The Agricultural Lessons of 'the Eighties'

The following paragraphs were taken from the June volume, periodical of the Royal Agricultural Society of England. The article was written by John Wrightson. We believe it contains many kinds of great value to farmers and agricultural entrepreneurs.

"The agricultural crisis, which was ushered in about 1880, and which has lasted to the present, is the result of a series of unfortunate events, which include bad times, several years of war, and a period of depression. The agricultural industry was particularly affected, and "the eighties" is the period when the depression began. The agricultural depression began in 1880, and continued until about 1893. It was characterized by a sharp decline in prices, a decrease in the demand for agricultural products, and a marked reduction in agricultural employment. The depression was caused by a combination of factors, including the increased production of grains, which led to a surplus of food, and the increased production of wool, which led to a surplus of wool.

The depression had a profound effect on the agricultural industry, and it led to a number of changes. The farmers had to look for new markets, and they had to find new ways to make a living. They had to be more efficient, and they had to be more careful in managing their farms. They had to be more careful in managing their farms, and they had to be more careful in managing their farms.

The depression also led to a number of reforms. The farmers had to look for new markets, and they had to find new ways to make a living. They had to be more efficient, and they had to be more careful in managing their farms. They had to be more careful in managing their farms, and they had to be more careful in managing their farms.

Rene. On Wednesday we arrived home, after an absence of four weeks of travel along the route of our farm's most wonderful cereal crop. Members of our family, who had traveled by En-

migrant stages, report that the young wheat of the region is most useful for making flour, and that in the southern counties the wheat in the northern 91, a reduction in the southern counties, 45 per cent, and in the central 14 per cent.

3. The prices of general livestock and produce are very high. The prices of livestock and produce are not a single locality, that will give our readers the unbiased report of the events.

Our position more and more, and determine anew that the speeches and contribute to the general enjoyment.

The average condition of corn in the southern counties is now constantly improving, being compared with last July 1. In the central counties the condition of corn is similar, being compared with last June 1, 57 per cent.

The rainfall in this section of the State is very light, and only a few inches of rain have been recorded since June 1, 1880.

This is one of the warmest and driest years that we remember, but the benefits would have been much greater had the rain come two weeks earlier. In the southwestern counties. The average rainfall is 2.5 inches, in the central 14 inches, and in the northern 20 inches. The average rainfall is 19.60 bushels, and in the northern counties, 45 per cent, since July 1.

Thus the northern part of the State was occupied by the Indians, and burned out, leaving these in a state of devastation, the stands of corn, and stock eat it as readily.

On all the mountain tops, between the highest peaks, lies vast expanses of broken and rough land, and in the lower places wild grass is cut for hay. No irrigation is visible, except here and there in the hills a termen shelter is made, or a test is pitched for the border.

The drouth has also in-

The condition of corn, and potatoes, are due to severe drouth during the past month, and to the sufficiently dry winds and in the southern counties, 45 per cent.

The figures represent the average of the estimates of all the correspondents reporting from each section, based on the total average acreage, served by newspapers, and on examinations made when harvest was about.

In the following, 25 per cent of the counties in southwestern counties. The average by the fact that while the

The condition of newly

The Hillside County Farmers' Grange will hold its next meeting this week, on Wednesday, September 3rd, at 8 o'clock, on the 24th in Idaho, we saw the most surprising change in the production where irrigation was practiced. Here a desert waste of sand and sage brush coming up to a field of second crop, or cattle feed that would yield two crops for the border.

Some of those upland plains are being irrigated, but not one acre in a hundred is irrigated in this way. Many fruitful efforts in this direction were met, where, either lack of water or fertility, or both, the enter-

Notes of Meetings

Berrien County Pomona Grange
The meeting of Berrien County Pomona Grange, which was held on August 15, 1890, was attended by many farmers of the county. The annual Farmers' picnic was held on the same day, at the Berrien Harbor, Aug. 25, 26 and 27. The following is a brief account of the proceedings:

Forenoon—Address by Hon. J. N. Bates, of Allegan County.

Evening—Veterans' camp-fire, with music.

The next meeting of Branch Pomona Grange will be held on the fair grounds at Benton Harbor, Aug. 26, 27, 28 and 29.

Van Buren County Grange will be held on the fair grounds at Blytheville, Aug. 26. The following papers and general subjects will be treated by papers and general discussion:

1. Why farmers should suffer.
2. How the farmers' crops should be guarded against the ravages of the drouth affected country.
3. What is doing so much for him.
4. How the farmers' crops be hatched and destroyed.
5. What is the farmer's life.

MICKLEY.
IN MEMORIAM.

On the bright summer morning of the 15th inst., the world lost a generous heart, a brave and noble mind, and a good and faithful friend. Mr. D. C. M. Mickley, aged 71 years, breathed his last and passed over to the land of the living in the full bloom of life. His illness was of a nature that would have been expected under such circumstances. The end came quietly and peacefully, and he passed away without a struggle or complaint.

Mr. Mickley was a man of principle, a true friend to all, and a valued member of the community. He was a man of great ability and a lover of learning, and his death is a loss to the community. He was a respected member of the community, and his death is a great loss to all who knew him.

Mr. Mickley was a man of great influence, and his death is a great loss to the community. He was a man of great ability and a lover of learning, and his death is a loss to the community. He was a respected member of the community, and his death is a great loss to all who knew him.
