VERY FIFTH CAR SOLD in this country is a FORD Model T. The car the great majority has proven reliable must appeal to you.

One of the reasons why FORD Model T cars are so extremely popular, so extremely satisfactory, not only as pleasure cars, but as a business car, lies in the extreme simplicity of control. You know simplicity of control is not possible without simplicity in design. This is one of the marked tributes to the marvelous mechanical genius of Henry Ford in designing a car so perfect for the purpose, and yet so simple, that anybody of ordinary sense can quickly understand every part of it.

There is nothing intricate, there is not much to it, a few parts, and every part specifically designed for a purpose, and that purpose plainly observable, plainly understandable. The owner of a FORD Model T is never "stuck" by any mysteries in the construction and operation of his car. He has no puzzling problems to face. The motor is as easy to understand as an old fashioned dasher churn, and it produces a power in excess of any other motor of the same size.
