

An Accurate Corn Planter Is One of Your Best Friends

There is a big difference between the yield of crops planted with an accurate planter and one that is inaccurate. You use the same amount of seed... The accurate planter avoids that loss—it proves to be one of your best friends because it does not waste seed.

More or less damage was done by the flood last Thursday. Elmer Stark reports that the water in the Kio farm was six to eight feet deep and the doors and some shingles torn away.

### TO CUT PRICE OF SEED

The kick was in urgent need of repair and Sandy McNab, a very popular member, had been invited to collect subscriptions for the purpose.

One day the Minister met Sandy McNab and they discussed the matter.

"Sandy," he said earnestly, "I'm sorry to see you in this state."

"Yes," he replied, "I'm sorry to see you in this state."

### BEAN CROP PROSPECTS

Developments After Situation. Thus Making Grow Safe for Michigan's Growers

Recent developments have changed the outlook of the bean situation in Michigan, with the result that the growers are more optimistic.

The state can grow, according to the report of the Michigan Crop Improvement Association, when recommendations are passed calling for a price cut for bean seeds of from 25 to 40 per cent of the margins asked for seed registered by the association.

The Michigan Crop Improvement Association has taken it upon itself to stimulate the use of high quality seed and to encourage the growers to plant the best of seed on every Michigan farm, and the association will be glad to furnish inspection and registration.

There is a great demand from other states for car lots of Michigan-grown seed. This calls for a higher price for the seed.
