

MASKED GUNNERS SERVING THEIR PIECE—The gun is emplaced with a screen of heavy foliage to hide it from the eyes of the enemy airmen. The men are wearing their gas masks, which indicates that they are not far from the German trenches. As long as the attack is kept up the gunners continue firing their piece without ever seeing their target. The angle of fire is determined by mathematical calculation and the gun continues to fire at that angle until corrections are necessary.
