Lewis Contempt Ruling Approved By 7-2 Count

Divided Justices Offer Three Views On Case

WASHINGTON, March 6 (AP)—An historic 7-2 Supreme court decision today adjudged John L. Lewis and the United Mine Workers guilty of contempt and branded their actions a "serious threat" to constitutional government and the nation's welfare.

Asks Red Ban

John L. Lewis, president of the United Mine Workers, is shown in a portrait. He is looking slightly to the right with a serious expression.

Moreover, the high tribunal in effect clamped a "no strike" edict on the soft coal miners for the present.

With repeated rebukes to Lewis, it sustained the anti-strike injunction Federal Judge T. Alan Goldsborough issued to head off last fall's coal strike. It approved the contempt convictions of Lewis and the United Mine Workers for disobeying the injunction. The \$10,000 fine against Lewis was upheld.

As for the \$3,500,000 fine against the Union, the court upheld \$700,000 of it as punishment for contempt already committed in the strike which ended Dec. 7, and it held the other \$2,800,000 over the Union's head, to be assessed if it strikes March 31 or any other time so long as the government operates the mines.

Must Withdraw Notice

To avoid the \$2,800,000 fine against the Union, Lewis must withdraw "unconditionally" his notice purporting to terminate his contract with the government, and so notify the miners, within five days after the court issues its mandate. The mandate would be issued to Judge Goldsborough in 25 days, which would bring it to the March 31 deadline Lewis set when he ordered them back to work Dec. 7.

The Supreme court decision does not rule as to whether the government's contract with Lewis—the so-called Krug-Lewis agreement—can be terminated by Lewis, as he contends, or whether it is good for so long as the government runs the mines, as the justice department contends.

But it upholds the temporary injunction which Judge Goldsborough issued Dec. 4, after the Lewis trial, pending his determination of that issue. The next legal step now would be a move by the government to have a date set to try that issue.

Anti Injunction Vote Close

While the vote was 7 to 2 in upholding the contempt convictions against Lewis and the Union, it was only 5 to 4 in overruling Lewis' claim that the Norris-LaGuardia anti-injunction act outlawed Judge Goldsborough's restraining order.

Chief Justice Vinson, writing the majority opinion, has first major opinion since he ascended the bench at the start of this term, called Lewis' action "an attempt to repudiate and override the instrument of lawful government." Again, he said, Lewis is wrong.

Truman Asks Trade Barrier Lifting By U.S.

WACO, Tex., March 6 (AP)—The alternative to lowering of international trade barriers is economic war, President Truman warned the nation today in an address delivered after he received an honorary degree from Baylor University.

The President left by plane for Washington at 2:14 p.m. (CST) after pausing here three and a half hours on his return from his good will trip to Mexico City.

Cold, wet weather thinned the anticipated 150,000 persons expected to pack highways and streets along his line of parade.

Eighty-nine-year-old Dr. J. T. Harrington, chairman of Baylor's board of trustees, introduced the president as a candidate for the award that later was presented by Pat Neff, president of Baylor.

The President appealed for full congressional support of the reciprocal trade agreements program, and for the forthcoming Geneva negotiations.

He said, "We are the giants of the economic world of today."

"We can lead the nations to economic peace or we can plunge them into economic war," he said.

"In such a war, nobody wins."

He warned that isolationism could result in another depression.

He said that the alternative to "regimentation" of international commerce is the world trade charter to be considered by 18 nations at Geneva next month.

TODAY'S CAMPUS

Yea, Verily

Campus activity recently has been a study in contrasts. A round of applause and cries of "See you, Snow!" were heard when the new chaplain, Rev. William H. "Amos" Amos, came to his post.

Radio Group's Talent Shown In Irish Play

By TOWNSEND RICH

Shelby Theater production of the famous "The Far-Off Hills" radio play in Room 43 of the Union Trust Building brought several hundred to the attention of an audience that enjoyed the mood of Irish humor.

The play was particularly successful in depicting the life and musical rhythms of the Irish people.

Through the transformation of the play into a stage production, the audience was able to see the play in a new light. The play is what distinguishes it from the other plays and the cast showed the features of the play.

Transitions

In a play as the transition from the old to the new, the audience was able to see the play in a new light. The play is what distinguishes it from the other plays and the cast showed the features of the play.

The play was particularly successful in depicting the life and musical rhythms of the Irish people.

Architect Sketches Memorial Center

Shown above is the Memorial Fund's plan for an International center (left) and campus chapel, to be built near the Deol gardens. At the lower left is a diagram of the memorial unit's position in relation to nearby buildings.

'S' War Memorial Center Plans, Sketches Released

By BOB BURNS

Architect Ralph R. Calder's sketches and floor plans of the \$300,000 Michigan State college war memorial center were released by Joseph Goudie, assistant director of alumni relations, yesterday.

Calder has followed the modern collegiate style of architecture of the Music building in designing the memorial center. He also designed this building, the first of its style on the campus.

The drawing shows the Center as it will be seen from a point just west of the Physics building looking toward the college greenhouse. It is on the site of this greenhouse, behind the Foreign Language building, that the Memorial will be built.

Looking from this point the International house is to the left. To the right is the Memorial Chapel. Connecting the two is a covered walk. And beyond the walk, on a path leading to the botanical gardens, stands the Peace Fountain.

To the right of the International house, main entrance is the Directors' office library and reading room. These rooms face the Peace Fountain and formal gardens.

Between the reception room and overlooking the campus is the lounge with its large open fire places at either end.

Across the hallway from the lounge is the dining room. The two are so designed that they may be combined to accommodate large gatherings. Glass doors open from this room on to the terrace which overlooks the Red Cedar and botanical gardens.

The kitchen is conveniently located between the main and private dining rooms.

Living quarters for the director and guest rooms for distinguished campus visitors take up the second floor. In the basement are recreation rooms.

The covered walks between the

MSC Foresters Attend Annual U-M Banquet

MSC foresters will travel to Ann Arbor Saturday to attend the annual Michigan-Michigan State foresters banquet. The affair is sponsored alternately by U of M and the State forestry clubs.

Highlight of the evening will be the Paul Bunyan, Jr.'s contest. Richard Milton Potter, Kalamazoo senior, will attempt to uphold State's tradition for telling the biggest woodland whoppers.

Blue Babe, Bunyan's benevolent home, is the title given to the trophy carried home and retained for the year by the winning club. Babe is a replica of the legendary lumberman's giant blue ox.

Although carved by U of M foresters in 1938 from genuine Michigan white pine, Babe has passed most of her years at Michigan State.

Five Soloists To Be Feature Of Musical

An annual and interesting musical will be given by the A Cappella choir, directed by William Kimmel, Sunday, March 16 at 8:30 p.m. in Peoples church.

The choir and featured soloists will sing works by Bach, Beethoven, Schubert, and others.

Written by Bach

Jesu, My Soul's Treasure, one of the six cantatas of the kind written by Bach. Written for chorus and solo voice, this cantata is a beautiful setting of the text.

Palestrina's motet, "Stabat Mater," is a story of the Crucifixion, written for double chorus and solo voice. The fourth part of the program will be "Songs of Consolation" by Hans McDonald.

See SOLOISTS, Page 1

Summer Work

All interested students in the summer work program should contact the office of the Summer Work program, located in the Administration Building, Room 101, for more information.

Play Tryouts For 'Lorraine' Start Monday

By HARRY WEIL

Tryouts for the play "Lorraine" will be held Monday and Tuesday evening from 7 to 9 p.m. in Room 101 of the Administration Building.

All undergraduates and graduates are invited to try out for the play.

Tryouts will be completed soon after the invitation to tryouts Wednesday evening and rehearsals are scheduled for the beginning of next term.

"Lorraine" offers a wide variety of character roles, particularly for men. Most of these are dual parts with the actors appearing as themselves as well as historical figures. The action shifts from a bare rehearsal stage to scenes from a play about Joan of Arc.

Outstanding in the play are the roles of Rheims, the Dauphin, the director who in the second act also appears as the inquisitor and various army men and followers of Joan.

Top female role is the actress Mary Grey, who plays Joan but there are several supporting roles including Mrs. Barnes and Tessie who let the part of Joan's mother and Aurora the Dauphin's lover.

Recession In Late '47

WASHINGTON, March 6 (AP)—The Bureau of Agricultural Economics said today forces now at work seem to indicate a business recession late in 1947 and a downturn in prices, particularly in food.

It said wholesale food prices—which in recent weeks climbed to a record level, may decline from 15 to 20 percent by the end of the year.

So He May Return

LETTER AROUSES SPARTAN'S SPIRIT

By BOB ASTLEY

In the State News on Wednesday, the following letter was printed:

To the Editor: On Monday I was tardy for physical education class and since I was in a hurry I forgot to lock my locker. We all for get at one time or another.

I wish to thank that "buddy" of mine who so kindly closed my locker for me but would you kindly return that \$17 which you removed from my wallet? I am not a veteran and must work some 20 hours per week to make both ends meet so that I might remain in school. I receive no outside financial assistance other than what I earn myself.

Just recently I lost a week's wages after being a patient in the college hospital and that not to back considerably. The money which was taken was part of my next term's tuition so if I'm not seen on campus I sincerely hope that my "buddy" will miss me.

Frank Greenwald, Norway, Mich.

Somewhere on this campus, someone of 12,500 is a thief. Because that someone stole, because he couldn't resist the temptation an open wallet offers, a fellow student may not be able to continue at Michigan State next term.

He may be forced to return to his home town with a story—a story of what a Michigan college,

Michigan State college, has given him—a story of an education in petty larceny.

Two MSC coeds are agreed that it won't happen, and they've done more than talk about it.

The following letter was received by the State News yesterday:

To the Editor: In regard to yesterday's letter by Frank Greenwald of Norway, we want to show him he has some real "buddies" on campus who disapprove of a certain small-minded person's actions.

We are therefore enclosing 50 cents to partly make up his loss. Perhaps others will want to join this buddy-buddy movement, and all greet you on campus the

beginning of next term.

A couple of working girls. What these two have done, what they have started, is a remarkable reflection of Spartan spirit. The State News is eager to make that reflection a full-length mirror from Abbot hall to the trailer camp.

To those who agree with "a couple of working girls," the State News is happy to offer its facilities.

It will be glad to accept further contributions at its office that a Spartan visitor may remain in school.

As for the thief, should the money he pilfered burn a hole in his heart, this paper will accept it from him either in person or by mail without question or comment.

Campus Activities In Pictorial Review

Although there still may be die-hards who say a woman's place is in the home, and that it's strictly a man's world, co-education here at State gives the lie to such well-worn adages. Such theorists of the old school would receive a shock indeed if by chance they would wander into a Foods and Nutrition class in the Home Ec building and stumble upon the above scene, as four Hotel administration majors (John Parker, Robert Mosher, Allen Bryant and Robert Turner) whip up batter, peer into ovens, and stand over a hot stove as they learn the finer points of the culinary art. And if further proof should be required, the picture at the right should suffice, as Veterinary Med seniors Jean

New Armor For ROTC

Photo by Schuer

ROTC cadet officers Bob Alexander and John Gibbs, Lansing sophomores, examine controls of the department's new M-8 recon car as Lt. Colonel Gerald Peterson looks on. The vehicle is capable of 60 miles per hour maximum speed and has a cruising radius of 600 miles. It is driven by a six-wheel drive and carries a 37mm tank gun, 50 and 50 caliber machine guns. Operated by a six man crew, advanced cavalry students will train with it starting spring term.

Publications Board OK's News Changes

New State News Charter Creates More Jobs, Sets Qualifications

The State News underwent a major reorganization Wednesday evening when the Board of Publications approved a reorganizational charter for the campus daily publication. The new charter, the first in the history of the State News, gave a definite breakdown of duties and responsibilities of staff members, has created several new positions and changed existing ones.

Among the changes listed in the new charter are: the title "Manager" has been changed to that of "Managing Editor"; the Editor may now serve a maximum of two terms instead of one; the Board of Publications approves the Editor's appointment and reappointment; the appointment of one term and the expiration of a new position called the "Circulation Manager" has been created.

Divided Into Three Groups

According to the new charter, the State News is divided into three departments. The Managing Editor is in overall charge of the State News. The Editor directs the Editorial Department, the Advertising Manager operates the advertising department, and the Circulation Manager is in charge of the circulation department.

The "Committee of Control," which is for one term only, was created because of a definite need for one staff member who can devote his full time to the financial accounting of the State News. This position is to be a stepping stone into the Managing Editor's position. Those persons who have acted as Controller will be given special consideration if they apply for the Editor's position.

Must Be A Junior

The Controller must be of junior class standing and must have served at least one term as an Associate Editor and must have had at least one term of bookkeeping. The creation of the Controller will remove from the Managing Editor's many duties and responsibilities.

Two new positions were added to the Advertising Department and one position was dropped. The new charter calls for the Assistant Advertising Manager to be appointed on a term basis with no limit to the number of terms one can serve in this capacity. It also calls for a qualified Advertising Manager.

Formerly there was only one Assistant Advertising Manager. The position of Assistant Manager was dropped. The duties were incorporated into the duties of the two Assistant Advertising Managers and the Editor.

One extra Assistant Advertising

College Symphony Group Will Entertain Sunday

Alexander Schuster will direct the college symphony orchestra in a four-part program this Sunday, at 4 p.m. in the College auditorium.

J. Herbert Swanson, associate professor of music at the college, will sing two solos accompanied by the orchestra.

Morton Gould's "Spirituals in Five Movements," one of the numbers to be played by the orchestra, was completed early in 1941 and was first performed under the composer's direction at the New York City Festival of American Music.

"Spirituals" draws upon the rich native heritage of negro and white spirituals. The names given to the five parts indicate that the movements embrace the different feelings and characteristics of this folk-expression: "Praeludium," "Serenade," "A Little Bit of Soul," "Protest," and "Jubilee."

Swanson will also sing a bass solo for his own setting of John Fletcher's colorful poem, "The Moon's Orchestra." Composed in 1932, it shows an impressionistic influence, and attempts to reproduce color through music.

Most famous works of Mendelssohn's most famous works will be played by the orchestra: "The Italian Symphony" (No. 4 in A major) and "The Hebrides Overture."

Showing perfection of form, this "music picture" of the islands west of Scotland gives Mendelssohn's impressions—the roar of the waves rolling into the cavern, the cries of the sea birds.

The gorgeous rites accompanying a Pope's coronation and the popular festivals of Rome left their mark on Mendelssohn when he wrote the "Italian Symphony."

Guinea Pig Convict Freed

DETROIT, March 6 (AP)—An Illinois convict's work as a wartime malaria guinea pig today won him freedom from two bad check charges in Detroit totalling nearly \$8,000.

Recorder's judge Joseph A. Gill dismissed charges against William C. Cooper after the Detroit bank withdrew a \$1,153 bad check complaint, dating back to 1938, and the National bank of Detroit one for \$3,665 lodged in 1940.

The banks withdrew their complaints at the request of Warden

Foreign Centers Offer Student Courses

MSC students have an opportunity to obtain first-hand information about our neighbors south of the border, plus a chance for a vacation-like trip, according to Dr. Joseph S. Werlin, director of the University of Houston's summer center program.

Students throughout America have been invited to attend the Summer Centers in Mexico and Guatemala. The Centers feature English language courses in social, economic, and cultural conditions of the respective countries.

The courses offer college credit in sociology, history, and Spanish, to students on both undergraduate and graduate levels. Students may also attend on a non-credit basis.

The centers are recognized by the Veterans' Administration and enrollment can be arranged through the local VA.

Expenses for the Mexico Center, open from June 3 to July 9, are approximately \$250. This does not include meals. Transportation is by train and bus along the Pan-American highway.

The trip to the Guatemala center includes a flight from Mexico City to Guatemala City. Expenses

ID Cards Necessary

Dr. Dressel, head of the Bureau of Examiners, has announced that identification cards will be necessary for entrance to comprehensive examinations.

The Synthesis of Nylon

Chemists of original nylon research team honor memory of Dr. Carothers at the dedication. They are: J. W. Hill, Ph. D. M. I. T. '28; H. B. Bywater, Ph. D. Ohio State '27; G. J. Berke, Ph. D. Colorado '29; J. E. Kirby, Ph. D. Iowa State '29; E. W. Spangol, Ph. D. McGill '33; D. D. Colman, Ph. D. Illinois '30; and F. J. Van Name, Ph. D. Michigan '35. Dr. Carothers received his Ph. D. from Illinois in 1924.

Recently the Nylon Research Laboratory near Wilmington was dedicated as "The Carothers Research Laboratory" in honor of the late Wallace Hume Carothers and his classical researches on the structure of polymers, the mechanism of polymerization, and the invention of nylon.

In 1928 a group of chemists under Carothers began a study of polycondensation which led eventually to the discovery of nylon. The project was part of a program of fundamental research to discover scientific facts which might be of eventual value in laying a foundation for applied research.

As the first point of attack, they chose the condensation of dibasic acids with glycols and reaction materials which would preclude the formation of rings. They obtained linear polymers of molecular weights between 2300 and 5000.

Molecular Weights Increased

After two years, a significant advance in linear polymer preparation was achieved. Through the use of the molecular still, it was possible to obtain materials of molecular weights between 10,000 and 25,000, which, when molten, could be drawn into filaments.

More important, the cooled superpolymer filaments could be further drawn into fibers several times their

Research on Fibers

The possibility of a commercial fiber development seemed remote, but the intuition that frequently accompanies research genius prevailed, and Carothers was encouraged to direct his research on superpolymers specifically toward spinnable fibers. A polyamide from 9-aminonaphthoic acid gave a fiber of 195°C. melting point, equal in strength to silk, and clearly indicated the possibility of obtaining a material for fibers of commercial utility.

In 1935, the superpolymer from hexamethylene diamine and adipic acid was first synthesized. It melted at 263°C., was insoluble in common solvents,

Dr. Wallace Hume Carothers

1896-1937, was the first organic chemist in industry to be elected to the National Academy of Sciences. During his short scientific career he made contributions that have greatly enriched American life.

tough, elastic and had the best balance of properties and manufacturing costs of any of the polyamides then known.

A third period of research covered commercial development. The task was enormous, and to reduce to a minimum the "time between the test tube and the counter" a large force of some of the most competent chemists, physicists, chemical and mechanical engineers available was assigned to the project. The story of the manufacture of nylon will be told next month.

Questions College Men ask about working with Du Pont

Where would I be located?

Openings for technical graduates may exist in any one of the 55 Du Pont research laboratories or 50 manufacturing plants. Every effort is made to place men in positions for which they are best suited and in the section of the country which they prefer.
