A DEVICE THAT MAY CUT A PATH TOWARD THE POLE—Sir George Hubert Wilkins, at Camden, N. J., inspects one of the circular ice saws to be used in his submarine cruise of the polar region. (Associated Press photo.)

NATURE REMAKES THE FACE OF NIAGARA FALLS—A snapshot of the mighty cataract showing the tons of rock that fell away from the ledge, giving a new curve to the contour. A section 200 feet wide, approximately one-seventh the width of the American falls, and 150 feet deep crashed down the precipice, making the greatest single change in history. (Acme-P. & A. photo.)

THEY KNEW LINCOLN—Granville Williams Browning, now of 1309 Astor street, and his sister, Lizzie, as they appeared when they met the Emancipator in 1863. The story is told on the editorial page of today's Tribune.

SIR HUBERT'S UNDER-ICE CRUISER—The Nautilus, the navy's former O-12, being refitted at Camden for its polar voyage. The wooden superstructure is designed to act as a runner on the under side of the ice.
