Introducing Autumn's Leading Silk and Woolen Fabrics

It is our pleasure to announce for this week a magnificent

The display was gathered by our buyer from the advance showings of famous eastern producers, and each piece was selected with the utmost regard for distinguished appearance

It is a truly wonderful collection, fully worthy of the admiration of our ultra-fashionable clientele.

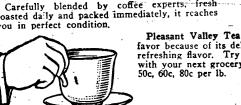

Silk Prices, \$1.00 to \$2.50. Velvet Prices, \$1.00 to \$6.00.

Dress Goods Prices, 75c to \$3.00. (Main Floor-Right)

Here's a Royal Coffee for Your Cup

Nero Coffee - 25 Cents

Warner's Proof Corsets

FRESH AND UNSTAINED Through the hottest days of summer, with the hardest kind of wear, you can keep your corsets fresh

and clean by ordinary washing if they are Warner's Rust-Proof Corsets. Water will not hurt the fabrics and the metal

parts are guaranteed rust-proof. It is real economy to buy Warner's, for you will be wearing your Warner's long after an ordinary corset would have gone to pieces.

Any Warner Corset bought at our counter will mold the figure for which it is intended absolutely i accord with fashion, and we guarantee every Warner's that we sell not to rust, break or tear.

Prices 50c up to \$3.00

While They Last --- With every \$1 purchase a 10c Fly Trap will be given.

Mississippi Slights Memphis But Eats a Park

EMPHIS, TENN. A great bar of mud and sand, half a mile long and an eighth of a mile wide, has formed along the Mississippi river front, prevent-

the current of the river flow against

ing navigation. Twenty years ago there was 90 feet of water where the mud nve leet above the surface of the water. The channel has veered off from Memphis, swinging to the Arkansas shore, where it runs swift and deep. It will probably cost the government a half a million dollars to induce the channel to swing back to the Tennessee side. A little farther down the river the channel has set hard against the Tennessee shore and is eating its way into beautiful Riverside park, a large tract

of land owned by the city. Already at some places the bank has been washed the highly improved driveway has fallen into the water. When the channel of the Mississippi decides to make a change, nothing, apparently can stop it. It will begin eating into the soft earthen banks and such obstructions as trees of giant proportions do not stop it. It will begin eating into the soft earthen banks and such obstructions as trees of giant proportions do not stop it. It will begin eating into the soft earthen banks and such obstructions as trees of giant proportions do not stop it. ructions as trees of giant proportions do not stand in its way. At some short session will begin points the river has carried away a quarter of a mile of land in a single highwater period and steamboats run where only a few months before fields of

stamped "cold storage."

There are only 650,000,000 eggs in cold storage in New York and thereabouts. Doubtless they are good eggs, but it is extremely impolite to ask a cold storage egg its age. So John J. Dillon, state commissioner of foods and markets, ruled recently that every such egg must have stamped on it the words "cold storage."

The truly important question is "Who, in obedience to Commissioner Dillon's order, will stamp the eggs?" Commission merchants who deal in eggs Staslak, of Jackson, while playing cruiser Bost insist that the retailers, the little dairymen and delicatessen dealers must near an enbankment fell four feet in Squadron at the identify every one of the 650,000,000 eggs that come out of cold storage to the the sand and broke his neck. He is to be taken

A Sleeper for Governor

A SLEEPER? This grand State of Michigan needs another Governor like the present one—a real Governor and not A SLEEPER. Some people in Manchester are wondering how A SLEEPER got the nomi-

nation. We can easily understand the situation. A. SLEEPER, like ourselves, believes in advertising and while his opponents were claiming the nomination, he, like Cascarets, "worked while they slept; that made "the coast clear." But "what's in

cans could have chosen no better man. His idea of aristocracy does not rise above the everyday man, and such a man is A. E. SLEEPER. We predict his efficiency will prove him to be as good a Governor as the Republicans have had. It will be a SWEET memory to see A. SLEEPER elected by 100,000 plurality.

TO hold "its place in the sun," is the avowed purpose of a great nation's conflict. To hold "its place in the sun," is the object of every business in the great fight for industrial and commercial supremacy.

To be able to hold "its place in the sun," is the supreme test of an asphalt roof. It is the sun, not rain or snow, that plays havoc with a roof. If it can resist the drying out process of the sun beating down upon it, day after day, the rain or snow will not affect it except to wash it clean and keep it sanitary.

Certain-teed

Roofing

ies its place in the sun" and holds it for than other similar roofing, because it is made of the very best quality roofing felt, thoroughly saturated with the correct blend of soft asphalts. and coated with a blend of harder asphalts. This outer coating keeps the inner saturation soft, and prevents the drying out process so

destructive to the ordinary roof. The blend of asphalts used by "The General" is the result of long experience. It produces a roofing more pliable than those which have less saturation, and which are, therefore,

At each of the General's big mills, expert chemists are constantly employed to refine, test and blend the asphalts used; also to experiment for possible improvements. Their constant endeavor is to make the best roofing still better. The quality of CERTAIN-TEED is such that

it is guaranteed for 5, 10 or 15 years, according to thickness (1. 2 or 3 ply). Experience proves that it lasts longer. Behind this guarantee is the responsibility of the world's largest manufacturer of roofings and building papers.

"You have a small, slender foot," he said to the sweet young thing; "does it run in the family?

Troubles in the starting system are indicated in two ways: First, the starter will not crank the engine at all, or, second, it cranks it so slowly that proper starting is not given. The first thought in either of these cases is thought in either of these cases is found where the aluminum pistons suffered from this treatment.

of Town State college. The answer given by R. A. Leavell, automobile expert of the college, is that it will not. Exhaustive experiments on this subject have just been completed by one of the most reliable auto manufacturing we would term today, "a bad man."

He could not have done his work or occupied his position if he had been. He was sincere in a bad cause; he was found where the aluminum pistons suffered from this treatment.

of Town State college. The answer given by R. A. Leavell, automobile expert of the traditions of our fathers (Gal. 1:14). He was not at all like those Pharisees whom Christ condemned as "white sepulchers." He was not what we would term today, "a bad man."

Well "(impatiently) "what do you want?"

"Why, I just wanted to ask you, if the police catch that chicken-thief, to give him my thanks!"

The Wretchedness of Constipation (Can quickly be overcome by Can quickly be ove

thought in either of these cases is that the battery may be partly or completely discharged or it may be operating at very low efficiency, due to very cold weather or some other cause. Coming back to the general head of when the starting motor will not-crank the engine at all there are two causes, open circuits and short circuits or grounds.

Open circuits on the cranking motor will be found at the brushes in loose connections at the commutator training switch or in the wiring. If at the brushes they may be worn too short or improperly adjusted. They may also stick in the holders, due to binding or dirt. Loose connections are obvious, the commutator troubles are the same as the same in the stifts of grenerators, the starting switch rouble is nearly always a fail ure of switch blades to make contact. Sometimes the switches are frased owning to racing.

Under the head of short circuits and grounds, these can be divided under grounds, these can be divided under

grounded. In the wiring a short circuit may exist due to rotted or worn SIGNALING DEVICE OF VALUE flict he must have had before him the above sea level. insulation or a ground from rotted or vision of what God would have him do, worn insulation or from metal screw Uluminated Hand, for the Use of Mo. and the work for which he chose him

ABSORBIN

Under the head of short circuits and grounds, these can be divided under the general heads of those in the arms of the priming cups open or the spark mature, those in the wiring and those out to expect the excess of keromatine, those in the wiring and those at the starting switch. In the armatice of field winding of the motor these may be either burned out or grounded. In the wiring a short circuit may aviet due to rested on work.

OUR PUBLIC FORUM

Peter Radford

The recent confession of Dr. Newell Dwight Hillis from the pulpit of the Plymouth Church, Brooklyn, that he erred in becoming secular is in many respects the most important statement made from the American pulpit in this generation and if it marks the high tide of ministerial lust for worldly power that has been flooding this country for the past quarter of a century thes Dr. Hillis.

country for the past quarter of a century then Dr. Hillis has not erred in vain.

It must be said to the credit of this noted divine that his purpose in stepping out of the pulpit was to acquire the means of rendering a more capable service to those who need and deserve assistance, but the pathway from the pulpit to the world is always strewn with good intentions. Satan knows as well how to tempt a saint as he does a sinner and he has lured many a minister down the primater pathway of worldly power to ruin, for no one knows better than his interminates how easy it is to get a preaction have viewed with alarm and the world with

The laymen of this nation have viewed with alarm and the world with derision, the growing tendency of ministers of the gospel to abandon the pulpit as a power against evil and seek the influence of worldly agencies to put into effect their Christian ideals. The man who has not sufficient faith in the power of religion to grapple with the sins of this world ought not to be in the pulpit and if he wants to accumulate wealth in order to relieve poverty or wield a scepter in order to anforce marality, then he ought to be a banker or a mayor, instead of a preacher. The two great temptations that confront the Christian ministry today are business and politics and between the two evils, Dr. Hillis chose the least and by his able conduct has turned error to his credit and transgression to the advantage of the pulpit. It is no compliment to say a preacher is a sharp trader or a smooth politician and certainly no applicant for the minister, would offer such qualifications as evidence of equipment for Christian work, and ministers engaged in undue activities in either field become a memore to the church and a peril to the state.

It is true the ministers as a class are realized.

It is true the ministers, as a class, are underpaid, but their average income will exceed that of the average farmer. Stocks and bonds, land and securities, politics and the lecture platform have tempted many a preacher. but the plow handles are without sin so far as living the minister from the pulpit is concerned. Any preacher who feels the inclusive to standon the pulpit should plow a few rounds and I venture the suggestion that he will

first sailing vessel to arrive from the ment methods, for the vessel brought copies of the Essex Gazette of April 25, containing the brief account of the engagement.

Post haste, they were carried to London, and on the following day the news was printed in the London Chronicle. Thus, 41 days after the shot was fired. its reverberations

shot was fired, its reverberations were heard in distant Britain. With but a simple headline—
"LONDON"—the Chronicle printed.

Your Figure Success Depends on Your Corset

They are designed in strict accord-with fashion's decrees and are the leaders of corset styles. Among the many styles we offer

for your inspection is Style 552, at \$1.50. Not only a practical everyday model, but one of the session's best styles for all occasions; designed especially for the average to fairly full figures.

Has a medium high, full bust, double boned throughout; has a graduated clasp which effectively supports the figure; three pairs of good grade supporters; made of a fine quality coutil which is of double thickness over the abdomen, giving added strength and wear to the correct and wear to the corset.
