"Owls" Blink at First Broadway Car

WHCAGO.—Chicago's first Broadway car ran through the loop district the other night, through the La Salle street tunnel, up Clark street, and out Broadway. It was the first evidence of the city's 567 varieties of new street names.

The car, with no sign save the unwonted "Broadway" displayed, swung around the loop at the alcoholic hour of 11:30, just when the most people

"Say, now, where'd that come from?" demanded one night owl of another on the curb, as No. 215 trundled by. "Lived here all my life an' didn't know we had a Broadway, let alone ear line on k."

Nobody could tell him. "Come on, Bill, here she is!" an triend. He tried very hard to walk straight, and asked as he paid both

of All Honor.

HETHER we look upon life as a voyage, a warfare or a journey, we know that the sailor, soldies or traveler is called upon to enlure hardship. There are storms on life's sea, battles on life's plains and steep and rugged places in life's pathway. In every conception of life the spirit of heroism is demanded.

The great admirals, the great commanders, the great pathinders in earth's history are not the only he roes, and indeed are not the greatest eroes in life's experience.

The great heroes and heroines are not those who subdue and rule over kingdoms, but those who gain dominion over self and adorn their lives with the princely virtues of courage and benevolence.

"He that ruleth his own spirit is greater than he that taketh a city' The meed of highest praise is due to those whose valiant souls have triumphed over the infirmity of lifelong invalidism, and through years of bodily pain and anguish have ceased not to minister to the wants of others First on the roll of honor are the heroes and heroines of the sick bed.

A picture rises before me of a room couch from which for many long years flowed a radiance of loving sym couch lies the frail body incasing the sublime spirit of Miss Jennie Cassaday of Louisville, Ky. In her early girlhood she met with an accident that placed her upon an invalid's bed for the remainder of her life. She organized what is known as the "Flower Mission," and every day for 25 years planned and directed the distribution of flowers to those in prisons and in hospitals.

Strength Often in Weski Her life was a beautiful expression of the heroism that may be found in the common, everyday life of men and women. We so often forget that there may be strength in weakness, and when we forget it we fail to be come heroes or heroines.

All may be heroes if they will. It is a question only of devotion and courage in discharging to the utmost limit the obligations of the brotherhood of man.

We all recognize and applaud the heroism of those who devote their time and energy to the uplift, to the comfort, to the cheer of their fellow-

GREATEST ASSET OF THE MERCHANT

Power of Reaching People by **Human Contact of Ines**timable Value.

Your thoughts may immediately turn to the stock of goods on hand, the store you own, the home around he corner or the bonds in the safety deposit vault when assets are under consideration.

Nothing as tangible as any of these will be discussed here, but when you have read this through, see if you don't believe that there is an asset worth more than the things already mentioned

This asset which cannot be inven toried and yet is worth more to many men than the goods in their store, is the power of reaching people by humcontact and interest. It doesn't sound like it is worth very much loes it? But wait.

have any conception of the interesting Here is a small store located near large department store in a certain The department store carries town. a full line of smaller merchant's goods, yet the latter has been in-America by the brave Dewey, was alcreasing his business each year since the department store started. The reason is only found in the fact that the Orient, lying midway between the newly opening territories of North China and the thickly populated pos-sessions of England in India. The Bahe is a likable, accommodating fellow with good business ability, and the friendliness of his nature has attracted people to his store and cause taan mountains loom on the left as you them to come there whenever the ness up the bay, forming a gigantic need makes a purchase necessary. barrier between the bay and the sea

His two clerks have imbued the town. Here was given Dewey's famous same spirit of good fellowship and customer of that store feels ready, Gridley,' which for all time that he has a real friend there to shattered the hopes of Spain for Orlwait on him and to suggest different ental power, and with the sinking of purchases, and to see that he gets her warships a rule of more than 300 the right goods at the right price.

Confidence in this man, in his clerks and in the goods they sell has brought into closer view. The first view from the boat is charming. It been inspired by the human interest and the personal contact between looks a tree-embowered city, the subthem and their customers. As purchasers we all like to there is a feeling of acquaintance and an atmosphere of friendship.

After all the best salesmen are de reloped under circumstances of this sort and there never has been any salesmanship than some that is manifested over the counters of the retail stores. It is strange that here can be found the worst features discouraging business and also the greatest use of that force, human element in developing business.

and at this point cars may be taken An analysis of the reasons for most sales in many successful stores has proven that this element entered "Manila is a city of churches, the largely into the transaction. TWO WAYS TO PROSPERITY

ful Competition Means Wealth **but United Boosting of Home** Town Also Pays.

There are two ways for a business an to become more prosperous. The first is by active competition among his neighbors. If he is a live one, he realizes to the full the law of life, that he must hustle, or young and brighter men will get ahead of him. He must get out after trade, or he

will get out of trade. But an additional prosperity can be equired, outside of whatever can be realized as the result of successful competition with your neighbors, by united afforts to make the home town grow. The advance of a whole community brings an accretion to every one who owns real estate or a business, or who has an income dependent

on the prosperity of his neighbors. This increment brings a new prosperity without much effort. As your houselot grows in value the more louses are built around it, so your business grows more valuable as more people read your advertising or pass

No man is doing his duty by his own ousiness, unless he sets apart a certain medicum of effort to be devoted to measures to make his home town

Any town can be made to grow by systematic and common ser to attract new residents and industries. Communities are like stores, it takes advertising to attract interest and attention.

, Often it is not advertising spread broadcast that lands new business. If every community does all it can to help its own young men who have new enterprises to start, it lays the founprosperous and bring people to the

tie them up or seal them. They will flight, the swaying oval before them be ready to eat in ten days or two weeks, but, of course, they are betthrown back against the trees already ter the longer they stand. .

MAKE THE DISHES DAINTY

Many Ways by Which the "Threw-Aways" May Be Used to Excellent Advantage.

We are so used to the term "leftover" that we can hardly realise that only a few years ago it did not exist. I would like to coin another word, the "throw-away," for those many bits that the unthinking housewife generally, puts into the garbage can. Instead of cheerfully peeling the cuslices, why not slice a long section the elliptical edge of the hangar, with from the side of the cucumber and an anticipation which held in it as scoop out the contents. This would easily make a cucumber "boat," and the pulp could be mixed with French dressing, chopped onion and topped with radishes. A little more time. but so much more attractive! same can be done with a half or the top of the pineapple. Scoop out the contents of the half, or a small section, and fill with a gelatine jelly, a pineapple whip, or a salad of cream cheese. There would be almost no extra trouble, and it would be more than repaid by the added attractiveness of the dish. The green leave of the cauliflower, if not faded, the tops of carrots, the peels of oranges. grapefruit and lemons, have some vorth as containers, and inste being "throw-aways" will add novalty and attractiveness to various

Mock olives made of green plums are worth making. Get a quarter of a

peck of them. Mix an ounce of mus-tard seed, two quarts of vinegar, two tablespoonfuls of salt and boil it. When it is boiling, pour it over the green plums, which should have been washed, sorted and taid out on a board table to dry. Let the plums stand in the spiced vinegar until the next it and nour it over the plums again. Let them get cold and bottle and cork

them.

If you want some fine vinegar, pure in quality and very tasty, make it from honey. Add a pound and a half of strained honey to a gallon of water. Then keep it in a warm place for a few not strong enough add more honey Three pounds of honey to a gallon of water is a good proportion. While not suited for all purposes, in the making f salads and for ordinary table mass there is nothing that can be compared

to honey vinegar. Sponge Pudding. Scald one pint of milk over boiling water and add one-half cup butter. Add a smooth thickening of one cup

of flour mixed with cold milk. Let it cool. When cold add the yolks of four eggs; have the whites beaten stiff. and stir in lightly. Bake an hour in a pan of water.

Cold Cauce—One-half cup butter,

one cup powdered sugar; four table-spoons of milk may be added and fa-

When Ironing Linen. Various substances are used to give linen a polish. A bit of wax or gum make added to the starch when holl ing makes a reliable foundation for a good polish. A laundry polish can scarcely be obtained without the use of a polishing iron. The articles to be polished are first fromed in the ordilary way, then damped by laying on them a wet cloth, then placed on a board and rubbed quickly with the

polishing from until they shine. Reef Loaf.

Beef loaf, served cold, is an inca pensive cold meat. Mix a pound fresh, chopped beef with half pound of fat salt pork chopped fine. Bind them together with an egg and add salt, pepper, a little grated onion and then half a cupful each of milk and cracker crumbs. Roll into a loaf hake for three-quarters hour, basting occasionally with hot water and melted butter.

Potatoes Baked on Top of the Range Potatoes may be baked on top of the range. Place an asbestos mat on ton of the range, and on this lay the potatoes, previously washed clean and dried. Cover with a deep pan, and in one hour you may eat a potato that is just bursting with mealiness. Turn them around occasionally.

First powder some lump starch and rub it well into the dirtiest parts; then roll the jersey up tightly and leave the starch in over night. The next morning shake and best out every bit of sarch and you will find the

sweater will be quite clean.

By ANNA KATHARINE GREEN AUTHOR OF THE LEAVENWORTH CASE THE PILICORE BALL THE HOUSE OF THE WISPERING PIRIES ILLUSTRATIONS DY CHARLES W. ROSSER SEVERER IN W. ESECULATION

SYNOPSIS

Chefmont norse, sook around years—wash his hands in the snow and years—Quammotion attracts them to the Clarmon where it is found that the beautiful Mill Bidth Challoner has fallen dead. Anderson describes the man he saw wash is hands in the snow. The hotel managidelares him to be Orlando Brotherson Physicians find that Miss Challoner we stabbed and not shot. Gryce, an aged descrive, and Sweetwater, his assistant take up the case. Mr. Challoner tells of hatch of letters found in his daughter deak, signad "O. B." All are love letter except one, which shows that the write was displeased. This letter was signify by Orlando—Brotherson. Anderson go with Sweetwater to identify. Brotherson with its found in a tenament under the name of Dunn. He is an inventor, Brotherson tells the coroner Miss Challoner I pulsed him with scorn when he offered his love. Sweetwater to dentify Brotherson tells the myste of the murder of a washerwoman in while some details were similar to the Challon affair. its love. Sweetwater recalls the mystery of the amreter of a washerwoman in which some details were similar to the Chailoner affair. Sweetwater gets lodgings in the same building with Brotherson. He bores as hole in the wall to spy on Brotherson. He visits him and assists the inventor in his work. A girl sent by Sweetwater with Edith Chailoner's letters is ordered out by Brotherson. He declares the isters were not written by him. Sweetwater, is unmasted by Brotherson, who declares he recognised him at once. The discovery is made that the letters signed "O. B." were written by two different men. Sweetwater goes to Derby in search of the second "O. B." whom he expects to locate through one Doris Scott, mentioned in the letters. She is found sitting as nurse for Owald Brotherson, who is critically sick and calls the name of Edith in his delirium. Sweetwater comes across a peculiar hut in the woodt. He sees a load of boxes marked "O. Brotherson." taken into the hut under the supervision of Doris Scott. Doris tells Challoner of seeing in a dream the contract of the men who Killed Edith. The woods. He sees a load of boxes marked "O. Brotherson." taken into the hut underthe supervision of Doris Scott. Doris tells Challoner of seeing in a dream the face of the man who killed Edith. The door bell rings and she recognizes in the visitor the man of her dream. It is Orlando Brotherson, who requests an interview with his brother. It develops that Orlando is working on a flying machine. Owald is told of Edith's death. Orlando tells his brother of his repulse by Miss Challoner. Orlando saks his brother to assist in tests of his air car, as he can trust no one cise. Oswald refuses owing to his weakened condition.

CHAPTER XXXV.—Continued Who's there?" he asked, imperiously and with some show of anger. No answer, but another quiet knock Speak! or go away from my door. one has the right to intrude here.

What is your name and business?" Continued knocking-nothing more With an outburst of wrath, which made the hangar ring, Orlando lifted passably well—the detective whose his first to answer this appeal in his methods, only indifferently clever, fierce fashion from his own side of the door, but the impulse paused at Of the other—the workman acquaint again in a rush of self-hatred which it would have pained his worst ex- matics and the principles upon which emy, even little Doris, to witness. As great mechanical inventions depend, it reached his side, the knock came you know little, and must imagine

It was too much. With an oath, Oriando reached for his key. But be-fore fitting it into the lock, he cast a look behind him. The car was in plain sight, filling the central apace from floor to roof. A single glance from a stranger's eye, and its principal secret would be a secret no longer He must not run such a risk. Before he answered this call, he must drop aviation. But since then I've been the curtain he had rigged up against such emergencies as these. He had but to pull a cord and a veil would fall before his treasure, concealing it ing of the one you have yourself con as effectually as an Eastern bride is cealed behind her yashmak.

Stepping to the will, he draw that me, and make a car of my own then with an impatient sigh. turned to the door.

greeted him.

In no fury now, but with a vague sense of portent which gave an aspect of farewell to the one quick glance he cast shout the well-known spot, he fitted the key in the lock, and stood ready to turn it. 'I ask you again your name and

business," he shouled out in loud command. "Tell them or ..." He meant to say, "or I do not turn this kay." But something withheld the threat. He knew that it would perish in the utterance; that he could not carry it out. He would have to open the door now, response or no response. "Speak!" was the word with which he own in any direction, and alight again frished his demand

A final knock.

Pulling a pistol from his pocket,
with his left hand, he turned the key with his right.

Stepping slowly back, he stared at its unpainted boards for a mom then he spoke up quietly, almost cour-

"Enter." the latch was not raised, and only the slightest tap was heard. With a bound he reached forward and pulled the door open. Then a great silence fell upon him and a rig-

idity as of the grave seized and stiffened his powerful frame. The man confronting him from the darkness was Sweetwater.

CHAPTER XXXVI.

The Man Within and the Man Without An instant of silence, during which the two men eyed each other; then, Sweetwater, with an ironical smile directed towards the pistol, lightly re

"Mr. Challoner and other men at the hotel are acquainted with my purpose and await my return. I have com here he cast a glowing look at the huge curtain cutting off the greater portion of the illy-lit interiorfer you my services, Mr. Brotherson. I have no other motive for this intru-sion than to be of use. I am deeply interested in your invention, to development of which I have already lent some aid, and can bring to the which you could hardly find in any rece living."

The silence which settled down pletion of these words had a weight which made that of the previent seem light and all athrob with sound. The man within had not othe the m mt held his, in an anxioty which had

vencon, into which he looked. Then an owl booted far away in the forest, and Orlando, slowly lowering his arm.

"How long have you been in town?" The answer cut clean through any lingering hope he may have had. "Ever since the day your brother

fortune." "Ah! still at your old tricks! I thought you had quit that business as unprofitable."

"I don't know. I never expect quick returns. He who holds on for a ris ometimes reaps unlooked-for profits. The arm and fist of Orlande Broth son ached to hurl this fellow back into the heart of the midnight woods. But they remained quiescent and he

spoke instead: I have buried the business. You will never resuscitate it through me.' Sweetwater smiled There was no mirth in his smile though there was lightness in his tone as he said:

"Then let us go back to the matter are you going to find one if you don't take me

A growl from Brotherson's set lips Never had he looked more dangerous than in the one burning instant follow ing this daring repetition of the de tective's outrageous request. But as he noted how slight was the figure op posing him from the other side of the threshold, he was swayed by his nat ural admiration of pluck in the physically weak, and lost his threatening attitude, only to assume one which Sweetwater secretly found it even

"You are a fool," was the stinging remark he heard flung at him. "Do you want to play the police-officer here and arrest me in mid air?"

"Mr. Brotherson, you understand m as little as I am supposed to under stand you. Humble as my place is in society and, I may add, in the depart ment whose interests I serve, there are in me two men. One you know show that he has very much to learn fulfillment, and he let his arm fall ed with hammer and saw, but with some knowledge too of higher mathe much. I was playing the gawky when I helped you in the old house in I was interested in you Brooklyn, airship—Oh I recognised it for what it was, notwithstanding its oddity and lack of estensible means for fivingbut I was not caught in the whirl

its idea; the idea by which you doubtless expect, and with very too, to revolutionise the science of thinking it over, and am so filled with your own hopes that either I mus have a hand in the finishing and sailstructed, or go to work myself on the hints you have unconsciously given

Audacity often succeeds where subtler means fail. Orlando, with a hold of the detective's arm and drew of another unprovoked crime." him in, shutting and locking the door carefully behind him.

you think you have discovered, to sation. make any ideas of your own available in the manufacture of a superior self-

propelling airship." Sweetwater, who had been so viclently wheeled about in entering that he stood with his back to the curtain hesitation:

"You have a device, entirely a far as I can judge, by which this car can leap at once into spe

"How's That for a Start?"

upon any given spot without shock to the machine or danger to the people controlling it.

"Explain the device." "I will draw it." You can?

"As I see it." "As you see it!"

"Yes. It's a brilliant idea: I could ever have conceived it." "You believe--"

"I know." "Sit here. Let's see what know."

Sweetwater sat down at the table the other pointed out, and drawing forward a piece, of paper, took up a approached and stood at his shoulder send his name to the ends of the He had taken up his pistol again, why earth; and, changing the trend of his he hardly knew, and as Sweetwater

little to do with the direction of the on its butt till they turned white in which had the force of a great de the murky lamplight.

"You see," came in easy tones from the stooping draughtsman, "I have an imagination which only needs a slight fillip from a mind like yours to send it in the desired direction. I shall not draw an exact reproduction of your idea, but I think you will see that I understand it very well. How's that

Brotherson looked and hastily drew back. He did not want the other to

note his supprise. "But that is a portion you never

"No but I saw this" returned Sweetwater, working busily on some curves; "and these gave me the fillip I mentioned. The rest came easily." Brotherson, in dread of his own anger, threw his pistol to the other end

"You knave! You thief!" he furiously cried.

"How so?" asked Sweetwater smilingly, rising and looking him calmly in the face. "A thief is one who appropriates another man's goods. or. let us say, another man's ideas. have appropriated nothing-yet. I've only shown you how easily I could do Mr. Brotherson, take me in as your assistant. I will be faithful to you, I swear it. I want to see that machine go up."

"For how many people have you drawn those lines?" thundered the inexorable voice...

"For nobody; not for myself even. This is the first time they have left their hiding-place in my brain."

"Can you swear to that?"

"I can and will, if you require it. But you ought to believe my word, sir. i am square as a die in all matters not connected-well, not connected with my profession," he smiled in a burst of that whimsical humor, which not even the seriousness of the moment could ouite suppress.

"And what surety have I that you do not consider this very matter of mine as coming within the bounds you speak of?"

"None. But you must trust me that

Brotherson surveyed him with an irony which conveyed a very differ ent message to the detective than any he had intended. Then quickly:

"To how many have you spoken, dilating upon this dexice, and publishing abroad my secret?" "I have spoken to no one, not even

to Mr. Gryce. That shows my honesty as nothing else can." You have kept my secret intact?"

"Entirely so, sir. So that no one, here or elsewhere, points in this mechanism:

"I say so, sir." "Then if I should kill you," came in ferocious accents, "now-here-You would be the only one to own that knowledge. But you won't kill

"Why?"

"Need I go into reasons?" "Why? I say." "Because your conscience is already too heavily laden to bear the burden upon mother earth.

Brotherson, staring back, glared with open ferocity upon the man who "Now," said he, "you tell me what dared to face him with such an accu-"God! why didn't I shoot you on an-

"Your courage is trance!" he cried. ertainly colossal." A fine smile, without even the hint now, touched the daring de-

tective's lip. Brotherson's anger seemed to grow under it, and he loudly repeated: It's more than colossal; it's abnor-' A moment's pause, then mai and—

with tronic pauses—"and quite unnecess you think you need it to sustain you through the ordeal you are courting. You wish to help me finish and prepare for flight?"

"You consider yourself competent?" Brotherson's eyes fell and he walked

ing and back. Well, we will grant that. But that's not all that is necessary. My requirements demand a companion in my

first flight. Will you go up in the car with me on Saturday night?" A quick affirmative was on Sweetvater's lips but the glimpse which he got of the speaker's face glowering upon him from the shadows into which Brotherson had withdrawn, stopped its itterance, and the silence grew heavy Though it may not have lasted long by the clock, the instant of breathless ontemplation of each other's feature across the intervening space was of incalculable moment to Sweetwater, and, possibly, to Brotherson. As drowning men are said to live over their whole history between their first age and their final rise to light and

air, so through the mind of the de-

tective rushed the memories of his

future; and rebelling at the subtle

vociferated an impulsive: by a new and irresistible sensation. A breath of wind-the first he had felt that night-had swept in through some crevice in the curving wall, flap-ping the canvas enveloping the great car. It acted like a peal to battle. After all, a man must take some risks in this life, and his heart was in this trial of a redoubtable mechanism in which he had full faith. He could no say no to the prospect of being the first to share a triumph which would

His Great Hour. Saturday night at eight o'clock. So the flat had gone forth, with no

As Oswald came from his supper and took a look at the heavens from the small front porch, he was deeply troubled that Orlando had remained so obstinate on this point. For there were eminous clouds rolling up from the east, and the storms in this region of high mountains and abrupt valleys were not light, nor without danger even to those with feet well-planted

If the temp

fore eight! Mr. Challoner, who, from some mysterious impulse of bravado on the part of Brotherson, was to be allowed to meetators, was equally concerned at his sight, but not for Brotherson, His fears were for Oswald, whose slow-ly gathering strength could illy bear strain which this additional any iety for his brother's life must impose upon him. As for Doris, she was in state of excitement more connected with the past than with the future That afternoon she had laid her hand in that of Orlando Brotherson, and wished him well. She! in whose breast still lingered reminiscences of those old doubts which had beclouded his image for her at their first meeting. She had not been able to avoid it. His look was a compelling one, and it had demanded thus much from her; and a terrible thought to her gentle spirit-he might be going to his

death! It had been settled by the prospective aviator that they were to watch for the ascent from the mouth of the grassy road leading in to the hangar. The three were to meet there at a quarter to eight and await the stroke and the air-car's rise. That time was near, and Mr. Challoner, catching a glimpse of Oswald's pallid and unhaturally drawn features, as he set down the lantern he carried, shuddered with foreboding and wished the

Doris' watchful glance never left the face whose lightest change was more to her than all Orlando's hopes But the result upon her was not to weaken her resolution, but to strength next few minutes, she must stand ready to sustain her invalid through it. That the darkness of early eve past and the fast fading glories of his ning had deepened to oppression unnoticed for the moment. The fears peril he saw in that sardonic eye, he of an hour past had been forgotten Their attention was too absorbed in "No! I'll not " and paused, caught what was going on before them, for

Suddenly Mr. Challoner spoke. "Who is the man whom Brotherson has asked to go up with him? It was Oswald who answered.

"He has never told me. He kept his own counsel about that as about everything else connec this matter. He simply advised me that I was not to bother about him any more; that he had found the assistant he wanted."

"Such reticenes seems unperdonable. You have displayed great pa

manville way. He was called this in derision, for Wise Billy was witless. There were some of the Bowmanville people who wouldn't have it that Billy was entirely witless, and it was in the expression of this belief these people showed that they were to be classed with the wiser ones.

Wise Billy had been hit on the head when he was nothing more than a toddler and it was the blow that set his mind groping for things that it could never fully grasp. Bowmanville, is a part of a great city, has green fields and great forests yet untouched by the ax of nature's tyrant. Billy reamed the fields and threaded the forests. Like Little Hiawatha he learned of the hirds and the soutrreis their secrets. They were playmates that never made sport of his mental rtcomings. He loved them and they loved him. The streams beyond the little stream which farther on in its course becomes the Chicago there that the Italian bird catchers hired by the big city dealers were in the habit of setting their traps to catch rollicking Robert of Lincoln that he might be cooped up in a 7 to 6 cage to pine away a few brief summer months for the supposed pleasure of someone whose ideas of liberty did not include bird and beast.

One afternoon the Italians set their traps all ever the meadow with a captive bird in the lower partment. The men went to a hedge by the side to watch results. They saw a boy start en a heen jump across the meadow. His feet were winged. Before the trappers could realize what was up the lower door of the first trap in line was open, a bobolink was freed and the trap They tried, but they could not catch this greyhound of a lad. He liberated twelve birds and smashed twelve traps, and then shot into the Budisng woods. It was Wise Billy who had done this tern for his bobolink friends.

Wise Billy's father and mother sent him to The teachers did not want to receive him, but he was quiet and he showed shortly that impression could be made upon his disordered mind. He knew more about the pictures than he did about the words, but in the course of a year or two he wrote sentences disjointedly. was poetry that Wise Billy loved, especially the mostry in which the words sane of hirds and trees and flowers. It was an inspiration to hear Billy repeat Bryant's "Bobolink" and the "Lines to a Waterfowl." There was a place in his heart seemed to speak to some little sound section of his muddled mind.

Wise Billy reported at the school one morning that he was going to be a poet. He stood at his desk and made the announcement out loud The pupils laughed and laughed. The teacher tried look kindly, but there was a bit of merriment r face. "I'll bring some verses and show eried Billy. He was keenly alive to ridiin her face.

cuie, witless though he was.

Wise Billy had found a friend. He was a man who tramped the field with a round box in which leaves and flowers and with an opera through which he stared at birds. Billy come across the stranger open the river's edge just west of the Budlong wood. The man res picking march marigoids. Billy told him he would show him where there were some prettier ones if the man would promise not to pick thom. The stranger seemed struck by this ap-seal from the boy with halting tongue and vacant

By JULIE ADAMS POWELL.

"You're a second edition of Ralph Waldo Emerson, my boy," said he a little quizzically.

"They're pretty by the water," said Billy, "and the wind whispers to them and they tell me what the wind says."

"You're a poet," said the man with the box. "I wouldn't pick your flowers now were they the real gold they seem to be, but I'm after birds,

"Bang 'em and put 'em in a box?" 'No, just look at them.'

"I'll show you lots," said Billy.

The man came to the meadows often after this and met Billy. The lad knew where the lark finch, where the vireo placed its paper-lined nome and where the oriole swung its cradle. He showed all his treasures to the man who was willing to look and to spare. One day Billy brought some papers to his botanical-ornithologioal acquaintance. "They're poems," he said, "Hise what the man with the gray beard wroteabout bobolinks and like what the man Shakesomething said about the yellow swamp flowers.

Billy's naturalist friend took the manuscript. Rhythm there was none; the spelling would make a lexicographer weep, but there was pos-The boy said in essence that the marigold didn't die because he thought of it all the year through, and thinking of things "makes 'em live."

One of Billy's schoolmstee had trapped a shore tark. The bird sings as it soars, and in that re spect is like unto the lark that "at heaven's gate Billy had fought a good fight for the trapped lark when the trapper was taking ft homeward but a crowd of schoolmates who regarded the larks as fuir prey made numbers

One day Billy and the stroller afield-were ramping the meadow that edges the Bowmanville road that runs along and crosses the rustic bridge over the north branch of the river. They heard shouts and turning saw that a building facing the road was on fire. It was a frame structure with the two upper stories occupied by It was on the ledge of the front window of the upper apartment that the caged lark which Billy had tried to save had been imprisoned for several days. The man and boy started for the scene of the fire. The building was a furnace. "Everybody's out," called a man in the

Billy, the witless, looked up. He saw the lark in the cage. The stairway was burning. He eluded a detaining hand and dashed into the entrance and up the stairs. A man jumped after him, but it was too late. He was driven back. less than a minute the people with staring eyes saw the boy appear at the front upper win w. His form was framed with smoke and flame. They saw him fairly tear apart the cage that held the lark. In an instant the bird was free and went soaring heavenward singing.

There was a crash; a floor had given way. little later a crowd had gathered round the dead of a boy. The school teacher and Billy's naturalist companion were looking down on the

PIMPLES ON FACE AND ARMS

411 Howard St., Dayton, Ohio.-'About a year ago my face, neck, arms afflicted with pimples and blackheads My pimples would get very large and appear to come to a head. If I tried to open them the pain would be terrible, but nothing could be taken from them. They itched very badly; I suffered terribly from itching. After scratching, the pimples would swell and after the swelling was gone my face would become very red and remain so for some time. My clothing caused the itching to be worse. When it was warm it was utterly impossible to sleep.

"I used a cream and the more used the worse they got. Shortly after I read the advertisement of Cuticura Soap and Ointment and determined to ise them. The itching stopped almost immediately. This was about three months ago and I am entirely cured (Signed) Miss Marguerite E.

INTERNATIONAL **SUNDAY SCHOOL**

ESSON

LESSON FOR SEPTEMBER 28 REVIEW.

Deliverance and Disobedience READING LESSON ONLY—Nehemiah 5:9-21. See also Acts 7:30-34. GCLDEN TEXT—"Thou art a God ready to pardon, gracious and full of compassion, slow to anger and plenteous in mercy."—Neh. 9:17/Am. R. V.)

The lessons for the past quarter begin with the deliverance of the child Moses and end with the apostasy of

the golden calf and cover a period of approximately 80 years. In almost every lesson there is something prophetic or typical of Christ, but two things may be mentioned with special emphasis, viz., the passover, lesson VI see 1 Cor. 5:7, and the bread from heaven, lesson VIII, see Matt. 26:26, I Cor. 11:23, 24.

For the younger classes a most fascinating story can be told when presenting this review. Describe Miriam watching the ark, Pharach's daughter spying the ark, sending the babe to its mother and later adopting it as her son. Tell of the day when Moses made his great choice, of the time he could free his brethren. thought he but failed, not yet having the neces sary power from God. - Then the 40 years as a shepherd (John 19:14), the revelation at Horeb, the conflict at Pharaoh's court, the passover, and the flight by night, the crossing of the Red sea, the gift of the qualls and the manna and that dramatic scene of the giving of the law. Enough is here presented to more than occupy the sson period.

Four Episodes.

For the older classes. The lessons of this quarter seem to group themselves into four general episodes (1) Moses his salvation, education flight and call; (2) Pharach, his pride humiliation and the passover; (3) the flight, at the Red sea, being fed in the wilderness, and (4) the law, God's holiness, his commandments and the

great apostasy.

The following brief review is suggested: Have one class member tell of the steps leading up to the Israelitish slavery in Egypt. Let another pupil present either orally or written, an the time of his appearing before Pharach with his apparently audacious equest, "Let my people go." Let that student not only recite the historical facts but also show God's dealing with this son of an obscure slave. He light illustrate by alluding to others whom God has raised up to "do exploits" in his dealings with men, Daniel 11:32. This will cover four lessent as concisely as possible that remarkable conflict which God, through his representative Moses, worked out with Pharach. This whole episode was treated as lesson V, the text being Ps. 105:23-36, and in lesson VI record of the passover. This latter. the great feast of the Jews and oftener than you do. be carefully and yet emphatically prethe Bible teaching on this, one of the greatest truths ever revealed to man by a gracious, loving, heavenly father Heb. 9:22.

Member as Spokesman.

The third episode can be presented if in class by a student, or if the review is a general one by the whole school. Let some particular class se lect one of its members as spokesman. and is a gracious revelation of God's tion with matrimony is married life. affections. protecting care and also his abundant supply for our every need. In this section is another and a most beantiful suggestion of that "living bread" so freely provided for all who will

Coming now to the last great eni-

sode of this quarter, the events in connection with the giving of the law, we embrace lessons IX, X, XI and XII. Before God gave them the various commandments he sought to emphasize his majesty and his holiness by the smoking mountain, etc. We then one on the decalogue, a most fitting arrangement inasmuch as the first part deals with the God-side of life-man's relation to his creator and the second part has to do with man's relations to his brother man The last lesson is a terrible illustration of this dual fact. The utter inability of the natural heart to fulfill its high sounding promises, its exceeding sinfulness and the necessity of right relations with him who alone can keep it pure is, it seems to us, the impor golden calf.

The two reading lessons give us the true light of the divine patience and at the same time of the divine nergis-These Levites celebrate particular the patience of God, while Stephen emphasizes his persistence. God saw the afflictions of his own in Egypt; he showed his wonders on Pharaoh in order to deliver these afflicted ones; he divided the sea to make for them a highway, leading them through the wilderness by the pillar of cloud and of fire; he feeds them and at Sinai gave them the and finally, though they deserted him and his chosen leader, yet he forsook them not in spite of their sin. These two passages are a really remarkable review of the lessons of the past quarter, for as we read them we can see the glory of Jehovah's satisnee and power which he manifested with his chosen ones. His readiness to pardon his slowness to anger are manifest ighout. In times of Israel's murmuring failure and sin he forachit them not, but bore with them. To those of us who "live by the faith of God" we should remember not to grieve his spirit (see Neb. 3:20, Hph. 4:30), but when we do fail let us avail ourselves of his pardon, for there is no unpurdonable sin care that of pe BY NO MEANS ORIGINAL IDEAS

samer Skirt and Cobweb Walst of Today Are Imitations of Those of Many Centuries Ago.

If learned savants are seeking the erigin of gossamer skirt and cobweb waist they need not stop with a Scotch professor and a petty two cen-

turies of antiquity.

Snefru, who was king of Egypt more than 4,000 years ago, before the great pyramid was built, had his royal barge on the Nile rowed by girls instead of men. These chosen oarswomen were dressed in linen so fine and diaphanous that it was no more than a filmy mist, accentuating rather than hiding the brown young bodies underneath. In short, the rowing costume designed by Snefru was much like the dancing costume worn some beauties who have managed to kick their way into the good

graces of Pittsburgh millionaires. Solomon had considerable exper ence with the fair sex, and he wrote that there is nothing new under the sun. Perhaps he was thinking of the newest "creations" of some modiste

chambermaid, and left everything to a college. Janiver-O. he wasn't so mean

Mh William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, the is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 178 West Jackson boulevard, Chicago, Ill., and only enclose two-cent stamp for reply.

When going into a building project there are three considerations of importance that present themselves. In the first place there is the design or outward appearance of the structure. next the arrangement of the dwelling inside for comfort and convenience. and last the cost of the building.

There is apt to be a wide range of choice in regard to the first factorthe design or outward appearance of the house. This is a matter to be de cided according to the taste of the owner and the requirements of the crowding. ilding site. It is proverbial that tastes differ widely; so there can be no definite fixed requirements along that line. Also the needs of different locations vary greatly. It has been said that we plan the outside of our s to please the neighbors, or to make's brave show from the street ccordingly this first factor, that of outward appearance, may at times be of very little real importance, although of course everyone would prefer to live in as attractive a dwelling place

All things considered, the interior of pine for the second. a residence is far more important than the exterior. Real satisfaction in a home comes from the comfortable, cozy and inviting features of the living Postal Service Employes Called On to room; the bright cheerfulness of the dining room, and the conveniences provided not only in the kitchen and pantry, but also in the other parts of the house. It matters little what the

The first floor plan of this house is exceptionally good. From the central square hall one finds the living room occupying the entire space at the left, while to the right is the dining room, with the kitchen just back of it. The stairway goes up with a single turn, and is so arranged that the front stairway from the reception hall and the back stairway from the kitchen open

the space usually occupied by one. The living room is designed in ac cordance with the most modern ideas. It is very large and comfortable, 12 feet by 27 feet in size. In addition there is an alcove containing a wide fireplace. This room would always be the center of the home life, cheery and inviting, and capable of accommodating a large number of persons without

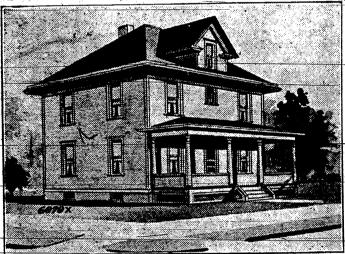

On the second floor four good-sized bedrooms with an abundance of closet room are provided. The bathroom is conveniently located, the plumbing fixtures there being directly with those in the kitchen. This is quite a money saving feature.

The cost of this house is estimated at \$3,000. This is very moderate for residence of this size, 32 feet 6 inches being the width and 28 feet the length. This figure contemplates the use of good quality hardwood finish and floors for the first floor and yellow

LETTER FROM THE

STATE GEOLOGIST ALLEN HAS COMPLETED APPRAISAL OF IRON MINES. .

Figures of Board Show That to Kill a Michigan Workman Costs in Final Analysis More Than

\$7,000,00.

ACCIDENTS.

fBy Gurd M. Hayes.]

Lansing, Mich.-State Geologist R. C. Allen has completed for the state tax commission the appraisal of the iron mines of the state for 1913. The figures for Gogebic, Iron and Dickinon counties have been fixed definite ly, but the assessment of the Mar quette county iron mines, is, as yet, only tentative. Since the first of the year State Geologist Allen has been engaged in this work for the state tax commission and the appraisal is re garded as the best and most accurat that has ever been made. Two years ago the legislature appropriated \$30, 000 for the purpose of securing an appraisal of all mining properties in Michigan and Prof. Finley completed the enormous task in ten weeks. However, his figures were questioned by the commission and were little used and the money spent has been regarded as one of the legislature's poor investments.

If is expected that the appraisal made by R. C. Allen will play a prom inent part in the next session of the legislature in the event that an at tempt is again made to pass a tonnage tax bill. These figures show conclu sively that some of the larger and more profitable mines would pay less to the state under a specific tax of ten cents per ton, which was the figure named in the last tonnage tax bill introduced in the legislature, than they are now paying on an ad valorem which some of the smaller and less productive mines would be prac tically forced out of business.

In 1911 the valuation of the iron mines of Michigan was \$85,587,325, while the valuation for 1913 is \$82,-707,256. In other words there is a decrease in 1913 of 3.36 per cent from the valuation of two years ago. In order to understand why the mines show a decrease in valuation for this year it is necessary to know the methods used in the appraisal of the mines. Each mine has furnished the tax commission a sworn statement of the itemized costs and receipts for each property during a period covering the five years preceding January 1, 1913. From this information there has been figured the profits, or in many case losses, per ton of ore mined from each property. Royalties are in all cases igured as profits. The value of a ton of ore in the ground in each particular property is thus obtained with great precision. The total tonnage of ere shown up in each property is then figured by State Geologist Allen and here is added to this, in most cases a certain tonnage designated as pros pective or profitable ore. This figure of total reserves is then divided by the average shipment made by the property during the past five years and the quotient is taken as the pros pective life of the mine.

In obtaining the actual prvalue of the mine the total or serves are multiplied by the value of a ton of ore in the ground and this figure is then multiplied by paid in equal installments during a ing an effort to remedy conditions period of years equal to the productive life of the mine, figuring interest at six per cent. In some case it has been found necessary to vary the method of appraisal, but on the whote this plan has been followed wherever

possible. In some classes of property, such as those having ore bodies which have been developed by drilling but which have not been mined, it is not possible to obtain from the records of operating experience the various factors on which the appraisal is based. The factor of tonnage may be obtained with a very reasonable degree of acpuracy in most cases, but the remain ing factors are assumed by the appraiser. These assumptions are based on the operating experience of the ac

From the statistics prepared by State eGologist Allen it is shown that the amount of ore in the ground has by about 20,000,000 tons, notwithstanding the fact that the state has shipned during that period approximately the same amount. In other words there is more ore found and develoned each year than there is shipepd. question arises as to why it is that 189,000,000 tons of ore in the ground are worth less in 1913 than 169,000,000 tons were worth in 1911. The explanation a ton of ore in the ground depends on ore prices and the relation of these to the cost of mining and transports-

tion. During the five year neriod preceding the 1911 appraisal the mines made profits of about \$54,900,000, while during the five year period preceding the appraisal of 1913 the total profits dropped to approximately \$47,500,000. This shows a failing off in the earnings of 12.8 per cent. State Geologist

Stanley Putney, chief stenographer in the executive office, who was appointed by Former Governor Osborn and was retained by Governor Ferris. eignation. Putney is nienning to attend the University of Wisconsp.

Two old mirrors which were precented to the wife of former governor Austin Blair by the officers of the faring the civil war, have been turnto the state and will be placed in the pioneer museum.

Allen says the decrease in profits is due mainly to the low price of ore in 1912 and the decreased shipments of 1911, but he points out that while the profits of the business of iron mining decreased 12.8 per cent the increase in the appraised valuation is only 3.36 per cent. Allen says that this decrease is not larger is due to the rapid development of the mines in Iron coun ty during the past two years.

The tonnage of ore in Iron county has doubled in the past two years and this is reflected in the increase in the valuation of this county of more COST OF AVERAGE LIFE LOST IN than 39 per cent: There have been some important developments in Gogebic county also, but in the other counties the tonnage has not been in creased by new developments. Only one new property has been developed in Marquette county and it is doubt ful if this property contains sufficient ore to make a mine, according to the state geologist's observations.

In 1910 the iron mines of Michigan paid the state \$899,308 in taxes, while in 1913 the iron industry turned into the coffers of this state \$1,379,551. The total effect has been as of about 54 per cent in total taxes paid by the mining properties. Another interesting comparison is afforded by the ratio of taxes to operating profits. During the period of 1906-1910, preceding the first valuation of by the tax commission, the ratio of taxes to operating profits was 6.52 per cent. During the period 1908-1912 this ration was 10.98 per cent, and this result is the average of three vears of low valuations by local oards and two years of full valuation by the state tax commission.

These figures of valuation do not include the value of ore in stock or buildings in mine locations that are ot a part of the mine plant. Neither do they include the value ofthemineral lands. Ore in stock is assessed personal property at its cash value f. o. b. mine, which is in the neighborhood of an average of \$2.50 per ton This figure per ton is obtained by subtracting from the Lake Erie ore prices merely transportation, commis tions and loading charges. All buildings not a part of the actual mine plant are appraised separately. value of mineral land, about 84.000 acres, in 1913 will be in the neighborhood of \$750,000. This represents face value. The value of the land itself is not included but is assessed separate-

Therefore, State Geologist Allen says that if the valuation of the mineral lands, ore in stock and buildings on mining locations were added the figures of valuation for 1913 would be increased by several million dollars. The additional value added for buildings other than those included in the mining plant may be judged in a way by the fact that the assessment of mining property in the city of Negaunee alone includes the value of 600 separate buildings not assessed as a part of the mine. These buildings have not heretofore been assessed by ocal authorities, but all such property has been placed o nthe rolls by the tax commission. The total value of this additional property has not been figured to date, but Allen says it will increase the total valuation of mining properties by several million dollars.

The Michigan compensation act places upon human life a value which is something more than theoretical. Under this act 73 fatalities during the closing quarter of the industrial accident board's first fiscal year cost Michigan industry \$168,304. Never be fore has it been possible to obtain even an estimate of the cost of fatal cicdents to Michigan employers. It has generally been understood that it was considerable, but even when reduced to cold figures, there can remain no doubt, according to the members of the commission, that this tax

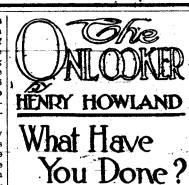

which are responsible for it.

The average human life which was sacrificed during the months of June, it." July and August cost \$2,305.53. In addition to this direct charge which is registered against the employer primarily and ultimately comes out I the consumer, there is the loss to the community which is estimated at \$5,000. It will be seen, therefore, that it costs in the final analysis \$7,305.53 to kill a Michigan workman. It must also become evidents that fatal acciful Michigan industry can afford to

cultivate. The mining industry was the heav iest contributor to the list of killed during the past quarter. Seventeer fatalities in the iron, copper and cor nines of Michigan cost the operators \$41,523 which would have paid the average wages of 2,528 mine workers for a period of one week, or which the wages of those seventeen men had they lived and remained in active pro duction for a period of 150 week practically three years.

Fifteen fatal accidents cost the elec tric and steam roads of Michigan during the three months covered \$39. 081 or \$2,791.50 per accident. In view of the present interest in the rate of wages paid in the upper peninsula mines, it is interesting to note that the average miner's dependents re ceive as compensation \$2,442.53, while the dependents of the average railman men receive \$2,791.50; dependents of those engaged in the electrical indus-try \$2,540.57; dependents of paper mills workers \$1,751.5; depende employes in building trades \$2,296.42; of employes of lumber industry \$2, 494.00; and of 19 miscellaneous in dustries \$2,102.67.

Capt. Ragadale, the regular arm officer who was detailed by the war department several months ago to aci as instructor for the Michigan National Guard, returned to Lansing alter accompanying the Michigan rifle team to the national shoot at Cama Perry and he declares that the Michi gan men made an excellent showing "Atthough the Michigan rillemen for lebed in twenty-third place, they have reason to feel pared of their showing,"

LIST' TO THE LAY HOME OF THE OLD SALTS

Tell of Many Strange Happenings on Amazon River.

THROUGH SEA OF RED

Huge Alligator Attacks Ship; Mando In Music Lures Whistling Memicey on Deck; Big Turtles Halt Vessel and Men Fight Vampire Bats.

New York-Pipe all hands on deck the sea. It is the tale of the Hittle steamer Javary which recently arrived from a voyage of 2,500 miles down the Amazon river. Captain Alexander Alexander is mi

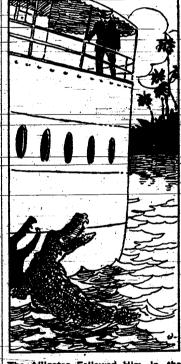

or of the Javary and many a trip he has made up and down the Ame The first mate is G. N. Duff, the second R. B. Furneaux, and the third, J. . Williams. All are familiar with the waters of the Amazon, its mosqui its alligators and its blood-sucking vam pires.

On the second day out, with just whist of breese to temper the heat, the Javary was coming along slowly, as all ships do in those waters at the start. Mr. Duff—they call all efficers "Mr." on all well regulated ships—was on deck. A huge alligator showed his ugly head above the water near the river bank, then came with a rush on to the steamer.

With a bang he hit the side of the ship, and the force of the shock bounced him back.

Mr. Duff walked forward, looking over the side, and the alligator followed him in the water. When they got to the bow the attacking party renewed the attack. A kedge ancho hung over the bow, for in these water have to be ready always to drop a book or throw it into the bank to warp around a bend. The kedge is let go by withdrawing a steel pin from fastening. Mr. Duff waited until the alligator was rushing head on at the bow plates, then pulled the pin.
With an awful bump the heek smashed down upon the kead of the most surprised alligator ever seen in the

Third Mate Williams plays the man dolin. One evening, shortly after the alligator episode he was on deck, the vessel being at anchor under the overhanging foliage of the bank. As he played he heard a whistling accompaniment to his playing. He stopped, puzzled, and the whistling stopped, too. He played again and the While he was trying to make up his

The Alligator Followed Him in the Water.

mind whether the sound was that el a mermaid or a banskee something fell or jumped from gioft and landed

He screamed in terror as a pair of hairy arms encircled his neek; and rose to grapple with the "whatever" it was, Sailors ran to his assistance and found him tied up with a gibbe ing, jabbering whistling monkey. It was a species of the whistling monkey of the Amazon, which had been often heard by those on board and

never before seen.

It was only a few days after this occurrence that Second Officer Pur-DORUE, who was on dock, noticed a most posuliar phenomenon in the wa-ter ahead. The river had suddenly turned black. The efficer called the captain and, by and by, through the glass they made out an immense school of turtles. They were thick as logs in a jam in the morthwest. The motor host had to be lowered and the turtles shoved off with pikes, just as they handle a log jam, to make way for the steamer. The jam extended for nearly helf a male.

At Aquim, Hayti, the Javary took on a deck cargo of dye wood. The next day it rained and the dye ran out of wood, feeding the sea with a crimeon has, so that the sale appeared to sall with a sea of blood in her walk. The deck was stained with the dre All was red, red, red.

WOULD PLANT SHRUBS LATE

Writer Upsets, Widely Held Theory Concerning the Advantages of an Early Start.

One of the results of modern research work, as applied to the garden and allied subjects, has been proof that the old time theory that planting could be done only in the early spring and late fall is wrong. writes Samuel A. Hamilton in the Gountry Gentleman. Modern horticulturists plant something almost every month from the time when the snow goes in the spring until it comes in midwinter. There is a distinct advanage in this lengthening of the planting season, for by it the rush and the consequent indifferent work are avoided. It is only lately that we have

learned the cafe planting of the hardy shrubs may be done in the latter part of the summer. I am of the ponion that under identical care better results will be had then than if the planting is done in spring and fall. The planting of shrubs in midsummer fulfills all the conditions presup-

4.3

posed by the theory of old—th and shrubs could not be planted successfully during the season of growth; or this season in the temperate regions does not cover the time from frost to frost, as it is commonly supposed. A shrub does not grow when it puts out foliage in the spring.
Growth of foliage is not growth of the shrub. There is no growth of the shrub until the roots have sent substance to the buds and formed full sized leaves which metamorphose the sap and send it again to the roots, whence it goes into the buds and forms tissue. This takes several veeks and some shrubs require a month before they start to grow

Prior to this it is safe to plant them. During the succeeding period rowth planting can be done under controlled conditions, and as most of the shrubs have made their growth by mid-August or a week later, it is safe to plant them any time thereafter.

TREES FOR BARREN STREETS

Chicago Raising Many Thousand of Different Varieties That Will Soon Give Grateful Shade.

Young elms to the number of 25,-000 ranging from two to four feet in height, are swaying, gently breeze that blows across the city's 250-acre nursery at Harlem avenue and West Twenty-second street, near Riverside. Not many years hence each of the elms will be throwing a circle of shade in streets where boy and girls today seek shelter from the blazing sun between the walls of frame houses. So will the 8,000 white ash now spreading their branches in the air at the nursery; also diminutive Norway maples, lindens, ailanthus, birth; sycamore, cataips and poplars just beginning to enjoy life in company of thousands of their kind.

"Out of this nursery in time will trees for all the barren streets of Chicago's congested wards," said City Forester Prost, after a tour of in-spection of the garden. "Each of hese trees will make some circle of youngsters happy and will add joys to the lives of those who live in a swirl of street dust and smoke from the railroad yards. Some of these trees will grow anywhere. We are raising only those best adapted to our climate and soil, and although last year we grew 40,000 trees and 75,000 shrubs, we do not think we have deity for usefulness."-Chicago News.

New Revenuelck Thum-Planning Act A town-planning act passed by the legislature of New Brunswick this year places restrictions upon various hases, of city and town development. It provides that any town or city council may prepare a town-planning scheme, but before it is acted upon it must be approved by the government. Thus, all future developments in the owns and cities of this province will he subject to the superivsion of the government.

Local commissions whose appointment is subject to the approval of th government, are to be responsible for the superivsien of new town areas The commissions are given important powers in regard to making provision for traffic highways and proper sani-tary conditions and may regulate the number and nature of buildings per acre. Private rights when lajured must receive compensation.—The Sur-

Toast Limite. A right honorable member of partia-
