# If Your Child "Eats Poorly" In Summer

Here's a Way to Make Him Hungry Even for Vegetables and Milk

I have used Ovaltine with perfect results for stimulating the appetites of my two children, one five and the other three. They seem to eat better and are able to assimilate their food much better than usual. Both my children are very fond of Ovaltine and in my own case I find a cup of hot Ovaltine at night helps me to sleep and rest better.

This Swiss Food Discovery By Actually Creating The Sensation of Hunger Offsets Loss of Appetite In Summer . . . Adds Weight At The Rate of A Pound A Week. . . Curbs Nervousness Remarkably  
Accept a Trial Package—Note the Coupon Below

LOSS of appetite in summer is not natural in a child; for the vacation rest-period is the one time above all when a child should be storing up energy and replenishing his vital-reserve. When he should be compensating for the drain of the previous school year and building up for the next.

So if your child eats poorly in summer, try this remarkable way to make "finicky" eaters eat! A way that does not merely

tempt the appetite—but which actually creates the sensation of hunger.

Immediately you start, you'll note the difference. Meal-time fussing becomes a thing of the past. Not only will you find your child eager to eat (even such foods as spinach, carrots and lettuce)—but you'll find him willing to drink double the usual amount of milk each day.

A remarkable food discovery from Switzerland will achieve this result for your child. It is called Ovaltine. In summer you simply give it shaken-up with cold milk. And children love its taste.

#### How It Literally "Creates" Hunger

Ovaltine is made by a special vacuum process, which makes it utterly different from any other food-drink in the world.

First: Besides being extremely nourishing and easy to digest, it is particularly rich in the appetite-producing Vitamin B.

Second: And much more important—Ovaltine contains a high proportion of a remarkable food property called "diastase." This substance has the power to digest the starch content of other foods in the stomach. Thus, Ovaltine will actually digest 4 to 5 times its own weight of the starch content of the other foods a child eats. And the diet of the average child contains about 60% of starchy foods.

Ovaltine not only aids a child's digestion, in this way, but speeds up the processes and empties the stomach sooner. This makes a child hungry. For hunger is largely a sensation caused by the walls of an empty stomach drawing together.

#### Quicker Digestion

This speeding up of the digestive processes is tremendously important. For specialists will tell you that the child with slow digestion is the one who eats poorly—who shuns vegetables—who objects to drinking milk.

But once digestive processes are accelerated by the diastatic action of Ovaltine, a definite change takes place. You see the result at once. The old objection to everyday foods gradually disappears. And even a "vegetable-hunger" is built up day by day.

Milk, too, is taken twice as readily when it is mixed with Ovaltine. And Ovaltine has a

#### FREE SHAKER

to shake up Cold Ovaltine as a Summer Drink

If you are giving your child Ovaltine now, send for this 50c professional shaker free. Use it to make a new and delightful cold shake-up-drink with Ovaltine. Note special offer in coupon below.

delicious taste that the fussiest child is unable to resist.

#### Start Today

For the sake of your child, we urge you to try Ovaltine. By doing so, you can make this a real health-summer for him.

Results will surprise you. Note the almost immediate difference in appetite—in the way he acts at meals. Note, too, the attendant increase in weight, in nerve poise and in strength.

Give Ovaltine at breakfast always—at meals and between meals. It is extremely economical to serve. For it is all food-concentrate—and contains no added sugar to give it bulk and cheapen its cost. You add your own sugar at home. So don't be misled if you're offered a sweet-tasting "sugar-mixture" substitute.

You can get Ovaltine at any drug or grocery store. Or send the coupon below for a generous trial supply . . . Notice the offer of a 50c professional shaker which is now being given free.

NOTE: Thousands of nervous people, men and women, are using Ovaltine to restore vitality when fatigued. It is also highly recommended by physicians for sleeplessness—for nursing mothers, convalescents, and the aged.

For the Child who Doesn't "Build Up" and Sleeps Poorly

My little girl was tall for her age, but couldn't seem to gain weight. However, since we started giving her Ovaltine she has developed a splendid healthy appetite and is filling out nicely. She really looks like a different child and sleeps much better, too. I always give her a glass of Ovaltine at bed-time and we never hear a peep out of her until 8:30 or 9:00 o'clock in the morning, when she knows it's time for breakfast—and more Ovaltine.

For the Child Who Is Underweight and Nervous

When I got my little girl's health report from school, she was 10 pounds underweight, so, as you can imagine, I was very much worried. I read about Ovaltine, and decided to give it a trial.

Anna, who is seven years old, gained 2 pounds the first 2 weeks. I think Ovaltine is a wonderful help to her nerves, and it makes her sleep soundly the whole night through.
