

CITY MATTERS.

Gates & Hoge's Foundry and Machine Shop.

We are quite sure that not one in fifty of our citizens entertains anything like a correct conception of the extent of the manufacturing interests of the city of Chicago. Our visits within the last ten days, to the principal establishments of the city have served to "open our eyes" upon this subject, and we are anxious to effect the same object for our fellow citizens by calling their attention to the subject, and if possible induce them to do themselves the favor of a personal inspection. We were greatly surprised, on calling in to the above establishment, at its extent, the facilities at hand for conducting the business, the number of persons employed, and the amount of business done.

Independent of the Foundry building, there are two substantial brick buildings, each 70 by 36 feet, and three stories high. Each department of this extensive establishment is supplied with appropriate machinery and some particular branch of the business carried on in it. But large as it is, Messrs. Gates & Hoge find it too small for their business, and have it in contemplation to put up still another building.

We are not sufficiently familiar with the technicalities of machinery to enter into any very extended notice of what we saw in this establishment. That which most struck our attention was a machine for planing iron—a very beautiful, compact and ingenious thing.

Messrs. G. & H. are prepared to manufacture steam engines, a number of which they have already turned out to order. A very beautiful engine of their make is employed to drive the machinery of the establishment. We believe they are prepared to manufacture almost anything wanted in the iron line. In one of the apartments hands are employed in making wagons. As many as 150 are made here during the year. Elsewhere we found men engaged in the manufacture of horse power, which are used in Wemple's Threshing Machine and Separator. In another apartment we found a number of men engaged in the manufacture of Easterly's Harvester, Messrs. Gates & Hoge having contracted to build 50 prior to harvest. We found Mr. Gates and several hands employed in making improvements and new arrangements in the foundry, which occupies a third building, of itself quite an establishment. Their iron is procured mostly, from Laporte and Mishawaka, Ind. In the foundry and machine shop, 60 hands find constant employment, an evidence that something is done there. We hope our citizens, who feel an interest and pride in the prosperity of our city, will make themselves acquainted with the facilities of this establishment, and also, we advise our friends of the country who feel a curiosity and interest in such things, not to forget to pay a visit to the establishment of Messrs. Gates & Hoge when they come to the city. It is situated on Canal street between Washington and Madison.

We must not omit to express our obligations to Mr. Hoge for his attention and politeness in showing us through the establishment.

WEMPLE'S THRESHING MACHINE AND SEPARATOR.—Adjoining Messrs. Gates & Hoge, is the establishment of Mr. J. V. Wemple the patentee of the above, who has some ten or a dozen hands employed in making these Threshing Machines and Separators. It is his intention to build 100 of them before harvest.—These machines have been tested by the farmers of Illinois, and we believe enjoy a merited popularity among them. There are no fears but what Mr. Wemple will find sale for the entire number.

CLOTH AND CASSIMERE JOBBER HOUSE.—An extensive Jobbing House, for the sale of Cloths and Cassimeres only, has been opened by Messrs. Field & Benedict, in the new fire-proof brick block, No. 171 South Water st.—It gives us pleasure to notice the advent of establishments of this kind. They are essential to the prosperity of our city. Last summer, merchants from the Illinois river visited Chicago, expecting to purchase stocks of Goods here, and were much surprised at not finding establishments where they could get what they wanted. As a consequence, a large amount of trade was forced away from Chicago to St. Louis, and the impression has gone abroad, much to our injury, that we have no but retailers and petty jobbers. We hope soon to see this impression effaced, by the establishment of Wholesale Houses, where everything can be bought on Chicago dealers on as favorable terms as at St. Louis or any other city west of New York.

We would refer the trade, and the public, to the advertisement of Messrs. Field & Benedict.

BOILER SHOP.—Passing up Canal street the other day, we were surprised in coming upon a shop between First and Sebor streets, for the manufacture of boilers. This establishment is owned by Mr. C. Reising, an enterprising foreigner, who has in his employ some five or six hands. From the specimens of his work which we examined, we conclude that Mr. Reising fully understands his business, and we recommend him to the patronage of the public.

REMOVED.—Mr. Harris has removed his Fashionable Clothing Establishment to No. 146—the sunny side of Lake street—where our citizens will find him ready to supply them with everything, from a shirt collar to a coat, in the latest and most approved style.

INTERESTING TO PRINTERS.—Mr. Ferguson received 400 reams of printing paper this morning, from Cleveland, per Propeller Republic.

LAMENTATIONS.—It is amusing to hear the lamentations of the office-holders, as they undergo the process of official decapitation from the hands of Gen. Taylor, Collamer and Ewing. We have not a "bowl of compassion" for them, as it is the same game they would have played on the Taylorites, had the circumstances been reversed. "Sauce for the goose, and sauce for the gander," gentlemen.

EUROPE.—Father Mathew was expected by the EUROPE.

Kate Hastings has been fined six cents for the assault on Ned Buntline.

Some of the gold dollar pieces have been issued.

CHICAGO AND ST. LOUIS TELEGRAPH.

The Ottawa Free Trader says that at the meeting of the Chicago and St. Louis Telegraph Co., recently held in Peoria, the Telegraph line was regularly turned over by Mr. O'Reilly to the company and the company organized and elected its directors. Judge Caton is the director for this region; C. Coffing, Esq., at Peoria, is another director. The president of the company resides at Galena, and the Treasurer is taken from St. Louis.

SUICIDE.—A passenger on the Albany, who shipped at Cleveland for Sheboygan, about 55 years old, jumped off the steambot Albany in Saginaw Bay, on Sunday the 16th inst. He appeared to be deranged. He had previously given his money to the captain, and requested him to take care of his family. So says the Wisconsin.

FROM THE CALIFORNIANS.—We were shown a letter this morning from a young gentleman on his way from this city to California, written at Burlington, Iowa. He represents his progress as being slow and tedious, owing to bad roads and high waters. Corn and hay are selling at extravagantly high prices at St. Joseph, Mo.

First cars through from Detroit to New Buffalo, to-day.

MEMPHIS CONVENTION.—A great Convention is to be held at Memphis, Tenn., on the 4th of July, for the purpose of eliciting an expression of opinion on the subject of the Atlantic and Pacific Railroad.

CANADIAN NATIONAL CONVENTION.—The first steps were taken at Montreal on the 10th inst., for the purpose of calling a National Convention. Much discussion took place in relation to the name that should be given to the intended association. It was finally determined to call it the British League.

TERRELL HURRICANE.—The Courier, Lafayette, La., gives an account of a tornado, which commenced at Walnut Grove, and proceeded north-easterly, sweeping everything before it—cattle were "taken up" and carried a quarter of a mile—houses were unroofed and prostrated—barns out-houses, hay stacks, orchards, fences, &c., were generally destroyed—no lives are reported to have been lost, nor the amount of property destroyed.

LAW REFORM IN ENGLAND.—Mr. Drummond has introduced a bill into the British House of Commons which bids fair to become a law, establishing in London a registry of deeds and titles, and making a simple record of transfer a binding conveyance. The bill was vehemently opposed by all the lawyers as an inroad upon their practice, for though we are familiar with registry in the United States, the landholders of England have shunned it, lest the incumbrances on their estates should be made too public. They are now changing their tune on account of the enormous expense of conveyancing. The London correspondent of the Philadelphia Ledger, from whom we gather the facts, says—

The expense of an ordinary conveyance of a small house in England, inclusive of the examination of the title, stamps, &c., usually amounts to over a hundred dollars! It is not at all unusual for the transfer of a farm to cost a thousand dollars in law expenses. Indeed, conveyancing is the principal source of an English lawyer's profits, there being but little litigation, as the expense attending the administration of justice is so enormous as to frighten people from the attempt to get it through the medium of the courts of law. The English lawyers may safely and confidently look forward to utter ruin as their doom, for great reforms cannot be postponed much longer. Mr. Drummond's bill may not pass, but a registration of deeds, somewhat like ours, is only a matter of time, and the Court of Chancery will be reformed, if not abolished.

The receipts of the Erie Railroad, N.Y., thus far in April have averaged about \$2,300 per day—equal to \$6,000 for the month.

The Washington Union says that Congress, in its haste to provide a Secretary and Assistant Secretary, &c., for the Department of the Interior, forgot to make any appropriation for the payment of their salaries.

ONE DAY'S WORK.—The Washington Whig publishes a list of seventy-four post masters appointed in one day by the present administration, fifty-four of which are removals.

TO COOK A HAM.—Boil a common sized ham four or five hours, then skin the whole and fit for the table; then set it in the oven for half an hour, then cover it thickly with pounded rusk or bread crumbs, and set it back for half an hour. Baked ham is always improved by setting it in an oven for near an hour, till much of the fat fries out, and this also makes it more tender.

FEATHERING WITH THE WHIGS.—The New York Globe says: "So ardently did the hunkers rejoice at the election of the whig Mayor and a majority of the Aldermen, that they yesterday hoisted the Cass and Butler bunting at the head of several whig flag-staffs. Taylor and Cass after election is about as significant as Taylor and Butler before election."

D. M. Haskell of Cleveland has been appointed Postmaster of that city, in place of T. P. Spencer removed.

STEAMBOAT SUNK.—The steamer Highland Mary, No. 2, was sunk on the 15th, 130 miles above St. Louis, by running against a stump.

IN A FIX.—The Grafton Reporter says:—"We understand that Cairo is altogether under water, and that Mr. Saunders, the editor of the Delta, is near the town in the fork of a tree unable to extricate himself from his enviable position."

Receipts have been issued by Gov. Briggs, of Massachusetts, for the 4th inst. for a member of Congress in Mr. Palfrey's District, to be made on the 30th day of next month.

GOLD MINE EXPLODED.—The Frontier Guardian, the new "Latter Day Saint" paper published at Council Bluffs, states that since last fall, much excitement has existed in that region, relative to a supposed gold mine discovered near that place. The Guardian adds, however, that the "gold" turns out to be a mixture of zinc and copper, and advises its friends to relinquish their "diggings," and turn their attention to "digging for corn and potatoes." Sensible.—Union.

Rev. Dr. Power, well known as the Catholic Vicar General, died at New York on the 14th. He has been ill for two years.

THE PATRIOT MITCHELL.

A private letter, from Bermuda, to a gentleman in Washington, speaking of this noble but persecuted patriot says:—"I had the melancholy pleasure, a few days since, of seeing Mitchell, the Irish patriot.—Poor fellow! He looks sad, weary, and worn, rarely if ever smiling, and apparently always absorbed in brooding over his desperate fortune. I do not think judging from appearances, that he can outlive the summer. He is but the shadow of what he once was, and in habit, tastes, and temperament, the more aptology of the frank, lively Irishman I knew him to be two years since." His treatment in all other respects is rigorous enough; though this, I am free to believe, is less galling to his proud spirit than the knowledge of his fallen condition. He says little, though evidently thinks much—thinks that part of his power rather than meekness, or its intended conciliating effect. It is the powerful incentive of retribution which seems alone to keep him alive.

PIRACY IN THE WEST INDIES.—The Halifax papers received by the steamer, contain late news from the West Indies. Among other items is the following:—"A French schooner, a sloop which sailed from Demerara, for neighboring port, when just outside of the harbor was seized by three men, one of whom had shipped as a seaman, and the others passengers. They landed the Captain and crew upon a desert island, and then ran the vessel into the Oronoco, where they disposed of their booty. Afterward, however, they were discovered in Lagun, arrested by the Barbadoes, where they were lodged in jail to await their trial.

LATEST APPEARANCE OF THE SEA SERPENT.—On Adams, of the schooner, Lucy and Jane, gives an account in a late Florida paper, of having, during a recent trip from New York to the Gulf, fallen in with a wonderful creature, supposed to be the sea serpent, about which so much has been said and written for twenty years past. He states that, on the morning of Sunday the 18th of February, when off the South point of Cumberland Island, the attention of those on board was suddenly riveted upon an immense sea monster, which took to be a serpent. It was of a dirty brown color, had a tail like a snake, was provided with a formidable pair of claws or fins, and was supposed to be about ninety feet long, and seven feet across the broadest part of the back. At one time it shot above the bows of the schooner; but the Captain, unwilling to come in actual collision with his snakeship, prudently sheered off, and took a different course.

MARVELOUS COINCIDENCES.—One of those remarkable cases of presentiment, or "second sight," that have occurred at intervals to the confusion of all human speculation in every age of the world, has just been brought to our knowledge in our city. The daughter of a highly respectable family, a child of some 12 years, who has been ill of fever for some days, told her parents, in a paroxysm of delirium on Monday evening, that her brother, who was on board the packet ship Devonshire coming from London, was then within 20 miles from home, and had with him sundry presents for them, specifying among other things, five books with red covers, gilt edges, &c. The vessel arrived next morning, and the return of the brother with the specified presents verified the truth of her marvelous impression. When the brother entered her chamber, she recognized him at once, and on the instant inquired concerning the presents which she said she had dreamed of; when he confirmed her prediction in every particular. She then immediately relapsed into delirium.

Such cases—not altogether rare in human experience—are greedily seized by the charlatans and Simon Maguses, found in all times and countries, in order to practice upon ignorant and credulous people, and only in field in which they can hope to win the rewards of imposture.—Newark Daily Advertiser.

An Unknown World—English in Eastern Africa—Its Fatal Climate. Quite recently the English have made a settlement at Aden, near the Red Sea. Having once obtained a foothold, they, English as well as Americans, have been endeavoring their first discoveries was a river, whose course was marked upon any chart, and upon this they steamed 300 miles without finding the least obstruction. Having now passed round this continent, let us look up in the interior. For half a century the English government have been expending lives and treasures in a vain exploration. They have found that this whole part of the continent is one of amazing fertility and beauty, abounding in gold and all sorts of tropical vegetation. There are hundreds of woods, invaluable for dyeing and architectural purposes, not found in other portions of the world. Through it for thousands of miles sweeps a river, from three to six miles broad, with clear water, and of unsurpassed depth, flowing on at a rate of two or three miles an hour, without rock, shoal, or snag to interrupt its navigation. Other rivers pour into this tributary waters of such volume as must have required hundreds of miles to be collected, yet they were scarcely to enlarge it.—This river pours its waters into the Atlantic, and the most magnificent delta in the world, consisting of a number of branches, extending probably five hundred miles along the coast, and mostly broad, deep, and navigable for steamboats. Upon this river are scattered cities, some of which are estimated to contain a million of inhabitants, and the whole country teems with a dense population.

Far in the very heart of the continent is a nation in an advanced state of civilization.—The grandeur and beauty of portions of the country through which the Niger makes its sweeping circuit, are indescribable. In many places its banks rise boldly a thousand feet, thickly covered with the richest vegetation of tropical climes. But all this vast and sublime country, so fertile and so beautiful, and so romantic by the sea, is apparently shut out forever from the world. It is the negro's possession. He need not fear the incursions of the white man there, for over this whole lovely country, moves one dread malady, and to the white man it is the "valley of the shadow of death." In expeditions sent out from the English port on the island of Ascension, not one man in ten has returned alive; and many fallen victims to this seemingly beautiful country. It seems impossible for an Englishman to breathe that air. So dreadful is it—so small the chance of life, that criminals in England have been offered pardon on condition of volunteering in this service, more terrible than that of gathering the poison from the fabled Uhu. This country, tempting as it is, can only be penetrated at the risk of life, and it is melancholy to think that those who have given us even the meagre information that we have do so at the sacrifice of their lives.—Sammond's Colonial Magazine.

AMERICAN DEMOCRACY IN FRANCE.—Mr. Frederick Galliard, writing to the "Courier and States Union" from Paris, speaks as follows concerning the discussion of the law for the suppression of Clubs:—"The partisans of the suppression have examined from the History of the United States the judgment formerly borne by Washington against clubs; The National and Reform journals are denouncing Washington as an aristocrat, and opposing to his opinions those of Jefferson, quite the reverse. We shall see which of these two apostles of American Democracy will be sustained by our Assembly."

AURORA BRANCH RAIL ROAD.—We see that the engineers are engaged in making a survey for this work, and the inhabitants are sanguine that it will be constructed. We hope they may do it.—Peop. Plat.

A telegraphic report from Cleveland says:—"The Mammoth Steamer Empire State left Buffalo yesterday afternoon, and arrived at Cleveland this morning, having passed, on her passage, Steamer Niagara, Hendrick Hudson, Troy, &c., which left Buffalo five hours ahead; thus more than sustaining her reputation as the fastest boat on the lakes."

NAPOLÉON'S SON.—Austria has ordered the remains of Napoleon's son, the late Duke of Reichstadt, to be placed at the disposal of France in order that they may be united with the remains of his father in the Church of the Invalides.

From Washington—Appointments. New York, April 19—6 P. M. The Washington correspondent of the Commercial Advertiser, says:—"It was on Saturday resolved to tender to Dr. Foote, of Buffalo, the editor of the Commercial Advertiser, the place of Charge to Bagots, made vacant by the death of Mr. Bidack. As Mr. Foote was understood to be an applicant for an appointment of the same grade to Constantinople, it is probable that he will accept this offer."

The same letter says that Gen. Taylor lately said to an applicant for the office, he intended to appoint his old friend, Gen. Van Rensselaer Post Master at Albany.

The Washington Whig of yesterday, says that Mrs. J. Q. Adams was laying dangerously ill.

From Mexico—Protecol. The Picayune of the 10th, contains the following letter from Mexico:—"The Mexican Congress had passed a bill to the Pope of Rome a donation of \$25,000."

The Protocol had been taken up in the Senate by Almonet, and after being considered in secret session, a bill was taken up on the 21st ult., and passed, authorizing the President to forestall matters by borrowing \$150,000—the three million indemnity to be paid in money from the U. S.

State of Trade. DAILY TRIBUNE OFFICE, Chicago, April 23. Nothing doing in the streets, even in the Family Provision trade. No changes have taken place since Saturday.

Milwaukee Market, April 20. Winter wheat 58.64; spring 50.56. Flour by the load, \$3.62, at retail \$3.75; 4.00; Pork \$4.00; Potatoes 56; Oats 20.22; Salt \$1.25. Land warrants are selling at \$110.12—Wisconsin.

St. Louis Market, April 16. Tobacco—Sale of but eight hhds at the Planter's Warehouse to-day. Flour—Market still active. Sale of 200 bbls Cedar river mills at \$3.50; 500 Hanover at \$3.26; and 500 bbls second brand, city, at \$3.60.

Wheat—Same as on Saturday, with sales of between 1500 and 2000 bags at prices ranging from 45 to 76c, exclusive of salt. Corn—No large lots on the market; two small sales at 35c per bushel, new gunnies in closed. Oats—Sales of 250 sacks at 33c, sacks included. Groceries—Sales of 73 hhds fair sugar from the Levee, at 43c; 200 hhds molasses, 120 at 21c, and 80 reboiled, at 21c; 400 bags G. A. gal in lots at \$1.20.125.—Twp.

Port of Chicago. ARRIVED. 20th—Prop. Republic. Sch. J. C. Spencer, Muskegon—80 m. feet lumber. 23—Telegraph, Grand Haven—100 m. feet lumber. Sch. Roscius. Niagara. HARRIS, WOULD respectfully inform his old friends and patrons, and the public generally, that he has just returned from New York with the most extensive and superb assortment of Spring and Summer Goods ever introduced into this market, and which he is in readiness to make up in the most approved and fashionable style, and at prices corresponding with the exigency of the times. Persons wishing a splendid outfit, therefore, would do well to call and examine his extensive stock of goods before purchasing elsewhere. ag23

MESH ARRIVALS. MECHANICS, HO: JUST RECEIVED, at the NEW YORK HARDWARE STORE of Edwin Hunt 181 Lake Street, a full and general assortment of Carpenter's Tools, which will be sold very low. April 20-df.

REMOVAL. W. B. BURBANK will remove, May 1st, to 171 Lake St., " Masonic Hall Building." WHITE WASHING DONE in the best manner and on shortest notice. Coloring of various kinds, and warranted fast colors, by GEORGE BASSETT; Residence on Sherman street, first block south of Jackson st. April 18-dw

SUPERIOR BLACK INK in 3, 4, 6 and 8 oz. bottles, by the gross or dozen, at manufacturer's prices, by S. SAWYER, 124 Lake st. March 2.

Only one 25 Cent Box.

Corat, McHenry county, Ill., March 10, 1849. Dr. W. H. Sloan—Dear Sir: Prompted by a sense of duty and justice to you, and desiring to benefit the afflicted, I transmit you the following test: My son, 7 years old, was attacked with a swelling of his thigh. We applied many popular remedies, which not only failed to afford relief, but appeared to increase the irritation. The muscles became so much contracted that the limb was drawn up at the knee, and could not be straightened. The limb changed to a dark purple color, and the swelling increased until we thought the skin would burst. His appetite was gone, and it was with difficulty that he could sit up five minutes without fainting. We lost all hope of his recovery without the loss of his leg, and very little expectation of saving his life. I was advised to try your Ointment. To our astonishment, in twelve hours he was so much relieved that he could sit up in the bed some time, and in less than 24 hours he straightened his leg with ease. The third day he could walk with little help across the room, and in a short time the swelling all disappeared. The leg resumed its natural color, leaving not a trace of any kind of disease. This almost miraculous cure was effected by the use of only one 25 cent box of your valuable Ointment. To some, the foregoing statement may appear incredible, nevertheless it is strictly true, and can be proved by many who were eye witnesses. Yours, with respect, M. W. RAYMOND.

CHICAGO THEATRE, RANDOLPH STREET, ONE DOOR FROM THE CORNER OF DEARBORN. OPEN FOR THE SEASON, 1849. FULL AND EFFICIENT COMPANY. EXCELLENT ORCHESTRA. SPLENDID SCENERY. MAGNIFICENT ENTERTAINMENT EVERY EVENING. Doors open at 7 1/2—Performances commence at 8 o'clock. Admittance to Box 50 cents—Tilt 25 cents.
