

### IGNORANCE PARTNER OF MUD

Motorists Complain That Farmers in Bad Roads Districts Know Nothing About Roads.

As a rule, ignorance accompanies mud. Many motorists in bad roads districts, stopping to ask a farmer in information about roads not ten miles away, have found that the farmer had never traveled so far way and could give no directions.

**Up to People Interested.**  
The success of state and national aid to road construction and road improvement will depend upon the interest the people take.

**Earth Road is Foundation.**  
The earth road is the foundation upon which all other surfaces are placed, and upon which we should depend for the load-carrying capacity.

**Water for the Dog.**  
See to it that the dog has plenty of cold water to drink in hot weather.

Rev. Rex, a popular Congregational pastor at Tecumseh, may leave there soon, having been offered work in another field at tempting salary.

### TEACHERS' VIEW POINT

Average Instructors So Poorly Paid There Is No Encouragement To Continue Work.

T. E. Johnson of Lansing, state superintendent of public instruction, says: "Michigan is first in the manufacture of motor cars, first in the production of white beans, second in the production of iron ore, potatoes, sugar beets, and rye, and thirtieth in the amount spent daily to educate each Michigan child."

In order to keep the competent teachers we now have and to induce the most able students to enter this field of endeavor, which requires such peculiar ability, we must pay teachers a minimum wage which will enable them to live in comfort and have at least \$300 left over for savings, care of dependents, professional growth, or possible sickness, according to Mr. Johnson's statement.

### YOUNG PEOPLE MARRY

One of Bridgewater's Daughters Becomes Bride of Ann Arbor Man, In Presence of Company.

A very nicely appointed wedding

was solemnized Thursday afternoon, April 8th, at the home of Mr. and Mrs. L. A. Schellenberger at Bridgewater, when their daughter Clara was united in wedlock to Edwin Henne of Ann Arbor.

Miss Edna Schellenberger acted as bridesmaid and Erich Walter of Ann Arbor was best man. The wedding march from Lohengrin was played by Miss Elsie Hochrein of Ann Arbor.

The bride wore white Georgette and carried Ophelia roses. The bridesmaid wore pink organdie and carried pink sweet peas.

Rev. Lueckhoff performed the ceremony, the double ring service being used. A three-course dinner was served, after which the bride and groom left for a short trip. Today, Thursday, they start for their future home in Des Moines, Iowa.

On Saturday evening at 8:00, Miss Olga C. Braun, daughter of Mr. and Mrs. Andrew Braun of this village, and John W. Smith of Tecumseh were married by Rev. A. A. Schoen at Emanuel's church parsonage. Mr. and Mrs. Smith will make their home in Tecumseh.

**Beautifying the Back Yard.**  
Those who have sufficient ground in the rear of their city or country houses in which to plant trees, or who are planning to plant trees, in ground on which they plan to build, will do well to consider the usefulness of trees that are to occupy the space before deciding just what they will plant.

Not only are apple trees, cherry and peach trees ornamental in their shape and their foliage, but they vary the year around. They are not only as decorative as the purely flowering shrubs, but they are much more lovely than the average shrub or tree in blossom time.

**Why He Was Interested.**  
"My uncle is very fond of the works of Artemus Ward."  
"Likes that form of humor, eh?"  
"He doesn't know it's humor. Takes a serious interest. Thinks it a fine example of simplified spelling."

### ATTACKS UPON FRUIT TREES

Stealthy Advances of Insects and Diseases Not Noticed Until Inroads Have Been Made.

Many insect and disease attacks upon our fruit trees are so stealthy in their advances that they have made inroads before we are aware of their presence. It means the salvation of the tree itself if these attacks are discovered in time. There are fungi that attack only dead trees, but the fruit grower is interested mainly in those

Apple Trees Pruned to Control Blight.

fungous and insect attacks which occur on live trees, resulting in injury and death.

The approach of disease is marked by slight and gradual changes and often some abnormal activity of certain parts. For instance, in the case of "yellows," that insidious and fatal disease attacking the peach, superabundant growth of slender branches and foliage often occurs in parts of the tree. Of course, diseases that attack only the foliage are discernible only in the summer. Some attack both bark and foliage. One disease that does this and which is known as fire-blight, attacks the tender branches and suckers and the adjacent bark of pear trees (also certain varieties of apple), working around it and girdling the tree with a diseased area. The name "fire-blight" is given because the leaves turn black and cling to the parts affected. The fruit also dries, blackens and clings in charred mummies to the tree.

All the diseased parts should be cut away and burned, to prevent a spread of the trouble. There seems to be no remedy for infected areas. Black knot is another troublesome disease which develops upon the cherry. A knotty excrescence of roughened bark develops upon the branches near their juncture with other branches and the twigs are roughened. Birds spread this disease with their feet. Diseased parts should be removed and burned, cutting well back from the diseased area.

### HIGHEST PRICES FOR APPLES

Commercial Crop for United States Estimated at 23,177,000 Barrels—Less Than in 1918.

(Prepared by the United States Department of Agriculture.)

The commercial apple crop for the United States is estimated at 23,177,000 barrels, or an increase of 105,000 barrels over the September estimate, compared with a production of 24,724,000 barrels in 1918, according to the October report of the bureau of crop estimates, United States department of agriculture. Prices paid for this fruit, from ciders to A grade, are the highest since apple growing became a commercial industry.

Warren Kimble and family and an aunt, Mrs. Kate Knowles of near Albion were guests of Mr. and Mrs. W. Kimble over Sunday.

### HAD LARGE FUNERAL

Many Friends and Relatives of Mrs. Springer Pay Last Tribute of Love and Respect.

The funeral of our late townswoman Mrs. William Springer was held at Emanuel's church Sunday afternoon and a large number of relatives and friends from near and far paid their respects. Some of the out-of-town relatives were, however, unable to attend the burial. Great sympathy is expressed for the bereaved husband and family, in whose loss the community will share.

### WIND HELPS ROAD BUILDERS

When Used in Construction of Highways in New Mexico Experiment Is Successful.

A new method of using the wind in sand-road construction has proved so successful, that, after making a nine-mile experimental stretch in New Mexico, roadmakers in that state have built 80 miles of similar highways. First of all, the grass and weeds are cleared from the right of way, and then a trench is made through the sand to the clay bottom. The loose sand is deposited in stacks ten feet from either side of the cut, and the rest of the work is left to the desert winds. During the spring and fall, the winds sweep away all the sand and widen the clay strip. Then the road is graded and the work finished.

The New England conference of the Methodist Episcopal church, in session at Boston, voted to lift the ban on dancing, card playing and theatre-going.

Don't scoff, madam, if you are (to yourself) unpleasingly large, and declare that it has never been done. It has been done—and here are Coats to prove it, to open your eyes, to give joy to your heart.

In Cleveland, Ohio, there is a prodigiously clever maker of women's apparel—so clever that dealers seek him from the three coasts of America. His wizard touch in the placing of a plait, the cutting of a dart, or the spotting of a bit of trimming seem to dissolve excess and make the stout matron vie again with those more lissome.

No, we are not rhapsodizing—we're very earnest. Will you come and satisfy yourself?

### It Can't Be Done

You don't have to be told that you can't put out a real fire with a tin cup of water. You know it can't be done, and it seems ridiculous to mention it.

We agree with you, yet it is no more ridiculous than to attempt to operate your telephone company on rates that will not pay operating expenses.

Also, the amount of money required to operate the telephone even a year ago is not enough to pay for present day operation.

Wages have been increased, the cost of everything that goes into telephone construction has been increased. To meet these increases the telephone company must have rates which correspond with all the other increases.

The telephone is operated for your service. We want to make it serve you in the best possible manner. This can't be done without fair rates.

### 52¢ How would YOU like a raise like this?

—and for 34 Years Work

THAT is the kind of increase in salary the minister has received. His living expenses have risen just as fast and as far as yours.

But he is paid on the average just 52 cents more per church member than he was paid 34 years ago.

The Minister Never Fails You

Every officer of the Government with a war message to deliver appealed to the ministers first of all.

But 80% of the ministers receive less income than government economists figure as a minimum for the support of an average family.

When hospitals need money they enlist the support of the ministers—and receive it.

But when sickness visits the minister or the members of his family they must be treated in a charity ward. His pay is less than a day laborer's.

8 out of every 10 ministers receive less than \$20 a week—about half the pay of a mechanic.

We Pay Him Half the Wages of a Mechanic

And of these pitifully inadequate salaries, how much do you contribute? Nothing if you are outside the church; an average of less than 3c a day if you are a church member.

All of us share in the benefits of Christian ministers to the community. They marry us; bury us; baptize our children; visit us when we are sick. In their hands is the spiritual training of the youth.

We Are All Profiteers at Their Expense

Part of the Interchurch World program is this—a living wage for every minister of Jesus Christ; an efficient plant, and a chance to do a big man's job.

If you want better preachers, help to pay the preachers better. It's the best investment for your community—and for your children—that you can ever make.

# JACKSON COUNTY

Jackson public school teachers will receive the increase in salary which they demanded, but efficiency will be considered.

Mayor Bennett of Jackson stated in a proclamation that the supply of gasoline was reduced to less than a week's supply, and he called on all owners of cars to discontinue its use until it should be sold to cars passing through.

They are having a lively jangle school system at 30 o'clock. Some claim that much more to transport the teacher would cost more than a teacher would cost. One's claim is that they can't get teachers and there are no more in the district. It costs \$8 per day for one vehicle; one district has \$180 and another \$120 per month for transportation.

# WASHTENAW COUNTY

In questioning 150 teachers regarding their plans for next year, Supt. Ebersole found that 53 intended to teach, 28 to be considered and three thought it possible.

## TEMPLE IS ORGANIZED

Lady Pythians Duly Installed in Offices—Temple Starts With Large Membership.

The Lady Pythians had a gala afternoon and evening last Thursday when the organization of River Raisin Temple No. 124 was consummated and officers installed.

Grand Chief Mrs. Ida M. Ryan of Caro and Grand Mistress of Finance Mrs. Mary V. Foster of Jackson were present for the occasion and the afternoon meeting was devoted to installation of the officers elected several weeks ago, a list of whom has been published. Following this meeting a bountiful banquet was served at 6 o'clock on tables handsomely decorated with potted plants, and in token of the nearness to Easter at each plate was a dainty rabbit's nest containing candy eggs, all in the colors of the order, red, yellow and blue.

After the banquet the degree team of 35 members from Utopian Temple No. 14 of Jackson exemplified the work and the local officers were seated in their respective chairs and given instructions by the grand officers in the work before them. It was a very pleasant event and the new temple starts out auspiciously with a charter membership of 80, the largest number of charter members in the remembrance of the grand officers. All members on the charter list were present at the meeting with the exception of Mrs. Gottlieb Jacob, who was detained at home by quarantine.
