Never before in the history of Lyceum or Chautauqua work has there been such a group of stars handed together as in this case. There are ten members in the company, each one of whom is an artist of merit and a finished player. All of them have had years of careful training under noted teachers and experience in high class concert work, while several have taught in conservatories and have served as leaders and directors of various well known organisations. A capacity tent will surely greet this wonderful company on the fourth day of the Chautauqua.

RAILROAD WINS BIG SUIT

Land Worth Five Hundred Millions Given to Southern Pacific By Decision

Washington-A decision favoring the title claimed by the Southern Pa cific railroad to 200,000 acres of California oil land worth \$500,000,000 was given Monday by the supreme court in two test cases of Edmund Burke and J. J. Lamprecht.

The decision was unanimous. The court, while holding generally in favor of the Southern Pacific railroad's title, held that the government the stage of the Coliseum theatre, still may bring suits to set aside the railroad patents for fraud, but the railroad's title is safe against collateral attack by private persons to get mineral grants for the lands and and in a few minutes the entire claiming title superior to that of the theatre was in flames.

**RHINE VALLEY

PHINE PROMENADE DUSSELDORF

The old Princes Palatine used to point from the towers of their incomparable castle at Heidelberg to the glorious plains of the Rhine beyond and say: "That is where the Garden of Paradise was; it could not have been elsewhere." To attempt to describe the Rhine in a paragraph or two is impossible, but one can have, perhaps, the best idea of its lovliness from the deck of one of the Rhine steamers. Seated in your comfortable chair you can watch the panorama of romance and history unfold itself, and if you decide on stopping here and there, you can land, see what is to be seen in this or that city, and then return to your boat. In this way you can accomplish much in a fortnight and congratulate yourself on having done so.

Not Spoiled by Man.

Cologne - Dusseldorf Rhine Steamer company have a specially arranged ticket which takes you for as many days as you choose and allows you to break your journey as you will. hanging from steamer to steamer on the same ticket. The journey to be specially recommended is from Cologne to Mayence, or the reverse. This will enable you to obtain some idea of Cologne, with its splendid cathedral; of Bonn and its famous university; of the wonderful fortress of Ehrenberitstein, of Coblenz, of Mayence, and of a score of places hitherto known to you on the labels of bottles and the prescriptions of physicians-the beautiful "bad" resorts and the vine centers of the Rhine wines. To travel up and down the Rhine is to see nature's fairest pic ture, which, strange to say, the hand of man has not succeeded in spoiling; it is too big for that!

But it is futile to cite any one division of the Rhine as being more rich in interest, historical and modern. than another. One can but select instances of her attractions to give some small idea of what she has to offer. There is Dusseldorf, a model city, which is not only the home of art but a center of German commerce and German manufacture. Dusseldorf is, many sided. The winding lanes, the ancient market-place and the churches of the old town seem as remote from the modern part of the moved from each other. Historically, course, compare with Co it cannot, of Older than the city itself are two of left a similar scar. its suburbs. Bilk, which contains the been founded by the Apostle Suitbertus and which was rated as a paro grows from an egg laid under the skin any street. A house is never a home chial village as early as 799, and the suburb, Gerresheim, known as far back as 827.

History of Dusseldorf. Dusseldorf is first mentioned by name in a deed of 1159, where it is described as a little settlement of fishermen at the mouth of the Dussel, a got acquires, as it grows, a belt of small river which still flows through the center of the town but is almost entirely bricked over. It became a parochial village in 1306 and was invested with civic rights in 1288, after the defeat of Sieghried, architectop of Cologne, by Count Adotth V at the battle of Worringen. This battle is recorded in the paintings which hang the picture gallery of the Kunsthalle in Dusseldorf and at Burt Castle on the Wupper. Dusseldorf then progressed until it speedily became a commercial center.

in his son, John William II, "Jan Wel- and cart them to the hot place and lem," a popular hero today with the reduce them to ashes or some by-pro-townsfolk, that Dusseldorf regained duct which may be capitalized.

N all Europe there is nothing more its former standing. Under him the beautiful than the Rhineland fine arts and trade flourished, and good times lasted until his death, when the government was transferred from Dusseldorf to Heidelberg and afterwards to Mannheim. And so the history goes, through periods of pros-perity and vicissitudes, until, in 1915, we find it taken possession of form ally by the king of Prussia, becoming in 1816 the capital of the newly formed administrative district, Dusseldorf, and in 1872 a special town district

A century of peaceful development followed and a fresh life blooms today in all three domains of art and Dusseldorf maintains its old rank in the intellectual and artistic life of the Fatherland. Not only is it an art city, with splendid buildings, but it is garden tion for its splendid parks.

BARRED BY INSECT PESTS.

Settlement of Parts of South America is Believed to Be impossible By Many Travelers.

More than one traveler has seriously asserted that the insect pests in the valleys of the Orinoco and the Amazon are enough to prevent forever the settlement of that region by civilized people of northern races Southern Brazil seems as badly off, at least in the forested interior. Hugh Pearson an English explorer of the wild country, describes two insect nests that infest the sources of the Parana. One is a red-hot caterpillar that burns a person wherever it touches; and the other a burrowing creature with a belt of prickles.

The caterpillars are not named, but are said to be various and beautiful. and the different species can be recog nized by the kind of pain they inflict as well as by their markings. They may be the larvae of a species of Lasiocampidoe, related to our tent caterpillars, which are clothed with tufts of downward-pointing hairs that in several tropical species are known to sting dreadfully. Madame Merian, years ago, in an account of the zoology of Surinam, described an enormous caterpillar of this group. She simply touched one of them, whereupon her hands became inflamed, and she suffered excruciating pain.

There is an African moth the hairs of whose caterpillar are so venomous inches, to break the tiresome monotony city as though they were miles re that they are used as an ingredient of a straight line. in making arrow poison. Independence in Construction Gives Charm to American Towns When Not Overdone-Model Shown Here Would Make an Ideal Abode.

There are a great many different kinds of roofs covering a great many styles of houses, any one of which may look well if it is rightly propor tioned, well made and in keeping with the house it is intended to cover. A good deal also depends upon the style and appearance of other buildings on the same property. You don't want a low roof on your house and a steep roof or a gambrel roof on the stable if the two buildings are placed near together, but you are under no obligation to follow the whims and caprices of your neighbors in working out ideas that they may have copied -and abused.

Darwin Still "in the Ring,"

Sir Ray Lankester in a recent review of the "Letters and Recollections of Alexander Agassiz" remarks incidentally that Agassis succeeded in showing that the views advocated by Darwin and Dana regarding the formation of coral reefs were not of general validity. Apropos of this E. B. Poulton of Oxford calls attention to the testboring of a coral reef made at Funifuti. It is the only important trial ever made of the Darwin theory of stolls, and certainly tends to support the latter so far as the Pacific area is concerned. The bore hole was 1,100 feet deep and in the core removed only shallow-water organisms were "For some reason or other." writes Professor Poulton, "probably because it is more exciting to over-turn than to confirm, very little has een said about this evidence.

Speeding Up the Ducks.

Gardeners usually take their duties very seriously, and are notoriously autocratic in their own domains. The other day, says a writer in the Glasgow News I heard a good story about one of the brotherhood. The garden over which he rules is much infested with slugs, and his master suggested that the best thing would be to secure a number of young ducks to act as scavengers. Accordingly the ducks were procured. After their arrival. the owner of the garden, on going out, observed Thomas, the gardener busily engaged in digging, while the small ducks waddled around poking their little yellow bills into the newly-turned-up soil in search of prizes. Well, Tomas," said his master, "I think we'll have to get a little pond made for the benefit of the ducks. "Na, na, sir," replied Thomas vigor-ously, "we'll ha'e nae pond. Gin we had a pond, the jucks wad jist get scutterin' about wastin' their time. They's faur better as they are."

Upon re neated invitations of her friends, the Joslins, however, she consented to at tend a little informal dinner they were giving, accompanied by her daughter. Mistaken in the Portrait. Menzel, the German artist, was at regular patron of a certain Berlin wine shop. One day a man and wife came in and sat down at his table; and presently Menzel noticed that the woman was making fun of him.

Menzel made a few finishing touches and then passing the sketching book over to the man, he inquired, with a laugh. "Is that your wife?" He had drawn a goose.-Youth's Companion.

Irritability the Waster.

Those who are easily irritated lose n enormous amount of precious time and costly energy. In physiology, irritability is the property of responding to a stimulus. In botany, plants endowed with irritable organs, when they touch any object, clasp it. Flowers play an important part upon the summer hat, and surely were artificial flowers so lovely as they are now. Roses of all kinds are imitated so wonderfully that except where the size is exaggerated, or unnatural, one could almost believe them to be fresh flowers, and there are other artificial roses that do not hold the mirror up to nature but are charming in their own Tanatural way —flowers of taffeta for instance, in white or pink or other tint, quite unshaded of texture, and altogether unlike flower petals, but soft and dainty and effective, when cleverly used.

INTERNATIONAL SUNDAY SCHOOL

LESSON FOR JUNE 28

The golden text is a great summary of the meaning and the essential pur-pose of all of our Lord's activities. Each lesson is an illustration of this simple promise. In them we discover chiefly our Lord in his work of preparing his disciples to share with him

in this work.

Lesson I. The observation of man's attempt to get the best seats with the consequent abasement, calls forth the parable of the great supper. Therein we are shown man's enmity against God as revealed by his contemptuous treatment of God's overtures of grace. The rebuke and the parable reveal God's willingness and man's refusal. In all this our Lord was seek-ing these men.

In proportion to the number of men who were heretofore employed, there are no more men out of work in Detroit and perhaps other cities, but for political purposes people are making a great cry. White house officials gave out letters from business men in different parts of the country, tending to uphold the president's contention that business conditions are good and that there is an organized effort on the part of "big business" to postpone action on the proposed anti-trust legislation.

This year at the state fair at Detroit, Sept. 7 to 18 they will have the greatest exhibit of " Michigan-Made" articles ever shown. Already the major portion or the space silotted for this purpose has been contracted for. The exhibit will prove that Michigan manufacturers are abreast of the times and that their products are factors because of their worth and because the state's dis'ributing agencies are such that these products may be set down at the consumers' door at less cost than other manufacturers

We have heard very little said about the chautauqua that is to be held in this village July third to seventh and wonder if our citizens realize what is in store for them in the way of amusement and education. The program of entertainments as published in the ENTERPRISE ought to conmand the attention and support of every person by individuals of national reputation far exceeding anything ever held in this or any of our neighboring villages. In many places where these chantanquas have been held people have come no little distance to attend, them and have found the time and money well spent Business men can afford to selet in making the chautaugus a success as i will draw people to the village and many will take advantage of the visit to do some shopping. To the young people no doubt and to those who older grew since the days when they were school boys and girls and hastened at the ringing of the old school bell to their classes in the old school house, the annual reunion of the slume with its exercises, banquet and dance i the great social event of the year.

It is a pity that there is not m effort made to induce the members, all the members of the association to make this a genuine home coming.

But to do this requires much effort and after the boys and girls get interested in business activities they find little time to devote to social matters. A few have kent in touch with the old home town and the claramates and occasionally wander back to the scenes of their childbood or wonth and are really apported to find that so many have remained here or near by so that they keep the association alive and its annual remains a function par excellence.

The officers seem to meet with the usual amount of difficulty in making out a program that will be interesting. So few are willing to " brush up " and do a literary or musical stant for the amuse ment or criticism of the public, that it keeps the committee either at the typewriter or telephone for weeks prior to the event.

SYNOPSIS.

Challis Wrandall is found murdered in a yoad house near New York, Mrs. Wrandall is summoned from the city and identifies the body young woman who accompanied Wrandall to the inn and subsequently disappeared is suspected. It is suspected in a nate during a blinding snow storm. On the way she meets a young woman in the road who proves to be the woman who killed Wrandall. Feeling that the girl had done her a ærvice in ridding her of the man who though she loved him deeply, had cauged her great sorrow. Mrs. Wrandall delermines to shield her and takes her to her own home. Mrs. Wrandall hears the story of Hetty Casteon's life, except that portion that relates to Wrandall. This and the story of the tragedy she forbids the girl ever to tell. She offers Hetty a home, friendship and security from peril on account of the tragedy. Sara Wrandall and Hetty return to New York after an absence of a year in Europe. Leslie Wrandall, brother of Challis, becomes greatly interested in Hetty. Sara sees in Leslie's infatuation possibility for revenge on the Wrandalls and reparation for the wrongs she suffered at the hands of Challis Wrandall by marrying his murderess into the family. Leslie, in company with his friend Brandon Booth, an artist, visits Sara at her country place. Leslie confesses to Sara that he is madly in love with Hetty. Sara sranges with Booth to paint a picture of Hetty. Booth has a haunting feeling that he has seen Hetty before. New Turbine Liner. The new German ocean liner Admiral von Tirpits, just launched at Stettin to ply between Hamburg and the Pansma canal zone, is the first large vessel to employ the Foettinger turbotransformer in place of the usual turbines. Steam turbines give their best service when operated at a high speed, but the number of revolutions of the ship's propeller must not exce a certain limit. MONARCH'S ACT SURPRISE

Old Lady Thought it Undignified That British Monarch Should Blow His Own Nose.

Indians at Philadelphia Zoo Laugh at Animals

DHILADELPHIA, PA.—Whoever thinks an Indian never laughs should have been at the Zoological gardens the other afternoon when a group of seven Blackfeet braves and four squaws, in full warpaint and feathers. saw for the

first time the curious wild animals from all parts of the world. The red skins simply roared with mirth from the time they struck the garden until they left. Every animal amused them highly, particularly the monkeys, and both furnished amusement for the great crowd in attendance.

Medicine Owl, one of the huskiest of the braves, stopped stock still in front of the cage holding the largest baboon in the garden. He let loose several loud guffaws and attracted Mr.

Baboon's attention. It's a mistake to try to make a monkey out of a baboon He resents it. This particular baboon did, anyhow, and he showed his anger by shaking the bars of the cage, chattering shrilly and making the most horrible of faces. The madder he got the more Medicine Owl laughed and the more Medicine Owl laughed the madder the baboon became. The other Indians joined in Medicine Owl's screams and the baboon went into a frenzy. He tore around the cage until he could stand it no lenger. With a last frightful grimace at the convulsed redskins he dashed headfirst against a swinging door leading to the outside cage and dived right through, disappearing

None of the other animals paid as much attention to the Indians' laughter as the baboon. The lions, tigers and other members of the cat family were too busy feeding to give any notice to the Indians as they passed through the carnivora house. The Indians, however, paid close heed to the table manners of the big cats and thoroughly enjoyed the sight. It was the same with the sea lions. The Indians watched them closely as they swallowed the

Before the giraffe, the Indians stopped laughing and gazed in awe. They could scarcely believe their own eyes and the zoo attendants had a hard time dragging them away from the cage.

Sporty Driver Finds "Uncle" Is the Town Police

BOSTON, MASS.—Ovide W. Meumier drove his rig jauntily through the streets of Holbrook. Carelessly he glanced to the right and left, drinking in the admiring looks of the populace. He looked like real money and he

knew it. He was in high fettle.
But Oryide didn't know just how shrewd the Holbrookites are, and the result was that the next day he was fined \$50 for carrying a loaded revolver by Judge Avery in the Quincy police court, and was wanted by the Fall River police for the larceny of the rig he so sportively drove.

When Orvide met up with Thomas Carrig he believed he had come to the very man who would buy the rig. The horse was a beautiful, high-stepping

bay, and the carriage was one of the sporty variety. It was then that Ovide made his first mistake.

He offered the rig to Carrig for \$22. But Carrig has a son who wasn't the "rube" Ovide thought he was. The son, John, became suspicious, for he knew horseflesh. He called up the police department, Chief Walter Crooker. The department responded, represented himself as John's uncle, and invited

Ovide to take him to the uncle's office where the trade could be carried Ovid didn't suspect any rude trick, so he drove to the office. There's

where he made his second mistake, for on his arrival at the so-called uncle's office he found himself under arrest.

The police of Fall River declared they wanted Ovide for larceny. Chief Crooker dived into Ovide's hip pockets and brought forth two loaded revolvers. He dug into Ovide's suitcase and brought forth a complete kit of burglar's tools. So he put his guest in the town lockup.

Andrew Carnegie a Prisoner in His Own Garden

EW YORK .- Andrew Carnegie left here the other day on board the NEW YORK.—Andrew Carnegie left here the other day on board the Oceanic, singing a song of peace, but he told of having his temper ruffled on the previous night when he was accidentally made a prisoner in his

own yard. He found that he had closed a door with a spring lock and could not get back into his house, so he paced back and forth in the garden, eagerly looking through the steel pickets that rise 12 feet above street. A boy about twelve years old came ambling up the street whistling

a song of spring.
"Come here my boy," said Mr. Carnegie, peering out from the garden. "What do you want?" said the boy. "I am Mr. Carnegle and I find that

I have locked myself out here in the garden. Will you please go around to the front door and tell the servants of my predicament."
"Not me," said the boy, with a wave of his hand. "You ain't Mr. Carne-

gie. If you were you wouldn't be kept out there in the yard. if you were you wouldn't be kept out there in the yard. Now, really, my good boy, I am truly Mr. Carnegie. Will you do as I ask you please?"

Vobody home, nobody home," said the boy, starting to walk away. "The thing was beginning to distract me," said Mr. Carnegle, as he told of the incident. "I had gone into the garden to pick a bouquet to take with me on shipboard. So I called to the boy again, telling him I would give him

one of the flowers I had in my hand if he would notify the servants." "Oh I'll take a chance," said the boy. He did and he waited for a larger reward than the flower when he learned that the man who spoke to him. really was Mr. Carnegie.

ADVOCATES CHANGE IN RULES

Most Astute Baseball Men Admit Problem of Intentional Pass is Hard Problem to Solve. Jim McGuire, for many years a leading major league catcher and

now acting as coach and scout for the

Detroit team, declares that the great est and best change in the rules of baseball was that making foul bails strikes if the batsman has less than two strikes upon him. Says McGuire: The rule mes the problem brought up by the constant fouling off of balls by hatters until the poor pitcher was tired and because of sheer exhaustion had to put the ball over the plate with nothing on it but the hide that the factory endowed it with. It was an easy matter for some of the clever men of ye olden days to foul off a dozen balls until that one clothed in nakedness lobbed up to the plate for

slaughter. "The next problem that must be faced and solved is the intentional pass affair. There is apparently no way in which to force a pitcher to pitch to a man if he wants to pass him. It has become so bad nowadays that the managers of the clubs simply tell their men when to pass certain batters and the pitcher and catcher so through the motions of pitching to him, while the crowds in the grand stand generally howl in derision. They always do it if it's a home man at bat, with a couple of men waiting score and one run needed to tie. "This is the one problem that the mest astute baseball men in the coun try admit there seems to be no solu-

tion for. They also admit that it is problem that must be solved. "It is only in recent years that the intentional pass problem has come up. Back in the old days there was no such thing as the intentional pass. It wasn't considered a game or a neces sary thing, But today it is considered a part of strategic baseball.

TRIPLE MURDER MYSTERY CLEARED

CRIME THAT HAS LONG BAFFLED GRAND RAPIDS CONFESSED BY LAWRENCE.

REPORTER GETS STATEMENT

Man Arrested in Covington, Ky., Las April Tells All About Diamond Robbery When Three Men Were Killed.

Grand Rapids, Mich.—The mystery of the robbery of the Thomson jewelry store, in this city, and the slaying of J. N. Thomsen and two of his clerks last fall was cleared up Friday night by the confession of Walter ("Vopper") Lawrence, who names Lawrence Robinson as the man who did the shooting.

Lawrence's confession was made when he was informed that Robinson had been shot in a fight with police officers in Boston and fatally wound ed, and that he had told the police there the story of the crime heer Lawrence then told the prosecutor and Judge Stuart, who had been sum moned, the whole story of the rob-bery and killing here. He was led up to the confession by E. A. No. wack, a newspaper man.

Last Sept. 18, shortly before 6 p. m., while hundreds of persons were passing by, two men entered the iewelry store of J. N. Thomson on Monroe street, in the heart of the business district, and help up Thomson and his two clerks, Edward Smith and Paul Townsend. One of them showed fight and all three were shot down, the first two being instant ly killed and Townsend dying a few days later. The two men escaped, taking with them \$2,200 worth of

Within a week after the affair Roy Blackburn was arrested in Chicago and brought back here for trial, but proved an alibi and was discharged. Detective John Halloran kept on the trail and finally, after a chase through 4 states, arrested Lawrence in Cov ington, Ky., April 13. Lawrence rehere without extradition and pleaded not guilty, and his police court examination is not yet com-

Cance Upsets and Young Man and Young Lady Meet Death.

Bay City, Mich.-Agnes O'Brien was rescued Thursday while clinging to an overturned cance in Saginaw bay, but her two companions, Lloyd Ebere, aged 20, and Gertrude Elcke meyer, 19, were drowned. The accident occurred in view of several hundred persons at Wenona Beach, and within a few yards of water so shallow all could have waded to shore. When the canoe in which they were riding upset, several people put out from shore in boats. While David Wright was pulling Miss O'Brien into his boat, Ebere lost his hold on the se and sank. The young people had gone to the beach to prepare for a picnic party of young people, Both bodies were recovered.

RAILROAD WINS BIG SUIT

Land Worth Five Hundred Millions Given to Southern Pacific By Decision.

Washington-A decision favoring the title claimed by the Southern Pa-cific railroad to 200,000 acres of California oil land worth \$500,000,000 was given Monday by the supreme court n two test cases of Edmund Burke and J. J. Lamprecht.

The decision was unanimous. The court, while holding generally in favor of the Southern Pacific railroad's title, held that the government still may bring suits to set aside the railroad patents for fraud, but the railroad's title is safe against collateral attack by private persons to get mineral grants for the lands and claiming title superior to that of the theatre was in flames.

Prof. Wallace the somewhat celebrated muscle doctor who had a sanitarium at Adrian and whose cures were praised by many throughout the country, was in town Tuesday calling on acquaintances formed some years ago. He told the ENTERPRISE that he was going to take a vacation next week and will visit London, Canada, where his wife resider.

We learn that George P. McMahon of Detroit, formerly a resident of this township and graduate of our high school in 779 died at his home last Thursday, aged 59 years. He was a popular man and had a wide acquaiatance, being engaged in the insurance business and an extensive traveler. He was a mason of high degree and past grand master of the grand council of Michigan,

Buy Chautauqua Tickets at \$1.50, That Only 7% Cents Per Number

One of the most careful buyers among our successful business men, was heard to say the other day, that he considered a chautauqua season ticket, "a good buy." When asked for an explanation he picked up from his desk one of the beautiful souvenier booklets containing park. the program and announcements of our ing chantauqua. He said, " I have decided that I want to attend every session and hear every number on the program. It all seems too good to miss. Now if I pay twenty five cents each afternoon and thirty-five cents each evening. for admission it would cost me a total of three dollars. By purchasing a season ticket I am not bothered by any delay or change making at the gate, I am ready for any or all sessions and it only costs me one dollar and a balf. This is an immediate saving of one half. My wife and I can both have season tickets at the price single admissions would cost one of us. "Furthermore," said he, " you will notice these tickets are transferable. Now that means that if I am prevented by some circumstance from attending any session of the program, I can give class B, group No. 1, under the new my ticket to some worthy person, and have the satisfaction of doing a favor."

As he turned to wait on a customer. this far-sighted business man, remarked. You can depend upon it, I am going to use that ticket to the limit. Somebody is going to ride on it every time the t .nt is open.

After waiting on his customer the busitainments and lectures during the five days chautauqua. At the season ticket price each one of these members will cost me only seven and one-half cente.' With a grin and a note of enthusiasm in rather indefinitely and the business man grew more enthusiastic. "Why, said he, "I went over to another to an to attend chautauqua last year because we had none of our own. It cost me for that one session more than the entire sesson ticket for our local chautaugus this wear I paid thirty-five cents to get into the tent, I got two meals at twenty-five cents I had to pay car fare both ways and came home late, tired out."

It occurs to us that the logic of this shrewd business man is irresistible and worthy of following. The calls for season tickets are gratifying the promoters of our chantenque and the outlook is very flattering. We would advise our citizens to purchase now, as the season tickets in the hands of the commites can be sold by them for \$1.50 but. if purchased of the chautauqua management the regular price is \$1.75. The good purchaser buys at the right time and the sight place. Do it now.

NOTED WESTERN REFORM GOVERNOR WHO WILL SPEAK SECOND DAY OF CHAUTAUQUA

GOVERNOR ROBERT S. VESSEY.

THE demand has grown among the Chautauqua patrons for at least one "headliner" upon each program. While the term admits of various meanings, it is generally understood that a "headliner" is a man who has achieved pre-eminence in some field of human affairs. To have been the governor of a sovereign state ought to entitle any man to promi-But to have been twice governor confers more than double honor and distinction; also to have been a governor universally loved and re spected at the close of his two administrations is cause for lifelong gratification. Governor Robert S. Vessey, ripe in years, rich in experience and humanttarian in purpose, came to the Chautauqua platform two years ago to give to the great audiences a few principles of conduct which he estimates are worth "thinking over." Governor Vessey denies that he is an orator. He modestly says his purpose is simply to emphasize some wholesome but homely truths which he believes will if followed out lead to a better world and better people. In the truest sense of the word we believe that he is an orator. He is a stal-wart defender of the home, the school and the church. He is interested in the young. He honors the aged. He was the first governor of the United States to proclaim "Mother's day" a legal holiday. He is the enemy of graft, corrup-tion and dishonesty. In his rugged though kindly fashion he wields sledgehammer blows at all that has the appearance of evil. His audiences love the sean, heed his messages and heartily approve his lectures. No one should miss hearing Governor Vessey on the second night of our Chautauqua.
