A stock of every kind, it is well supplied, so that when they have finished their work, and have the right thinking. The mechanical instructors, instead of some merchants, some lawyers, some workmen, some others, have the right thinking. And there is a demand for a thoroughly trained brain to the train-
Field and Stock.

STRAW BERRY GROWING.
Bill Carter, of Satteetown.

T. L. COPE.

This question has been long and even yet is considered an open one in a good many places. The size of the fruit is largely in favor of the latter, if we look at the size from the standpoint of produce, but the fruit that is of the best size will not be the one which is the most productive of fruit. The strawberries are now in demand, and it is the best time to plant them for the fruit which ripens late in the season.

For the present, I believe that the margin of the fruit is not in favor of the larger size. To say the least, I have no evidence to show that the larger size is more productive of fruit. It may be, however, that the larger size is more productive of fruit, but I have no evidence to show that the larger size is more productive of fruit.

As a step toward a solution of the question, I would like to say that it is my opinion that the larger size is not more productive of fruit. It may be, however, that the larger size is more productive of fruit, but I have no evidence to show that the larger size is more productive of fruit.

The following are the results of experiments made in a few of the most promising cases:

(128 varieties only twenty years old; all these results are for the following year, and were obtained by the following spring to make for winter)

The following are the results of experiments made in a few of the most promising cases:

1. Every one must see, without any doubt, that surplus products of grain can be marketed, and that it is not necessary to have the grain graded in order to sell it.

2. Grades must be established in each market where the grain is sold, and that the grain must be graded according to the established grades.

3. The best plan we can recommend is to use a system of grading that is not only simple, but also fair to all parties concerned.

4. The best plan we can recommend is to use a system of grading that is not only simple, but also fair to all parties concerned.

5. The best plan we can recommend is to use a system of grading that is not only simple, but also fair to all parties concerned.

While, in both cases the plant was green, the color of the leaves was no means highly managed, no septa or barren fruits being produced, and the flowers were not less numerous, and much more regularly fertilized, than will be the case in the following year.

EVAPORATING FRUIT.
L. L. BRENN.

It would be impossible for me to treat the subject fully in the time allowed, but I shall try to give a general view of the subject, and to point out the principal considerations which should be taken into account in the selection of a site for an evaporator. The first consideration is the cost of the evaporator, which should be as low as possible. The second consideration is the cost of the labor, which should be as low as possible. The third consideration is the cost of the water, which should be as low as possible. The fourth consideration is the cost of the fuel, which should be as low as possible. The fifth consideration is the cost of the labor, which should be as low as possible. The sixth consideration is the cost of the labor, which should be as low as possible. The seventh consideration is the cost of the labor, which should be as low as possible. The eighth consideration is the cost of the labor, which should be as low as possible. The ninth consideration is the cost of the labor, which should be as low as possible. The tenth consideration is the cost of the labor, which should be as low as possible.
Death has removed from Silver Lake Co., No. 624, Rev. G. H. Whitelock.

Bo. O. G. White, of Allegan Grand, has been called to his reward. He died aged 27 years. He was a charter member.

Bo. Joseph E. Rice, of Master Lodge, and for many years Treasurer of the same, has been called to his reward. He suffered a sun stroke July 15th and died July 16th. He leaves a wife and four children.

Stephen Doctor Bolding, known familiarly as "Scan," died at North Star July 11th. He was a member of Grand Grange No. 291, served 3 years in Co. "B" 1st Mich. Light Artillery, and was one of the most faithful of the farmers.

THE GRANGE AND THE TARIFF.

The position of the Grange so far as the national tariff and the mode of levying the same is concerned, is not high or low tariff, free or protection. The position is that which results from his investment of labor and capital, or the profit that he has made. Whether he has a raw material, or whether he is a manufacturer of finished products. He has no interest in the protection or destruction of the so-called "free raw materials." He asks high tariff on the raw material, at the same time that he has been trying to amend the tariff laws, for the benefit of farmers in the whole bill was given to the manufacturers.

The following committees have been appointed for the next session of the National Grange:--

Agriculture—

Finance—

E. M. Hall, M. Statesir, Mrs. Statesir, Mrs. E. R. Russell.

Mileage and Per Diem—

J. D. Clardy, James A. Bull, Mrs. J. Statesir, Mrs. E. R. Russell.

Transportation—

Pensions—

C. H. Knott, chairman; Elmer D. Howe, Hiram Hawksworth, J. W. Davis, Geo. M. Hall.

Resolution—

Sister E. It. Williams,—reported favorably.

Judge T. A. N. V. Goodding, chairman; Mrs. J. T. Sturgeon, Mrs. J. T. Sturgeon.

This is the position of the farmers, that the burden of the tariff may be equally divided on all who must, for some years to come, support the same; that the measure be brought into our common laws, and be applied and secured; but that the farmers take no stand one way or another.

FRAUDULENTLY SIGNED.

THE NATIONAL GRANGE.

OFFICE OF MASTER THE NATIONAL GRANGE, P. O. H. J. REID.

Fitch, July 3, 1889.

The following committees have been appointed for the next session of the National Grange:

Agriculture—

Finance—

E. M. Hall, M. Statesir, Mrs. Statesir, Mrs. E. R. Russell.

Mileage and Per Diem—

Transportation—

Pensions—

C. H. Knott, chairman; Elmer D. Howe, Hiram Hawksworth, J. W. Davis, Geo. M. Hall.

Resolution—

Sister E. It. Williams,—reported favorably.

Judge T. A. N. V. Goodding, chairman; Mrs. J. T. Sturgeon, Mrs. J. T. Sturgeon.

It has occurred to me that the investment and loan association, as we have been called, has never focused the attention of the farmers. It has never been brought to the attention of the farmers. It is, however, as important as any other association, and has never been brought under the consideration of the farmers. It has never been brought to the attention of the farmers.

The building and loan association, as we have been called, is the most important association, and has never been brought to the attention of the farmers. It is, however, as important as any other association, and has never been brought under the consideration of the farmers.

The building and loan association, as we have been called, is the most important association, and has never been brought to the attention of the farmers. It is, however, as important as any other association, and has never been brought under the consideration of the farmers.

THE STATE FAIR.

Numerous addresses and resolutions come to the Secretary of the Fair from live stock breeders of the State, and the general sentiment is that the fair promises to be a large one. This is not to be wondered at, as with the Lansing bicycling club for exhibition races during the Fair of 1891, a fair of the Fair at a large number of the best riders from all over the State and Chicago and elsewhere.

ONE WAY TO ABSTRACTION:

"Had Andrew Carnegie, Mr. Henry L. Ford, and Mr. Henry Yoorheis of Traverse City, and Mr. Whittaker of this city, not only advertised our Grange, but made it not only worth while to appear in the shows, but to get it here by August 6, please, mark my words, in the Brayton & Co., Lc., with a special request to publish in the issue mentioned.

Jennie Buell, State Secretary of Grange No. 62.

Say, aren’t you going to Bay View? What? Not going? What! Don’t you know that if you do not join the 90,000 others, that it will be you "lola" of gloom? Don’t you know that you are not a better man, a better citizen, a you better farmer for going? And then don’t you think that the lind woman might enjoy it? Hans’ has had such a trip since the Harvard Union. Pshaw! isn’t your best rains now, please?

Tell you what, am going to companies and put in for you.

Jennie Buell.

August 1, 1892.

Don’t you think we are a good prophet? You remember we said in the early days that the Grange would have a great path thus videously re- called. And here is the lesson of the present day, or the future, the need of the day, the need of the Grange.

Grange industrial organization is imperative, the worst men realize it, and seek to establish it, the better cooperation, communism, socialism, and other theories, have their advocates. The whole master work, without connection. The attention of the largest segment of the laboring population must be turned to this question, and the workingman must yet understand each other. Why does the question exist? Because the facts and not with less important while the brawn of the children. When we have a religious admission to present its claim.

A PROMISE REALIZED.

We quote the following from a daily paper of July 2:

Robert G. Don & Company’s Weekly Review of Trade says: A fiscal revolution has swept in the middle of the country, in volume of wholesale andof dollars of exchanges, or in other words, the trade has just started. The imports for the year have been in excess of the exports from the New York in June last year by $53,000,000, and if this be continued, the total for the year has been about $1,200,000,000, and on this basis the country has been in the largest in any year in the last 25 years. The export has been in excess of the import in known in that month, extending last year at the close of the whole year the largest export of all years for the half year have been about $20,000,000, in excess of the export for the half year has been about 7 for the whole year, and in excess of the advance for the half year has been about 7.

SHOULD THE WORLDS FAIR BE CLOSED?

This question is one that until very recently has not been a debatable one, and that the world has been waiting for an answer. The question is whether the world's fair, which has been under discussion for many years, is of sufficient importance to warrant the expenditure of the immense capital required for its establishment.

The opponents of the fair, on the other hand, argue that the expenditure of such a large sum of money for a temporary structure is not only a waste of resources but that it will have a harmful effect upon the moral and educational progress of the nation.

In conclusion, it is evident that the question of whether the world's fair should be closed is a complex one, involving considerations of both national and international importance. It is a question that can only be answered after a thorough examination of the evidence presented on both sides.
THE HARP OF CALLEDONIA.

The National Grange, at its winter session, recently held at Chicago, adopted a resolution appropriately denominated "A Circular from the National Committee on Work in the Grange," which is to be used in the execution of the objects of the Order of Patrons of Husbandry, in the city of Washington. This sum to be available for the further support of the Grange, and shall have been raised by voluntary contributions.

OBJECT OF THE TREATY.

The object of the Grange of the city of Washington is to have a house, in which each member may engage, in order that it may be done with satisfaction, and with a view to the best possible results. The purpose of the treaty is to provide a house, suitable and commodious for the Grange, and is to be used by the members of the Order of Patrons of Husbandry, in the city of Washington. This house shall be used for the purpose of providing a place of meeting for the members of the Order, and for the purpose of promoting the objects of the Order.

The loss here has been in a 10-fold increase of the Atlantic states in corn and in the Pacific states in wheat. The average amount of wheat produced in the states of Oregon, Washington, and Idaho during the past year has been estimated at 10,169,010 bushels, valued at $29,345,000.

The prices for the year 1902 were about 51 cents per bushel.

The concern about the high cost of living and the economic fluctuations is legitimate and important.

The next Pomona will be held

Open Session 1:30 P. M.

The programme for the 12th Annual Session of the Pomona of the National Grange, to be held at the New Market Grange Hall, County Pomona Grange, No. 1, Fremont, Ohio, and the date of the meeting has been changed to Friday and Saturday, August 6th and 7th. The following is the programme:

The meeting will open with the usual business of the society, including the admission of new members and the election of officers. The evening session will consist of a series of lectures and discussions on various topics of interest to the members, including agriculture, horticulture, and politics. The closing business of the meeting will be the election of officers for the ensuing year.

The general manager of the Pomona is Mr. J. H. Brigham, Master of the County Pomona Grange, No. 11, Fremont, Ohio. The Pomona of the National Grange is one of the largest and most active in the state, and is recognized as an important institution in the development of rural life and agriculture.

The Pomona of the National Grange is a voluntary association of farmers and rural dwellers, formed for the purpose of promoting agriculture, horticulture, and rural improvement. It is an important institution in the development of rural life and agriculture, and is recognized as one of the largest and most active in the state.

The Pomona of the National Grange is held annually in various parts of the state, and is attended by a large number of farmers and rural dwellers. It is an important event in the rural calendar, and is recognized as one of the largest and most active in the state.
