Boss of the hard-fisted, powder-scarred, devil-maycare itinerants who drive tunnels this summer in Alaska and next winter perhaps in Florida or New Jersey. Pat H. O'Nelli has set a faster pace

"Tunnel stiffs" is the generic term for them all. "Hoboes" th uninitiated would call them, but the uninitiated would be wrong in their classification. To handle such men as these, to spur them on to fresh bursts of speed, to make them do the impossible, takes a man, who knows hard rock men. That is probably one reason why Pat O'Neill, tunnel boss, has succeeded. When the Alaska-Gastineau Mining company put through a two-mile tunnel in 1913 so its railroad could haul ore O'Neill was the tunnel boss. That was the job on which he sat the supperse pace. These drugs will produce sleep, and a FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labelling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stuper, coma, convulsions and death." The taste and ous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed.
