While Clare Norris was plowing on his father's farm, a few miles from West Branch, he discovered that he was being followed by a black bear. couldn't see it that way. With his up a tree. While the dog was on ed and shot the bear.

Ten high school boys of Owose have been suspended for belonging to student secret societies, in violation era store in order to collect the inof the state law.

The young son of Henry Cornish, a years for arson. farmer living a few miles from Saline, was fatally shot by his elder brother with a 32-caliber target rifle, late Friday night. The boys had gone to their bedroom and were playing with the gun which had been left loaded. The gun was discharged accidentally and the builet entered the smaller boy's side and caused his death before medical aid arrived

MICHIGAN NEWS BRIEFS CALL ON THE STATE TO GIVE THANKS

GOVERNOR FERRIS ISSUES HIS FORMAL PROCLAMATION SATURDAY.

GRATEFUL FOR PEACE IN U. S.

Joins With President in Appointing November 26 as Day for Thanking God for Many Blessings.

Lansing-Gov. Ferris issued the following proclamation Saturday:

"In all the years since seventeen hundred seventy-six there has been no greater reason for giving thanks to Almighty God than in this year nineteen hundred fourteen. The U. S. is at peace with all the nations of the earth. The Stars and Stripes symbolize to all the world, 'Life, liberty and the pursuit of happiness.' Sunshine, rain and toil have given us an abundance of the good things of life. Our glorious nation has gone forward unswervingly towards the goal of civic righteousness. We, the people of Michigan, are happy in joining every other state in reverent and hearty

thanksgiving: Therefore, I, Woodbridge N. Ferris, governor of the state of Michigan, do hereby join the president of the United States, in designating Thursday, the 26th of November, as a day for all the people of this commonwealth to celebrate in thanksgiving and prayer."

GALE ON GREAT LAKES

Two Boats Lose Cargo and Barely Escape Destruction.

Alpena-Minus its deck-load of 500,-000 feet of white pine lumber, valued at \$15,000, the barge Ashland, in tow of the steamer L. Edward Hines, both belonging to the Hines Lumber Co., limped into port Friday. Both ships are in badly battered condition.

After a night of terror, during which two members of the barge's crew narrowly escaped with their lives, the crippled ships flew a flag at halfmast, opposite Thunder Bay island Friday norning, and the lifesavers from the island conveyed the boats to shelter in the river here. Capt. Kenneth Mc-Kenzie, of the Hines, declares the night to have been the worst of his experlence of a quarter of a century on the great lakes, not excepting that of No-

Hines to safety in Duluth harbor. The Hines and Ashland went into the gale about 11 o'clock Thursday night at a point about ten miles south of Thunder Bay island.

skins, as to amount of wool, 50c@

Detroit.—Shipment of live stock to Detroit is handicapped by a shortage of stock cars, according to meat packers in Detroit. Shippers and drovers throughout the state are experiencing difficulty in shipping to the plants everywhere is the refusal of the railroads to furnish cars until they have been disinfected to prevent further spread of the hoof and mouth dis-

Receipts continue light at localpacking houses, but packers are op timistic and hope within a few days to see the receipts increase. There have been no severe increase in the price of meat; and although pork ha gone up 1-2 to 1 cent a pound, packers declare that there will b material increase as a result of the quarantine

Hoof and mouth disease now raging among cattle in 14 states is communi to humans, the department of agriculture announced Thursday, but its effect rarely is serious." partment urged, however, that humans keep away from diseased cattle. to avoid spreading the infection, and ommended the use of pasteurized

milk. The statement said, in part:

"Men who come in contact with diseased animals may also become in-fected. In adult human beings, the contagion causes such symptoms as sore mouths, painful swallowing, fever and occasionally eruptions on the hands, finger tips, etc. While cansing considerable discomfort, the disease is rarely serious.

"The disease, in short, is dangero; s because of the loss that it occasions to property, and not because of its effects upon the health of mankind. At present all infected herds are being slaughtered as soon as they are heavy fire of shrapner and high explo-discovered, the carcasses burled, and sives, but on the appearance of a large the premises thoroughly disinfected.

Omar Turned Out to Be a "Régular Cat," After All

C HICAGO.—Mrs. Joseph Clemens is looking for Omar Khayyam, her blue ribbon Persian cat. Her husband is looking for George Allen, a boarder in the Clemens apartment, who used to be regarded as one of Omar's best friends. Allen, who is a salesman, got home at three o'clock in the morning.

Mrs. Clemens and Omar were alone in the house, for Clemens works nights. Allen's voice roused Mrs. Clemens. The boarder was in the front room On his knee sat Omar, contented and purring. Omar, of course, did not know what Allen was saying—but Mrs. Clemens heard the terrifying words.

"You're jus' a lil old long-haired faker-thass what you are," Allen an-"I bet if I dropped you out the window you wouldn't land on your feet like a reglar cat. No, you wouldn't. Not you. You'd break your neck. Oh, you wouldn't, wouldn't you? All right. We'll see."

The boarder rose and carried the unsuspecting Omar to the window. The Clemens live on the fourth floor, and Mrs. Clemens loves Omar. She

But Omar, with a despairing squawk, had vanished into the night. A moment later Clemens let himself in, just in time. His wife had pushed Alien half-way out the window and was prying his fingers loose from a death grip on the window frame.

"I bet you won't land on your feet like a regular man," she was crying hysterically. "No, you wouldn't. Not you. You'd break your neck. We'll

Clemens rescued Allen, who ran from the house and has not been heard

Mrs. Clemens raced to the sidewalk, but no broken neeked Omar lay there. Omar was a regular cat, after all.

Sadie, the Joy-Riding Leghorn Hen of Cleveland

CLEVELAND, O.—There must be a gypsy strain, a vagrant, nomadic streak, in "Sadia" somewhere "Sadia" · in "Sadie" somewhere. "Sadie" is a brown leghorn hen of uncertain age, outwardly no different from any other respectable, nest-loving bird, but in reality a "harum-scarum," a "fly-by-night," and a "ne'er-do-well," no bet YA LITTLE

RASCAL

ter than the worst nighthawk. die" is the joy-riding hen. "Every night of late she has stolen a ride underneath Scovill avenue trailer No. 322, clinging to her precarious and perambulating perch from the Bolton car barns, Quincy avenue and East Eighty-ninth street, all the way to the city and back to the barns. Little does "Sadie" care

whether the fare is three cents or

five, whether the penny transfer charge is refused or gobbled up to appear hungry deficit. "Sadie" must have her ride, and have it she does. The carmen declare she has at least elementary knowledge of mathematics to the extent of knowing one figure from another, for she always picks

trailer No. 322 for her trip Commissioner Witt's attention was first called to "Sadie" one night when she hopped from beneath the Scovill trailer at Superior avenue and West Third street, where a traffic jam caused a delay. "Sadie" wanted to know

what the trouble was. When she found out she hopped back to her place. It was suggested to Mr. Witt that he have a nest put under the trailer for "Sadie's" convenience and for the practical reason that she would, if given this inducement, probably pay her fare by laying an egg each trip.

John Burt, starter at the Bolton barn, discovered and named "Sadie. Merritt Bean, dispatcher, and Fred Knight, barn clerk, did not believe Burt's story until they had "Sadie" watched one night. The three men now contribute to a fund to buy corn, wheat and chopped meat for "Sadie." The hen's contribution to the fund is an occasional egg laid in a dust heap in the barn, but this, of course, doesn't make up the deficit.

Chef Gambles Away His Fine Barbe de l'Empereur

NEW YORK.—Taking a few hours off from making tasty pastry and ice ream for persons who go to the Vanderbilt hotel, Nicolas Herbschleb, head of that department, had a great adventure the other night. However,

he appeared smiling in the kitchen of the hotel and wondered at the looks of surprise that greeted him. He had shaved off his beard. Jean Ricroch, the head chef of the Vanderbilt, did not even recognize his assistant. Mr. Herbschieb had worn a beard, black and fairly long, for the last seven years. Finally, when matters of recognition had been adjusted, Mr. Herbschleb proceeded to tell how it came to pass that he appeared without a

beard. with un ami, who is in the automobile business," he wegan. "I will not tell his name, for that would not be fair. We played pinochle. First of all, we played for a few quarters we had in our pockets. We lost and won, and finally spent the money.

"It was then a puzzle for what we should play. I suggested that we play for our watches, and pretty soon I had my friend's watch, and not long after ward he possessed mine. We then played for the chains on the watches, and he soon had mine, and I got his. We agreed that it was all right for us to have each other's watch and chain, but did not see the fun of playing for them back again. What then must we play for? both of us asked.

"Play for the barbe de l'empereur,' I said to my friend, but just at that instant I realized that he did not have a beard. But he did have a pair of mustachois that were splendid, and mr.ch like the kaiser's. My friend he took at my beard and laugh. I look at his mustachios and grin. It was too funny to miss. So I say, 'All right, we play for the barbe de l'empereur,' as the saying is in France, 'against the mustachies of the kaiser.'
"It was with keen interest that we play, very, very carefully. But, mon

dieu, I lose! But I was, as you say in this country, game. I ask the patron of the cafe to give me a pair of chizzors. He look amazed, when I take them and cut off the beautiful beard without so much as a tear.

Hop Alley Makes Big Feast, Like the White Men

T. LOUIS, MO.—The Chinese Merchants' association celebrated the removal Into its new headquarters at 20 South Eighth street the other day. The exterior of the three-story structure was decorated gorgeously. The flag of

the new republic was entwined with the Stars and Stripes, and the dragon and other emblems of the Chinese nation before it became a republic, were on equally good terms with everything American.

This association is to the Chinese about what the Business Men's league is to the rest of St. Louis. The Chinese have been reading of the functions of the P. M. L. and their celebration presented all features of that or-

ganization, and then some First, they had a banquet. It has come to be recognized in St. Louis that no function at the b. M. L. is complete without a banquet. brethren had a series of them. Music, too, features the functions of the B. M. L., and the Chinese were not daunted. While they had no celebrated vocalists they got along fairly well. Harmony has no particular place in a

Chinese musical production. But they sang, anyhow. Each Celestial chose his own song, and delivered in his own pet key While the words were not overly intelligible to the American ear, that made no particular difference, and as rapidly as one banquet table was emptied other banqueters took their places, and the revelry lasted all day and until

late in the night. There were no speeches. Every Chinaman knew there was a new hall and all the eloquence of Confucius or C. Porter Johnson could not alter that

Everybody talked, or apparently seemed to, without intermission. It was

a gala day in Hop Alley, and business was suspended in the Chinese marts

LETTER FROM THE

ACTION LIKELY TO BE TAKEN LOOKING TO PROPER DRAFT-ING OF LAWS

State Game Warden Wires That Rum of Foot and Mouth Disease Among Deer is a Canard.

[By GURD M. HAYES.]

Lansing-It is certain that some ting will be done at the coming session of the legislature to provide for a proper drafting of bills so that defects will not be found in so many laws by the court.

Action along this line will be asked for by Governor Ferris and from sentiments expressed by many members during the last campaign there is sure to be something done.

Either all laws will be finally whipped into shape by the attorney general or the Massachusetts plan will he adopted In the Bay state all bills involving constitutional questions, and this is practically every one consider ed by the legislature, is passed upor by the supreme court before final pass age. If the court holds that it is unconstitutional, or defective, the defect can be cured before passage, or if the defect is such that the bill cannot be made legal, it is dropped.

Of course, in the past the attorney general has been asked by individual members for opinions on bills but the legislators have shown a tendency to disregard his advice. This was notab ly so in the case of the redistricting law on legislative districts. Attorney General Fellows told the house committee that the bill as drafted would not stand up in court. The legislature went ahead and passed it anyhow and Representative J. Frank Stevens, of Missaukee, took it into court and it was thrown out.

Under the present system the the ory is that the judiciary committees of the two houses will whip all bills into shape but the theory hasn't worked out very well and it is certain that some steps will be taken at the next session to do away with the troubles of the past.

Large power interests of the Comnonwealth Power company in Mich igan are to be merged into one com pany, according to an application filed. Thursday before the railroad commis sion. The Consumers Power company, of Boston, a holding company, with a capitol stock of \$20,000,000, evenly divided between common and preferred, asks permission to do business in the state of Michigan. As it stands now the Consumers company holds all-of the bonds, stocks, etc., of nine of the Commonwealth interests in Michigan. The idea is to bring all together and do away with individual company in Michigan this year, while the yield loans. This plan was adopted some of corn was 60,090,295 bushels. time ago with the gas interests of the same companies.

A number of lumber dealers of the state held a conference with the state railroad commission Friday in regard lumber. The lumber dealers claim 000 hushels, plums 378,000 bushels, they are willing to stand a boost of 5 cherries 1,326,000 bushels, strawberers found the roads were not entitled blackberries 605,000 bushels, sugar to any increase in lumber rate, they beets 662,677 tons, hay 2,769,025 tons. ber rates much more than 5 per cent.

as 75 per cent. other states is forced to compete with the price of all lumber, is their con-

state's office for the state board of canvassers, all four of the constitutional amendments voted on at the election have been beaten.

The only one which seems to have any chance at all on the ratio so far developed is that permitting students and traveling men to vote while away from home. The other three are sure ly lost unless there is a complete re-

ersal of the returns. When the office closed Saturday afternoon there had been received reports from county canvassers in 37 LUMBER MEN PROTEST BOOST counties. The counties were all small ones. In the 37 the votes stood: Amendment for public highway bonds—Yes, 40,826; No, 57,600.

Amendment allowing students and traveling men to vote-Yes, 48,507; Amendment changing fraternal insurance laws-Yes, 21,734; No, 81,293.

A discovery that may materially affect the steel industry of the United States was made at least three weeks ago, when J. N. Thompson, mineralogist, prospecting for Chicago iron in

the Lake Superior shore, 35 miles northwest of L'Anse. The discovery was kept secret until Saturday and in the meantime ma chinery for the construction of a shaft has been delivered at L'Anse and a crew of men is already at work fol

terests; found a vein of vanadium near

thick and outcrops for some distance It is not known how deep the lod runs, but the indications from the rock foundation, are that it lies as does the copper-bearing strata further west and continues indefinitely. If the metal holds out in quantity tremendous values will be added to the upper peninsula output.

All the vanadium now used in this country is imported from Sweden and a few other European countries. In the United States it has been found in five western states and in only two states in sufficient quantity to mine Thompson's discovery is the first intimation that vanadium existed in the middle west.

David Jones, chief deputy state game warden, says that bears are very numerous in the vicinity of Houghton lake, and that probably a great many will be killed this winter. Last winter one hunter that he knows of killed 51 in that neighborhood and they are said to be more plentiful this

Insurance Commissioner John Winship says that it is a clear violation of the insurance laws of the state for any insurance companies to expend any fund for political purposes.

It was reported that certain companies interested in the fate of the proposed constitutional amendment relative to the regulation of fraternal insurance societies spent money in the recent campaign, and if company funds were used in any instance prosecutions will follow according to Winship who is making a thorough investigation.

The crop report issued by Secretary of State Martindale shows that 14.-The total yield of oats was 52,535,

717 bushels, barley 2,214,708 bushels, rye 5,633,659 bushels, buckwheat 903, bushels, potatoes 41,139,473 bushels, beans 4,669,514 bushels, peas 1,109,758 bushels, clover seed 194,000 bushels, apples 23,643,000 bushels to the recent increase in the rates on peaches 1,564,000 bushels, pears 978,per cent. Although the commission- ries 531,000 bushels, raspberries and

By H. J. DANIELS. When Ira E. Randall of Houghton,

rmerly of Lansing, suggested holding a county fair in the copper country 13 years ago, his proposal provoked a loud guffaw which rippled from Lake Gogebic to the extreme tip of Keweenaw point. The fair was held, regardless, and the twelfth an nual agricultural exposition has just passed into history with a record-breaking attendance and splendid exhibits of everything grown under the sun from peanuts to ripe October atra wherries

When Randall first said "fair" there ere 362 farms in Houghton county to supply a population of 67,000 peo ple. Today there are 1,500 farms catering to a population of 90,000. Twelve years ago the value of all farm property in the county was \$922,181. There were harvested this year crops value of \$1,000,000, and farm lands have risen in value to \$5,302, The county fair may be old 540. fashioned, but the copper country is convinced that it is a good thing.

Houghton county's potato crop this year runs over three hundred and fifty thousand bushels, with a value lowing up the vein which is 24 inches of \$250,000. Norfolk, Va., and other long established potato centers will next spring plant Houghton county potatoes for which they are paying \$1.50 a bushel Houghton county is feeding the epicures of New York, Boston, Philadelphia and other eastern centers of cultured cousins with October sweet corn whose fame has

penetrated to far Manitoba. strawberries country Copper ripened in July and in October, grace exclusive tables the country over Copper country Jerseys are heading pedigreed herds east, west, north and

All of this would not be exceptional were it not for the fact that up to 15 years ago there was practically no farming on the surface of copperdom The tilling was pursued at 1,500 feet to a mile below the surface, with giant powder and a drill. Houghton county with 652,160 fertile acres had in 1910 but 45,452 acres in farms The copper country fair undertook to show the entire mass of people what those 48,452 acres were raising, and it has succeeded to such an extent that today more than 150,000 acres are devoted to agriculture.

KRAUT FACTORY IS BUSY.

The Eaton Rapids kraut factory, up to the present time, has been one of the busiest places in Eaton county since the cabbage cutting season came on. In every respect this has been the busiest season the industry has ever had since it was establishe more than a dozen years ago. During the past week the late cabbage came in such quantities that the pickle company was unable to handle all of it, because of the fact that all of the vats were filled and two carloads of the raw material—cabbage as it came from the acreage—were shipped out to customers in the cities. It was 015,290 bushels of wheat were grown necessary to load out for shipment another carload of the "ripe" kraut in order to make vat room for what was being cut. The cabbage crop is larger than it ever was before and it will

all be utilized. The canning factories to which th pickle company at Eaton Rapids ships much of its manufactured product have had their hands full this fall to take care of the tomato crop that came on later than usual, and this has kept both from receiving the kraut in large enough shipments to keep a sufficient number of vats empty at that end of the line so that the krau capacity when necessary. The business of the kraut industry for 1914. both in cucumber pickles and kraut more than double what it has been in any previous year, and it is to be made still greater next season

FRUIT INDUSTRY GROWS. In another year Marquette county will be among the foremost of the up per peninsula counties in fruit grow The Northern Orchards associa tion, recently formed, with headquar ters at Ishpeming, will begin to plant trees next spring on its tract of land eight miles east of that city on the Green Garden road. The ground is prepared and fruit specialists being from the Michigan Agricultural col lege are picking out trees in an effort to secure the hardiest stock and that best suited to the climate of the upper peninsula.

Close by this tract. J. M. Lindstrom of Marquette has a farm which he in tends to fill with fruit trees as fast as he can prepare the ground. He has made a fine start, 1,000 trees having been planted last spring. These consist of apple, cherry and plum trees The idea is that the cherry trees will serve their most useful life by the time the apple comes into fair bear-

near Rainy lake, Presque Isle county, has secured 1,800 acres additional, comprising what is well known as the Rainy Lake ranch. The transaction, which gives Mr. Young 3,000 acres of choice land, which will at once put under cultivation, is one of the largest of its kind in northern Michigan. A. M. Young, who is the principal in the firm of Young & Storms, who will operate this ranch, is proprietor of Young's apple forest, an 8,000-tree orchard at Shelbyville. He is an old Texas rancher and knows the cattle business. He will develop the Rainy Lake ranch into one of the biggest cattle propositions in the state. He has associated with him in this venture a practical cattle man, Milo Storms, who will be the active ger of the panch. It is Young's inten-tion to carry 1,000 head of cattle, turning off three hundred to five hundred head a year. Splendid fields of pasture, alfalfa and corn will be prepared for, and clover seed raising will be

HARVESTS BIG APPLE CROP.

made a side line.

Robert Sherwood is harvesting the rop from 300 acres of apples from his orchard near Watervliet. There will be 8,000 barrels which have already been secured and marketed. This is southern Michigan's biggest orchard, and no effort is spared by its

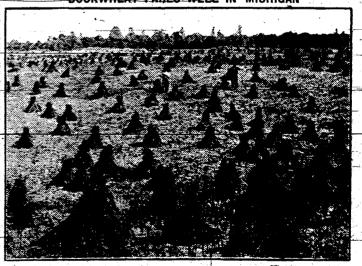

owner to grow perfect fruit. There are one hundred acres of Jonathans on the farm in one block, planted years ago in new land. This one hundred acres has never plowed but the land has been kept fertile and productive. The trees were headed down when young and one can almost pick the whole crop from them without a ladder. They were a very pretty sight this fall with their wealth of fruit, and the trees have never missed a crop since they first came into bearing.

A crop of 24,000 bushels of apples. all perfect and marketable, means a small fortune to their owner for they will bring the top price when sold. The windfalls in this orchard will add several thousand bushels more, all of which go to canning factories and the vinegar makers. At one time Mr. Sherwood also grew peaches and plums and one year had over 5,000 bushels of the latter, all of which were sold to canning factories at a good price.

TO COLONIZE BENZIE LANDS. As there are thousands of acres of fine farming lands in Benzie county. suitable for general farming and fruit raising, there has been considerable talk in that county about colonizing of John Cruse and L. H. Stacy the plan is being carried out. The men are from Honor. They have made arrangements for the taking of 75 fam-

prices of upper peninsula lands had "The bureau has thus given a value ilies of Belgians from Chicago into Benzie county, and some of the famto something that had no value be-Do you think that if it were not ilies are now on the ground. SALARIED MAN MAY OWN HOME

Need Not Remain Uncomfortable in Crowded Quarters in the City.

Plan of Operation Outlined-Most Convenient Bungalow Type of Mouse Such as is Described Here, Should Be Within Reach of Most.

By WILLIAM A. RADFORD. By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie to wind, Chicago, Ill., and only enclose itwo-cent stamp for reply.

It is true that many thousands of city dwellers who have, in their natural love of the country, a longing for a home with ground and garden, are unable to secure what they desire, for

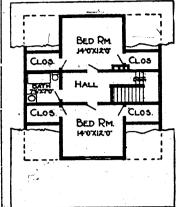

of a lack of means. City dwellers are compelled for the most part to live in flats or apartments, with never a look at trees or

with a house, which, unlike this one, has no individuality.

There is a large living room 16 feet equare; and, at the right of this, is the dining room 13 feet 6 inches by 12 feet in dimensions. The kitchen is reached from the dining room through a passageway. This is a good arrangement, for the reason smoke and steam from the kitchen will be kept out of the dining room. Another of the good features about this house is the fact that it is well lighted, and every room will be bright

and cheery.

The second floor is reached by a DEAL WITH REAL ESTATE MAN stairway leading from the living room.

Second Floor Plan.

On this floor are two bedrooms, which, various reasons-principally because with the one on the first floor, provides three in all. The bathroom is located at the end of a hall that extends through the house, thus as suring plenty of air on summer nights grass. Privacy, so much to be de through the windows at each end. An

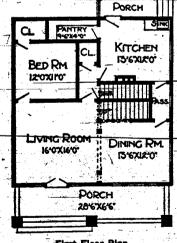

tramping of feet overhead is a constant reminder that the place is not a home but merely a place to stay.

The whole idea of the builders of places.

"homes" is to economize space and get all the rooms possible on a given piece of ground, in order to titled "Feminine Finance" in the Womearn revenue. All sight is lost of the an5s Home Companion, Lee Macalister artistic and everything must bend to the one purpose of earning an income from the investment. The occupants foolish for a woman to shrink from live along, and constantly dream of a saking for it as if she were an undelittle cottage with a few vines and a garden place in the back yard, and a only thoughtless, it is unfair to him. place for the children to play where will not be under the constant espionage of a janitor with a grouch. This is all wrong. And, further, it

is unnecessary. You may be a salaried man. You may think you cannot do differently. You may not have the money to buy the ground, it is true, and to authorize a builder to put you up a house such as you want. You have always thought that even if you bought a house you must take one already made by some real estate firm and

pay their high price. Now, listen. The real estate man has selling expense. He has advertiging hills office rent, clerk hire. maintenance of salesmen, and many other expenses in addition to his profits, all of which figure in the price of any given house. It is safe to say

First Floor Plan.

that this real estate man would be glad to eliminate this expense if he could make a deal that did not involve all these factors. He builds to sell. Suppose you were to take to him the plan of the house shown here, and say: "You are in the business of building and selling houses on small payments. You want your customers estimied. Probably you are going to build a number of houses in the next few months. Here, now, is a house that just suits me. If you will build it. I will take it on the same terms would ask for one that you might build from some other plan. I will

sign the contract now. There is no probability that the ordinary real estate man would refuse your terms. And what would you have? You would have the same you would get if you owned a

lot and built on it. Now, the house shown here is one of the popular bungalow type of in order to save money. Owing to the houses, and it is especially attractive system long prevalent in Spain by on account of the fact that the porch which women of noble birth transmit is included under the roof of the house. Nor is it expensive. It ought to be built complete for about \$2,500.

This house is 31 feet 6 inches wide, and 38 feet long. It has an attractive porch with strong lines. The design is one that will make every person ook at the house as he passes by; and it is one that will always sell, if at any future time conditions should arise that would cause you to want to dispose of it That you cannot do

sired, is out of the question because unusual arrangement, and one that of the common hallway; and the will appeal to every housewife, is the tramping of feet overhead is a confact that there are six closets in this house, providing plenty of storage

> Asking Hubby for Money. In an interesting little article ensays in part:

"If there is money to be had, it is serving child. Also, if her husband is Most men wish to spare their wives every possible discomfort, and it is silly for a wife to experience needless inconvenience and feel sorry for her self the while when a little common would do away with it. can't understand such a point of view Whatever they want they ask for, and they can't see why a woman should ob ject to doing the same thing. And s woman shouldn't. There are times, of course, when a woman wants more than she thinks her husband can afford to give her, and when it is necessary for her to be at home the greater part of the time. In that case

gently sought."

the inventor for \$300,000.

The object is effected through the use of two strips of especially pre-pared paper which cover the film. A hinged leaf built in the back of the camera, when opened, bares a strip of red paper which protects the sensi-tized film from light. This paper is coated with a wax-like substance which is easily scratched by a sharp-pointed instrument. When anything is writthis paper, the coating breaks under the tracing, and just enough light is admitted through the inner paper to make an impression of the words on the negative. - Popular Mehanics

To Teach Children About Trees. movement is on foot at Shreve port. La., to make it possible for the school children of that city to secure an education in tree knowledge. It is the intention of those behind the movement to have on hand at all times samples of all trees in the bark and after being manufactured so that the school children may acquire a knowledge that may be of use to them in later years. Another move ment on foot in that city, is to have all of the trees adorning the highways of the city, labeled so that not only the children, but grown people will be able to ascertain the difference be tween the various kinds of southern

-American Forestry. Titles and Taxes in Spain.

In Spain titles of nobility are taxed in the same way as houses or land Moreover, each separate title is taxed and for this reason certain members of ancient families in which a number of titles have accumulated drop some their title not only to their children but to their husbands; so that a plebeian marrying a duchess becomes a duke, Spanish titles rarely become extinct unless the holders deliberately discard them.

In Accord. "How did you enjoy Professor Dob ber's lecture on dreams?"

"Pretty well. I fell asleep and had one myself."

SOUR MILK RECIPES FOR THE THRIFTY HOUSEWIFE.

There is not only an economy in using sour milk, there is also a distinctly different flavor as well as more moisture in the food, and it does not dry out so rapidly. The amount of soda

to be used with sour milk depends largely up-on its acidity, and in the results are not always good. Too much soda spoils the appearance, and not enough will make the food heavy. See that soda is well dissolved before it is added to any the food heavy. See that soda is well add one teaspoonful of butter for each pint of purper, season with salt and food. A level teaspoonful of soda to

found to be sufficient. Cottage cheese is one of the delicious products of sour milk where one is fortunate enough to have a sufficient quantity of milk to prepare it. Heat milk until the curd forms, remove from the heat and drain before it becomes tough. Mix cream, salt and butter with the curd and the cot-

tage cheese is ready to serve.
Sour Cream Filling for Cake.—Boil half cupful of sour cream and sugar together for five minutes, add the yolks of two eggs, beaten well, a half cupful of chopped nuts and three-fourths of a teaspoonful of vanilla. Put in a double boiler and cook until thick and smooth. Cool and heat until thick enough to spread.

Sour Cream Ple.—Beat the yolks of four eggs until light and creamy, add a cupful of sugar and a cupful of chopped raisins and a cupful of sour cream, with a fourth of a teaspoonful of cloves. Place in a double boiler and cook together until smooth and thick. Line a pie plate with a rich crust and bake in the oven as for lemon ple. Fill this crust with the mixture and cover with a meringue made from the whites of the eggs

By PHILIP"HARRISON.

(Copyright, 1914, by W. G. Chapman.) Sometimes a poet is born (they are not made) in an unpromising place. But then, everybody knows that. There is hardly a father but has looked upon the cherubic countenance of his heir and hoped devoutly that the deadly unpractical gift of the muse has not been visited upon him.

At least, hardly a farmer father in Middleboro. It is essentially a farming commuity. The banker and the parson, the storekeeper and the livery man have their proper recognition, of course; but Middleboro has no use for

poetry. However, Henry Milton was not a poet; he was born a musician. And that was worse. For poetry, unhallowed as it is, was known by reputation to Middleboro, and a young fellow with such an unfortunate name as Milton might have been expected to suc cumb, but music-

"See here, Hen," said his father, " don't object to your playing the old planner. I guess that's what planners is meant for, though I don't seem to see as you gets much tune out of it. But you've got to get down to work, my boy. Pianners ain't work, unless you makes 'em. Now, it is to be the farm or Mr. Sutphen's insurance business?"

It was the scandal of the town: a hulking lad of twenty, home long ago from the high school, spending his days at the piano composing airs.

"And there's no tune to them," wailed his father. "I heerd the fellow who wrote "The Star-Spangled Banner' got a heap of money outen it. But who's going to print that rubbish Hen's writing?"

In the eyes of the good citizens of Middleboro, the profession of music

"I Don't Object to Your Playing the Old Planner." was associated with a barrel organ.

dark, Italian face, and a monkey. "Never mind, Harry, dear. I be-lieve in you," said pretty Lucy Rollins. They don't understand. But I know

you are going to become a great com poser, and some day Middleboro will be proud of you." The end of it all was that Henry Milton packed his grip one morning and took his departure for the metropolis, with the evil predictions of all Middlehoro ringing in his ears. But

there was sweeter music than that, sweeter even than the melodies which came to him night and day. Lucy had promised to be his wife when he had achieved success. s in New York nothing need be set down. Lucy waited three years, four, five. Occasional

ly, in the first part of the long wait, a letter came, full of promise. Then the letters ceased. New York had swallowed up the boy, as she swallows many others. "I reckon that Hen Milton went to

the bad long ago," said the insurance agent, remembering sundry errors of omission and commission which he had discovered after Henry left his mployment That was the universal agreement.

Old man Milton had had the mistor tune to have his only son turn out bad The stubborn old man mourned for the young fellow secretly, but he set his ace as hard as a flint in public. Then came the day when an attack

of paralysis seized him, and he awakened from his coma to see Lucy at his bedside nursing him. When he recovered he asked her to keep house for him. He meant to adopt her, he said, as he had no children. The months passed. Lucy so

times dared to speak of Henry, but the old man would not betray his emotion. "He was a bad lot, my dear," he said. "I know there was something between you, but you've had a mighty narrow escape. I want you to find some young fellow that will be worthy

Then Lucy would sigh and say nothing. It was three years now since she had heard from Henry. Then one day the insurance agent

came in, breathless with excitement All the city was talking of a new opera, he said, composed by one Henry Milton. He was America's great musical prodigy. The newspapers were full of him.

Middleboro reluctantly agreed that it might have been mistaken. But not so the old man. He was more stubborn than ever. "I don't care if he can fool the pub-

lic." he said. "Any knave can do that. When Henry takes up a clean line of work and makes good at it I'll take him back. Till then-no, sir!' Yet Lucy knew that he secretly devoured the newspapers, searching for

his son's name. He was secretly proud of him. Lucy had an idea. she said coaxingly—she called him that nowadays-"he is to conduct at a performance in Boston

next Friday. Now you know you have

been promising to take me into Bos-Let us go and hear him."

"What do I want to hear him for?" growled the farmer. "Hain't I heard im times and again strumming on that old piano? I've had enough of

hearing him, my lass."

However, by dint of coaxing, Lucy inveigled him to Boston, and thence to the opera house, where, upon a dozen biliboards, as large as life, were the words Henry Milton, beneath a flesh and blood reproduction of the young man.

Lucy felt herself trembling. She knew that he had long ago forgotten her; she had nerved herself to accompany the old man only out of a sense of duty, in the hope of effecting a reconciliation; if she saw Henry she meant to show him her indifference.

But when the farmer saw his son conducting in the orchestra, a strange look came over his face. And Lucy, watching him, knew that the past was forgotten in the joy at finding his boy. The old man's stupefaction increased

as, seated all through the bewildering medley of sounds, he saw Henry waving his baton and his hand, sometimes in alternation and sometimes together. "Well, I'm swinged!" he exclaimed. He turned to his neighbor.

"How much do you reckon that there young fellow Milton makes a night out of this?"

"O, perhaps three hundred dollars," answered the other. The farmer gaped at him and sub-

They were at Henry's side almost before the piece was ended. And Henry, looking up, suddenly perceived his father and Lucy. His face grew

"Hen! Hen!" faltered the old man, and suddenly he grabbed Henry to his heart and muttered something about forgiveness and coming home. "Well father I wanted to seeres of times, but you know you told me not to see you again until I had got a better job than composing music," said

"Better job? Suffering snakes, you ain't composing still, Hen, are you?" demanded the farmer, "Three hundred dollars a night for working that wooden plug and making the band go—say, it beats blowing the church organ out Go on and compose all you want to, Hank, so long as you keep at that there job of yourn."

But Henry, knowing his father, was content with the compromise. It was all his stubborn old soul could bring

itself to. Besides . . "Lucy, dearest, if you had answered

"But it was you, Henry, who stopped-And that explanation was the begin-

ning of the long-promised paradise.

Saved the Children. Our class was held on the third floor of an old wooden school building. One afternoon another boy and myself scattered some snuff in the air before the afternoon session began. When the professor began talking to his assistant they were seized with a fit of sneezing, bobbing their heads toward each other in a most ludicrous fash ion. The students howled with laugh

ter when they were not sneezing. Finally the professor managed to get his breath long enough to ques tion the class and all but we two

guilty boys were dismissed. He took us to his office and while we were there—about twenty minutes later—fire was discovered in the build ing. We got out with difficulty and the school was burned to the ground. From an angry man the professor became deeply thankful and he has since maintained that we boys were the instruments of fate, for the building burned so rapidly that there would have been great danger if all of the children had been in class when the fire started.—Exchange.

Oplum Traffic.

China has advanced so far in her fight against opium that other crops are being planted in place of poppies. In the Chunking district, large areas formerly devoted to poppy cul ture are now covered with a good crop of soya beans. The traditional beat ing of swords into plowshares was not s more notable victory for progress than this. The use of the land has been turned from death unto life in the most literal sense of the term Instead of producing an insidious poison, the fields of Chunking are bearing food, instead of a crop peculiarly exhausting to the soil has come one which enriches the soil. If the Chi nese revolution had done nothing but dealt the death blow to opium, it would be many times worth while.

Various Compounds of Coal.

Coal has given to the world several hundred thousand compounds, most of which are of great value. For coa contains carbon, oxygen, hydrogen, ni trogen, sulphur, phosphorus and the nalogens. It sometimes even contains gold and radium. Among the materials mentioned by Dr. Louis Cleveland Iones in an address before the Franklin Institute as obtained from coal are acid bases, alkaloids, gums, varnishes, solvents, sugars, saccharine stuffs as bitter as saccharine is sweet disinfectants, dyestuffs of brilliant hues, stimulating and sleep producing drugs, healing medicines and violent poisons, vile odors and pleasing perfumes.

Coal and its Formation. Each different kind of coal-peat

lignite, semibituminous, bituminous gas coal, smokeless coal, semianthra cite, anthracite, graphite, diamond represents only "a different step in na ture's slow process of converting the vegetation of the carboniferous era into the fuels so necessary to our mod ern civilization."

The earth's crust, is a vast retort and in its work of carbonizing vegeta tion it saves us the by-products in the form of asphalt, bitumen, petroleum and natural gas.

An Impossibility.

"The artist who wants to paint your wife's portrait also excels in still life painting.'

"Then he'll never be able to pain my wife's portrait.

Reduction in Living Costs Made Pos

sible by Perfect Product.

The sudden and highly alarming increase in cost of food necessities, such as sugar and flour, demand increased domestic economy. For incomes have not advanced with this war-time soaring of food prices.

Waste of food as well as cost of food must be considered and minimized in these days of exorbitant prices.

Fortunately the greatest food waste with which the housewife has to contend—bake-day failures and the waste of costly baking materials—is rendered preventable by the perfect leavening power of Calumet Baking Powder.

Calumet is an absolutely sure baking powder of absolute purity. It never fails to produce fully raised bakings that are tender and temptingly delicious. For its wonderful leavening strength never varies. It's always uniform—and always unexcelled.

To pay more than is asked for Calumet simply means a useless waste of memey. To pay less, and obtain an inferior powder means a useless waste of memey. To pay less, and obtain an inferior powder means a useless waste of memey. To pay less, and obtain an inferior powder means a useless waste of more acan of calumet. Save a substantial sum on the price asked for Trust Brands when you buy it. Save the flour, sugar when you use it. You're asked in endering Calumet, in trains it, in testing the truth of these claims, for if you are not theroughly satisfied the purchase price will be refunded by your local dealer.

price will be retunded by dealer.

I buying a can of Calumet send the slip found in the one-pound can to the Calumet Baking Powder Co. Advertising Department, Chicago, Ill., and you will receive one of their handsome 72-page Cook Books, illustrations in colors, and a book that will be a guide te economy in the kitchen.—Adv.

CAR GOES 28.7 MILES ON GALLON OF GASOLINE

Red Crown Shows Remarkable Test.

Judged by C. A. C. Committee. Surprising results were obtained Tuesday in Chicago, when, in a distance test on the boulevards, a 1915 big six went 28.7 miles on a gallon of Red Crown gasoline. The test was made to demonstrate the fuel economy of high test gasoline, by the technical committee of the Chicago Automobile Club.

Red Crown gasoline, 58 test, was decided upon by the judges and drivers as the best gasoline to be used. All through the trip the clutch was not slipped, except when traffic congestion made it necessary. The dash adjustment on the carburetor was disconnected, and in order that the test be a fair one, the fan was in operation throughout the run.

Next came the acceleration test. With the carburetor adjustment the same as during the economy run, the car was driven from standing start to thirty miles an hour in 12 4-5 seconds. The flexibility test saw the car run at four miles an hour, then speeded up to forty-four.

The test proves that the six is not an excessive fuel consumer, where the best gasoline is used.

Personal Mention

Sunt.-Geo Smith was in Jackson on usiness Saturday.

Mat D Blosser visited his daughter in Labeing over Sunday.

Mrs B C. Worff hes gone to Norvell to live with Mrs. M. Hant.

Mrs. Madge Blankley-King of Toledo visited at G. H. Anthony's the past

Mr. & Mrs. John A. Miller have got to Lebacon, Onto to visit friends several weeks.

Miss Lelah Wuerthner accompanied by Miss Edna Taylor of Tecumseh, spent Sanday here with her parents.

Meedames Stark and McCord have gone to Plymouth, Ind., to visit Mrs. Mae Stark-McDowell a week or two.

Carl Schaible and others draws out to Freedom Tuesday night to see the fire when Henry Feldkamp's house burned.

Lawrence-Wurster is taking a few lays' vacation and his substitute Herman Suber is carrying the mail on his route,

Rolland Schmid went to Aun Arbon

Saturday to see the foot ball game and remained over Sunday to visit his sisters Mrs. C. G. Davenport went to Bridge-

water Station Tuesday to spend several days with her daughter, Mrs. Chauncey Dettling. Mrs. Effie Misner of University Place,

Neb., daughter of Mrs. G. H. Potnam and Mrs. John Kinnamon of Jackson ister are visiting her.

Rev. Spittler went to Kent City, Wednesday, where his wife is visiting beir daughter whose bustand is dangerusly ill. He will be away over Sunday.

The population of the village has been ocreased by Harry Letsis and family, five persons in all who came here from Hudson and occupy the house lately vacated by M. Hendershott.

Next Monday Mrs. J. F. Spafard, president of the county association, O. E. S., and other Manchester members of the order will go to Ypsilanti to attend he semi-suppal meeting there.

A number of Brooklyn ladies were in town Saturday morning en route to Clinton to attend a meeting of the Columbia farmer's club which was held at the home of a former resident of Jackson county.

We learn that Will Steinkohl Lansing who was a candidate for the office of prosecuting attorney on the democratic ticket, was not on the lucky side. We and his friends have wished him better success.

The Tecumseh News says that Raymond Drake of Hayden's garage struck Eleworth Rixom over the head with the butt of a billiard cue Saturday night which rendered Rixom unconscious for 17 hours. Rixom is a deaf mute and worked in the News office.

The family and friends of Mrs. Wm. Freeman were greatly shocked on Taesday morning on account of her andden call. She had been in fairly good health and arose that morning at the usual hour but lay down again while her son Hiram was doing the chores. Returning to the house he entered her room and found that she had passed quietly away. Mrs. Freeman's maiden name was Jerusha Martin and sho is the last of that family to pass over the river. She had been twice married, first to Thomas Logan and after his death to Wm. Feeeman who passed on several years ago. The funer-

We had the pleasure of visiting with an old friend at the Manchester house last Thursday, in the person of J. R. Miller, who way back in the 70ies was superintendent of our village echools. He was a Lenawee county boy coming from Macon and was manly, courteous and popular with parents, teachers and pupils. He filled several prominent positions after leaving Manchester and then drifted west to Kansas and Colorado we think, where he had his ups and downs but finally made good on a farm proposition which we learn he still holds. Returning to his old home state he accepted a position as traveling salesman for a large publishing concern and makes his home in Detroit where he manages to spend Sundays with his family. He seemed to enjoy meeting some of the old friends and we are certain that they were

Miss Fay Allen of Ypsilanti, who will be at the Manchester House, Tuesday, Dec. 1st to meet snyone interested in voice instruction is a graduate of the Ypsilanti conservatory under the late Prof. P. B. Pease, also has studied with best teachers in Detroit, and with George N. Holt, the famous voice teacher of Chicago, who was five years, assistant to De Reeke in Paris. When in Chicago Mies Allen was saprano soloist in the Plymouth Presbyterian church. Mr. Holt said of her when she left Chicago, Miss Allen understands the De Reske method well. I recommend her to teach

Babbit hunters are having pretty good

The roads have been quite rough since the freeze up.

The wind last Friday swept our streets clean except for a few stray leaves.

Bartless & Schaffer are building an ice house on the east side of the upper pond.

The ponds are frozen over and the ice will soon be strong enough to hold

We feel sure that our new serial story. "The Call of the Cumberlands" will please you.

A person with an appetite for cold weather can have it estisfied right now, it seems to us.

chicken dinner at the Schmid cottege at Sand Lake Sunday. Sapt. Hatch is putting up new guy wires to support the electric light pole-

A jally company of men enjoyed

at corners and curves in the street lines. Station Agent Hamm informs the ENTERPRISE that railroad business here this fall is the best it has been since be

Resident masons and a number of visitors enjoyed a rosst beef supper Monday night and then tackled the work in the 8rd degree.

The nightwatch locks up a number of tramps each night who prefer a warm dry place to sleep instead of the freight car or old shed.

The new continued story "The Call o the Comberlands," began with this issue of the ENTERPRISE and we trust that our readers will read it.

You have still an opportunity to ge one of the valuable prizes Maher Brothers of Jackson are to give to successful readers of their rebus, as advertised on

The keys that were lost and advertised in the ENTERPRISE, were found and returned to the owner. There is no doubt about the efficiacy of this paper as an advertising medium.

A man with a crippled hand, who was selling court plaster about town one day last week became abusive when people refused to buy. He also indulged too freely and was put in the lockup.

For some unaccountable reason the dance advertised by the young men to be given last Friday evening, was not well attended. Can it be that there is so much going on in the way of amusement,

Manager Graham is busy repairing telephone lines. The high winds cause more or less damage to lines passis & through or near trees and an occasions wire is broken by a tree blowing over

There has been an immense amount of produce shipped from Manchester this fall, and there are several carloads yet to The in freight has also been conrailroads.

We must ask our advertisers to get copy for change of advertisement to us not later than Monday as we shall go to press one day earlier next week in order to observe Thankegiving. Advertisements will be run without change if copy does not reach us Monday.

In order that the post office department which includes the rural mail in the nature of a song service at delivery, parcel poet, etc., may promptly Emanuel's church, Sunday eyening care for the rush attendent upon the holiday season, it is adviseable to send packages intended for Obristmas presents as early as possible instead of leaving them the day before.

The success of even the liner advertisements in the ENTERPRISE is so generally known that we wonder why people do not use more of these. No matter what you want to buy or have to sell, a liner is sure to bring a customer. Lost and found advertisements are among the

Have you stopped to think how soon Christmas will come. Why, it's only five weeks. We have had such a fine, mild fall that we hardly realise it was so near. Gracious, we'll have to get busy to be ready for it. We must begin shopping at once, there's so many things to buy to make all the children happy.

From casual observation we are con vinced that our merchants have better stocks of goods on hand this fall than ever before.- A talk with some of them draws out the fact that they are trying church, Friday evening, Nov. 20 for to capture some of that trade that has benefit of Thomas church school Mary been going out of town. We advise and Nordman, teacher. Everybody invited. arge the readers of the ENTERPRISE to look around before sending away, you will be better satisfied perhaps.

The severe cold weather that settled down upon us with the begining of the week canced everybody to fly for the enal souttle. The black diamonds are \$8.25 a ton and many were trying to get along as long as possible without burning up all the summer's savings, but they had to come to it Monday. In our advertising columns will be found a notice, of "The Kentucky Hummer" coal, which may afford a means of lightening the fuel expense. Read it.

Remember that the stores and busines places in town will be closed all day Thankegiving.

The Adrian Independents and Manchester City team will play foot ball on Hall's park on Thanksgiving day at 2:30

We have print d bills for a dance on Thankegiving evening at Arbeiter hall, the Norvell farmer's club on Saturday. Fischer's orchesten of Ann Arbor will

At the moving picture show Taesday night the manager of Ranch 101 stated that anyone dissatisfied with the show could have their money back. After the show a lad appeared at the box office said he did not like the show and wante his money back. Upon being questioned he said he wanted the money so he could see the show again the next evening.

Mrs. Franklin Hall and son Byron have sold their property in this village, what was formerly the Webster Case place, to Thomas Hansberger a reale state dealer who has divided it into village lots and will sell it at auction on Saturday, as will be seen by the advertisement on this page. This will be a good opportunity for men to buy a desirable iot ou which to build a house.

Oh, some are born that way.

Perhaps no one subject has received a much attention during the past few weeks as the foot and mouth diseas among live stock. Fourteen states have been quarantined. On the seventh page of the ENTERPRISE will be found an article on the subject prepared by the United States department of agriculture. We make room for it this week b cause day last week, the limb broke against of its importance, coming as it does from an official source.

The \$20 bill advertised in the ENTER-PRISE as lost, was found by Laurel Breitenwischer a son of Fred Breitenwischer who brought it to this office. The money belonged to Larry Kirk. The finding of so large a sum of money was inusual and the young lad showed his opesty by returning it to the owner. Mr. Kirk said he did not much expect to get it back but we assured him of the onesty of the people here.

S) far as we are able to learn every thing is progressing very satisfactory at school. Supt. Swith and his corps of teachers are working harmoniously and therefore are producing results beneficial to the boys and girls who are studying under them. Parents seem to be well estisfied with the management and if they will be careful to watch their children and see that they get their essent, and are prompt in attendance and bedient to the rules of school they will be surprised at the advancement their children will make A little more personal attention and an occasional chat with the teachers will be beneficial. Just ry it once.

Miss Lens Schaible. Rev. D. H. Ramedell of Ann Arbor, district superintendent will preach at the

M. E. church Sunday evening. Julius Wuerthner played the organ at Emanuel's church Sunday morning to the satisfaction of the audience.

There will be no preaching at the Evangelical church Sunday, the pastor being absent, and no Sunday school.

There will be Thanksgiving services at the Methodist church, Thanksgiving morning at 10 o'clock sun time. Rev Schofield will preach and the audience can express their thanks in song.

They are arranging to have something the sermon by Bev. Waifman will be in english. Miss Myrtle Benau will play on the violin, Julius Wuerthner who is organist at the M. E. church at Great Falls, Montana, will preside at the organ and Miss Helen Bahfuss will sing a solo

When we send a statement or notification to people in the country, almost invariably they are displeased and if they come in to pay the account they mention receiving the "dun" in a way very unpleasant. They ought to know that we need what is due us and if they do not come in or send it to us, how else can we do than ask for it. We have considerable on our books in small and large accounts which we need to pay help, buy paper and type and we hope that this simple hint will be taken kindly, and have the desired result without obliging us to send "dune," or cot the matter in a collectors bands. THE ENTERPRISE.

The CALL of the WITH ILLUSTRATIONS FROM PHOTOGRAPHS OF SCENES IN THE PLAY SPIRE SCENES IN THE PLAY

CHAPTER I.

The sugar-loaf cone that towpointed and edged with emerald tracery where the loftiest timber thrust up its crest plumes into the sun. On Also, it was the body of such a man the hillsides it would be light for as she had not seen before. more than an hour yet, but below, along in a chorus of tiny cascades, the light was already thickening into a fully conscious lips, but rather tha riner" would have seen only the rough velveted and shaded bowlders of titanic proportions. The native would have recognized the country road in these tortuous twistings. A great block of sandstone, to whose summit a man standing in his saddle could scarcely reach his fingertips, towered above the stream, with a gnarled scrub oak clinging tenaciously to its apex. Loftily on both sides climbed the mountains cloaked in laurel and timber. Suddenly the leafage was thrust

aside from above by a cautious hand, and a shy, half-wild girl appeared in the opening. For an instant she haltback the brushwood, and raised her face as though listening. As she stood with the toes of one bare foot twisting in the gratefully cool moss she laughed with the sheer exhilaration of life and youth, and started out on the table top of the huge rock. at there she halted suddenly with a startled exclamation and drew instinchave astonished her, for it was a thing had never seen before and of which she had never heard. Finally, reassured by the silence, she slipped across the broad face of the flat rock for a distance of twenty-five feet and paused again to listen.

At the far edge lay a pair of saddlebags, such as form the only practical equipment for mountain travelers Near them lay a tin box, littered with small and unfamiliar-looking tubes of soft metal, all grotesquely twisted and stained, and beside the box was a strangely shaped plaque of wood smeared with a dozen bues. That this plaque was a painter's sketching palette was a thing which she could not know, since the ways of artists had to do with a world as remote from r own as the life of the moon or stars. It was one of those vague mysteries that made up the wonderful life of "down below." Why had these en left here in such confusion? If there was a man about who owned them he would doubtless return to claim them. She crept over, eyes and ears alert, and slipped around to the front of the queer tripod, with all her muscles poised in readiness for

A half-rapturous and utterly aston ished cry broke from her lips. She stared a moment, then dropped to the moss-covered rock, leaning back on her brown hands and gazing intently.
"Hit's purty!" she approved, in a low, musical murmur. "Hit's plumb,

dead beautiful!"

her heart leap.

Of course it was not a finished pic ture—merely a study of what lay before her-but the hand that placed these brush strokes on the academy board was the sure, deft hand of a master of landscape, who had caught the splendid spirit of the d it immutably in true and glowing appreciation. Who he was; where he had gone; why his work stood there unfinished and abandoned, were details which for the moment this half-savage child-woman for got to question. She was conscious only of a sense of revelation and awe. Then she saw other boards, like the one upon the easel, piled near the paint box. These were dry, and represented the work of other days; but they were all pictures of her own mountains, and in each of them, as in this one, was something that made

To her own people these steep hillsides and "coves" and valleys were a matter of course. In their stony soil they labored by day, and in their shadows slept when work was done. someone had discovered that they held picturesque and rugged beauty; that they were not merely steep fields where the plow was useless and the hoe must be used. She must tell Samson-Samson, whom she held in an artless exaltation of hero worship; who was so "smart" that he thought about things beyond her understanding; Samson, who could not only read and write, but speculate on problematical matters.

Suddenly she came to her feet with a swift-darting impulse of alarm. Her ear had caught a sound. She cast searching glances about her, but the tangle was empty of humanity. The water still murmured over the rocks undisturbed. There was no sign of human presence, other than herself, that her eyes could discover—and yet to her ears came the sound again, and this time more distinctly. It was the sound of a man's voice, and it was moaning as if in pain. She rose and searched vainly through the bushes of the hillside where the rock ran out from the woods. She lifted her skirts and splashed her feet in the shallow creek water, wading persistently up and down. Her shyness was forgotten. The groan was a groan of a human creature in distress, and she must find and succor the person from whom it

Certain sounds are baffling as to direction. A voice from overhead or broken by echoing obstacles does not readily betray its source. Finally she stood up and listened once more in- glanced up and asked with plucked-up, smoke that marked a cabin a quarter tently-her attitude full of tense earnestness.

e a fool," she announced half aloud. "I'm shore a plumb fool."

Then she turned and disappeared in the deep cleft between the gigantic Close to the serried backbone of the bowlder upon which she had been sit-Cumberland ridge through a sky of ting and another-small only by commountain clarity, the sun seemed hesi- parison. There, ten feet down, in a tating before its descent to the hori- narrow alley littered with ragged stones, lay the crumpled body of a ered above a creek called Misery was man. It lay with the left arm doubled under it, and from a gash in the forehead trickled a thin stream of blood

Although from the man came a low where the waters tossed themselves groan mingled with his breathing, it was not such a sound as comes from of a brain dulled into coma.

Freed from her fettering excess of shyness by his condition, the girl stepped surely from foothold to foothold until she reached his side. She stood for a moment with one hand on the dripping walls of rock, looking down while her hair fell about her face. Then, dropping to her knees, she shifted the doubled body into a leaning posture, straightened the cient fingers for broken bones.

above the wrist, and her fingers had sciousness must have come from the with her brown fingers holding already blackening, and a gash still trickled blood.

She lifted her skirt and tore a long strip of cotton from her single petti-coat. Then she picked her bare-footed she drenched the cloth for bathing and done what she could by way of first aid she sat supporting the man's tively back. What she saw might well | shoulders and shook her head dubi-

> Finally the man's lids fluttered and his lips moved. Then he opened his еуев.

"Hello!" said the stranger, vaguely. "I seem to have—" He broke off, and his lips smiled. It was a friendly, understanding smile, and the girl, fighting hard the shy impulse to drop his in these halcyon days go armed afield. shoulders and flee into the kind masking of the bushes, was in a measure reassured.

"You must hev fell offen the rock," she enlightened. "I think I might have fallen into

at the stranger's good-natured nod and his quiet refusal to give expression to pain. It relieved her of the necessity for contempt.

"I'm afraid," apologized the painter, "that I've been a great deal of trouble to you.

Her lips and eyes were sober as she replied.

"I reckon thet's all right."

"And what's worse, I've got to be more trouble. Did you see anything of a brown mule?" She shook her head.

"He must have wandered off. ask to whom I am indebted for this first aid to the injured?" "I don't know what ye means."

She had propped him against the ocks and sat near by, looking into his face with almost disconcerting steadiness; her solemn-pupiled eyes were unblinking, unsmiling. "Why, I mean who are you?" he

laughed. "I hain't nobody much. I jest lives ver yon.

"But," insisted the man, "surely you his arm. It's shore es beautiful es-" have a name.

"Hit's Sally.

"Then, Miss Sally, I want to thank Once more she nodded, and, for the first time, let her eyes drop, while she briefly, and swung off without further sat nursing her knees. Finally she parley toward the curling spiral of

"How'd ye git hurt?"

"I was painting-up there," he said; the canvas and forgot where the edge was. I stepped too far."

The man rose to his feet, but he totered and reeled against the wall of ragged stone. The blow on his head had left him faint and dizzy. He sat down again.

"I'm afraid," he ruefully admitted, "that I'm not quite ready for discharge from your hospital."

"You jest set where yer at." The girl rose and pointed up the mountainside. "I'll light out across the hill and fotch Samson an' his mule."

"Who and where is Samson?" he He realized that the bottom of the valley would shortly thicken into darkness, and that the way out, unguided, would become impos sible. It sounds like the name of a strong man"

"I means Samson South," she enlightened, as though further descripdundant. "He's over thar bout three-

"Three-quarters of a mile?" She nodded. What else could three quarters mean?

"How long will it take you?" he asked. She deliberated. "Samson's hoein'

corn in the fur hill field. He'll hev ter cotch his mule. Hit mout tek a half-hour." "You can't do it in a half-hour, can

you?" "I'll jest take my foot in my hand, an' light out." She turned, and with

a nod was gone. At last she came to a point where a clearing rose on the mountainside above her. The forest blanket was stripped off to make way for a fenced-in and crazily tilting field of young corn. High up and beyond, close to the bald shoulders of sandstone which threw themselves against the sky, was the figure of a man. As the girl halted at the foot of the field at last, panting from her exertions, he was sitting on the rail fence, looking absently down on the outstretched panorama below him.

Samson South was not, strictly speaking, a man. His age was per-haps twenty. He sat loose-jointed and indolent on the top rail of the fence, his hands hanging over his knees, his hoe forgotten. Near by, propped against the rails, rested a repeating rifle, though the people would have told you that the truce in the "South-Hollman war" had been unbroken for two years, and that no clansman need

CHAPTER II.

Sally clambered lightly over the ence and started on the last stage of her journey, the climb across the young corn rows. It was a field stood on end, and the hoed ground was uneven; but with no seeming of weariness her red dress flashed steadfastly "Yes, of course." The man suddenly across the green spears, and her voice was raised to shout. "Hello, Samson!"

in the support of her bent arm. He his hat or descend from his place of attempted to prop himself on his hurt rest, and Sally, who expected no such hand and relaxed with a twinge of ex-treme pain. The color, which had be-was her hero. Slow of utterance and was her hero. Slow of utterance and gun to creep back into his cheeks, left diffident with the stranger, words now them again, and his lips compressed came fast and fluently as she told her. story of the man who lay hurt at the foot of the rock.

"Hit hain't long now tell sundown,"

nounced the young woman, quietly, she urged. "Hurry, Samson, an' git "Ye've got ter be heedful." yore mule. I've done give him my promise ter fotch ye right straight

Samson took off his hat, and tossed the heavy lock upward from his forehead. His brow wrinkled with doubts.
"What sort of lookin' feller air he?" While Sally sketched a description.

ne young man's doubt grew graver "This hain't no fit time ter be takin' folks what we hain't acquainted with," he objected. In the mountains any time is the time to take in strangers unless there are secrets to be

d from outside eves. "Why hain't it?" demanded the girl. 'He's hurt. We kain't leave him layin'

Suddenly her eyes caught sight of the rifle leaning near by, and straight way they filled with apprehension militant love would have turned to hate for Samson, should he have proved recreant to the mission of reprisal in which he was biding his time yet the coming of the day when the truce must end haunted her thoughts She came close, and her voice sank with her sinking heart,

"What air hit?" she tensely demand-"What air hit, Samson? What fer hev ye fotched yer gun ter the

The boy laughed. "Oh, hit ain't nothin' pertic'ler," he reassured. "Hit hain't nothin' fer a gal ter fret herself erbout, only I kinder suspicions strangers jest now."

"Air the truce busted?" She put the question in a tense, deep-breathed whisper, and the boy replied casually. almost indifferently.

"No, Sally, hit hain't jest ter say busted, but 'pears like hit's right smart cracked. I reckon, though," he added in half-disgust, "nothin' won't

Somewhat reassured, she bethought erself again of her mission. "This here furriner hain't got no

harm in him, Samson," she pleaded. 'He 'pears ter be more like a gal than a man. He's real puny. He's got white skin and a bow of ribbon on his neck—an' he paints pictchers."

The boy's face had been hardening with contempt as the description advanced, but at the last words a glow came to his eyes, and he demanded almost breathlessly:

"Paints pictchers? How do ye know

"I seen 'em. He was paintin' one when he fell offen the rock and busted she broke off, then added with a sudden peal of laughter-"es er pictcher." The young man slipped down from the fence, and reached for the rifle.

The hoe he left where it stood. "I'll git the nag,"

Sally sat mountain fashion behind climbed the rock and halted before him, facing straight to the side.

So they came along the creek bed "and I guess I got too absorbed in the work. I stepped backward to look at still sat propped against the mossy rock. As Lescott looked up he closed into his pocket with a smile.

"Snappy work, that!" he called out. "Just thirty three minutes. I didn't believe it could be done.

Samson's face was masklike, but as he surveyed the foreigner, only the ingrained dictates of the country's gleam of scorn for this frail member of a sex which should be stalwart.
"Howdy?" he said. Then he added

suspiciously: "What mout yer busiless be in these parts, stranger?" Lescott gave the Odyssey of his wan lerings, since he had rented a mule at Hixon and ridden through the counry, sketching where the mood prompted and sleeping wherever he found a ospitable roof at the coming of the

evening.

Tamarack Spicer.

and, when he was affirmatively ans swered, his eyes contracted and bored searchingly into the stranger's face. "Where'd ye put up last night?"
"Red Bill Hollman's house, at the

mouth of Meeting House fork; do you know the place?"

Samson's reply was curt.
"I knows hit all right."

There was a moment's pauserather an awkward pause. Lescott's mind began piecing together fragments of conversation he had heard. until he had assembled a sort of mental jigsaw puzzle.

The South-Hollman feud had been mentioned by the more talkative of his informers, and carefully tabooed by others-notable among them his host of last night. It now dawned on him that he was crossing the bounand coming as the late guest of a Hollman to ask the hospitality of a

South.
"I didn't know whose house it was," he hastened to explain, "until I was benighted and asked for lodging. They were very kind to me. I'd never seen them before. I'm a stranger here-

Samson only nodded. If the explanation failed to satisfy him, it at least seemed to do so. "I reckon ye'd better let me holp

ye up on thet old mule," he said; "hit's a-comin' on ter be night." With the mountaineer's aid, Lescott ed astride the mount, then he turned dubiously.

"I'm sorry to trouble you," he ventured, "but I have a paint box and some materials up there. If you'll bring them down here, I'll show you how to pack the easel, and, by the way" he anxiously added, "please way," he anxiously added, to handle that fresh canvas carefullyby the edge—it's not dry yet."

He had anticinated impatient for his artist's impedimenta, at his nephew.

his surprise the mountain boy (TO BE CONTINUED.) but to his surprise the mountain boy

the sketch with a face that slowly softened to an expression of amazed and into the sight of the man who admiration. Finally he took up the square of academy board with a ten der care of which his rough hands the case of his watch and put it back would have seemed incapable and stood stock still, presenting an anomalous figure in his rough clothes as his eyes grew almost idolatrous. Then he brought the landscape over to its creator, and, though no word was spoken, there flashed between the eyes of the artist, whose signature gave to hospitable code kept out of his eyes a canvas the value of a precious stone, and the jeans-clad boy whose destiny was that of the vendetta, a subtle wordless message. It was the countersign of brothers-in-blood who recognize in each other the bond of a

> The boy and the girl, under Lescott's direction, packed the outfit and stored the canvas in the protecting top of the box. Then, while Sally turned strode down creek in search of Lescott's lost mount, the two men rode upstream in silence. Finally Samson

mutual passion

spoke slowly and diffidently.
"Stranger," be ventured, "ef hit hain't askin' too much, will ye let me see ye paint one of them things?" "Gladly," was the prompt reply.

Then the boy added covertly: "Don't say nothin' erbout hit ter none of these folks. They'd devil me." The dusk was falling now, and the hollows choking with murk. "We're nigh home now," said Sam

son at the end of some minutes' silent plodding. "Hit's right beyond thet thar bend." Then they rounded a point of timber and came upon a small party of

men whose attitudes even in the dimming light conveyed a subtle suggestion of portent. "Thet you, Samson?" called an old

man's voice, which was still very deep and powerful. "Hello, Unc' Spencer!" replied the

Then followed a silence unbroken until the mule reached the group, reealing that besides the boy anothe man—and a strange man—had joined

their number.
"Evenin', stranger," they greeted him, gravely; then again they fell silent, and in their silence was evident constraint.

nounced Samson, briefly. "He fell offen a rock an got hurt. I lowed I'd fotch him home ter stay all night. The elderly man who had hailed the boy nodded, but with an evident an-noyance. It seemed that to him the others deferred as to a commanding time. The good people of Palestine officer. The cortege remounted and in his day never thought of honoring rode slowly toward the house. At last all men. On the contrary, there were

mule and inquired: Samson, where was ye last night?"

"Thet's my business."
"Mebbe hit ain't." The old mountaineer spoke with no resentment, but deep gravity. "We've been powerful oneasy erbout ye. Hey ye heered the

"What news?" The boy put the question noncommittally. "Jesse Purvy was shot this morn

The boy vouchsafed no reply. "The mail rider done told hit. . Somebody shot five shoots from the laurel. . . Purvy hain't died yit. . Some says as how his folks nas sent ter Lexington fer blood-

hounds." The boy's eyes began to smolder hatefully. "I reckon," he spoke slowly, "he

didn't git shot none too soon." "Samson!" The old man's voice had the ring of determined authority. When I dies ye'll be the head of the Souths, but so long es I'm a runnin' this hyar fam'ly I keeps my word ter friend an' foe alike. I reckon Jesse Purvy knows who got yore pap, but

up till now no South hain't never busted no truce. The boy's voice dropped its softness and took on a shrill crescendo of ex-

citement as he flashed out his retort.

"Who caid a South has done busted the truce this time?"

HISTORIC FIND IN PALESTINE MEASURING LIGHT OF STARS agoan Reports Discovery of Floor

Must Have Some Evidence.

Improved Instruments, Johns Hopkins Professor Hopes to Secure Most Important Results.

A recent number of Le Radium con tains a paper by Dr. A. H. Pfund of Johns Hopkins university, in which he describes some preliminary he has made of a new apparatus for measuring the light of a star. The work was done at the Allegheny ob servatory, the Keeler 30-inch reflector being used. In the focus of the tele scope, either of two small blackened disks, which formed the junction of and was built in the third or fourth a thermo-circuit, could be placed. The wires used for the thermo-elemen were alloys of bismuth and tin, and of antimony and bismuth respectively. They were enclosed in an evacuated capsule, closed at one end by a plate of fluorite and substituted for the eye piece of the telescope. The thermocurrent was measured by a moving coil galvanometer. The sensitive ness of the arrangement was such that a candle at a distance of 80 miles would give a deflection of one mil-The deflections obtained limeter. from celestial objects were: 7.5; Jupiter, 3.0; Altair, 2.0 millime The author hopes, by using a sensitive galvanometer and ma

HONORED ALL MEN

Never a Word of Contempt or Scorn Came From the Lips of Our Lord.

A few privileged men move in spiendid circles; they are the actors in great affairs, and their names will be writ large on the page of history. is an instinct to honor the mighty, the gifted, and the famous. But the immense majority spend their lives in he most commonplace scenes, an infinity of petty tasks consumes their time and strength, and the experiences which make up the life-story of the multitude are hardly important enough to be mentioned in domestic correspondence.

But on investigation we find that the great minds of the earth have also n concerned with the most modest affairs of human life. For instance, Shakespeare writes of kings and conquerors, of battles and empire, of love and beauty, of the deep things of the intellect and the beart, and he treats these high themes with wonderful mastery and spiender of expression. With his name we associate only su-preme genius and immortal fame. Yet when we read his last will and testament and find him begreathing his second-best bed, we see that the great master had, like the rest of us, to deal with very minor matters indeed.

Our difficulty is with the word all. 'Honor all men." The people in Africa as well as the people in America. The dwellers in the siums as the residents of the avenue. All men! servant as well as the master: the maid as well as the mistress; the illiterate as well as the scholers the sinher as well as the saint. Men of high character and achievement-we de ight to honor them. The tramp, the drunkard the criminal-how can we conor them? And yet the apostle makes no exception when he says, honor all men. It is a tremendous demand, and tremendously hard to obey, and yet we must strive to obey it is we would have the mind which was in "This hyar man's a furriner," an- Christ Jesus.

Passed None By.

For this is what Christ did during his earthly life—he honored all men This was indeed a thing which differ entiated him from everyone else of his the elderly man came alongside the certain folk whom they regarded only as objects of their scorn and con tempt. They honored the pious Pharisee, but the "publicans and sinners they treated as the filth and offspring of all things. Jesus honored all men. He honored Matthew by calling him as an apostle; he honored Zaccheus, the chief publican; he honored the woman who was a sinner and defended her before Simon and his assemble guests; he honored the frivolous and sensual woman of Samaria when he taught her at Jacob's well; he honored even that wretched woman who was dragged before him by a brutal mob. and saved her by his word of justice and pity. That was always characteristic of our Lord. Palestine in his day had its share of wastrels and ne'er-do wells, of low and degraded people and Jesus came into close contact with them. But you will search the tempt or scorn from his line.

Looked into the Heart.

When Christ looked upon men what did he see? Ordinary men saw simply the sordidness of life and its vicious characteristics. Jesus saw more. As St. John says: "He knew what was in man." Everybody could the brutish conduct, everybody could see the vice and the shame. But Jesus looked beyond the outward con- we have let the tree stand unheeded duct to the heart, and in the hearts of or cut it down. Not in one hundred saw potencies and possibilities of

Jesus saw the possibilities in human nature where we usually see only com-mon clay. The ruby is a bit of crys-tallized earth colored with iron; the opal is so much silica and water; the diamond is charcoal; and indeed, such substances as clay and flint form the basis of nearly all the precious stones. To our Lord the human soul was infinitely precious, so that even the ealth of the world was not to be compared to it in value. There was but one thing of sufficient value to buy the soul of man, and that was the blood of the spotless Son of God. He died for all men.

Therefore honor yourself, for Christ onored you, and scorn anything which may degrade or bring upon you Then, also, you will see something to reverence and honor in every man and woman you meet, for even in the battered and broken vrecks of humanity we see children of the love of God, our brothers and sisters for whom Christ died. It is not for you and me to judge as to concerning whom the Lord of Hosts hath "They shall be mine in that day when I make up my jewels."

The Value of the Bible.

The Bible is first among those influ nces that shed a balm into the spirit. It seems sanctified by influences have impregnated no other book thro the ages. The comfort, the rest tions of believers have in a manne been shed back from its pages so that we find in a little text of special import to all the needy and suffering peace that has the effect of a bene diction. It is known to most of n mainly by these pertinent, significant nessages that have a special bearing on man's dependence on God, and the help that comes in mysterious ways to those who earnestly seek for aid What lies between the texts is main ly negligible to the most of us. The gems we gather; the less precious set ting, that has no special bearing or our inward state, we pass by. Words fitly chosen are these brief, precious texts, like apples of gold in pictures of silver. They are deeply inwrough with our religious life, and have had a prodigious influence in bringing to myraids of souls the peace the world cannot give or take away.--Christian

When foreign war vessels first vent into Chinese waters, it was found that the Chinese had built forts facing the direction in which the attack was expected to come, and had left their rear exposed. When the English first appeared before the island of Hong Kong, they found a formidable fortress frowning from the rocks and garrisoned by several thousand Chinese soldiers. The English sand Chinese soldiers. commander began to look around for the best place of attack. While the Chinese were sleeping, the English circled the island, and at dawn suddenly came upon the Chinese from the rear.

Unfair Attack

The Orientals were thrown into wild consternation, and one officer, who could speak some English, ran out waving his arms. "No b'long ploper!" he shouted. "No can come this side; must come other side. Must go back, come ploper side." Strange Nervous Affection. One of the strangest nervous afwhich the sight of a cat or even nearness of one produces in many persons. This cat fear or gilurophobia affects different individuals in a number of widely different ways. There are those who have cat asthma; those who have fear on seeing cats, with-

ent through its smell, which once ex-

ides these, cases occur "in which

"Greenbacks" received their name in 1859. The naming took place in the spacious stone building now-thehome of La Chambre de Commerca facing the Champs de Mars in Mont real. Fifty-five years ago our print-ers of bank notes shared the dismay of their American brethren as photographic counterfeits appeared. The British-American Bank Note company, perplexed by this new hazard. consulted Dr. Thomas Sterry Hunt, chemist to the geological survey of Canada. He suggested the use as a pigment of sesquioxide of chromium. From that day to this it has been a safeguard against fraud because, for all the vividness of its green tint, it refuses to be copied by a camera.

Logically Reasoned.

The conversation was about the bright sayings of the rising generation, and a participant was reminded of an incident happening in a public school. One day the teacher was instructing a class of youngsters in geography, and to this end she told them to close their books while she asked a few questions about the lesson. "Johnny," said she. beginning with a bright-faced young ster, "what is the name of the principal river in Egypt?" "The Nile," was the easy rejoinder of Johnny. "That's right," returned the teacher, encoursgingly. "Now, please give me the name of the Nile's smaller tributaries." "Juveniles, Wiss Mary," swered Johnny.

The Neglected Pecan The tree is nature's real engine of duction. Wild trees producing ber

rels and barrels of fruit are not un common. We have failed to develor a tree agriculture long ago because nobody happened to think of it. For hundred years the white man has been chopping down pecan trees in the Mississippi valley. Yet the meat in the nuts of these trees is more nutritious than the meat of pigs. A single pecan tree at times produces more meat than does the squealing quadruped. Still

THE COUNTRY'S WAR AGAINST THE FOOT-AND-MOUTH DISEASE

Prepared by the United States Department of Agriculture.

Fourteen states have been quarantined by the United States govern ment for foot-and-mouth disease Massachusetts, Rhode Island, New York, New Jersey, Delaware, Pennsyl vania, Maryland, Ohio, Indiana, Illinois, Michigan, Wisconsin, Iowa and Kentucky. This disease is new to farmers of the United States, for there have been only five outbreaks in the history of the country and of these the first three were unimportant and the two others confined to a comparatively limited area. In Europe however, it has long been a well known and dread scourage. Should it ever be permitted to establish itself as firmly here it would cause not only tremendous losses to stock but

Typical Lesions on the Feet

seriously interfere with the supply of meat for the people.

The foot-and-mouth disease affects particularly cattle, swine and sheep It is characterized by sores in the the mouth which make swallowing painful and frequently cause the animals to refuse all food, and by sores on the feet which cause lameness and in severe cases, occasionally result in the hoofs dropping off. The animals lose flesh with extraordinary rapidity and in the case of milk cows the milk supply is so seriously affected that it frequently dries up altogether. The first evidences of the disease are a followed quickly by fever, the temperature sometimes rising as high as 106 degrees Fahrenheit. Small vesicles or blisters about the size of a pea appear shortly after in the mouth and spread rapidly. As the disease advances ropy saliva hangs from the afflicted animal's mouth, which is opened and shut with a peculiar smacking sound. In a short time similar eruptions appear on the feet, which are red, tender, swollen and painful. In consequence the animal persists in lying down and bedsoon develop. The udders of milk cows are also susceptible and the sores interfere with milking.

Most Contagious of Stock Plagues. Although the mortality is, except in very severe outbreaks, comparatively low, foot-and-mouth disease is probably the most contagious of all stock plagues. The germ which causes it is so small that it is invisible under he miscroscope and passes through the finest filter known to science. It can be carried in any one of a hundred ways. In addition to direct con tact with affected animals, the disease can be communicated by hay, straw, edding, harness, ropes, in fact, anything that has even indirectly came in contact with diseased animals. Cats, dogs, and poultry have b known to carry the germ from farm to farm, and in particular this is frequently done by human beings. Already in the present outbreak cases are on record where the curiosity of farmers has led them to visit infected herds. On their return to their own homes these men have given the disease to their own animals. For this reason the authorities are urging upon every one the duty of refraining trangers from visiting their stock.

from such visits and of keeping contagiousness of the disease ndeed is such that when one animal in a herd becomes infected it is conidered useless to attempt to save the remainder of the herd. For this reason the federal authorities have only practical method of adopted the stamping out the disease, namely, the slaughter of all cattle, sheep and swine on an infected farm. When a case is discovered a deep trench is dug, the animals led into it, slaughtered, their hides slashed, and the ca casses treated with quicklime and then buried under at least five feet of earth. It is advisable to slaughter the animals in the ditch itself in order that the ground may not become affected by dragging the dead bodies The hides are slashed partly in order to facilitate the action of

Didn't Believe in Tattling.

Marjorie, aged four, was in the library with her father, while her mother was superintending the preparation of dinner. The attention of the head of the house was attracted by a scratching sound, and he looked up to find his daughter at work with a pair of scissors on the top of a polished table. "Marjorie," he said, sternly, "go tell your mother what you've been do "I won't do it, papa," she said. "Do you think I'm a tattletale?"-

the lime and partly to remove any temptation to dig them up again and sell them. The entire farm premises are the thoroughly disinfected and no stock allowed upon them for a period of approximately sixty days.

Appraiser Values the Herd.

In order to compensate the owner of his property thus condemned in the interest of the public welfare, an appraiser is appointed by the state authorities to value the herd. The sum thus fixed is divided equally between the state and the federal authorities. In the last outbreak in 1908 in New England it cost the federal government, which was then paying twothirds of the appraised values, approximately \$300,000 for condemna tion, slaughter and disinfection. The present outbreak is regarded as much ore serious The inspectors engaged in this

work are equipped with a complete rubber outfit which can be thoroughly disinfected after each exposure to infection. Persons who have not the advantage of this equipment should rigorously refrain from exposing themselves to the least risk of infection. As has already been said, the disease is frequently transmitted by human beings, and it is really a crime for any one to gratify his curiosity at the expense of his neighbors. In addition to this danger there are also & number of cases on record in which both children and adults have become infected themselves. Ordinarily the disease is not serious in men, but weakly children who drink contaminated milk suffer so severely that in a few cases death has been known to With adults the malady usually takes no more serious form than a slight eruption in the mouth similar to fever blisters and possibly a similar eruption on the hands and fingers. There may be also some fever and nausea, but there is comparatively little danger. In countries where the disease is prevalent many authorities believe that it is fairly general in human beings but that the consequent disturbances in health are so slight that they are not brought to the attention of physicians.

Started in Michigan.

The present outbreak originated in southern Michigan but how the germ found its way there is not yet definitely known. It seems probable that some cattle became infected, that their milk was sent to a creamery the skim milk then returned to be fed to hogs. A herd of these infected hogs was then shipped to Chicago where they infected the stock-

Ropy Saliva Hanging From Mouth of Stricken Animal.

yards before they themselves revealed any symptoms of the disease. Once this had taken pisce, every shipment of stock from Chicago to other parts of the country was likely to spread the infection. For this reason federal inspectors have for some time now been engaged in tracing, by the aid of bills of lading and other railroad records, each of these shipments to its destination and inspecting the stock there. This accounts for the discovery of cases in states as far removed from each other as Iowa and Massachusetts. The various quaran-tines already imposed have been designed to prevent the continued movement of cattle from infected or suspicious places. Once these move ments have been halted and all the exposed cattle brought to a standstill, t will be possible for the federal authorities to locate all suspicious cases and by the slaughter of all exposed

The Oldest Handicraft

The toy industry is one of the oldest industries in the world. The British museum can show us a doll (with strings of mud beads for hair) and others with movable arms. which the children of ancient Egypt played on the banks of the 'Nile Jointed dolls and dolls' furniture have come down to us from the days of Greece and Rome, and we know that balls, tops and toy animals were favorite playthings at an even earlier

Appearances Deceptive. in'."-Washington Star.

cattle ultimately eradinate the dis-The federal quarantines are accompanied by state and local quarantines of individual infected farms. From these no produce whatsoever can be sent out. In many cases children are not even permitted to go to school, and the farmer cannot drive his horses on the public highways.

Stock Raisers Should Help. The chief obstacle in the way of the nuccessful prosecution of this campaign of isolation and extermination lies in the danger that there may be concealed sources of infection. hough the farmer receives the appraised value of his herd, it is inevitable that the summary slaughter of all his stock should cause him considerable inconvenience as well as in-

Slaughtered Cattle in Trench Ready for Burial.

direct financial loss. To those can see no further ahead than this and who do not realize what it would mean to the entire country if the disease were once to gain a firm foothold here, there is a natural temptation not to report suspicious cases to the authorities. This, however, is simply to cut off one's nose to spite one's face. The disease cannot be stamped out by ignoring it. The only possible way in which stock raisers can save themselves tremendous losses in the future is to co-operate now with the authorities by reporting every suspicious case of sore mouth or lameness among their stock and by assisting in enforcing the quarantines, both federal and local, which have been declared.

EXCELLENT POINTS CONCERNING SWINE

Alfalfa Recognized as of Greatest Value in Hog Feeding-Care for Sows.

(By C. S. MILLER.) If you intend to plow your blue grass and clover pastures next spring, let the pigs have free range over them until the snow falls.

No other feed for small pigs ranks as high in value as skim milk. If you do not have plenty of it on your own farm, better arrange to get from a neighbor, even if it takes trouble to do it.

In the West alfalfa is now recognized as of the greatest value in hog feeding. Give a brood sow plenty of cut alfalfa with a small ration of corn, say not more than two pounds per day, and she will come through the winter in fine condition.

A slop made of shorts and hot water, fed every other day, is an excel-

lent thing for brod sows. A good many men will tear them-selves from close proximity to a hot stove, dash out into the storm, shove a few bushels of corn on the ground their hogs, and then leave the to shiver and freeze without adequate shelter during the night. These men are the fellows who are always sure ey in hog raising. Since Doctor Moore's discovery the hitherto unknown qualities of copperas, it has been used with great to preserve the health of hogs. A very small portion, say a teaspoonful in a barrel of drinking wa ter once or twice a week, is recommended

FIND PLEASURE IN POULTRY.

Woman May Find as Much Enjoymen With Flock of Birds as She Does on Shopping Expedition

The woman who finds herself possessed for the first time of a flock of poultry will soon learn that she may spend an afternoon working with her birds and be just as much amused as if she spent her time shopping, nor will she be nearly so tired as if she had been walking around on hard

sidewalks. instead of being out of pocket-for nost every woman will buy things that she does not need if she chances to see ther-she will find that she has added to the possibilities for gain.

To be out in the open air ar chine is to see more real life than does the woman who is always in the

Center of British Industry. Within two or three hours by rail and linked to the River Humb a network of canals, live 12,000,000 to 15,000,000 people, mostly engaged in manufacturing and mining, and largely exporting their products to lands and receiving from foreign abroad the bulk of their raw material and food supplies. Seed crushing, flour milling, oil refining, and the making of paints and other goods into which these oils enter, are the special industries of Hull, England.

BIG POLAND CHINAS POPULAR

Chief Characteristics Are Early Ma turity and Rapidity of Fattening
—Also Good Rustlers.

For many years Poland China hogs were the leaders in the corn Originating in Ohio in 1872, their good points were rapidly appreciated, and before many years Poland Chinas were established in every section where hogs were raised for market in a large way. The early Poland Chinas had much to com-mend them. Their chief characteristics were early maturity and rapidity of fattening. The combination of the various strains of blood Big China, Poland, Byfield, Berkshire, Irish Grazier on common stock, resulting in this breed, was such that a hog could be matured much earlier and much cheaper than was formerly the case. Moreover, they were good rustlers, did not require pampering, and, as a matter of fact, were practically feel proof. So it came about that in a marvelously short time the praises of Poland Chinas were sung on every hand and the demand as breeders was practically unlimited.

They were of good size (sows 500 ounds, boars, 600 pounds and over), smooth, with moderate bone, large ham and shoulder, producing a high percentage of the highest grade of ard and edible meat of remarkably good flavor and quality. They dressed out well and consequently were popular with packers. Poland China raisbecame a fad. The sows were prolific, not unusual for average litters to contain six or eight pigs, in individual cases run up to 10, 12 and 14. The pigs were active from the

Fine Specimen of Poland China Breed

beginning, began to eat feeds quickly, grew with remarkable rapidity, so that by the time they were eight or nine months old they were ready for home butchering or for sending to the market. This was an eye-opener. The older and well-known breeds required much longer time for maturity.

HOGS AS MORTGAGE LIFTERS

More Money Made in Raising Swine on Farm Than in Any Other
Animal—Enemy is Cholera.

(By GEORGE H. GLOVER, Colorado Ag-ricultural College.)

There should be, and usually is, nore money made in raising hogs the farm than other animals. Aside from cholera, hogs are less subject to disease, reproduce faster, and make better gains per pound of feed con-sumed. The annual increase of horses, cattle ard sheep ranges from 50 to 100 per cent. The increase of hogs should be from 500 to 1,500 per cent. The sow has the advantage in farrows several at each litter

Doctor Warrington in "Chemistry on the Farm" states that for each 100 pounds of feed consumed the different farm animals make gains as follows: Cattle, nine pounds; sheep, 11 pounds, and pigs, 23 pounds. Pigs then make nearly two and a half times the gain over cattle for the amount of feed consumed.

The man who hauls hogs to market instead of corn is the one who should make money. Because of the fact that hog raising, when properly managed, has been so profitable the hog has been styled the "mortgage lifter." one enemy to the business is hog cholera. No doubt, much can be done in controlling cholers by the farmers co-operating in adopting measures which will prevent the dissemination of cholera

It is up to the farmers themselves. in the last analysis, to confine cholera on the one farm where it starts by strictly following the advice of sani tary authorities and all working together to this end. I know of a farmer who kept his hogs healthy for four years, while the neighbors all around him were losing their hogs from chol-He did it by an eternal vigilance in keeping infection out, and this man made a regular chore of cleaning the hog pens every Saturday afternoon.

Skim Milk for Pigs. It is usually estimated that 100 pounds of skim milk are worth as much as a half bushel of corn for feeding purposes—that is, if corn is 60 cents a bushel, 100 pounds of skim milk are worth 30 cents. In feeding pigs give three pounds of skim milk to one pound of grain. Skim milk contains 2.9 per cent protein, 5.3 per cent carbohydrates and about 0.2 per cent fat. It is practically all digestible.

Cheapest Gains on Pigs. Alfalfa pasture produced the cheapest gains on pigs ever secured at the Iowa station. In 1911 alfalfa pasture, with a grain ration of ear corn plus small amount of meat meal, produced gains at a cost of \$2.88 per 100 pounds considering corn worth 50 cents a
