### GOV. TO CONTROL FOOD

Have Put Food Prices on The Blink.

It is now admitted that the majority of the food problems which have arisen in the United States would have occurred whether or not we had entered the war. The spoulative feature was rapidly making it necessary that something along economic lines sould be undertaken. The great waste of products in this country was all out of proportion to that in England, which was and is really the greatest market for what we have to sell.

In order to keep up the supply of sheep in this country, western stock raisers must not sell ewe lambs for slaughter but will retain many of them on their ranches or sell to farmers east who desire to increase their breeding flocks. This is a very It is now admitted that the major

should have some supplementary protein feed. A clover or alfalfa meadow adjoining the corn field is ideal for this prpose. in a small enclosure.

3. The sanitary conditions are usually better in the field than they would be in a small lot.

4. Necessity for providing space for the crop is eliminated and loss caused by rats and mice is done away with.

But there are also some disadvantages. These are:

1. Roughage is not utilized to any appreciable extent.

2. There is some expense and ideal for this prpose.

Another method of providing a supplementary feed is by sowing ryc or rape in the corn field at the last cultivation. If none of these are available, a commercial protein such as digested tankage or "shorts" should be provided in a self-feeder or fed in the form of slop. In hogging down corn the hogs should be limited to an area which they can clean up in from two to three weeks. wise provision.

The committee appointed by Gov. Sleeper to investigate the coal situation intend to see that small towns get a sufficient supply, but the price of coal they have nothing to do with.

Among other things, Mr. Ferris said at Milwaukee was that the mayor of Chicago is paving the way to prison by his antagonistic utterances and actions against the government

Representative Doolittle of the state of Kansas, Tuesday introduced an amendment to the draft law designed to exempt farm laborers as a class. It was referred to the military of the state of the military of the state of the st tarv committee.

The high cost of living is meeting with a check. Coal flour, sugar and many other necessities will be regulated as to price. Millers are to be allowed a maximum profit of 25 cents a barrel on flour and 50 cents a ton on feed.

The continued advance in the price of news print is compelling many publishers to still further increase the price of their papers. The government has fixed a price of  $2\frac{1}{2}$  cents on what news print it needs, but that don't help

James Keeley, a Chicago publisher, claims to have knowledge to confirm former Ambassador Gerhard's published statement, that Germany had proposed to Great Britain a joint intervention in Mexico and Central America in an evasion of the Monroe doctrine.

Perhaps not in many years has the housewife done so much work in preparation of foodstuffs as she is preparing to do this season. The prices charged for canned goods have prompted her to do this; besides she realizes that she can produce better flavored goods than can be purchased.

At Milwaukee on Labor day, Ex-At Milwaukee on Labor day, Ex-Gov. Ferris is reported to have given out this statement: "There is a certain man likely to run for the senate, and if he does I shall again forget that I am a school teacher." It is claimed that former governor Chase Osborne of Sault Ste. Marie is the man hinted at.

The new styles of tractors are a great improvement over the early patterns, as might naturally be expected. They are not as cumbersome and can be more easily handled. The fence corners can be plowed as easily as with horses and much more rapidly. Another year will see a lot of farmers using the tractors.

There are millions of flies that escaped being swatted. They may appear more or less nervous in their action but they may have the same feeling as the boys in the trenches in France, fearful of getting a swat at any moment. Flies are getting more and more troublesome now as the fall approaches, and it is some job to prevent them from doing much damage to goods.

Chairman Francis Redfern, farmer member of the district appeal board at Lansing, says: "We had always considered that the farm was a good place to grow up on, but according to affidavits received Central Michigan is well stocked with "infirm men." Many claims being received from sons of farmers state that they are needed on the farm because of their aged parents, the affidavits later stating that the parents are 45 and 50 years old.

Business men find that in the purchase of goods of all kinds they not only have to pay a great advance over former prices but they also find that the quality of the goods is much poorer. This is true of almost every kind of goods. In this connection we desire to impress upon the merchant who is now or contemplates using space in The Enterprise these facts: The circulation of the paper is confined almost exclusively to the section which they desire to reach. From careful investigation we find that the paper is read in more than 2,000 homes. The quality of the reading matter has improved from year to year and is so well appreciated that new subscribers are being added to our list each week. Our advertising rates scribers are being added to our list each week. Our advertising rates however, we are compelled to ad-vance slightly to meet the increased cost of production made cost of production made necessary by the advance in price of labor. by the advance in price of labor, paper, type, equipment, etc. As everything now brings a higher price we feel that no one will deny our necessity of making the increase and will willingly pay the difference, especially as we can assure them that on account of the larger circulation they are really paying no more than in the past.

We learn that the Ford traactor is being tested in various soils and farmers who have seen them work beau that thex think they will be not the market next spring. There are other tractors that will be sold at a reasonable price and some of our farmer friends are talking of purchasing.

Mr. and Mrs. O. R. Bromley of Grand Rapids visited Mr. and Mrs. Harvey Anthony from Thursday until Monday. They went to Wampler lake fishing Saturday and Mr. Bromley landed a 9½ pound pickerel, the largest fish taken from the lake this season. Bromley is a nephew of Mrs.

It may have been a little slow in getting at it, but when it did rain it certainly made no bones of it, but came in torrents. The very ground was flooded last night, the river is a real thing this morning, and as the sun has shown brightly all day we conclude that the job is finished. The rain was much needed.

It was an inspiring sight to see the boys and girls hurrying towards the central school building, Tuesday morn-ing. They were more or less excited and were talking and laughing as they passed by, each with a package of books, etc., and there was nothing in their talk or appearance that indicated they were not happy.

i A Coodyear has returned from a business trip to Grenlock, N. J., where the factory for which he has been western representative so many years is located. His son also resides there. He says that we know nothing about the war preparation here. In Philadelphia and other eastern cities everybody is active and soldiers and sailors are seen in numbers.

The tax commissioners have now finished assessing the business places of the village, but other property and farm property has not been assessed but will be as soon as the men are but will be as soon as the men are through work in other places. The commission is short of men. Chas. Lewis of Ann Arbor informs us that although assessments were raised in that city, their taxes are lower than before because property is assessed equally.

#### FARMERS WILL BE CALLED

Probability That Many Exemption Of Those in Agricultural Work

Much has been said of late regarding the exemption of farmers who have been drafted. There have been some exemptions with which our readers are acquainted and some dissatisfaction and bitter feeling has resulted. From what we can learn, the government intends to extend clemency to real farmers, when applications have been made for exemption, until after harvest is over, say October. After that, should the war continue and a call for more men is made, it is very likely that all who are physically qualified will have to go.

We learn that many have appealed to President Wilson for help to exempt farmers, to which he has replied: "The matter of leaving the farmers on the farms has been given the most careful and smpathetic attention by the war department, and I have before me a letter from the secretary of war from which I quote the following sentence: 'Gen. Crowder had foreseen the practical need of enabling men in agricultural work to remain at their tasks until the close of the harvest season, and has ingeniously arranged so that men on the farms will practically all fall within the last group and will therefore not have to report for military service until about Oct. 1." Much has been said of late regard-

fore not have to report for military service until about Oct. 1." We would not advise any of ou farmer readers to have too high mately answering the call to serve their country in this time of need.

#### PATRIOTIC DAY AT JACKSON

This section of the state is not strong on beans though there are some farmers who try out a field occasionally just for experiment. In driving along the road one can-not tell accurately how the crops-will turn out. There are some fields that look pretty good but question-ing the farmers, we are inclined to say the crop will not be large. There is blight in some fields, if not all to a certain extent, and a new disease called "Mosaic" has been discovered.

The Store that Makes Good

In one county in South Dakota over ninety farmers were "caught" for \$200 apiece—in one month—by a "Get-Rich-Quick" schemer.

If those farmers had consulted their BANKER before investing their hard-earned money they wouldn't have been "burnt."

We will gladly advise with you on any investment you are thinking of making. Maybe we can steer you away from LOSING your MONEY.
