Union Opera Cast Returns From Tour; To Open Here Friday

Mammoth Convocation Scheduled For Tomorrow

TO RECOGNIZE FOUNDERS' DAY AT ALL-COLLEGE CONVOCATION; GOVERNOR BRUCKER TO SPEAK

Program Is Planned to Amplify Traditional Military Ceremonies; Sphinx to Designate Initiates; Will Honor Faculty Members Who Have Passed 40th Year of Service.

FOUNDERS' DAY will be commemorated Wednesday, May 13, at the new drill field in a program which is planned for this campus. Following the traditional military parade, Governor William M. Brucker will address the assembled cadets and other students from the steps of the new building of Demonstration hall as the featured speaker of the convocation program. It is expected that the governor's words may be heard by all members of the campus.

HOLD JUDGING TEAM BANQUET

One Hundred Seventy-five Attend Third Annual Dinner.

The third annual food and drink judging team banquet was held at the Union Hotel on Monday, May 11. Approximately 175 members of the judging teams from various Michigan State colleges and universities, including Michigan State University, Eastern Michigan University, Western Michigan University, Central Michigan University, Ferris State University, and Michigan Agricultural Experiment Station, were present for the banquet. The banquet was held in the new dining hall of the Union Hotel and was a most successful affair.

OUR ANNIVERSARY

Tomorrow Michigan State will be seventy-four years old. It was in 1857 on this day that the college was formally dedicated, making it the first state institution in the United States to offer instruction in scientific and practical agriculture.

The school really had its beginning during the previous year. At that time contracts were let for the erection of a building known as College Hall at a spot in the wilderness three miles east of Lansing, then only a tiny clearing in the woods, "Saints Rest," the companion building, was the first dormitory and boarding house. Such was the humble beginning of our honored institution.

Since that time great strides have been taken, unbelievable expansions have been made, and many improvements added. The college has consistently forged ahead until now it ranks near the top among the leading schools of the country.

Now, what of the future? Up until a very few years ago, Michigan State has been extremely busy "catching up" with the other colleges of its caliber. For many years, it seemed more or less backward. But due to admirable administration by our president, we are at last practically on a par with the best schools in the United States.

Only one thing remains to be accomplished to qualify Michigan State as one of the best, that being a class "A" rating from the American Association of Colleges and Universities and it is toward this end that the college is working at the present time. We hope that this last remaining step can be taken when the next Founders' Day is celebrated.

THURSDAY NOMINATIONS

Next Thursday the three lower classes will hold meetings for the purpose of nominating class officers to serve next year.

The attendance at nominating and eliminating meetings of the classes has always been poor. No one seems to take enough interest in putting forth the little effort required. Yet those who are never present at the primary caucuses are always the first to criticize the administrations of those candidates placed in office.

Why is it that so small a percentage of the student body takes the initiative in class activities? The majority are content to sit back and watch a few individuals handle entirely the interests that should be operated by the group as a whole. True, everyone cannot hold an office. But the purpose in choosing class leaders is to select the representatives whom you believe will serve most capably and honestly. How, then, are you to select such a representative unless everyone affected takes an active part? The only method offered is that of the class election.

Therefore, it should be the duty of every Michigan State student to: 1st, Attend the meeting of his class on nomination day, Thursday, and see that the man of his choice is named; 2nd, Be present at the following Thursday and support those who he honestly believes to be the best suited for office; and 3rd, Vote at the all-college elections the third Thursday for the most capable candidate.

"SQUIRREL FOOD"

Next Friday and Saturday the annual Union production will play for Michigan State students in the Eastern high school auditorium. Having had its initial showing in Grand Rapids during the past week, the play is now ready for the presentation to the college.

This will be the first all-state musical production ever staged here. Written, directed, and played solely by Michigan State talent, "Squirrel Food" bids fair to be enthusiastically received by the college audience.

It should be the duty of every student and faculty member who is imbued with the true Spartan spirit to honestly and faithfully support the opera. The very same spirit that is manifested at football games during the fall should bring every person to buy a ticket.

Last winter, the lack of support for the Wolverine threatened to sound the death knell for that production. Without the proper backing, no student managed activity can succeed. The very same situation faces the Union committees. Unless this year's production is financially successful, it will be the last.

Students, we came through on the Wolverine last winter. Let's do it again for the opera.

'Round About the Campanile

By O. L. Beckwith

Fresh-soph battles have started again although at present all is quiet on the Wells Hall front. The rain—Chess and checkers seem to be returning to popularity. The rain—That peculiar smell (or odor to be classified) of stale flowers that comes out of women's furnishing stores. The rain—The sorority house girls who kicked out their house number because their gentlemen friends liked her too well. The rain—The Union Opera's wonderful time at Grand Rapids. The rain—Our pitiable attempts to get something to eat Friday noon. The rain—A chip in a lumber jam. The rain—THE RAIN.

TO MY BELOVED

I could write lines
Traising your eyes, your hair,
Your lips, like ruddy wine,
Your smile, like sunny days,
Your face, like soft and rare,
Your hair, like dark and blue,
To denote words to any part
Of you.
At least to those it's proper to,
Such as lamp's arms, face smile.
Yet, when this I did,
I would have only sounding
phrases,
Pleasant to the ear and keeping
me,
All my love within their mazes,
But flattery, which worked on
Eve, is working still.
And since I could write lines I
think I will.

This is an example of the Shakespearean style. It is distinguished from the other types of sonnets in that you can put the rhymes almost anywhere which is a great help. The Shakespearean sonnet has never been popular and after this effort it is going to be even less so. The title of the poem should be taken in a general way and the more generally it is taken the happier we will be.

INCREDIBLE INTERVIEWS

This time it was with Secretary Halladay. "Hello, Herman," we said, entering his office.

"You're mixing me up with the last brother," said Mr. Halladay, severely.

"Oh, no," we said, "you look more alike. You've been recently setting yourself on his desk, haven't you?"

"My function," he said, "is to investigate and put into effect the plan of the Secretary. I am not a secretary myself."

"What's your function?" we asked, looking at him.

"My function," he said, "is to investigate and put into effect the plan of the Secretary. I am not a secretary myself."

"What's your function?" we asked, looking at him.

"My function," he said, "is to investigate and put into effect the plan of the Secretary. I am not a secretary myself."

"What's your function?" we asked, looking at him.

"My function," he said, "is to investigate and put into effect the plan of the Secretary. I am not a secretary myself."

"What's your function?" we asked, looking at him.

Pinetum and Botanical Gardens Result of Dr. Beal's Foresight

Beauty Spots Represent Years of Work by Former Instructor.

Dr. W. J. Beal, former instructor in botany at the college, has done much to endear him in the hearts of the faculty and student body alike.

Coming to this college from Harvard, he was one of the first men to introduce the laboratory method of teaching Botany in the middle west.

He was also one of the first instructors to use the microscope in the study of plants. Under his influence the present Botany building was built, though now the laboratory has been added to it.

His first project that won him recognition was his seed-viability experiment. This consisted of planting various weed seeds in glass bottles filled with sand and then burning the bottles in the ground.

The class of 1873 burned the bottles, and one was dug up every ten years and the growth and germination was studied and catalogued.

At the present there are results covering a period of fifty years. There are still eleven sets burned, enough to last a hundred and ten years if the ten-year interval is still continued between each digging.

Besides being the founder of that wonderful group of trees at Pinetum, he was also the founder of that popular sylvan retreat of the students, the Botanical Gardens. This was founded in 1879 by Dr. Beal in a very primitive way.

For a time it was laid along the banks of a little stream which ran across the campus and emptied into the Reservoir. This stream ran in front of Abbott Hill and caused the quite noticeable valley in front of the hall.

This stream was soon filled in and the elevation of the whole garden was raised. On the north bank where the lilac bushes are now, there used to be a botanical laboratory.

That burned down, however, and there is at present a stone marker that marks the site of the former building. There also used to be a trellis extending all along the north side of the bank built of boards and supported by poles.

Dr. Beal started this garden by planting wild flowers because the ground was moist and especially adapted for this use. He intended to have it a wild flower garden and gradually extended it to the east and north.

Its present shape is largely due to other men in various states send plants to him and often alumni would be interested and donate various specimens.

Soon the State board became interested in the garden and the plan was approved.

Robert Miller playing the part of an enthusiastic French detective, who exceeded the other in the production.

"Squirrel Food" was well liked with some dancing numbers, all of them snappy and pleasing to the eye. Margaret Lane, who had with her a few speaking lines, was one of the outstanding features of the show.

The show, which started well in Grand Rapids, was a tap dance that was snappy and entertaining. Beverly McKelvey, appeared twice in some dancing parts that were nothing less than hot.

One of the warm and most amusing who numbers of the entire show was the tap dance which was by Ken Ladouceur, a target set.

The "Ghost Dance" was a very dancing number composed of girls from the high school, and it was well liked and appreciated by the audience.

The Lesensky Sisters, attractive dancing crooners also pleased with a between act singing specialty.

It was the other game of the afternoon the S. A. E.'s welcomed the Trimbors by a score of 4-3. Reed was on the mound for the winners and turned in a good performance.

He collected eight strikeouts and scored three of his team's runs. Defense was good on both sides, and thrilling infield plays held down the score.

Batteries: P. Kappa Phi's Reed and Kivler; Phi Delta, Strub and Max Empire, Kasse.

In the other game of the afternoon the S. A. E.'s welcomed the Trimbors by a score of 9-2. It was the second victory of the week for the S. A. E.'s, and also Calahan's second victory. Calahan allowed only two hits and collected nine strikeouts.

interested in Beal's project and granted him a small sum of money to continue his work. He next added the fern bed, which is in the same place now as it was then. A pond was also built where the present one is, but this was smaller and not nearly as substantial.

There was a swampy stretch of land, and in the center an island. On this island Beal planted snags and poison ivy, so that people might see what they looked like but wouldn't be poisoned by them.

There was also a little artesian spring which used to flow into this swamp, but this had become powerless because the Lansing water system seriously affected it.

As the garden was attaining large proportions, he decided to plot it out into beds, having the various plant families in separate spots.

This is the way the garden is organized now, still labeled as Dr. Beal wished. The present caretaker is Mr. Chapman who is an expert in botanical garden care.

Thus, as we stroll along the grassy paths of this garden, admiring the flowers, birds, etc., we should think of the lovely past spot has had and the many tales it could tell if only we would let it.

Dr. Beal was here for about fifty years, attending fifty commencement ceremonies. He took a personal interest in the college and left undying monuments for us to enjoy.

Contemporary Campus Comment

What Price Fraternities?

—Green Daily—
A complete explanation of the financial obligations to be assumed by a student upon his joining a fraternity, if given at the time the student is pledged to the house, would greatly help the present difficulties in the housing system of the university.

Take the case of the average freshman coming to school. He is usually asked of his feet by the various houses and he is greatly struck by this opportunity of living with one of these groups. When he makes his choice he may ask what the house bills are, but it is entirely probable that he does not even do this.

If he is so businesslike as to inquire how much it will cost him to live in the house, he is assured that the bill is no more than the average cost for room and board on the campus.

Few students are financially able to live in fraternities throughout their four years of college life, but according to the housing rules of the university, upper division students must have the approval of the housing secretary of the house in which they live.

How is liberation of religion brought about? It is a question of sufficient of a new and old religion in our country.

Upper division students who are not members of fraternities are permitted to live in any approved house. This is a privilege which is practically restricted to live in their respective houses during their college career. Often it is a matter of either being in the house or leaving school.

Of course, there are many points to be made from the standpoint of the house. They would be able to exist for only a very short space of time were it not for the upper division students allowed to live there. There is always a certain percentage of students who drop out of school and the burden of keeping the house on a sound financial basis has to be observed by the other members.

One point is this, however, if there were a thorough explanation of the financial obligations to be imposed on men going into the house, they would be more likely to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

It is a matter of being able to see the light. It is a matter of being able to see the light. It is a matter of being able to see the light.

Scene from "Trader Horn" coming to the State Theater three days starting Sunday, May 17th

become the waterword of the generation. And any instructor, any course, or any aspect of life that liberalism becomes stagnant in the quiet pool of complacency.

Because religion has avoided the swift rushing currents of liberalism by the traditional dam of past customs, it has become a useless thing in the lives of many students and others of this liberal generation. But leaders of religious thought such as Rabbi Isserman of Temple Israel, St. Louis, who speaks at the University auditorium Sunday night, are riding the waves of contemporary thought, and following such leaders, students are finding religion to be a vital and necessary element of life.

We have scorned the narrow ideas of old religions. They do not and can not harmonize that thought with the spirit of the day. We have sought to discard the superstitions, conflicts, between the various sects that even lead to intense rivalries and petty quarrels between different churches of the same denomination.

Rabbi Isserman spoke in The Things We Have in Common. He emphasized two main points: the things we have in common, religiously, and the things we have in common along religious matters.

He pointed out that the American School of Anthropology asserts that races are not different fundamentally, but only that races are backward or advanced in culture. This relationship changes with the centuries.

In religion, Rabbi Isserman explained the common basis for all sects as of these parts: the history of all religions, they can be traced back to primitive worship and sacrifice in each case. The study of comparative religions, as the similarity of the meaning of Easter and the Passover, both of which began as spring festivals among primitive man, and the possibility of mutual regard to all religions, are their reasons.

How is liberation of religion brought about? It is a question of sufficient of a new and old religion in our country.

Upper division students who are not members of fraternities are permitted to live in any approved house. This is a privilege which is practically restricted to live in their respective houses during their college career. Often it is a matter of either being in the house or leaving school.

Of course, there are many points to be made from the standpoint of the house. Mothers Honored by Numerous Week-End Dinners and Teas at Fraternity, Sorority Houses

Parties Caused by Influx of Guests and Showing of Union Opera in Grand Rapids; Revue Will Top Social Program for Coming Week.

MEMBERS' DAY ON CAMPUS meant the influx of a large number of guests for the week-end. It meant charming teas in honor of mothers at sorority houses, delightful dinners given in their honor at fraternity houses.

Mu Phi Epsilon entertained Saturday afternoon with its annual Mother's musicale. Many parties were scheduled for the week-end. Phi Omega, Kappa Alpha Theta, and Sigma held spring term parties, and Delta Sigma Phi held its party Saturday evening.

There were no large parties and no open houses were expected because many out-of-town guests were expected. Parties were in Grand Rapids with the Union program for coming week.

Alpha Theta held its party in the Union building Monday evening with Ken Pastore playing piano. The party was given by the girls' mothers.

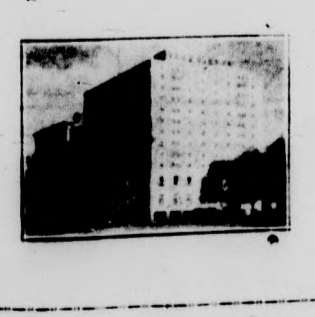

Alpha Phi Omega held its party in the Union building Monday evening. The party was given by the girls' mothers.

Spartans To Play Hosei Wednesday

JAPANESE TEAM ADMINISTERS 5 TO 3 TRIMMING YESTERDAY. IOWA TEACHERS ARE SWAMPED

Baseball Team From Japan Exhibits Classy Playing to Defeat Kobsmen; Kahl Replaces Griffin; Annihilate Iowans 17 to 2 Friday.

The Michigan State College baseball team will have an opportunity to redeem itself in a return game with the crack Hosei University nine of Japan on Old College field Wednesday afternoon at 4:10 o'clock. The game will be a part of the Founder's Day celebration.

Coach John H. Kahl's Spartans bumped up against defeat for the first time during the home session Monday afternoon when the Japanese administered a 5 to 3 defeat. Good pitching, fast fielding and speedy base running enabled the invading Hosei team to take the measure of the Kobsmen. To make things worse, Charley Griffin, left-handed ace of the hurling staff, ran into difficulty and was relieved in the sixth inning by Harry Jumbo. Kahl, big senior right-hander with the count 4 to 2 against state.

The Spartans ran into some consolation from the slugging 17 to 2 victory which they scored over Iowa State Teachers college here Friday. The Iowa Teachers were the only team to beat the Kobsmen on the home diamond last year. Kahl, the victim of the Cornhuskers' bats last year, turned in a very creditable performance on the mound Friday and allowed only two hits in the seven innings which he pitched. He left the mound with the Spartans out in front 14 to 0. Jerry (Boots) McCaslin, a sophomore, pitched the last two innings and allowed one hit and two runs in the remaining two innings. The game scheduled with Central Teachers college at Mt. Pleasant, Saturday, was rained off.

State rolled up what appeared to be a safe lead in the third inning of the game with Hosei Monday, only to see it wilt before the rattle of the Japanese bats and turn into defeat for the Kobsmen. One run in each the fifth and seventh innings and three in the sixth proved the deciding factor of the game.

"Chop" Griffin was knocked for seven hits in the six innings during which he worked on the mound, and he was given shaky support by his teammates. J. Suzuki, Hosei hurler,

At Virginia and Kentucky . . . down where tobacco grows

college men choose this one outstanding SMOKING TOBACCO

The men who go to the universities of Virginia and Kentucky know tobacco . . . they see how it grows and what makes it good.

So when Virginia students, and the men who stroll down old South Limestone Street in Lexington, pack their pipes with Edgeworth, their choice tells volumes about the cool, slow-burning quality of this favorite smoking tobacco.

It's the same story everywhere—North, South, East and West. In 42 out of 54 leading colleges and universities, college men prefer the smooth, fragrant burley blend of Edgeworth. Try Edgeworth yourself. You'll find more pleasure in a pipe than you ever knew before. Every tobacco store has Edgeworth, like the tin. Or, for generous free sample, write to Larus & Bro., Co., 105 S. 22d St., Richmond, Va.

State's Thinclads Splash To Victory Over Titans

Spartans' Biggest Thrills in Sport

Kenneth Yarger, Veteran Hurdler, Recalls Exciting Incidents in His Athletic Career at State

I spluttered over to where Ken Yarger was reclining on the soft grass of the stadium, resting for a moment from his "limbering up" exercises.

"He'll be glad," How's the hand working broad jumper?"

"Terrible," I told him and meant it. I see you guys crashed through down at Ohio."

He grinned and sat up.

At the Ohio relay, the Saturday before the shuttle hurdle team had taken second, pushing Ohio State to a new unofficial world's record.

"I guess," this Keller can handle him," I kidded him. Keller had run anchor for Ohio."

"Well, he wasn't exactly picking daisies along the way," said Ken. He got up and we jogged down to the end of the straightaway.

"Did you get quite a kick out of that race?" I asked him on the way down.

"Probably if it'd been in that packed that would've record I'd have gotten a thrill out of it. But as it is, I guess it was just another hurdle race."

"How about that year up at Marquette when you cracked the variety record in the high?" I asked. "And how about the Detroit City meet a while ago when you ran 15.7?"

"That wasn't so much. There was a lot of wind that day. But last year when I beat Johnny O'Brien."

And then he went on to tell me the biggest thrill he ever had in the history of the sport was when he was held at Marquette university, the best high hurdler ever to pose for the Green and White.

The 1926 Central Intercollegiate meet was held at Marquette university, Milwaukee, at night under flood lights, the first time in the history of this annual track carnival that artificial lighting had been used. It had been raining and the track was soft. The starting place for the hurdle was partly under the eaves, hence the light was rather meager. The machines of the night were used to make "amber" goggles, a truly hazardous practice for one not equipped with perfect co-ordination and an unusual budding sixth sense.

In the line-up besides Yarger, Tom Russell and Eugene of State, Thompson of Marquette and Johnny O'Brien of Notre Dame, holder of the American indoor record at 23 yards. O'Brien was worse, as a man with a reputation to sustain would be because of the softness of the track and the imperfect lighting.

"On your mark," he said the starter "Go!"

"That was it. Half a dozen hurdles straightened."

"That's a pair of legs flashed out of the gloom of the chute toward the first hurdle. O'Brien was away fast as usual, and took the first barrier ahead of the pack. Crash . . . and one luckless athlete staggered, then started on in a brave attempt to make up precious tenths of seconds. O'Brien was well out in front now, crossing his way down the line with machine-like rapidity. At the fifth hurdle he was still ahead. Then out of the gloom behind him came another human person, a green-shirted figure that was cutting up the distance with alarming rapidity. The crowd over on the alert for the dramatic "threat" made the tape. Over the last hurdle they leaped in unison, then pounded for the thin white string like madmen. The powerful drive of the green-shirt runner was not to be denied, his lunge at the finish took O'Brien by inches.

Results of the 120 yard high hurdles, bawled the announcer a minute later. "First Yarger, Michigan State; second O'Brien, Notre Dame. Time 15.5."

Michigan State's variety record set in 1921 by De Gay Ernst, and tied the week before by Yarger was 15.6.

"Yeah," said Ken. "I guess that was my biggest thrill all right. But you know, Johnny O'Brien was madder than I. He wouldn't speak to me for the rest of the meet."

DETROIT TRACK TEAM FAILS TO BEAT SPARTANS

Cliff Liberty Is High Point Man in Saturday Meet; Sets New Record.

Winning nine out of fifteen events, and scoring 100 points, Michigan State track team splashed its way to an 86 to 51 victory over the University of Detroit Titans Saturday afternoon at the stadium, a victory that enabled the fast stepping Spartans to close their dual meet competition for 1936 undefeated.

Large pools of water on the track from the drizzle of rain that fell all morning, made conditions far from ideal, as far as record breaking went. One variety mark fell, however, when Clifford Liberty stamped through the 220 yard low hurdle in 24.5 to break a ten-year-old record by De Gay Ernst. The former mark was 24.7. Liberty was also high-point man for the day, taking second in the high hurdle and the broad jump for a total of 11 points.

Clark Chamberlain fell short of his goal in his attempt on the mile record, traveling the four laps in 4:26.7. Half an hour later he jogged through a slow two-mile to take his second first place of the day and earn second high honor for the meet.

Any further evidence that was needed to prove State's supremacy in the hurdles was brought out when the Spartan lumber toppers placed all five men in the high hurdles ahead of the Titans. The U. of D. team scratched in the low. Ken Yarger drifted over the shorter distance in 15.4, remarkably fast time considering the condition of the track, and only two tenths of a second from his own variety record.

Ken Lafayette crashed through with the first victory of the year for the Spartans in the sprints when he took a fast 220 from O'Neill and Carey of Detroit, after taking O'Neill in the 100. The Titan flash tripped the century in ten flat.

Comparative strength of the Spartans in the field events proved an appreciable factor in the scoring. A slam in the pole vault when Olsen, Ahoska and Holcomb tied for first, eight points in the discus, and eight more in the high jump served to put the meet on its feet. Oswald won the discus with a breeze of 117 feet with Phil second and Norman Smith and John Kleinhackel finished one-two in the ball toss. State's one remaining first place came in the javelin when Hal O'Connor out-traced the field.

Prof. A. J. Clark's Kin Dies State Wins Second Place Stock Judging Contest

Prof. A. J. Clark was called to East Jordan Wednesday, May 6, by the death of his grandfather, Mr. Townsend. The deceased was ninety-five years of age. He died after a two week illness with pneumonia. Prof. Clark returned Friday.

Saturday morning Michigan State stock judging contest here. Ohio State took first place, Michigan State second, Ohio State A team third, Wisconsin fourth, and the Michigan College fifth. Michigan State led by seven points. The teams were accompanied by state's woodmen and equipment.

A special test program was broadcast Saturday morning by the college radio station WKAR. The object of the broadcast was to experiment with some new equipment which the college has purchased several students furnished the entertainment for this program.

FRESHMEN WIN TRACK MEET ON M. S. C. TRACK

Borton, Alma Cinder Star, Cops High Point Honors Against State.

Michigan State's freshman tracksters added two more medals to their list Saturday morning at the stadium when they took the Alma varsity and freshman teams into camp by the lopsided score of 133 to 22. For Alma varsity and a split three for the Alma varsity. The meet was held in a driving rain that slowed in the performance appreciably. The Detroit City meet.

Borton of Alma varsity proved the outstanding performer of the day when he broke the meet record in the 200 yard dash, and tied for second with Detroit at State in the high jump. He accounted for 13 points for his team's total, more than half the squad's total. Tim was pushed closely by Detroit's versatile sprinter, J. H. Brown, who won the broad jump, was second in the low hurdle, third in the javelin, and in a tie with Borton in the high jump, for 12 points. Keist of State was third with 11.7-12 points.

Four meet records were broken. Borton spun the discus on 119 feet 9 inches. Better of State took the high hurdles in 10.6. Lilla bounced over the 200 barrier in 25.9, and three Spartan youths, Don Harvey, H. Ryan and Roger Keist splashed through a 518 quarter mile to finish in a premeditated triple tie for first.

The Green and White squad took first place in every event but one the discus, and scored all four places in the two mile, the 800, the low hurdle, and the pole vault.

Johnny Weissmuller To Swim Here Friday

Johnny Weissmuller, swimmer of world fame, will give an exhibition in the college swimming pool Friday afternoon at 4 o'clock. There will be no admission charge. The demonstration has been arranged by the Michigan State college P. O. club swimming honorary.

Weissmuller, world's record-holder in free style and basketball events, is being brought in, Lansing by the P. N. Andrews Co., Lansing department store. He is president of the U. S. U. S. Swimming Club.

Johnny is a personal friend of Coach Russell's. He has coached the Spartan swimming team and has consented to give a special demonstration for members of the varsity and freshman track squad following the regular exhibition. Weissmuller will demonstrate how the most powerful and speediest can be swum, and the various strokes for the benefit of the Spartan swimmers. Spectators are welcome to stay for this special demonstration.

A Tough Break

Michigan State struck a tart in the Hosei University baseball team from Japan Monday. The Japs' speedy line boasting a fine hurler sent the Spartans down to defeat for the first time during the home season. Suzuki, who worked on the mound for Hosei is the same pitcher who let Notre Dame down with three hits a few days ago in a game in which the Japs beat the Irish 4 to 1.

Rain Plays Havoc

Four athletic meets were rained off last week-end. Varsity and freshman baseball teams, the football contest between picked teams from the Spartan spring grid squad were postponed due to inclement weather.
