**THEY ALL TOOK A LAXATIVE
BUT THAT DID ONLY HALF THE JOB**

To relieve these effects of Constipation
ACIDITY MUST ALSO BE CORRECTED

For constipation is nearly always accompanied by an acid condition in system. Read how Sal Hepatica corrects both.

FREQUENTLY the disagreeable effects of constipation hang on and on... long after your laxative has cleansed your intestinal tract of clogging wastes!

The reason for this is simple. The usual laxative does cleanse your intestinal tract, but it is not designed to correct the systemic acidity that frequently accompanies constipation.

But Sal Hepatica, scientific research indicates, does BOTH! It is not only an ideal laxative, but also an active alkalinizing agent.

Just take two teaspoonfuls of Sal Hepatica in a glass of water. Almost at once the alkaline reaction of this mineral salt laxative begins to correct the acid condition of your system... to restore your body's normal alkaline reserve.

And, at the same time, Sal Hepatica also gently, thoroughly flushes the intestinal tract... cleanses wastes and poisons from your body.

Thus Sal Hepatica, unlike ordinary laxatives, corrects both your constipation and the acidity that goes with it... gives effective relief from troubles frequently caused by these conditions.
