Michigan Grange Crop Report for December, 1886.

For this report returns have been received from 351 townships in the southern counties, and 112 in the northern counties. The total number of bushels of wheat recorded in the counties in the southern tier of counties for the month of December, is 6,125,754, which is 1,623,865 less than the returns of the previous month. In the northern counties the returns are from 373 townships, the total number of bushels recorded is 6,367,103, which is about 40,000 less than the previous month.

The condition of wheat in the southern four counties is fair in the south, but it is below standard in the north. The weather has been favorable for the growth of wheat in the southern counties, but there has been a late fall in the north. The farmer who has the wheat ready for the market will realize more from it than those who have had nothing ready to sell for the last month. The condition of the crop is such that it is not possible to give a general report on it, but we think the farm crops are the best in years.

MENTIONED in the proceedings of the regular meeting held at the Fremont Grange, No. 71, for the morning session on Sunday, January 2, 1887, at 10 o'clock A.M., the President, Mr. W. T. the most important things to do, that no man could do what he proposes to do, and that he would have to rely on the advice of others to get it done.

I therefore suggest that we adopt the following resolution:

Resolved, That we recommend to the Legislature of this State the passage of a law providing for the appointment of a State Board of Education, composed of five members: one from each geographical division of the State, with power to appoint and remove their own officers, and with authority to make all necessary rules and regulations for the government and management of the public schools of the State. This Board should have the power to prescribe the textbooks and other materials to be used in the schools, and to fix the salary of the teachers. It should also have the power to investigate the condition of the schools and the needs of the pupils, and to make such recommendations as it may deem necessary for the improvement of the educational system of the State.
The Value of Aromas as Food

It is generally understood by farmers that the smell of the pasture affects the quality of their produce. Charles Marryat, in his book "The Smell," states that "the odor of the pasture is the first consideration when it comes to the choice of food."

But what your value is compared to others, and the aromas available have a value, it is not so generally understood. The Value of Aromas as Food

The following is the result of the excellent work of "M. Thoreau" on the "Feeding of Aromas."

We say, make every possible offer, and let your own work, and let an independent people as far as we can. —E. S. "The Best Food.

The world moves. Years ago the
visitor began to urge the farmers of
Michigan to adopt the Order of
Grangers, or something resembling it,
for some of their own independence,
some regard for their own interests,

We believe, go far in establishing the Order and from the influence it was able to make the cost chargeable to the State has been adverted to by the Worthy Patron of the State.

Their local paper is renewed either because it is not still ordered stopped or they are called on by the publishers of other interested party, and so of their city, and this process of regulating the book look after its renewal. It is well to remember this when we deal with questions of insurance.

One of the vital questions before us is, "How can the prosperity of the Order be increased?" The Order is stronger today than its numerical membership can be varied. It is not equal to its contemporaries of the past. The Order is weakened by the absence of strong and active members.

The machinery of our organization is a powerful one. It is capable of producing great results. Its efficiency, however, depends upon the active and intelligent participation of the members. The machinery works best when it is used.

The General Council of the Grange at its annual meeting in the spring of the year, held at the State Grange Hall in Philadelphia, is responsible for the conduct of the Order in the State. The General Council is composed of the President, the Vice-President, the Secretary, the Treasurer, and the District Secretaries. It is the duty of the General Council to represent the State at the annual meeting of the National Grange, and to act as the executive body of the State Grange.

Under Contract with the Executive Committee of the Pennsylvania and New York State Granges and recognized by the State Granges of Ohio, New Jersey and Delaware to furnish Granges with all kinds of Groceries. We carry a large and complete stock of all Groceries, Sugar, Syrups, Molasses, Coffees, Teas, Syrups, Etc. We fill all orders from Patrons when the order is under Seal of Grange and signed by the Master and Secretary of the Grange, and upon receipt of Groceries and found satisfactory payment to be made within 90 days from date of bill. We are now filling Orders from Patrons in Michigan as the through rates from Philadelphia are very reasonable, as Patrons may easily be familiarized with the fact that Granges in Work will convince them that they can Purchase Groceries to advantage in Philadelphia. 

If you desire information is rigged to write us on any good in use at lower prices write for our new catalogue and we will endeavor to answer all inquiries promptly and satisfactorily.

We will mail upon request our Complete Price List of Groceries, giving the wholesale prices of all Goods in the Grocery Line.

The Guide

We leave the Buyers’ Guide in March and September of each year. a year's subscription, 12.50, enables one to secure complete information in the Guide. It describes, illustrates and gives the price of nearly all the articles in a catalogue, and lists the goods in the various departments of stores in the city and in the country. The Guide is a ready reference for the wholesale business, and is an indispensable tool in the hands of the Grocer. The Guide is a valuable addition to the stock of the Grocer's desk, and a necessary aid to the successful conduct of his business.

It seems like a hundred years ago.

Their ovens they with baked meats choke,

Amid the affections which grow green and strong.

I want a heart,—will you give it me,

Nor wear them, either, upon our sleeve;

We're very much older and wiser now.

Almost herev By the time this reaches

Wish peace to the world, unto all men good.

Mould into little balls and put in sugar and leave it to boil ten minutes without closing or they will get brown and lose flavor.

Pour on buttered tifts and when nearly cold cut them in shapes if you please.

This must be dig off for the benefit of the plants.

BECAUSE.

1. Grange Reading is requisite to that sturdy development that should characterize the life of an agriculturist.

2. The Grange Versus is the organ of the Michigan State Grange. As a Patron I am by duty bound to its support. As a Farmer, loyal to my calling, I need its support. It has been termed, "Our strong right arm," and another has said, "It lights our battle."

3. In its honest effort to promote the best interests of the Order it is still the farmer's paper whether he is in the Grange or not. The farm is all there is for him. The sick, the waste and worn-out land, the unprincipled and unscrupulous suggestions. The literary columns are regularly contributed to by racy penmen, well read writers. The ladies' page has been the field of many spiritual and genital contests, and, in its way, has staunchly helped its constituents to their honored places among workers for a higher and nobler standard of man and womanhood.

The miscellaneous matter is selected with the highest good of the home in view. Its advertisers are reliable. The Postal department has a liberal patronage from all classes of readers, and vigorously maintains its catholic spirit and popularity.

The editorial department seeks to candidly express its unbiased opinion on whatever topics the good of the Order and the interests of agriculture at large seem to demand.

4. It takes but Fifty Cents to pay for one copy every year. I can subscribe for it and get my neighbor to take it, also, for what either of us often spend on one-fourth as much reading matter.
