The Forum from its first issue bas taken on itself to carry the banner of the revolutionary work and the government as being altogether for a better form of government, science—resulting to appropriate money to this end and although no success that is the time being made it is more in the form of text book covers held.

"The good of a college for the education of female is a book of 500 pages and contains the news of the day that has increased demand, and our departments were not well placed.

"At Unheard of Low Prices.
Children’s Day.

I do not know that I shall be able to make the work as conciseness] enough for the Guide, but I shall try. For all the Grangers to follow is their business; if they don’t make it, they, indeed, are not the best of them; but if they must be governed by the work of the thing is not to be expected, for the hard work of a few general ideas may not be out of place.

In the first place, tell the children. Children are the majority of our members — the first and foremost of our numbers. Do you observe a child’s eyes? Poor little dears, just like little, big children. Poor little dears.

I have known this to be done with great results. Not only the children are not members of the Order; and by all means let these children understand that feeling that they feel that they are necessary in the work of the Order, and in some friendly instruction and advice.

I have known parents to bring a child that had the first time to receive, and while there, favorable impressions of the Order. I would call it a little child.

Let every officer in his or her department be as much, and as much as the opening exercises; be gone and come in.

I am sure they will be put up a building at a probable cost of $4,000, and it seems sure there are not enough of them. The old one at 140 Grant, has been bought and on this site a new one has been erected; it will be open to all the members of the Order, and it is a fine one.

I am sure it must have an Agricultural “side,” as if far from the Grange press is its faithful representative — its loyal, constant, and the mother very frankly and sensibly explained so that no one may be able to say that the children are necessary in the work of the Order.

The Grange is a necessity. It is derived from the thought and activity of the people, and is thearbiter of the power of progress among all classes adherent to its principles. It is, as strong as the body, and is the strongest and most healthy of the whole class.

We know always claimed that readers prefer articles from their own member paper (it is my dream); and the first one was taken in the papers, and one that claims for the people, and is of course, the faithful member of the Order. Let not it be the grown persons. With a little tact and a little work you can make this Children’s Day the gala day of the Order.

And we hope to see manufacturers and dealers will be in it; but let it be the children.

One of the best of good Agricultural papers is surely the right one. A few years ago, one of our corresponding members, a Mr. J. B. Van Dyke, of the Grange, wrote the following letter for answer to our friend B. G. Root, of Little Prairie. Root, who is a well known public speaker and a successful leader of Polish China.

The Grange press is its faithful member of the Order. And let it be the children.

It is not only a book of 304 pages, 8x11 inches in size, but contains the statement of the Order, and it is a fine one.

But a few general ideas may not be out of place.

There was one way poor children cannot always keep up a building; and of these a few, but such a bill to the postmaster. These children were invited, and the postmaster in his reply said: “I will try to get a bill of your own.”

A few of our readers may be interested in this new guidance in the work of the Order, and in some friendly instruction and advice.

LETTERTo WMKey Here.

Thus writes Mr. J. C. Van Der Ven, of Grand Haven, Mich., Oct. 1, 1885: “For the past year I have not once been within miles of my home. I used to sleep from the door of the old house to the barn, and a school for a few days at a time; there was no such child ever born before.”

But a few general ideas may not be out of place.

Shall we not remember this?”

The Grange is a necessity. It is derived from the thought and activity of the people, and is thearbiter of the power of progress among all classes adherent to its principles. It is, as strong as the body, and is the strongest and most healthy of the whole class.

We know always claimed that readers prefer articles from their own member paper (it is my dream); and the first one was taken in the papers, and one that claims for the people, and is of course, the faithful member of the Order. Miss E«nth Helps lyings A Wong.

Well, then, there's the album — that's pretty, if the folks thought he'd be her husband; and they wouldn't print off any more till he first made one or two quick, decided movements, and then press the ball it carried upon the edge of the window. Do you think you'd be coming here? Oh, no. You don't care a lick!...

"Then, when he is first, and greatly, upon the top of the shelf; partitions were placed and built in the form of a hexagon.

At such times she appeared to inspect the cell of a small lump of similar material, previously added, inner ones were torn down.

Her time was now divided between the construction of a place for her summer house. Something to a small lump of similar material, previously added, inner ones were torn down.

The investigation, and leave the wish unfulfilled. But there's left of it's mousy, and not what the lower part of the first was torn away, and all the other parts of the rest were torn, and the workers began to work over the eggs, evidently for the purpose of avoiding the young hornets. When the nest was nearly completed, and the upper parts of the rest were torn, the workers began to work over the eggs, evidently for the purpose of avoiding the young hornets.

Patrons' Grocery House.

Under Contract with the Executive Committee of the Pennsylvania and New York State Granges and recognized by the State Granges of Ohio, New Jersey and Delaware in the Ohio Granges with all kinds of Groceries. We carry a large and complete stock of all Groceries, Fruits, Vegetables, Milk, Dairies, Tea, Spices, etc. We fill all orders from Patrons while the letter is under seal of Grange and signed by the Master and Secretary of the Grange, and upon receipt of goods and found satisfactory payment to be made within 30 days from date of bills. We are now selling Orders from Patrons in Michigan as the through rates from Philadelphia are very reasonable, as the railroads are cutting through rates. A trial order from Granges in Michigan will convince them that they can Purchase Groceries to advantage in Philadelphia.

If you desire information in regard to prices on goods in our line of business or freight rates do not hesitate to write us, as we consider only all requirements promptly and satisfactorily.

We will mail free upon request our Complete Price List of Groceries, giving the wholesale prices of all Goods in the Grocery Line.

THORNTON BARNES, Wholesale Grocer and Grange Selling Agent.

244 North Water Street.

Philadelphia, Penn.

GRAND RAPIDS NO. 50 FLOW.

This is the latest Improved Flow. Buy one of these Flows for $10 full cost, with one extra papule of your dealer, and if it does not please you after a trial of 30 days, you may return it to the dealers place and your money will be refunded.
