## EUGENIC MATING TO BE REJECTE

RACE BETTERMENT CONFER-ENCE AGAINST LIVE STOCK METHODS.

BATTLE CREEK MEETING CLOSES MONDAY.

Two Babies Are Found to Be Practically Perfect Physically and Mentally By the Committee On Awards.

Battle Creek, Mich.—Breeding race of human "thoroughbreds" by mating eugenically perfect women with eugenically perfect men will be rejected as an unsound theory by the executive committee of the National Conference on Race Betterment which has been holding sessions in this city, when it announces its conclusions from New York city early next month. Dr. Maynard Metcalf, professor of zoology at Oberlin college, and Dr. Winfield S. Hall, professor of physiology at Northwestern university, among the speakers at the closing sea sions of the conference, told why they believe livestock methods of breeding blue ribbon winners could not be applied to the human race.

A sociologist, Prof. Herbert Adol-phus Miller, of Olivet college, Michigan, supported their views and previous speakers have held to the same theory.

"The scientist knows too little of the laws of heredity to breed perfect men and women by selecting mates," declared Mr. Metcaif. "It is doubtful whether science will ever reach a point where stock-breeding methods could be used with human beings."

tant to the society of tomorrow than the prize winning babies of today, declared Robbins Gilman, head worker of the University Settlement society, of New York.

Unhealthy babies are more impor-

The committee on awards in the "Better Babies Contest" awarded med-als for the best babies—boy and girl, between the ages of six months and three years—to Alvin Ringsley, threeyear-old son of Mr. and Mrs. Albert Kingsley, and Virginia June Nay, daughter of Mr. and Mrs. S. R. Nay It was said that the winners of the awards were practically perfect in physique and mentality. The parents of both children live in Battle Creek. The father of the boy is a taxicab driver and the father of the girl is engaged in the optical business. Both fathers are abstainers, it was announced, from tobacco and alcohol.

#### LEGISLATOR SEEKING SHELTER FACES GUN

Petoskey -- After missing his train because he had failed to wind his watch, Rep. D. H. Hinkley, who was at Clarion, nine miles south of Petoskey, on business, found he could not return home unless he walked.

Half way to Petoskey, he was overcome by a severe snowstorm, and huge drifts piled in his path, while the temperature dropped alarmingly. The snow was blinding, and the Emmet representative lost his way, wandering into the

Nearly freezing, he stumbled on a shack and entered. The occu pant, thinking Mr. Kinkley had followed him there to rob him, held him up with a gun, and it required considerable explanation for the legislator to establish his identity. While the storm raged, Emmet county's representative discussed

politics with his host, who proved to be William Spindle, a lumber jack, and when the sky cleared, both snow-shoed to Petoskey, which they reached late at night.

## WANTS FEDERAL INVESTIGATION

RESOLUTION IS PRESENTED IN SENATE ASKING STRIKE PROBE.

MICHIGAN SENATOR OPPOSES SUCH ACTION.

Lively Tilt Follows Introduction of Resolution for Government investigation of Copper Strike.

Washington-Thorough investigs tion of strike conditions in the copper mines in the Calumet, Hancock and South Range districts of Michigan was proposed in a resolution Monday by Senator Ashurst of Arizona. It would direct the senate education and labor committee to ascertain:

Relations between employers and employes, so far as they relate to the present troubles; the justice and reasonableness of a minimum wage and other demands of the strikers; original investments and profits of the companies: weather employers or employes have declined arbitration; whether peonage is maintained or ac cess to postoffices is prevented: whether persons have been punished is a combination in the mining district in restraint of trade.

The presentation of the resolution caused a lively tilt between Senator Ashurst and Townsend.

The Michigan senator charged that political expediency prompted the action and that such an investigation would be a voluntary insult to the courts of his state....

The Arizona senator replied that if the conditions in his state were similar he would welcome the light.

To Deport Undesirable Animals. Lansing, Mich.—The Michigan sanitary live stock commission has inaugurated an animal deportation plan similar to that of the federal government in deporting undesirable aliens. The scheme is being carried out to protect Michigan breeders as well as throw a safeguard around public

## Big City Is an Overgrown Town; Just Read This

C HICAGO.—The city is only an overgrown town after all. It was a cat, a shabby gray mouser, instinctively suggestive of the ash can in a back alley; a thin, scrawny representative on the species feling

cadaverous and weasened; a frayed scrap of a cat of pronounced gutter tendencies; not a cat to be loved and petted nor to writhe gently in front of a glowing fire; not even a cat to scream shrill de flance at moonlight in company with its mates. The Northwestern station poured forth its loop bent thousands. Each mind was full of the day chores that loomed ahead. It was the city at its "citiest."

Then the cat—mud spattered, inconsequential, a cat of the city's streets. It danced across the wide concrete walk in front of the hurrying battalion of workers like a leaf blown before the wind. Before it sped a lead-colored lump with a chasing a rat

The hurrying throng stopped in its tracks. A hush fell over the thoroughfare. All eyes were bent on the insignificant drama being staged before them. Into a convenient hole popped the horrifled rodent. Baffled the cat poised at its rim—tense, tingling, ready to pounce and rend and kill. The crowd waited. Let the city toot its whistles and ring its bells in impatience.

It was the cat's big hour. All its life it had been an humble affair, a

despicable bundle of bones and sinew, a dodger into the back doors of cheap restaurants, eating what was flung at it and to it. Every toe had been against it. Whirring wheels had struck at it to grind away its feeble life against the cobbles. Now it rejoiced in its great hour. The upraised paw trembled not only with impatience, but also with pride. All that had gone ore was worth this moment. For the crowd was waiting and watching.

Out of the hole flew the rat like a slug of nicotine from an amber stem, straight into the paw that struck it down and the teeth that worried at its throat until it died. A gasp came from the crowd. Then they poured across the bridge into the city.

The study of stairways and the proper placing of them in dwelling houses is responsible for more suicides among architects than any other feature of the business.

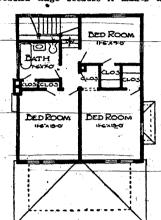

Ever since two story houses were first built stairs have occupied prominent positions, usually in front in full view of the street door where floor pace is more valuable than in any other part of the house. The front stair not only takes up valuable space on both floors but it often spoils the living room or parlor down stairs and curtails two of the best bedrooms up-

Now, the stairway in this plan solves the problem in a new way not only fills a new felt want, but it fills the neighbors with envy and the contractor with malice, because the workmanship must be so exact to please the owner that he can never get out of it with a profit.

However, this stairway seems to overcome many difficulties. It occupies the least valuable corner in the house, which is right because nobody stays in the stairway any longer than he can help. You sit in a dining room long enough to enjoy a good meal, you lounge in the living room until neces sity, drives you to work or sleepiness drives you to bed, and you stay in a nice front bedroom all night and part

"How soon will one be at work up there again?" he asked through the window of Auguste Philpoteaux sitting at his dinner, and the man an swered good-naturedly:

"It may be in half an hour, my boy, Not sooner" And François raced on. By this time a boy here and a boy there had stolen from their dinner tables and were gathering in groups down the street, but the elders paid no attention. Francois disappeared into the church; the boys began to grow breathless.

"It will take some minutes for the stairs," one said, and they waited. Two minutes, three, perhaps five; something rose out of the trap-door leading to the platform from which the steeple sprang-a figure, looking very small so far up above them. Instantly it attached itself, like a crawling fly, to the side of the steeple; it moved upward. Henri Dufour, below in th street, jumped as a hand gripped his arm. He looked up frightened at La

It has been said by a physician that most diseases are the result of indigestion.

There's undoubtedly much truth in the statement, even to the cause of many unsightly eruptions, which many suppose can be removed by applying some remedy on the outside.

By changing her food a Kan. girl was relieved of an eczema which was a great annoyance to her. She writes:
"For five months I was suffering with an eruption on my face an hands which our doctor called eczema and which caused me a great deal of inconvenience. The suffering was almost unbearable.

"The medicine I took only gave me temporary relief. One day I happened to read somewhere that eczen caused by indigestion. Then I read that many persons had been relieved

of indigestion by eating Grape-Nuts. "I decided to try it. I liked the taste of the food and was narticularly pleased to notice that my digestion was improving and that the eruption was disappearing as if by magic. I had at last found, in this great food,

"You are constantly running on to the unexpected, so that there is no danger of being wearies by lack of variety. "We met one man who has the most trying position of which I know. He's an Americana big, broad shouldered, athletic chap, with the oolish of a university man and the breezy opennearted manner of a true westerner: "He is an engineer, and it is his duty to see

railroad is kept free from land and snow slides. "That doesn't sound so bad, does it because you can have no conception of what it means uness you have seen the country. The Trans-Andean railroad is a third-rail system in the strictest ense of the word. That third rail is located between the narrow gauge strips of steel on which the cars travel, and is a cogged affair into which teeth on the driving wheels of the locomotive slip, giving sufficient grip to pull the heavy trains up the almost perpendicular course. "On the Chilean side of the Andes it is a case

of climbing almost every foot of the way, and at times it seems as though the locomotive must fall backward on the cars that follow. "This chap lives in a little stone house close by-Inca lake, in the Andes, 12,000 feet above sea level. He has a gang of natives under him, and at ertain seasons of the year they are kept on the jump battling with snow slides, which bury the tracks so deep that it requires days of the hardest kind of work to clear them.

"Then the mountains have a playful habit of comes tumbling down across the tracks and puts an end to travel until it has been removed. "Sometimes these pranks result seriously, and there's many a lonely grave along the right of way to indicate the last resting place of some poor ection man who was buried beneath a slide. Last winter a few square acres of snow and rock and ce came crashing down on a crew that were en deavoring to clear the tracks. Part of them escaped untouched and immediately began digging out their fellow workers. At the end of 26 hours they came upon a sorry figure—a battered section nan who had borne the full brunt of the slide. "And what do you think he did when they pulled him out, more dead than alive? Berated them for leaving him buried so long.

"'You're a fine lot,' he stormed, 'why, you left me in there two hours. It wasn't your fault that

but somehow I didn't envy this particular American his job. "Crossing the crest of the Andes and getting down to the Argentine plains you strike one of the widest gauge railroads in the world. Service on the line is not so bad—in some respects. "They have single and double compartment cars for male and female passengers. It was my ill fortune to draw a seat in a double compartment with three Spaniards. Now, they are not ctly the traveling companions you would select for a 24-hour ride across the plains, a journey hat is trying under the most favorable conditions "They are passionately fond of onions of a particularly rank variety. We learn that the hotel and 10-cent shed property has been sold by Mrs. Bunyan and that it will be fitted up for a garage. Is will certainly make a splendid location for that business.

Later still because, after all, the case is set will be fitted up for a day and so I valued them. I have seen a deceived dog thus value a pup with a broken leg, and a pauper child nurse a dead doll with the sawdust out of it.—

The Peoples bank officers and stockholders met Tuesday and re-elected the old directors with the exception of Fred Steinkohl now at Lansing. Hiram Paur was made a director in place of him.

We hope that the steamer bearing our friends Mr. & Mre. W. C. Buckman of Seattle has not proceeded far enough towards Japan as be in danger on account of the volcanic eruptions and distarbance of the ocean in that vicinity.

The stockholders of the Union Sayings bank at the annual meeting Tuesday afternoon elected all the old directors for 1914 and the directors retained the same offices the coming year. The bank has been very prosperous the past—year and has paid a dividend of 16 per cent.

HAD ADVERTISED THEIR DADS

Strange to Say, Fathers Were by No Means Pleased With the Youngsters' Work.

Two youthful suburban aspirants who belonged to families where little brothers and sisters had been donated by the family physician, decided to enter a little side line of business one

One of the youths was the son of a well-known doctor while the other was the son of a prominent tailor.

The two lads were very chummy, and this afternoon they decided to launch upon a little advertising expedition. A paint brush was the means devised to accomplish the advertising and the lettering was quickly but plainly traced over any smooth surface of wood or stone encountered on the way.

After office hours in the evening the doctor was having his customary chat with his son and during the time he asked: "And what have you been doing today, William?"

"Advertising," he announced.
"Advertising whom?" questioned his

father.

"You and Tom Stanwood's father

(the tailor")

(the tailor").

"Me? How did you advertise me?"

"Oh, we fixed a sign up that road,
Buy your pants from Stanwood and
your bables from Dr. White," announced the lad, proudly.—Illustrated

#### GRAFT WORKED BY CASHIERS

New Yorkers Said to Be Victimized
Out of Large Sums Annually
in That Way.

"One form of honest graft a hotel keeper has to fight the hardest in the town is 'accidental short changing,'" says the manager of a very popular hotel in New York city, famous for its oyster bar. "The same sort of honest graft' obtains at almost every cash changing place in the city where there is a netting on the cashier's desk to protect the cash, and a lower bar of wood to hold up the netting or glass screen. This bar of wood or metal runs across the hand-hole for change. The cashiers have figured out the angle of vision of all men, short and tall, and the distance they stand from the desk to receive their change. Say a dollar is changed to take out 30 cents; the 'accidental short-change artist will push forward the 70 cents in coin, but his hand will hold one dime that is hidden from the angle of vision of the man getting change by the line of the bar over the cash hand hole. If the man is in a hurry, or absent minded, he grabs the change he sees and rushes of without one dime. Always stop, stoop and look, if in doubt. And you would be surprised to know how much money is left at cashiers' counters, box offices, subway ticket booths and other places. I'll wager \$100,000 is shortchanged annually in New York. They never call you back."

Homer and Humbug.

I do not mind confessing that for a long time past I have been very skeptical about the classics. I was myself trained as a classical scholar. It seemed the only thing to do with malaculard such a singular facility in handling Latin and Greek that I could take a page of either of them, distinguish which it was by glancing at it, and, with the help of a dictionary and a compass, whip off a trans-

But I never got any pleasure from it. I lied about the pleasure of it. At first, perhaps, I lied through vanity. Any scholar will understand the feeling. Later on I lied through habit; later still because, after all, the classics were all that I had and so I valued them. I have seen a deceived dog thus value a pup with a broken leg, and a pauper child nurse a dead doll with the sawdust out of it.—

Stephen Leacock in the Century.

Too Nice for the Woods. -she the daughter of a retired manuous merchant in that vast territory followed after both had reached their respective homes, and early in the summer the young man received an invitation to "visit papa's camp in the North Woods." The young man accepted, was met at the nearest railroad station by "Brother Tom" and was carried, together with two huge trunks, to the camp, 16 miles away. The trunks contained a carefully selected wardrobe, which "Tom" de scribed as "just as appropriate for the WOODS as a gas stove. He was the 'best dressed' man in camp and will probably never know that his 'style' blocked him for further invitations."

Use of Tact.

How much trouble mothers, young and old, would save themselves by a little continuous nursery diplomacy—in other words, tatt! It is so much better to secure voluntary discipline than to multiply exacting rules.

A reasonable being knows that neglect of right-doing brings suffering to somebody; and how much more useful it is to develop "reason" in a child's mind than sullen obedience!

A very successful trainer of her children never gave utterance beforehand of what a punishment wan to be for shortcoming. She was accustomed to say to her children: "Don't you think you had better do thus or so before such a time?" A sort of confidential leading, this, to the right view of things, which comes before obedience proper, and in most cases dispenses with it.

The Dream-Lion.

A Vienna professor is cred ted's ith saying that dreams are usua ly w shruifillments. Maybe so. What ab suit that childish dream in which the feroclous lion comes bounding a long whind you, and you run as bo y never ran before, and the lion closes ti we gap little by little, and then—all of a sudden—your legs grow limp, and you muscles turn to water, and you refer tray out, and the lion leaps—and you awake with a yell, if your you is isn't care lyzed, and everybody in the bouse wakes with you?
