BANKS OF STATE SHOW INCREASE

BUSINESS AND FINANCIAL INTERESTS CONTINUE TO GAIN IN PROSPERITY.

TWENTY ARE CHARTERED

Banking Commissioner E. H. Doyle Has Just Issued Report on Michigan Institutions Covering Period Ending Sept. 1.

Lansing.—Michigan's financial and business interests continue to show an increase in prosperity, according to figures and statements made in the report of the condition of state banks and trust companies by the banking commissioner E. H. Doyle.

The total banking capital surplus, undivided profits and deposits of 12 state banks, three trust companies and three national banks in Detroit has increased since June 7, \$5,105,038.35. In this connection, reference is made to the increase, although during the summer months nearly \$1,000,000 was withdrawn from Detroit banks by country bankers for the purpose of moving crops, which shows the development of the city's manufacturing interests.

In the state there was an increase since the report of June 7 of \$9,734,483.77 in loans by state banks, and an increase of \$5,693,807.83 in deposits and an increase during the year of \$23,531,193.31 in loans and \$28,531,193.31 in deposits, while the capital stock of these banks has been increased \$3,026,430, either by an increase of capital of established banks or the organization of new institutions.

Aigrettes May Be Worn by Women. Michigan women who will may continue to wear the beautiful aigrettes which were torn from the bodies of white-tailed eagles for the adornment of their hats. At the suggestion of State Game Warden Oates, the attorney general's department has been examining the law to ascertain if it were not possible to prohibit the sale, having in possession of the wonderful plumage, which are secured by killing the birds at breeding time when every nest is occupied by little birds, thus left to starve.

The law, however, will not cover Attorney General Kuhn having furnished the warden with an opinion to that effect. "I understand," reads the opinion, "that an aigrette was at one time a part or portion of the plumage of a bird, and also that in its finished stage it is a distinct article of manufacture and trade and sold under a distinctive name. It is my opinion that as such distinct articles of manufacture and trade they have lost their identity as a part of a game or non-game bird within the meaning of the statute. There are a vast number of articles of trade which in whole or part represent part of some animal or bird protected by the laws of this state, and in my opinion, I can direct your attention to no better illustration than knife handles made from the antlers of deer."

Druggists Will Fight Cork Law. Strong opposition is being formulated in the western part of the state to be presented to the annual meeting of the Michigan Retail Druggists' association, which meets in Flint October 5, against the new state law requiring a special kind of cork in bottles containing poisonous mixtures. It is declared that already plans are being formulated to provide for a test case in the courts.

The announcement of the nominations, the choices of which were made during the meeting of the committee recently held here for the first time as follows: President, D. D. Alton of Fremont; F. E. Curtis of Grand Rapids; C. H. Longgan of Grand Rapids; first vice-president, J. D. Gillo of Pomperly; Charles H. Michigan Patents.

Michigan patents were issued as follows: Nelson A. Austin, Spring Arbor, molding shingles; Lewis A. Aspinwall, Jackson, bee hive; Kolevi-Bolesy, Cedarville, hand wrench; Auguste A. Cadie, Detroit, tick vending machine; Albert Dudley, Menominee, wrench; David H. Evans, Detroit, lock device for controlling levers of motors; John Kerwin, Detroit, surface grinder; Luther V. Moulton and P. A. Jones, Grand Rapids, starter for internal combustion engines.

Tax Commission Completes Report.

The special tax commission made up of Attorney Roger I. Wykes of Grand Rapids; Prof. Adams, University of Michigan, and Patrick H. Kelley, Lansing, have completed their report, which it is supposed Governor Osborn will submit to a special session of the legislature in January, with the exception of a recommendation as to the assessment of mining property, upon which point the members of the commission are at sea and looking for assistance.

Governor Osborn's object in securing a special tax commission was to have it devise a corporation tax and recommend such other changes in the existing tax laws that the moneys derived from them might be diverted to the general fund of the state and thus reduce the state tax. In a general way the recommendations of the committee will be as follows:

Taxation of corporations for state purposes on so-called "intangible values," which will be arrived at by capitalizing the net earnings and subtracting the assessed physical valuation upon which corporations now pay taxes.

Increasing the inheritance tax so that the state will realize \$1,000,000 a year instead of \$450,000 as at present and diverting this money from the primary school fund to the general fund.

Taxing interurban electric railway property by the same method as railroad property is now generally taxed and compelling such property to pay the average rate, instead of being taxed locally. The money thus derived to be also placed in the general fund of the state.

In dealing with the corporation tax proposition the commission has secured much data showing where numerous automobile companies and other corporations are assessed at only a fraction of their real value, while at the same time they are paying enormous dividends. Members of the commission admit that the report will advocate the adoption of the corporation tax system which has been in vogue in Massachusetts since 1865 and from which the state gets \$9,000,000 a year, which is turned back to the various counties instead of being used to defray the expenses of the state as the Michigan commission will recommend.

To illustrate the working out of the corporation tax P. H. Kelley of Lansing worked out the following example: "Suppose a corporation is assessed on its physical property at \$1,000 and that it pays \$500 dividends a year. If the dividend were capitalized at 10 per cent, that would make the value of the corporation based on earnings \$5,000. From the latter amount subtract the physical value and it would leave \$4,000, the amount that would pay the average rate for state purposes."

Village of Mio May Go Thirsty. Officials of the state of Michigan have discovered that the state owns the site of a water station from which the village of Mio, Oscoda county, secures its water supply. No one knew of the state's ownership until one day last week, and no one knows now just what is included in its title or what the state can do with its property of this character.

The property consists of 40 acres of land in the center of which is a pumping station operated by a private corporation to pump water from several wells located on the tract for the benefit of residents of Mio. The property comes into the possession of the state through the failure of the owner, who is a stockholder in the water company to pay his taxes. Under the provision of the law, after the estate has waited for five years for the owner to redeem the land, the title passes to the state, and this period having passed the state land department sent an employe to look over the land.

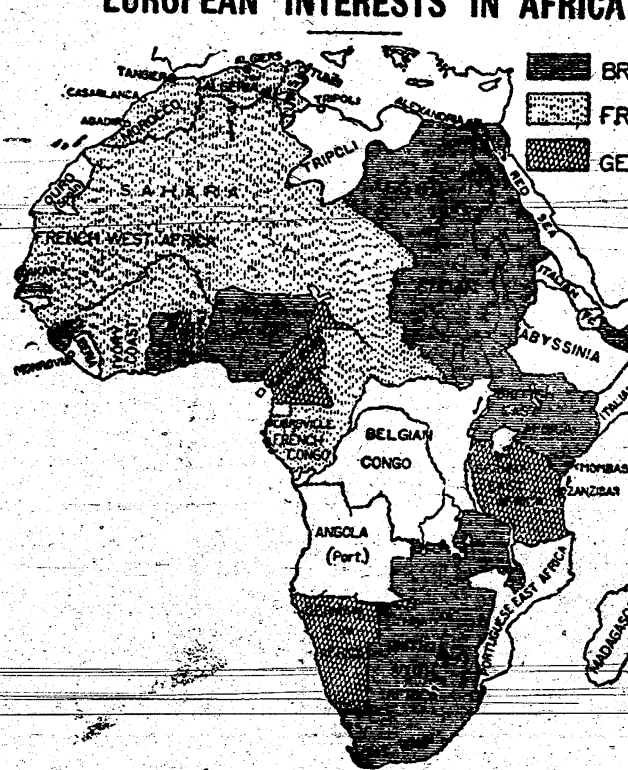

New Corporations. New corporations filing articles with the secretary of state are: Smith & Baldrige Machine company, Detroit, increase from \$50,000 to \$90,000; Michigan & Indiana Traction company, Battle Creek, \$500,000; Michigan Leather Packing company, Detroit, \$5,000; stockholders, S. C. Leonard and G. Maloney, W. R. Leonard; Peninsula Land & Orchard company, Bitely, \$1,000.

Will Plan for 1912 Campaign. State Chairman Frank Knox issued a call for a special meeting of the Republican state central committee to be held in Grand Rapids October 5.

The purpose of the meeting, according to Chairman Knox, is to give the committee an opportunity to go over the work done along organizational lines since the close of the 1910 campaign, and to plan for the presidential campaign of 1912. He strongly favors the committee undertaking the organization of Republican clubs in each of the counties of the state and the holding of a banquet during the approaching winter season.

Trading Stamp Co. Fights State Law. Whether a state legislative body has the right to pass laws promoting the general comfort, convenience and welfare of its citizens; and if so, whether the police power of the state is sufficient to enforce such laws, are the two main questions being submitted to Federal Judges Denison, Knappen and Angell. The case being heard is that of the Sperry & Hutchinson Trading Stamp company of New York against Franz C. Kuhn, attorney general of Michigan.

200 DIE IN FLOOD

BIG DAM BURSTS AND TWO PENNSYLVANIA TOWNS ARE IN RUINS.

MANY ARE BURNED TO DEATH

Austin and Costello Nearly Wiped Out When Raging Torrent Sweeps Through Without Warning—Cold and Hunger Add to Horror.

Austin, Pa., Oct. 2.—Two hundred or more of the 2,500 residents of this town were drowned and untold numbers were maimed when the great dam of the Bayless Pulp and Paper company, holding back more than 500,000,000 gallons of water, went out.

It is estimated that of the 675 houses in the village 500 have been swept away. Nearly all were dwellings and it is fair to presume that at least one person was in each of them. This would bring the total to 500 persons lost.

Number of Dead Uncertain. As a matter of fact no one can estimate with accuracy the loss of life. Until the debris is cleared away, until the last pile of burning refuse has been examined and the charred bones of those who died by fire as well as those who met death by drowning have been counted and the number reported missing tabulated, the number of dead will not be known.

Costello, three miles below this place, is another Austin on a smaller scale. It nestled, with its 500 inhabitants, in the Sinebuboning valley. It looks as though some gigantic force had picked up the town and carried it away bodily and strewn its rubbish on its site. The number of dead there is not large.

Between Austin and Costello and far below bodies are strewn along the banks of the Sinebuboning creek. Disaster Comes Without Warning. The most stupendous disaster of its kind since the Johnstown flood, the catastrophe descended upon the inhabitants of the town almost without warning. The huge dam which caused it had been built two years at the head of the valley, formed by Free-man Run, in which Austin lies. The basin, with its wall 500 feet long and 19 feet high, had never been filled until recent rains brought the water in to the brim. Many persons from Austin and the surrounding country visited it to view the unusual sight of the basin filled.

As the crowd viewed, there came a sudden report. A hole appeared in the wall near the top of the east end. The next moment water trickled through. In another moment the hole was 20 feet wide. There was another report and the structure crumbled.

Engineer Gives Alarm. Screaming a futile warning, with the town and its unsuspecting population a mile and a half away, all fled to the hills. Harry Davis, a locomotive engineer, rushed to a house on the hill.

"For God's sake warn the town," the dam has burst," he shouted to Margaret Decker, stenographer for the Bayless Pulp and Paper company, as she sat in the office of the mills. But Margaret Decker laughed after the manner of a young woman that thinks she is being made the butt of a practical joke.

"Warn the town the dam has burst," came the cry again. Once more the girl laughed and as no further words came over the wire she hung up the receiver. But she told a clerk. In an instant he had called up the car shops a mile away and its whistle a second later gave a brief blast of warning. Almost before its echoes had ceased to reverberate between the hills of the Alleghenies, the torrent from a collapsed dam, 500,000,000 gallons of water, was swirling through the town carrying all before it.

Gas Mains Burst and Burn. A dangerous situation developed immediately. Austin is piped for natural gas and the great force of the flood tore the mains from the streets. One of them, the largest pipe in the town, burst in the business section. A moment afterward the gas rushed out and in a twinkling it had taken fire. In ten minutes a dozen other gas pipes had burst and were pouring their deadly inflammable fluid into the air.

One of them, the largest pipe in the town, burst in the business section. A moment afterward the gas rushed out and in a twinkling it had taken fire. In ten minutes a dozen other gas pipes had burst and were pouring their deadly inflammable fluid into the air.

GOV. OSBORN FREES MORE CONVICTS

PRESENT GOVERNOR HAS BEEN CLEANING UP MORE LEFT-OVER PRISON BUSINESS.

EIGHT "LIFERS" AMONG THE MEN WHO HAVE BEEN PAROLED.

A Total of Thirty-Five Convicts Let Go and Twenty-Six More Given Conditional Pardons.

According to the records Gov. Osborn has paroled 35 prisoners, who were confined in the various penal institutions of the state, and has granted pardons, many of them conditional, to 26 other prisoners.

The figures do not include any of the prisoners set free through action of the state board of pardons, but in a great many cases the chief executive, acting on recommendation of the pardon board, released certain prisoners.

The claim is made that many prisoners repent of their crimes and would make model citizens were they released an hour after being confined in prison. Gov. Osborn, however, not made any release of this nature, and of the number who have been given their freedom through executive clemency there apparently was a sufficient reason in every case.

FAST FREIGHTS TO U. P. Detroit Merchants Will Be Able to Ship Goods to North Ahead of Chicago.

Arrangements are under way for a package car freight service into the principal points of the upper peninsula which in the future will make it possible for the merchant of Detroit and the upper peninsula to trade with each other without the delays of the past, which made it all but absolutely necessary for the Chicago market to get all of the upper peninsula business.

St. Ignace, Marquette and Calumet will be reached with a second morning delivery, and Houghton, Michigan, Ishpeming and Negaunee the third day.

Under the new schedule to upper peninsula points the necessity to bill by way of Chicago, where from within two days are always lost in shipping, will be done away with.

Women Finally Reject "Kimmel" Mrs. Estelle Kimmel, mother of the fugitive George A. Kimmel, who declares that "George A. Kimmel" is not her son, left for Chicago in company with her daughter, Mrs. Edna M. Bonslet, to recuperate after the long ordeal over trying to either prove or disprove that the Man of Mystery, the Human Enigma, is her son.

If the man proves to be her son she will not get \$25,000 life insurance until he "dies again." The long conference held Sunday between the man and the two women did not settle the mystery as to whether the man is what he claims; that is, did not settle it satisfactorily to all concerned. All incidents in the life of the real Kimmel mentioned by the women had no place in the memory of the man; and all supposed incidents related by "Kimmel" had no place in the memory of the women.

After the conference the women declared again that the man was not the real Kimmel, the banker who disappeared 13 years ago.

Rain May Ruin Sugar Beet Output. Favored by excellent growing weather all summer and with thousands of tons of beets in the fields and sheds ready for the machinery to start and commence slicing operations the sugar beet industry has suffered one of the most severe setbacks that it has ever encountered because of excessive rains on beets in the field and near the weighing stations. It is reported that in eastern Michigan looked out and saw another drizzling rain that started early Saturday evening and kept it up, thoroughly soaking and rotting the beets in several different counties. Steady rain on the Trestly pulled and tender meat of the beets tends to produce a rot. The work had gone forth to open the Garrington plant of the Michigan Sugar company, but the opening has been postponed.

State Teachers to Meet in Detroit. Wayne Gardens and the Light Guard armory, the two largest assembly rooms in Detroit, have been requisitioned for the great gathering of Michigan teachers which will begin on November 2 and 3, the occasion being the annual convention. Eight thousand teachers are expected to be in attendance. Similar programs will be given in both places, with double performances by musicians and speakers.

All freight rates from Atlantic seaboard to Escanaba, Mich., on all east-bound freights, were attacked as excessive and discriminatory, and a 12 to 20 per cent reduction asked, by the Business Men's association of Escanaba.

Felix Gallagher, Kalamazoo cigar dealer, read in the paper of the death of John Gallagher, and thinking that it might be his father, went to the hospital; where he recognized the remains as those of his parent. He had not seen him in the last 14 years and when he heard of his death five years ago he was in Chamberburg, Pa.

Koenig Friedrich August Driven From Moorings by Gale—Many Passengers Are Aboard. Boulouge, Oct. 2.—The steamship Koenig Friedrich August of the Hamburg-American line, plying between European and South American ports, was driven from its moorings by a gale. It stranded on a sandy bottom inside the breakwater. The steamer carried many passengers.

MICHIGAN NEWS IN BRIEF

It cost Kalamazoo \$2,100 to entertain President Taft.

The price of sugar has dropped 75 cents per hundred pounds.

The postoffice at Bridgeport was broken into and all the money in the place \$15, taken.

Petitions have been posted by the anti-local option forces in Owosso for a re-submission of the liquor question next spring.

Mrs. William Houle, of Bay City, 52, and grandchild were burned to death when the former tried to start a fire with coal oil.

The Muskegon and Oceana bargave a banquet in honor of Judge Sessions, who retires from the bench to accept a federal judgeship.

Richard Manokottel, 25, married, was killed when a syrup tank fell on him at the Bay City beet sugar plant. He lived half an hour.

Bankruptcy proceedings based on a creditor's petition have been instituted in United States district court against the Van Motor Car Co. of Grand Rapids.

Seven men were arid in Lake Michigan all night in a motor boat near Manistee, following the breaking down of their engine. The wind changed and drove them back to the shore.

Fifty delegates of the Shouby family from the country over were in Benton Harbor to attend a representative reunion of the clan at the home of Furely E. Shouby, peppermint grower.

Following a conference between George Sweet's attorney and the creditors and their attorney at Jackson the examination of the former Mault and Whitmore Lake banker was adjourned.

It is said a serious breach is threatened because Pro. George Burman Foster, of Chicago university, occupied recently the pulpit of Fount Street Baptist church, Grand Rapids, which caused ill feeling at the Tabernacle.

Paradise township, the last in Grand Traverse county to vote money for good roads, voted \$1,000. All townships will now carry on the good roads campaign at once, being the first county in the state with such a record.

B. H. Bayleff, of Detroit, has asked the courts for a receiver to be appointed for the North American construction Co., manufacturers of knock-down houses. He says he owns one-fourth of the stock and does not receive any profits.

The produce dealers in Saginaw are complaining that it is impossible to get enough refrigerator cars to move crops and that the cabbage crop, which is unusually large this year, is suffering particularly because it is not possible to market it.

The Mason County Horticultural association are planning a fruit exhibit and apple show to be held in Ludington, Michigan, in December. Experts in fruit growing from this and neighboring states are to be in attendance to judge the fruit.

Barney Julius, a former prosperous Albion merchant, who left Chicago in 1904 and never returned, has been declared legally dead. He carried life insurance amounting to \$3,000, and the company refused to pay the widow until he was declared dead.

American Society of Municipal Improvements, in session in Grand Rapids, elected E. A. Kingley, of Little Rock, Ark., president; Edward H. Christ, Grand Rapids, second vice president; Prescott Polwell, New York, secretary. Dallas, Tex., secured the 1912 convention.

Kansas may properly be designated the Sunflower state, but it is believed that even it has been outdone this year by upper Michigan. At least its question and that of the southwestern commonwealth has produced a sunflower plant three times the height of the grower. That is an upper Michigan record registered this season. Mrs. George Giosser has in blossom in her yard at Sault Ste. Marie a huge sunflower plant the stalk of which towers 15 feet 3 inches.

There recently was advanced the claim that throughout the upper peninsula of Michigan the chestnut tree existed. This in the yard of William Bacon, at Sault Ste. Marie, and the fact that it has been heavily this year was held to demonstrate that raising chestnuts in the Lake Superior region was altogether feasible. It has developed that John Parker, an old-time great lakes navigator, has in his yard at Ontonagon, five trees of the same kind and that each season for several years with them have been heavily laden with nuts. The trees were raised from sprouts brought from the east.

Within an hour after Receiver Snover of the United Home Protectors' fraternity of Port Huron had received \$43,083 from the state treasury, checks had been mailed for the amounts of dividends to the various stockholders of the fraternity, about 1,800 in number. The distribution of the fourth dividend of the defunct order gives the stockholders 40 per cent of their investment. The receiver believes that another dividend will be paid within a few months, bringing the amount returned to the stockholders to one-half of their investment. The checks sent out ranged in amount from 42 cents to over \$600.

The Michigan conference of the United Presbyterian church celebrated the fiftyth anniversary of the organization of the conference in Grand Rapids. It was decided not to divide the state into two districts, and Rev. C. F. Hopkins, of Grand Rapids, was retained as presiding elder.

Carl E. Schmidt, of Detroit, tendered \$1,000 to the U. M. to establish a fellowship in the art of tanning. The regents passed a resolution asking the students' council to aid them in planning for the diamond anniversary, which is to be observed in 1912.

WHY SO MANY FARMERS ARE BUYING THE CARTERCAR

There are many good reasons why the Cartercar is being universally accepted by the farmers as the ideal car for their purpose. It is simplicity itself—every a boy can operate and care for the Cartercar without injuring it in the least. This wonderful simplicity combined with extra strong working parts insure absolute reliability. The Cartercar is ready all the time—day or night—for the signal to go.

The Cartercar is powerful—but it is meant that it will climb almost any hill, even a 50 per cent grade, and will go through very bad, muddy or sandy roads. The farmer can drive his Cartercar out in stubble fields or pastures, across brooks, and he knows that his car will always go right along.

The remarkable pulling power of the Cartercar is because of the efficient friction transmission. This is merely a friction disc which runs against a fibre-faced wheel—the relative position regulating the speed of the car. The Cartercar driver has any number of speeds and THEY ARE ALL CONTROLLED BY ONE LEVER.

The Cartercar will speed along braking everything on the road—or will creep along behind a flock of sheep or drove of cattle, never crowding or rushing them.

The wonderful easy control makes the Cartercar ideal for the ladies' drive. The few parts make it very easy for them to learn to operate it—and prevents them getting frightened. The easy control is supplemented by very strong brakes. In addition to these regular brakes the driver also has the friction reverse, which makes it so easy to stop on the market today. The friction reverse is only available on friction driven cars.

Another excellent feature of the Cartercar is the Chain-Lo-Oil Drive. The chain runs continually in a heavy oil—and the chain case being gripped and sealed tight, practically all wear on the chain is prevented. The elegance and remarkably attractive appearance of the Cartercar also makes a very strong appeal to the farmer. A glance at the above cut will convince you of its beauty. The extra heavy upholstery on the seats makes it almost an impossibility for a person to tire while riding in the Cartercar.

Think over these facts we have given and see if they answer the requirements you would make of an automobile. We know that when you understand the Cartercar you will be as enthusiastic as we are. Let us send you complete information regarding this ideal car for the country man.

A Personal Invitation to You, Mr. Farmer. I want to personally invite every reader of this advertisement to visit me here at the Detroit Branch of the Cartercar Company, and I will be very glad to explain carefully every detail of the Cartercar construction.

The farmers are delivering a large amount of wheat just now. Lonier & Hoffer's mill is full of grain. You, Mr. Farmer, O., are showing so one of the leading styles in coats in this advertisement this week.

It has been discovered that the law prohibits the selling or offering for sale of rabbits in this state as any day. The potato crop around here will be just a fair one. Farmers say that the weather was too dry for a good potato crop.

F. W. Brown & Co. who are doing uphisting in "Kapp's" truck, have a potential advertisement in the application this week. Meridian chapter A. M. received petitions last night and will confer before at the school of instruction to be held at the home of Mrs. J. J. Thompson.

After reviewing the list regarding Memory Day, the officials decided that it was not a legal holiday and it was not observed as such. If you are not a subscriber to the Enterprise and you get a sample copy, you may know that we want you to subscribe. Won't you do it?

The Cartercar Company. Factory at Pontiac, Mich. Branch, 1244-6-8 Woodward Ave., Detroit. Now for a Look at our new line of Dry Goods and Shoes. N-O-W is the time to buy your Fertilizer. Buy the Best, It's the Cheapest. Lonier & Hoffer. G. H. Breitenwischer. YOU HAVE A Monument or Memorial Do Not Put It Off Any Longer. A Monument or Memorial. Do Not Put It Off Any Longer. Binder Twine. 7 Cents. The GAREY-MORAN GRANITE CO. MANCHESTER, MICHIGAN. R. C. ORDWAY. Many of the Magazines raise their prices from \$1.00 to \$1.50 November 1st. Office at once and renew and save the advance. Come to the ENTERPRISE.

Published weekly at Manchester, Mich. By MAT D. BLOSSER. THURSDAY OCTOBER 6, 1911. BRIEF LOCAL ITEMS. Netting parties are numerous these fall days. Oorn hunking is in full swing. The crop is a good one. We had to issue a supplement this week to take care of advertisements. Farmers have been handling sugar beets. They are said to be of fine quality. The Michigan Milling Co. of Ann Arbor have a small advertisement this week.

A break in Lonier & Hoffer's mill some Sunday caused a little excitement but was soon remedied. Judge Kinney announced 33 applicants to citizenship on Monday, but we believe none were from Manchester. The farmers are delivering a large amount of wheat just now. Lonier & Hoffer's mill is full of grain.

BATTLE RAISING IN CHIRQUI

By FORDES LINDAY

THE portion of the Province of Chiriqui lying on the Pacific side of the Continental Divide and extending westward from the Rio Tamao contains the richest lands in the Republic of Panama. Of this area, the choicest section is the district of Chiriqui, known as the "Divina Country," including the districts of Atitlan, Boqueron and Bugaba. This superlative fertile region is situated between David, the capital of the province, and the Costa Rican border.

There is no finer agricultural land than it in the world. Along its play the coco palm thrives. A little farther east the admirably fertile sections are the alfalfa soil, combined with climate and drainage, make such perfect conditions for the growth of such crops as alfalfa, sugar cane, tobacco, fruits, tobacco, cacao, and rubber flourish, while in the mountain valleys the vegetables of the temperate zone and coffee of excellent quality are produced.

This country is admirably adapted to the purpose of raising the most valuable of all crops, the coffee. The climate is locally termed "dry" which means that it is free from frost and is free from the heavy rains which are so common in the tropics. Although the fields are not irrigated, and filled only in the most primitive manner, the crops are nevertheless abundant. Fruits, tobacco, cacao, and rubber flourish, while in the mountain valleys the vegetables of the temperate zone and coffee of excellent quality are produced.

The Costa Rican border. There is no finer agricultural land than it in the world. Along its play the coco palm thrives. A little farther east the admirably fertile sections are the alfalfa soil, combined with climate and drainage, make such perfect conditions for the growth of such crops as alfalfa, sugar cane, tobacco, fruits, tobacco, cacao, and rubber flourish, while in the mountain valleys the vegetables of the temperate zone and coffee of excellent quality are produced.

The climate of this section is subtropical and semi-arid. The temperature is about 75 degrees F., and the extreme variations do not exceed 10 per cent. In either direction. The humidity is moderate, and the rainfall is abundant. The soil is fertile and well adapted to the raising of such crops as alfalfa, sugar cane, tobacco, fruits, tobacco, cacao, and rubber flourish, while in the mountain valleys the vegetables of the temperate zone and coffee of excellent quality are produced.

The Life-Giving Stream

Lesson Text—Ezekiel 47:1-12
 MEMORY VERSE—"The water of life freely."—Ezekiel 47:1

THESE prophetic words of the life-giving stream were written by E. C. 312, "in the beginning of the year." It was read in the middle of the 70 years' captivity (480-538 B.C.) in the 12th year of the reign of Zedekiah, which was written 12 or 13 years before the fall of Jerusalem.

It was written at Tel-abab on the river Chebar in Babylonia. The prophet Ezekiel, who was a priest, was taken to the second part of Ezekiel's prophecies, the vision which was to be the basis of his return. It was the vision of the river of life which was to be the basis of his return. It was the vision of the river of life which was to be the basis of his return.

In our last lesson we studied the warnings by which God, through his prophet Ezekiel, would persuade Israel to return to God. It would not be necessary to permit Jerusalem and the Temple to be destroyed. The Temple was to be restored, and the people were to be gathered back to the land of Canaan. The best of the people, those in the greatest number, were to be gathered back to the land of Canaan.

There were at that time without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd.

There were at that time without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd.

There were at that time without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd.

There were at that time without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd.

There were at that time without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd. Their former rulers, whom God had placed as shepherds over his people, had been slain, and the people were as sheep without a shepherd.

Vocal Solo	Helen Behfuss
Piano Solo	Ernest Filber

"Spearshake"

Have you seen Mr. Brown,
The Upholstering Man,
Who does his work good
On the C. O. D. plan?
He'll upholster your chair, rocker or couch
And plenty of people stand ready to vouch
For his work, material and prices as well.
So give him your work
Or he'll go to some other place
His future to dwell.
He also renovates mattresses
And makes them up in shape;
So don't forget that Brown's in town
And doing business straight.

Dr. Kapp's Store, Railroad Street

Zemo Makes Astonishing Eczema Cures

"WE PROVE IT"

Every day ZEMO gives relief and cures men, women and children in every city and town in America whose skins are on fire with torturing ECZEMA rashes and other itching, burning, scaly, and crusted skin and scalp tumors.

ZEMO and ZEMO (ANTISEPTIC) SOAP, two refined preparations will give you such quick relief that you will feel like a new person.

We give you three reasons why we recommend and endorse ZEMO and ZEMO SOAP for all skin and scalp eruptions.

1st They are clean, scientific preparations that give universal satisfaction and are pleasant and agreeable to use at all times.

2nd They are not experiments, but are proven cures for every form of skin or scalp affections whether on infants or grown persons.

3rd They work on a new principle. They do not glaze over the surface, but they penetrate to the seat of the trouble and draw the germ life from underneath the skin and destroy it. In this way a complete cure is effected in any case of SKIN OR SCALP ERUPTION.

Endorsed and sold in Manchester by

Haenssler & Son's Drug Store
