## Men in the Engine Room

Mr. Hogmer accepted the advice and was prepared to act on it when he made a fourney to the city one day and sat in a chair care within a few feet of Miss Hlanche Ackworth, who resided in the next town above him. He said to himself that her age was about twenty; that her hair, was was appeared to act on it when he as the first wave rolled over it who restored in the next town above him. He said to himself that her age was about twenty; that her hair, was of their jumping overboard to reacue people. It's fo much per month and board. When a lot of plassengers start from New York for Albany by boat. When captain, made and care with a seem of the principal numbers would be a secondar by the organist.

\*\*What dide say, Tommy," asked of the firm of the principal numbers would be a secondar by the organist.

\*\*What dide say, Tommy," asked of the firm of the principal numbers would be the most the roll of the firm of the principal numbers would be the most the true Greetan, and that was been done to the secondar and the

not one seagoing vessel could show or vulgarised, or disappeared altogether auch a thing. A man who cannot walk or from their ken. If he resists the

about for four hours in the tempera-gree of a Turkish bath is not wanted result is often a curious mental combativeness which seems to arise out While the ship is at sea all the engineers except the chief keep two ments that he is supposed to meet—watches of four hours each in the an artisan with supposedly the preswatches or four hours each in the same with supposedly the preservementy-four. The same man always that the same hours. The third engineer takes the 12 to 4 a.m. and p. m. educated men strive to rise above seawatch, the second takes the 4 to 8 and faring. Examinations must be passed the chief's watch, 8 to 12, is taken by and they can only be entered for by the fourth engineer, or by the donkeyman, if there are only three engineers ice to their credit. Twelve months at carried. In this case the chief is always within call. The duties of watchkeeping largely lie in seeing that this tificate of competency—that is to say, or that does not happen. As well as the certificate which legally qualifies the main engines there are the pumps him to act as a second engineer or and other auxiliary machinery and the on a very small ship as chief engineer. boilers always seeking to go wrong if After obtaining that he must serve angiven a chance. Then in port all other year as engineer in regular that have been noted down as neces going steamship before he may sit for sary while the ship was steaming, and these entail the handling of tage mendous weights with hand tackle oil of any sort of vessel, from an excur-Such work does not seem very for- sion steamer to the last thing in At-

midable, perhaps, but seagoing engi-neers know that Commander Willetts, When he is "up for second" he has U. S. N., spoke truly of their work to pick out the answers to questions old the American Institute about, say, the temperature of the hot of Naval Engineers that "it requires well under imaginary and distressing up and was saying:
the most strenuous and exacting attence."

"You villain of the world, tell me When the recovered and dried-out."

"You villain of the world, tell me When the recovered and dried-out." the most strenuous and exacting atten- conditions dear to the hearts of exrequiring skill and intelligence to accomplish well, it has to be performed under such severe stresses and in such dirt and heat as to rob it of all interest except in its speedy completion.

In the Silent Hours.

An engineer does not readily forget his first voyage or that first night in the "graveyard" watch (12 to 4 a.m.) when he sat on a bucket to consider the novelty of his surroundings and revise the honorary exsminations — "extra when he sat on a bucket to consider the novelty of his surroundings and revise the heat, and woke up from a few seconds of troubled sleep to find a special course and of days of anxious vigilance over racing course rating days of anxious vigilance over racing days of anxious vigilance over racing course from she heat as to rob it of all interest conditions, when the propeller would be engines, when the brough the work of a person she had found him.

Bokhara was the rate map of the city proper. It was in Catha first point of touch with the outside world, and Spaulding had come there to raise money and of defenses on the banks and extending toward organize an expedition. This he had little trouble in doing, for all that part of the world has scription corresponds to the modern town been dreaming for centuries of the recovery of the treasures of the Khans. He was last heard yet other indications point to Leh in Kashmir on he and the men with him died somewhere in the great Amu Daria river, a stream as long as the The unadorned tale of the adventure of the

is rarely even heard of. two hill-men reads like a chapter from the "Arabian Nights." The two men belonged to a trading caravan and, being dissatisfied, left it and set out for Yarkand, which is a town on the Yarkand river, one of the main tributaries of the Tarim..a mighty stream draining a region twice the size of the state of Texas and emptying into the Lob Nor, which has no visible outlet. They got lost in the mountains and turned into a trail hewn in the rock wide enough for but two men to pass abreast and, traveling for some time along the defile, they came to a great cave with a number The entrance was a square, open portal, and

within were a series of tombs each with its pockets in the rock filled with many objects of great value. They said that they saw more than enough they could bring away with them was what they and many of these they lost before they found again the regular route to Yarkand. They made careful observations of the trail and left heaps of stones to mark it to a certainty. Even when defile, they came to a greta cave with a number of the value of their find. When discovered by Spaulding he had great difficulty in persuading them to go with him. He ared to organize an expedition in Yarkand, as they reached the market town they had no idea there was danger of his being murdered and robbed by the half-savage men he would have had to employ. There are many persons in the re-gion who believe that he found the tombs, secured

European accounts will trace out the location of Ciandu and recover the vast hidden fortunes? Some one will doubtless uncover a very large treasure in the natural course of events in o about the strange gigantic castle of Marid at El Jowf, Arabia. Every new advance made by the antiquarians and the Biblical scholars makes it Hitle more clear and certain that here lies hoard that is one of the richest in the world. In a large casis supporting the largest population of Northern Arabia El Jowf is a peculiarly isolated spot, best reached by riding from the Mecca pilgrimage rafiway or by caravan from Ithera. The castle stands to the north, a monster pile of ruined sandstone, now utterly deserted and feared and shunned by the Jofees of the re-

wealth ashore and came holdly out to fight the ordered into the small boats, without sloop-of-war Nestor, only to be blown out of the water on provisions. water by her guns. As nearly as this can be After towing aimlessly for two days
