DECISIONS OF THE SUPREME COURT

RAILROADS NOT HELD RESPONSI-BLE FOR ICE AND SNOW PLATFORMS.

SETTLE SCHOOL BOARD CASE

Deposed President at Bay City Wins Out and Will Resume Position After Standstill in Business for Months.

Lansing, Mich.—The supreme court holds that a railroad company is not negligent for snow and ice collecting on the platform of trains en route Herman Meyer, of Chicago, boarded a Michigan Central train in 1909, for Three Oaks, Mich. Leaving the smoker, he started to go into another car and slipped on the platform, falling to the ground. He was injured and brought suit against the road The trial court directed a verdict for the road on the ground that there was no negligence on the part of the railroad company, as testimony showed the steps to have been clear of ice at the starting point and that it snowed while en route. The supreme court affirmed the decision.

Bay City Case is Settled,

Edward Lichtig, of Bay City, has won his fight against his opponents in the board of education, the su preme court having upheld his right to veto the resolution deposing him from the presidency of the board. A faction of the board opposed to Lichtig adopted a resolution voting him out of the presidency, but Lichtig, as president, vetoed it and the matter was carried to the supreme court, which has now sustained him in his action.

Lichtig says he will call a special meeting of the board to catch up on the business of the board, which has been at a standstill since the fight last winter, and further factional fighting is in prospect.

Settles Point for Detroit.

The supreme court holds that assessment must be made only against real estate in Detroit on account of property condemned for a street opening, and not against both real and per sonal property. Henry M. Weil, of Detroit, brought the case to the supreme court.

WOMAN WINS IN HIGH COURT

Judge Stewart is Ordered to Hear Case Against Real Estate Dealer.

Kalamazoo, Mich.—The effort of Mrs. Nellie Merleau to regain property she alleges was taken from her under false pretenses by Fred Merri-man, a real estate dealer, has been given assistance by the supreme court Recently Judge Stewart decided that he could not hear this case, stating

here had been no violation of a law Mrs. Merleau had her attorneys start mandamus proceedings in the supreme court against Judge Stewart. and now comes the order that he must try the case. Meanwhile the grand jury investigated this case and returned an indictment against Mer-

riman.

Muskegon, Mich. The local board of review will not attempt any general increase of the city's assessment roll to bring it up to the strict cash value basis of assessment fixed by expert of the state tax commission. This is the declaration of members of the board now in session in this city. The boost recently made by City Assessor William Moore, which sent the totals here over \$12,000,000, is considered about 70 per cent of the cash value.

Jackson Brewers Are Sentenced Jackson, Mich.-Carl Eberle and Steven H. Carroll, of the Eberle Brewing Co., was sentenced to the Detroit house of correction Monday for 90 days and in addition to each pay a fine of \$200 and \$45 costs. The resp dents were convicted in 1909 of violating the local option law and appeal ed to the United States supreme court which affirmed the conviction.

MICHIGAN NEWS ITEMS

State Forestry Warden Oates has established patrols on all logging spurs and main lines of every railroad in upper Michigan. Their duty is to see that only locomotives with properly screened smokestacks are alowed to run. They also will esti-

mate the damage of the recent fires. A bost containing three men fishing was capsized on Round lake near Petonkey Sunday and Carl Zero, 35 years old, was drowned. The other two men were rescued by another boat

nearby.

Postal receipts for the current fiscal year in the Detroit postoffice, which ands June 30, will aggregate more than \$3,000,000, according to Postaster Vagel. In view of this fact. naster save he will work for an increase in pay for all supervisory officials of the office because of their creased duties.

Hellehenenenenenenenenene ARREST OF GUST SAVES HIM FROM DEATH IN SEA

Marquette, Mich.-Gust Pan nila of Negaunee is not among the victims of the sunken steamer Empress of Ireland, although his name appears on the passenger list and he was announced as one of the lost. Instead, Gust was reposing safely in the custody of officers the night the Empress went down Half an hour after he purchased a ticket to Finland an officer arrested him on a warrant sworn out by a Duluth publishing house for which he had worked, charging him with embezzlement. Gust settled soon after his arrest, but the train he was to take was the last that would permit him to reach the Empress before she sailed, and he had to lay over.

CARRANZA SENDS **NOTE TO U.S. PRESS**

REBEL LEADER DOESN'T SEE HOW MEDIATORS CAN FORCE SETTLEMENT.

HAS 50,000 MEN IN THE FIELD

Says Occupation of Mexico City Is Matter of Only Few Months and That Huerta is to Be Eliminated.

El Paso. Texas-A semi-official statement from Gen. Carranza's headquarters at Durango, criticising the actions of the A. B. C. mediators at Niagara Falls, and an announcement from General Villa reiterating his allegiance as a military leader to Caranza, were developments Monday of the Mexican situation here. Villa arrived at Chihuahua city from Torreon on his way for a visit to Juarez. Carranza was reported as having begun preparations to move by way of Torreon to Saltillo, where he will perfect

his provisional government. The statement from Durango, where Carranza's provisional government was addressed to the press of the United States, with a note to the effect that it had official sanction, although it was not a formal declaration The telegram, in English, arrived here over the National Telegraph

wires A copy follows, in part:

"The dominant sentiment of the constitutionalists regarding the proceedings of the mediation commission at Niagara Falls is one of astonishment that there should be such an apparent lack of understanding on the part of that body not only with regard to conditions in Mexico, but as to the attitude of the constitutionalists regarding the mediators. This lack of understanding is not confined to the commissioners themselves, but seems to be shared by a large portion of the American press as well as by the Washington government."

The constitutionalists are especially caustic in their comment on the proposal of the commission to take up the agrarian question and propo some form of settlement. They declare this is a purely internal problem and that they will tolerate no outside interference. Indeed, this is their attitude with regard to the entire proceedings of the mediation commission.

The constitutionalist leaders are wondering how they are to be forced of study, its scope, arrangement as to do this in view of their present accomplishments and by whom they are to be crushed if they decline to shey

The constitutionalist leaders assert that with an army of approximately 50,000 men in the field, the occupation of the remainder of Mexico, the cap ture of the capitol and the elimination of Huerta and his followers is a matter of not more than two months. "The inference that Huerta might

sible. He is regarded as a criminal by the constitutionalists and that he should be a candidate for anything, except the guillotine or the electric chair, is not considered seriously by them.' -

AGRICULTURE TO BE TAUGHT

Forty Michigan High Schools Will Have Courses by Specially Trained Teachers in Farming.

East- Lansing, Mich. - When the school year opens next September about 40 high schools in Michigan will offer regular courses in agr culture, taught by specially trained teachers. This number includes 10 schools which will take up the nev work for the first time. According to Pref. W. H. French, of M. A. C., progress in the agricultural work among the high schools has been most en couraging, considering the fact that it has been accomplished without state aid or state bonus of any kind. This extension, it is said, has been brought about solely through the interest of school superintendents, farm-

ers and others.

The introduction of agriculture as subject of study into high school courses was begun in the fall of 1908, with one high school experimenting as to the development of the course probable sims for future development The result of the experiment was very satisfactory, and the development of agriculture in the public high schools has become a part of the extension service of the agricultural college.

PEACE DELEGATES ANNOUNCE HIS WILLINGNESS TO RESIGN.

WHEN PEACE IS RESTORED

Dictator Has Instructed His Repre sentatives That He Will Not Stand in the Way of Any Settlement of Mexican Troubles.

\$6.757.50; milkers and springers, \$45@ Niagara Falls, Ont.—Gen. Huerta is preparing to resign. He Tuesday authorized his representatives at the mediation conference to announce to the world that "neither mistaken pride nor personal interest" would provent his withdrawal when once Mexico is "politically pacified," and the government succeeding his is so constituted that it can count on the

support of public opinion in Mexico. The Mexican delegates in their formal statement revealed that they had been instructed from the first to inform the mediators that Gen. Huerta's personality would not be an obstacle toward reaching a peaceful settlement. They also stated in unequivocal terms that the internal situation in Mexico was "necessarily bound up with the international questions," and that this spirit had actuated them in coming to the mediation conference.

RULING OF BOARD REVERSED

Supreme Court Finds That Accident Board Erred in P. M. Case.

Lansing, Mich.-The supreme court Monday decided against the industrial accident board in the case of Philip Limron vs. the Pere Marquette railroad. Limron, while employed by the road, suffered the loss of a foot and was badly jammed up. The industrial accident board decided that the road should pay him one-half his weekly wage during the time of his disability caused by injuries other than the loss of his foot and one-half his weekly wage for 115 weeks for the loss of the

The supreme court says that the ruling of the industrial accident board is erroneous and ordered that it be set aside and vacated. The court further change at 87 1-2c, touched 88c and desays that the workmen's compensation law speaks in terms of disability and that the road shall pay for either one injury or the other and not for both.

GROWING OF SEEDS IS NOW ONE OF BIGGEST INDUSTRIES

Big Seed Warehouse in Charlevoix County.

By H. J. DANIELS

Although fruit growing and its allied industries have obtained the strongest foothold in western and northern Michigan, and in the main offer the greatest opportunity for expansion, the growing of seeds for the several great seed companies shows the most phenomonal growth. Many of the seed concerns have branches scattered through the northwest portion of the state, others have forces of men always on the lookout for acreage and are but awaiting the day of securing sufficient acreage to establish branches; while still others with a view of future action, are looking the country over and investigating its re-

One company alone, at one of its branch warehouses, bought and stored in one seaon 30,000 bushels of pea seeds. Another firm, which did not believe it could secure sufficient acreage for its needs, cleared up and planted last spring 4,000 acres of the same vegetable.

Clover seed, too, grows to great advantage on the sandy plains of the north and northwest. There are records of men, who, buying such land sometimes at prices less than \$5 an acre, have in the first season raised clover seed enough to pay for their land several times over, besides yielding their living. Plains-grown clover seed, because of its purity and freedem from weed seeds, and because of the exceeding plumpness of its kernels, has practically necessitated the establishing of a new grading superior to prime in Toledo, the clover seed market of the United States.

Beans, corn, potatoes, almost any variety of grain or tuber does equally as well, and finds the same demand By actual test, in widely separated communities, under most diverse conditions, the seed companies have demonstrated to their entire satisfaction that northern grown seeds will, when planted in Indiana, Ohio, Tennessee, Texas, Florida or Louisiana, germinate and mature more quickly than seeds grown in the south. Radish seed grown in western Michigan and planted in the south are uniformly ready for the market two or three days-to-a week earlier than those grown from southern seed, while corn shows difference of two weeks. The southern farmer bends every effort to catching the early market so it is get the northern grown seed.

FARMERS AT FAULT. C. K. Bassett of the market depart ment of agriculture at Washington addressed a body of farmers at Owosso recently and told them that the farmers themselves are at fault for the unsatisfactory condition of the bean market today. Dumping the entire bean crop on the market in the fall. which records show has often been the habit of Michigan farmers, is blamed by Mr. Bassett for the bad conditions.

The market department is making an investigation all over the country of the bean, fruit and other markets with a view of alleviating unsatisfac tory conditions. In Michigan the farmers believe they are not getting enough for the beans, while the consumers think they are being compelled to pay too much for them. It was for the purpose of seeing who is

right that the market department sent Mr. Bassett out.

The record of one large bean job-bing house in Michigan for the past five years was submitted at the meeting. It showed that practically all the bean crop each year had been sold in the fall. The practise of marketing nearly all of the bean crop in two months, when it takes 12 months to consume it, is wrong, Mr. Bassett told the gathering. The beans should be placed on the market in quantities pro-

portionate to the immediate demand. Mr. Bassett said he would go back to Washington, make his report, and if it was deemed advisable by the head of the department a man would be sent to Michigan to remain several weeks for the purpose of educat ing farmers as to the proper method of marketing their crops.

It is true that nature and a woman's work has produced the grandest remedy for woman's ills that the world has ever known. From the roots and herbs of the field, Lydia E. Pinkham, forty years ago, gave to womankind a remedy for their peculiar ills which has proved more efficacious than any other combination of drugs ever com-pounded, and today Lydia E. Pinkham's Vegetable Compound is recognized from coast to coast as the standard remedy for woman's ills.

In the Pinkham Laboratory at Lynn Mass., are files containing hundreds of thousands of letters from women seeking health - many of them openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound: and in some cases that it has saved them from surgical operations.

"Scoring a run after a side is out is a ticklish situation for any umpire, and I can honestly say that seldom before have I heard of an instance where an umpire must rule on such an affair. There were three Kansas City men on the bags, and two out. The batter had three balls and one strike, and apparently a hitand-run signal was given. As the Buns' pitcher wound up, the men on first and second started out on a gallop, but the man occupying third saw that the ball was wide, and he started off. slowly to stroll home, as the run was forced in. The runner who had been on second, however, had decided to give an exhibition of speed, I guess, for he dashed around third and took a hig lead toward the plate. Quick as a flash Wilson pegged the ball to Zeider, and the runner was tagged

That out was made before the stragglar who had been on third reached the plate, and there we have a situa-tion that would puzzle anyone for an instant. The Packer lagging from third continued to walk home, and he registered the run probably three seconds after the third man had been retired at third. There was nothing to do but to allow the run, as the pass issued with the sacks full forced in a run which must be counted, even though a speed boy pulled a bone on the sacks.

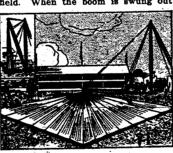

COVER PROTECTS BALL FIELD Canvas Tarpaulin Screen, Attached to Hangers, Sliding on Cables, Makes Sloping Roof.

To protect baseball diamonds and other athletic fields from rain and avoid postponement of games on account of "wet grounds" two St Louis inventors have devised and patented a cover that may be spread over the field when it is not in use. The cover is arranged in two forms to be used with or without a grandstand. In one

Until a few years ago, when most of the club owners in the American and National leagues began constructing new stands, there were many 25-cent seats. But since then they have been growing scarcer and scarcer. The old area in most of the narks has been cut into three parts, the two parts nearest the home plate selling at 50 cents, and only the little stretch that is farthest away from the plate being allotted to the 25-cent fans.

The rules of the big leagues provide for 25-cent seats, but they do not specify the number. Because of that little error that would have protected the 25-cent fans the magnates have reduced the bleacher seats from numbers far into the thousands to numbers in the hundreds.

WELL DONE

We were favored with perfect weather r the memorial or decoration ceremonies last Saturday. The rain of the officient to make driving very enjoyable. Many hastened to oak grove early in the morning to put finishing touches on the sacred little plats of ground and adorn the graves with wreathe and flowers. At the appointed hour at the ringing of the school bell, auto drivers hastened to the high school building to carry teachers and children to the cemetery. The old soldiers and W. B. C. gathered at the nost room and soon the committee had all seated in auton which were willingly furnished and the procession started in order passing due west up Exchange Place and Jackson street to oak grove. How the Central Chautaugua Circuit Is Operated

A TYPICAL CHAUTAUQUA SCENE.

The system of conducting a Circuit Chautauqua is an example of modern efficiency. Few people understand comprehend the magnitude of such an undertaking. The Central Chautauqua system which furnishes our ogram will conduct similar assemblies in sixty-five other towns. In order to carry out their plans they have six program will conduct similar assemplies in sixty-ave other towns. In order to carry out their plans they have six large tents, each capable of seating over a thousand people. Five of these tents are in use at one time and every day the last one is on the move. Each tent is in charge of a platform superintendent and a rew of tent men.

These tent men are usually selected from various colleges and universities. The entire number of souvenir programs issued by the Central System this year weighed over six tons. Thousands of billboard sheets, fence signs, tack cards, auto banners, street banners and other kinds of unique advertising material were used by the advance men. Though the routing of talent and tents is made with the greatest care, the total mileage for the whole season for all who appear on the program in the various towns will be 136,120 miles, or almost six times around the earth.

A Floating City.

Along a narrow wooden footway, built upon piles, we walked for half a mile till we seemed to be in the middle of a floating city; but away, farther to the west. I could make out an iron-roofed building, which, I learned, is the terminus of the railway from Samshin to Canton, and a pair of sheerlegs, which marked the position of the Canton-Hankow railway, connected with the other by a ferry-boat pervice and likely, ere long, to become the regular route for reaching the Trans-Siberian line. Looking back towards the town, I had pointed out to me a tall, gray stone building as a pawnshop, an institution regarded in China as a kind of bank.

We now turned away from the cree! up a narrow street where all the building were wholesale rice stores. Almost every street is set apart for one trade or industry. In Sap-Pat-Po (otherwise Ward 18), however, the chief business street of Canton, the shops were filled with general manufactured goods-German and Japanese clocks, American soaps, gramophones and sewing machines. Here were strange articles of diet also—edible beetles, giant whelks bamboo shoots and dried cuttle fish. There were bankers shaking coins into trays till each of a hundred circular depressions was filled, as a way of counting, dealers in old pictures, a lottery shop, where prizes were being paid out for a lottery late coins, jewels and even fruit and flow-ly drawn, and an ancestral hall or ers. The kings of Burma and Siam eting place for some particular clan or guild. Then came a whole street of the makers of "Old-Age Clothes," as the Chinese call their coffins, and a street of pewter workers, and a street of smiths—and all this time we had only reached a gateway of the outer wall of Canton. Inside this, after passing a small island of shops, we went under the semi-circular arch of princes the Great West Gateway, where the wall was 17 yards thick

We climbed from within on to the top of the wall, and above there was a sudden peace and quietness. Here and about the bastions were old British muzzle-loading guns on wood-1812 and on another 1816. Itswas foggy, according to survivors, when the Empress of Ireland, a steelhulled, steel-bulkheaded ship of more than eight thousand tons, left Montreal at 4:30 Thursday afternoon in command of H. G. Kendall of the Royal Naval Reserve, one of the most skilled of transatlantic navigators.

Forest fires also obscured the atof a pilot, proceeded slowly on her way to sea. At midnight the pilot aide left near Father Point, shouting a merry "Bon Voyage" as he went down

their ladder to his waiting boat. The darkness at this time was intense and the ship under the slowest speed possible with steerageway held her course. Her decks were deserted. The passengers had all sought their berths with no thought of impending death.

Out of the darkness, on the port side, soon after 2.30 in the morning there loomed the little Norwegian collier, not half the size of the Empress but fated to be her destroyer.

Not until the collier was almos beam of the big liner was the danger known on either ship. The fog had blotted out the lights as well as the port and starboard lights of both ships. Quick orders trumpted on both ver sels were heard. But they came all

The bow of the Storstad smashed its way through berths on that side of the ship, killing passengers sleeping in their berths and grinding bodies to

Reaching the stern of the big liner the Storstad staggered off in the dark ness, her bow crumpled by the impact. Her commander was ready a few minutes later, when he found his ship would float, to aid the crippled and sinking Empress, but he was too late to save the majority of those on board.

Carried to Bottom. The Empress of Ireland recoiled almost on her starboard beam ends from the blow of the collier and passengers were flung from their berths against the walls of their staterooms.

Many were stunned and before they had time to recover were carried to the bottom with the ship.

The vast torrents pouring into the

great gash on the port side, aft, filled the corridors and flooded every stateroom abaft the midship section inside of four minutes.

There was never a chance for the side laid open for half its length from the midship section to the stern, a seive had more chance to float the the Empress of Ireland, and the trapped passengers in that after sec tion were doomed from the moment the Storstad struck.

Reeling from the blow the ship be gan to settle almost immediately as the water rushed into the big rent.

From the forward cabins, however men and wemen in night attire stun bled along the corridors and up the companion way to the promenade deck -the deck below, the one on which the boats rested.

Swarm to Deck.

Up they swarmed on deck in their alght clothing to find the ship heeling way to port and the deck slanting at degree that made it-almost impossible to stand even clinging to railings. Men and women, shricking, praying, crying for aid that was fated to arrive too late, fell over one another in that last struggle for life on board the doomed Empress of Ireland.

Frenzied mothers leaped overboard with their babies in their arms. Others knelt on deck and tried to pray in the few moments left to them. Some were flung overboard by the heeling of the sinking ship and some broke their legs or arms in trying to reach the life boats.

Above the din of the struggle on the great promenade deck could be heard for the launching of the lifeboats. Several were launched in the 19 minutes that the ship floated.

The water rushed forward and the Empress of Ireland, went swiftly to her doom, carrying down with her hundreds of passengers who stood on her Slanting deck, their arms stretched upward and their last cries choked in the engulfing waters.

Her bow cut under the upper deck and took a peeling off the side of our ship that allowed the water to rush into the lower decks. NECESSARY TO LIFE

Wholesome Fear Should by No Means Be Entirely Cast Out by Mankind.

Fear is a word out of favor-almost in disgrace—in these days. We are exhorted zealously to be without fear, because there is nothing in the uni verse of which we need to be afraid. Fear is said to be the beginning of folly, of failure, of disease and destruction. It cannot possibly be the beginning of wisdom or of any good thing.

If we maintain that fear is a nec essary element in our philosophy of life, we are beset on every hand by a bewildering variety of cults which discredit such philosophy as antiquated and unwholesome a relic of that dreadful period before we had found out that all evils are imaginary and that there is nothing but good in the universe.

In this world, where dangers abound, we ought to recognize fear as one of our very good friends. From the cradle to the grave it is our daily teacher, guardian and guide.

It is out of fear of the loathsome ness and fatal consequences of diseases of smallpox and the bubonic plague that men have so bent their energies to finding out means of prevention and cure. It is because we are so wrought up with fear of the terrible white scourge, consumption, that the whole civilized world is now being organized to do battle against it.

What Fear Has Done. Fear puts safety couplers onto cars and equips the railroads with block signals. It furnishes steamships with life preservers, boats and rafts, makes them virtually non-sinkable with watertight compartments, and now adds the wireless telegraph, so that they may never be out of reach of some human ear that shall hear a call for

help. It is fear that has given to us the modern sanitary home in the midst of a sanitary city, wherein we may dwell free from constant dread of "the pestilence that walketh in darkness and the destruction that wasteth at noonday." *

Illustrations of the practical uses of fear suggest themselves endlessly. We know that we are in an infinite universe, surrounded by infinite powers. We must yield obedience to these powers or suffer the consequences.

Reasonable fear is the gift of God to his children. It keeps us in mind of our limitations. It gives us a lively realization of the consequences of disobedience. It spurs us on to find out the real conditions that surround us, so that we may guard ourselves against evils and dangers. Out of the fertile soil of fear springs the tree of the knowledge of good and evil.

Pain le for All. "Be strong in pain," is the exhortation which hangs on the study wall over the desk of Emperor William of Germany.

It is not "Be strong because there is no pain." It is not "Be strong because there is nothing to endure that requires your strength." It is, "Be strong in pain." And the plain meanbeen nearc; no account.
"I shouted five times; I also shouted ing is, there is pain for you, as there

"and if he did not hear that he should world. You will fear it. You can't
help that. The fear is wholesome. It world. You will fear it. You can't help that. The fear is wholesome. It will keep you from encountering pain recklessly.

Though love may, indeed, cast out that base fear which cowers before God as a tyrant who inflicts unimaginable punishments, must we not con-tinue to fear, when we present before him who is perfect wisdom, perfect love and perfect holiness, our imperfect, ignorant, willful and sin-stained natures?

We may say, and with good right, that we are children of God and there fore of the same spiritual nature as he: but how infinite is the distance between our low estate and his height of holiness, and how shallow and thoughtless we are if we do not fear before him when we worship!

Need Revival of Honesty.

I believe the reason we do not have better work in this country is because there is so much sham. We do not go down into the bottom of things. We need a revival of honest, downright, upright honesty. That is what we want-right living. If it costs the right eye, out with it. 'That is what repentance means. It is not just mere sentiment—going to meeting and praying and having a good time, not squandering our life according to the Scriptures.

God is going to draw the plummet line by and by, and he will have it right. We may deceive our friends and deceive one another; but let us keep in mind we cannot deceive God. If we attempt to cover up some sin, some dishonest act, and come to God with our prayers, he will not accept them. They will not go higher than our heads. It is more important to live to please God than man.—Dwight Moody. ٠.١

The Winning Power. Christian arguments and appeals, re-

enforced by the power of Christian exemple, are most persuasive, and bring many into the freedom of the Christian life. We should have more faith in the power of appeals conveyed in the pulpits and in the religious press. But, best of all, whenever a true word is spoken for Jesus Christ, an ally of the truth appears in the Spirit of God working upon the minds of those who ear, and the ultimate explanation of the fact that many are being led back to religion is found in the unspeakable yearning of the Holy Spirit, and in his tender and constant work in winning the wills of errant men to an acceptance of the duties of the only rational existence that is possible for man—the life that is hid with Christ in God. In view of this great outreaching and uplifting love of God for men, we should not be surprised that multitudes are being drawn back to religie while at the same time we ought never to intermit prayerful and earn fort to reach with the gospel those who so greatly need its quicker and sustaining power.—Bon's Her

CHAPTER X .- Continued. He looked as though he expected nothing. He could only sit back and wonder why the deuce Sara meant by

behaving like this.

They returned at seven. Dinner was unusually merry. Sara appeared to have recovered from her indisposition; there was color in her cheeks and life in her smile. He took it to be an omen of good fortune, and was immeasurably confident. The soft, cool breezes of the starlit night blew visions of impending happiness across his lively imagination; fanned his impatience with gentle ardor; filled him with suppressed sighs of contentment, and made him willing to forego the delight of conquest that he might live the longer in serene anticipation of tts thrills.

Ten o'clock came. He arose and stretched himself in a sort of ecstasy.

Damn It All, Sara! She-She Turned

His heart was thumping loudly, his senses swam. Walking to the veran-dah rail he looked out across the moonlit sound, then down at the selected nook over against the garden wall-spot to be immortalized!-and actually shivered. In ten minutes' time, or even less, she would be down there in his arms! Exquisite medita-

He turned to her with an engaging smile in which she might have discerned a prophecy, and asked her to come with him for a stroll along the wall. And so he cast the die. Hetty sent a swift, appealing look

at Sara's purposely averted face. Les-lie observed the act, but misinterpret-

"Oh, it is quite warm," he said quickly. "You won't need a wrap," he added, and in spite of himself his voice trembled. Of course she wouldn't ed a wrap!

"I have a few notes to write," said Sara, rising. She deliberately avoided the look in Hetty's eyes. "You will

find me in the library."
She stood in the doorway and watched them descend to the terrace, a sphinz-like smile on her lips. Hetty seemed very tall and erect, as one go ing to meet a soldier's fate.

Then Sara entered the house and sat down to wait. A long time after a door closed stealthily in a distant part of

house—the sun-parlor door, she knew

by direction. A few minutes later an upstairs

door creaked on its hinges. Some one had come in from the mellow night, and some one had been left outside. Many minutes passed. She sat there at her father's writing table and waited for the other to come in At last quick, heavy footfalls sounded on the tiled floor outside and the

They were silent for a long time, the girl lying still and almost breath less against the other's shoulders. Hard to Refrain From Admiring in-genuity of This Little Washington Girl.

Audrey was thirteen, but a big girl for her age, according to the Washington Herald. Yet she was still a child in her absorbing taste for sweets. Not far from her home the food show, which is held annually in Washington, was going on, and the idea that there were pounds of cakes, jellies and chocolates all ready to be eaten occupled her mind every morning as she wended her way to school past the building. This preoccupation of thought resulted in arithmetic in which four quarts equaled one yard, and Napoleon crossed the Rubicon on the ice in history lessons. But Audrey was a modern girl, and soon found

a way out of her trouble. Saturday she decided to put her plan into execution. Mother had gone to work at the treasury, and Audrey was monarch of all she surveyed literally. She could not get into the food show without being accompanied by ar adult. Now, adults in such cases being regarded as necessary evils, the girl determined to be one herself for

the occasion. Down at the ten-cent store bought a diamond ring and a smaller one of plain gold. Then she hied home, arrayed herself in her mother's best doorkeeper passed her in unnoticed in the crowd of others streaming in, for the figure seemed that of a short wom-an. Blucher Solved Problem One hundred years ago the pleni-potentiaries of the allied nations were onferring on the future of Europe after the overthrow of Napoleon which now seemed inevitable. The invasion of France, which was the first great task undertaken by the allies had been accomplished, and there now remained only the march upon Paris So far the coalition had accomplished its work well. But at this point the jealousies of the allied nations began the plenipotentiaries favored pushing on to Paris without delay. But the Austrians were not easer to hasten the sure the triumph of Russia and the passionate vengeance of the Prussians. At this juncture Marshal Blucher solved the problem by boldly continuing his advance on the French capital without waiting for the plenipotentiaries to agree.

Leslie was to return from the wilds on the following day. Early in the morning Booth had telephoned to inquire if she did not want to go for a long walk with him before luncheon. The portrait was finished, but he could not afford to miss the morning hour with her. He said as much to her in pressing his invitation.

"Tomorrow Leslie will be here and I sha'n't see as much of you as I'd like," he explained, rather wistfully. "Three is a crowd, you know. I've got so used to having you all to myself, it's hard to break off suddenly. She would have to lie to him; to tell him she did not love him.

Coming to the jog in the broad macadam, they were striking off into the narrow road that led to the quaint old mill, long since abandoned in the forest glade beyond, when their attention was drawn to a motor car, which was slowing down for the turn into Sara's domain. A cloud of dust swam in the air far behind the machine.

A bare-headed man on the seat beside the driver waved his hand to them, and two women in the tonneau bowed gravely. Both Hetty and Booth flushed uncomfortably, and hesitated in their progress up the forest road.

Language Not Likely to Last. Mistral, the great Provencal poet, whose death was announced lately, has been likened to Robert Burns for the work he did. But Burns' task was child's play compared with Mistral's. The Scottish poet found his language fully grown and completely alive; Mistral had to create his means of expression. Provencal had lost ery resemblance to a literary tongue, and the new poet-patriot had to mold it afresh, to recreate and to build up on the ruins left by the vineyard and the farm. "Our Provencal," said Mistral, "was a country lass ragged and wild." She is now a wonderfully beau-tiful creature; but it is doubted whether all the genius of Mistral can keep her alive. A somewhat unusual way of utilizing the border of a handsome damask cloth is to make it into a "runner down the entire length of the table If the damask is sufficiently handsome to warrant the handwork, shallow scalloping is by far the best appear ing finish for the edge, but a narrow Cluny edge, sewed on by hand and fulled only at the corners, is an effective finish and much more quickly ccomplished.

Where the tablecloth is little worr except directly in the center strip which has received the greatest test of endurance, it is a good idea to cut the cloth in half lengthwise, taking the outside edges for the middle of a new cloth.

Where the material is not particularly handsome, the selvage edges should be neatly joined with the oldfashioned over-and-over stitch and then rubbed open until the seam has more the appearance of a crease in the damask than an actual joining of others. two selvages.

This brings the unworn part of the cloth where it will receive the hardest usage and the worn sides, which wear and tear on top of the table, can be cut away sufficiently to remove all unsightly places and the raw edges neatly hemmed.

LESSON FOR JUNE 7

COMING OF THE KINGDOM. LESSON TEXT-Luke 17:29-37. LDEN TEXT—"Lo, the Kir is within you." Luke 17:21.

I. The Kingdom Present, vv. 20, 21 Pharisees held some peculial ideas about the coming of the kingdom. Contrary to their ideas there are no special outward signs to herald its coming. The word "observation" v. 20, is an astronomical one and suggests that the kingdom was to come in a bodily shape from the sky, a current expectation on the part of the Pharisees.

In answer to the boastful Pharises (v. 20) Jesus plainly told them that he himself is the kingdom, and that that kingdom was in their midst or "among you," see (v. 21) margin. Their or estion was a flippant one, one of unbelief, and to it Jesus makes a characteristically brief, but clear re ply, that partook of the nature of a The kingdom would not come with trumpets and drum. They could not say, "Lo here! lo there!" Its coming was not to be spectacular arresting the attention of some who in turn brought it to the attention of The authorized rendering "within you" does not imply that the kingdom already existed in the individual lives of his questioners. Subsequent teaching of Jesus shows that he here refers to another and a final coming of the kingdom, at the time of the final coming of the son of man What he desired to teach these Pharisees was that the kingdom of which they spoke had already appeared due to the fact of his presence in their midst. The carping Pharisees withdraw and Jesus speaks openly to his disciples of the days that will come, s time of persecution when they will long for comfort

Prophecy Fulfilled.

II. The Visible Son of Man, vo 22-24. The kingdom in its outward form was rejected by the Jews, John 1:26, 27. In its spiritual form it is now in the hearts of believers (Rom. 14:17), but he who was rejected with contempt will one day be sought after, though in vain, Matt. 23:37-39. During the time of his absence many shall claim to be Christ (v. 23), but we are not to believe such claims. Hishas abundantly proved and fulfilled this prophecy. When he really comes there will be a sudden publicity (v. 24), that shall flash from one cor ner to the other of the heavens, Matt. 24:27; then "every eye shall-behold "So shall the son of man be in his day." This instruction Jesus gives to his disciples. Men shall not be present as he then was. After the false ones will come a day of will reveal him and all will know it.

Finality of Events. The Day of the Son of Man, vv. Before that day comes, how ever, he must suffer and be rejected but following that rejection men will marry, carry on merchandising and merriment as in the days of Noah and those of Lot. In the days of Noah and of-Lot there came a sudden halt in these activities and a judgment of food and fire, even so "after the same manner shall it be in the day that the son of man is revealed," v. 30. This refers to the finality of events when the kingdom of God comes by way of udgment. Here Jesus sets his seal upon the truthfulness of these two events which preceded his first advent. If they be not true then he is a false teacher. Like as men discredit those events they likewise would set aside his teaching about his sec and advent. Many claim that verse 31 refers to the destruction of Jerusalem; the context to us clearly disproves any such interpretation. Verses 32 and 33 must be taken toproves

Summary. Onite emphatically this passage is a teaching on the subject of the coming of the kingdom of God. That kingdom came when Christ came in grace. It will come when he comes in judgment. It is coming constantly his reading of Issiah's prophecy. Luke 4:18, 19; cf. Isa. 61:1-9. In his first advent he did come to preach the acceptable year, the year of grace. That day is still with us. In his second advent he will proclaim the day of the the kingdom, will build the waste es and raise desolations. Today the kingdom of God is among us in power through the presence of Christ by the spirit in the living church To the Pharisees he said: "Neither

shall they say, lo here! lo there! for the kingdom is in your midst." To his disciples he said: "They shall say lo there! lo here! go not away nor follow them." We cannot localize the kingdom. On an ancient Syrian fragment the words of Luke 1:33 read. no frontier." On the line of the Phartganisation and empire. With Jesus it means a spiritual realm universal in except a rate of righteousness, and peace and joy in the Hoty Spirit. When he appears all will know.

The owner of a city or town lot, of a suburban home or a country estate. is usually interested in affairs which he considers more important, or, at least, more practical, than the abstract principles of gardening, no matter in what form they are presented or what application is to be made of them His immediate requirement, if his attention is directed at all toward the subject, is practise and not theory He wants planting and not principle his main desire is to employ the speediest and safest process to make his yard, his grounds, or his estate as harmoniously and effectively beautiful as trees, shrubs, plants and vines, limits of his financial rewithin the sources, will permit. There are no hard and fast rules for gardening, and particularly for the art ornamental gardening, whether it be conducted on a large or a small scale, on a country estate, or on the back of a city lot. There are some principles best remembered, but even they are not without innumerable variations in application. e trees are planted on small
