1 INTRODUCING APRIL, Belgian mare colt a week old when these pictures were taken on The Tribune's Yorkville experimental farm. At the moment, she was all legs.

2 Binks, smooth haired fox terrier, romps into the picture, getting action from April but none from the colt's mother, Rose.

3 A prankish and willful camera subject, she spoils the focus of a picture by walking right into the lens.

5 The youngster has an impulse to scratch her right ear, but it doesn't quite come off.

7 As laughable as she is adorable, she gets herself tangled in any convenient rope.

4 In picture No. 2 it began to look as if April had very fair control of her legs; but when she's down trying to get up it isn't so good.

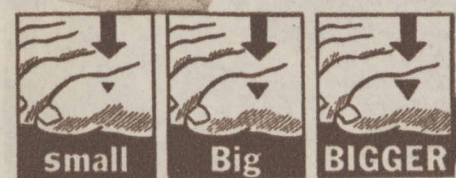

6 Heigho! In the life of a colt there's nothing more exciting than a run through the pasture with ma.

CORNS COME BACK BIGGER — UGLIER UNLESS REMOVED ROOT* AND ALL

Wonderful Root and All Method Relieves Pain — Removes Entire Corn

HOME paring merely affects the surface of a corn, and it means the risk of serious infection—even blood poisoning. For a corn goes so deep that with home-paring it is only trimmed—the root remains imbedded in the toe.

That's why millions of people everywhere are using the new Blue-Jay medicated plaster. By removing the pressure, all pain is relieved quickly. Then in 3 days the entire corn lifts out Root and All (exceptionally stubborn cases may require a second application).

Blue-Jay is easy to use. Held snugly in place with special Wet-Pruf adhesive, it can't stick to stockings—won't make shoes tight. Get Blue-Jay today and escape painful corns without dangerous home methods. 25c for a package of 6—at all druggists.
