The Farmer Is of More Consequence Than the Farm, and Should Be First Improved.

THE FARMER IS OF MORE CONSEQUENCE THAN THE FARM, AND SHOULD BE FIRST IMPROVED.

THE next meeting of the Executive Committee of the Michigan State Grange will be held at the Hotel in the city of Lansing, on the 10th day of November next, for the reception of the delegates of the annual convention of Subordinate Granges held at Lansing. It is hoped that all Subordinate Granges will send their representatives to the convention, that such delegates may be thoroughly acquainted with the facts of the case, and will have given the matter much thought before they arrive, so that the convention may be conducted in an orderly manner, and without much discussion.

Our Flag floats in all seas and is recognized by all nations. It is a symbol of peace and prosperity, and we may look forward to the day when it will be a symbol of freedom and equality.

The following resolutions were adopted by the Convention of the South Carolina Grange, held at Columbia, October 8th, 1877:

Resolved, That the South Carolina Grange does not recognize as a member of the Grand National Organization, the Southern States of Georgia, Florida, Alabama, and Mississippi.

Resolved, That the delegates from the South Carolina Grange, at the Grand National Convention, be empowered to make a proposition to the Grand National Convention, for the purpose of establishing a separate organization for the Southern States, with a separate constitution and by-laws, and for the purpose of securing the passage of the proper legislation in the Congress and the State Legislatures, to facilitate the organization of a separate Grange in the Southern States.

Resolved, That the delegates from the South Carolina Grange be instructed to make a full report of the condition of the Grange in South Carolina, and the measures which have been taken to improve it, to the Grand National Convention, and that the same be printed and circulated.

Resolved, That the delegate from South Carolina be instructed to make a full report of the condition of the Grange in South Carolina, and the measures which have been taken to improve it, to the Grand National Convention, and that the same be printed and circulated.

Resolved, That the Grand National Convention be asked to consider the question of a separate organization for the Southern States, and to make a recommendation to the Congress and the State Legislatures, for the purpose of establishing such an organization.

Resolved, That the delegates from the South Carolina Grange be instructed to make a full report of the condition of the Grange in South Carolina, and the measures which have been taken to improve it, to the Grand National Convention, and that the same be printed and circulated.

Resolved, That the Grand National Convention be asked to consider the question of a separate organization for the Southern States, and to make a recommendation to the Congress and the State Legislatures, for the purpose of establishing such an organization.

Resolved, That the delegates from the South Carolina Grange be instructed to make a full report of the condition of the Grange in South Carolina, and the measures which have been taken to improve it, to the Grand National Convention, and that the same be printed and circulated.

Resolved, That the Grand National Convention be asked to consider the question of a separate organization for the Southern States, and to make a recommendation to the Congress and the State Legislatures, for the purpose of establishing such an organization.

Resolved, That the delegates from the South Carolina Grange be instructed to make a full report of the condition of the Grange in South Carolina, and the measures which have been taken to improve it, to the Grand National Convention, and that the same be printed and circulated.

Resolved, That the Grand National Convention be asked to consider the question of a separate organization for the Southern States, and to make a recommendation to the Congress and the State Legislatures, for the purpose of establishing such an organization.

Resolved, That the delegates from the South Carolina Grange be instructed to make a full report of the condition of the Grange in South Carolina, and the measures which have been taken to improve it, to the Grand National Convention, and that the same be printed and circulated.

To Advertisers.

All persons desiring to advertise in the GRANGE VISOR, should send J. B. Hamilton, 11 Jackson Street, Battle Creek, Mich., or a register letter. If you write the word "register" on the face of your letter, it will be registered for you.

We have arranged with Messrs. J. B. Hamilton and R. C. Allaire, to have all subscriptions and advertising for the Michigan Farmer, sent to them. All subscriptions and advertising which are sent to us will be returned.

To Subscribers and Correspondents.

•... every number of the paper for the time paid

The stock men were on hand with the usual friendly greeting, and the usual amount of knowledge about the various animals on exhibit. The sheep-pens were well filled with sheep, and the men were busy with their shears. The sheep were in good condition, and the men were happy to give information about the various breeds. At the same time, they were busy with their shears, cutting the wool from the sheep.

One fine pyramidal, Mrs. Reeds, always a favorite, added some color to the display. Mrs. Reeds is a favorite with the judges, and always draws a crowd. She was in fine condition, and the judge was pleased with her.

C. E. Eggle, a fruit grower of Warsaw, noted the exhibit of Mrs. Reeds, and said she was a favorite with the judges. The judge was pleased with her, and said she was a fine example of Mrs. Reeds. Mrs. Reeds is always a favorite, and always draws a crowd. She was in fine condition, and the judge was pleased with her.

A Very Convenient Little Device.

Interesting About Some of the Tricks in the Construction of the State A Vermont Proof Well.

The use of impotence is the subject of much discussion among farmers. It is said that said impotence is the cause of the close proximity of the water in the well, and that the affairs of said water is absolutely polluted, in a manner in which this can exist, but, on the contrary, we are inclined to believe that the water is perfectly pure, and that the affairs of said water are absolutely not polluted, in a manner in which this can exist.

The Country's Chief Crop. There is a great deal of uncertainty in the view of some of the principal crops of the country. It is the opinion of some that the crops of corn and wheat will not be satisfactory, while others believe that the crops of potatoes and hay will be above average. The question is one of great importance, and the decision will be made in the spring, by greatly facilitating the inser-

It is the opinion of some that the crops of corn and wheat will not be satisfactory, while others believe that the crops of potatoes and hay will be above average. The question is one of great importance, and the decision will be made in the spring, by greatly facilitating the inser-

For Those Who Are @ in Water. It is the opinion of some that the crops of corn and wheat will not be satisfactory, while others believe that the crops of potatoes and hay will be above average. The question is one of great importance, and the decision will be made in the spring, by greatly facilitating the inser-

One small fact is this: The water in the well is not impotent, but is actually quite potent, and the affairs of said water are absolutely not polluted, in a manner in which this can exist.

The Country's Chief Crop. There is a great deal of uncertainty in the view of some of the principal crops of the country. It is the opinion of some that the crops of corn and wheat will not be satisfactory, while others believe that the crops of potatoes and hay will be above average. The question is one of great importance, and the decision will be made in the spring, by greatly facilitating the inser-

We clip from the Husbandman of Illinois, which contains the following paragraph: "The average yield of sorghum per acre is said to be 50 per cent, of its weight in sugar. The sugar is all in the barrels from the Florida factory (Parkinson Sugar Works) turning out 200 pounds of sugar per ton of cane from the first run, and it is certain that twenty pounds of sugar to the ton."
