MANCHESTER, MICHIGAN, THURSDAY, SEPTEMBER 23, 1920

MISCONSTRUED.

"Father," inquired the little brain twister of the family, "when will our little baby brother be able to talk?" "Oh, when he is about three." "Why can't he talk now, father?" "He is only a baby yet, Ethel, and bables can't talk."

"Oh, yes they can, father," insisted hel, "for Job could talk when he as a baby."

was a baby."

"Job! What do you mean?"

"Yes," said Ethel. "Nurse was telling us today that it says in the Bible, 'Job cursed the day he was born."

FIVE WOULD ROB BANK

Four Young Men and Girl Arreste "As Suspects at Saline Last Friday

Four young men and a girl in an auto acted so suspiciously that they were arrested at Saline and taken to fail. Saturday morning they gave their names as Johns Sullivan, Arthur Hamley, Reginald Dodge and Edgar Withe of Detroit, aged from 17 to 22 years. Peggy Furgason, aged 18, also from Detroit, was with

The men had automatic revolvers and intended to rob the bank of is cashier, just before closing time he men were taken before Judge Sample charged with carrying con-cealed weapons and were sentenced to Marquette prison for from one to two years, with recommedation of two. They confessed that they had their plans laid to rob the bank.

It appears that they held up a taxi driver in Detroit and took his car Thursday night. John Sulllivan one of the gunmen, and Fred Klein, a Federal prisoner sent from Detroit because the jails there were full, sawed their way out and escaped by aid of outside friends early Tuesday morning.

Profitable Companionship.

Among the most curious and interesting of natural phenomena are those pertaining to the mutual relationships of common organisms. Two plants. two animals, or a plant and an animal, may live together for their mutual benefit. Very often one of the partners gets food for the combination, while the other receives protection. This is the arrangement that subsists between tropical plants and certain species of ants which live and feed in their hollow stems, and in return drive away other insects that would do damage

SURE THAT ANIMALS DREAM

Eminent Authorities Have Gone Record, Though It Has Been Subject of Dispute.

Aristotle's history of animals declares that horses, oxen, sheep, goats, dogs and all viviparous quadrupeds dream. Pliny, in his natural history specifies the same animals. Buffon describes the dreams of animals. Macnish calls attention to the fact that horses neigh and rear in their sleep, and affirms that cows and sheep, especially at the period of rearing their young, dream.

Darwin, in the "Descent of Man," birds, as is stated on good authority, have vivid dreams, and this is shown by their movements—and voice."

George John Romanes, in his "Mental Evolution in Animals," says that the fact that dogs dream is proverand furnishes proof from Dr. Lauder Lindsay, an eminent authority, that horses dream. Bechstein holds that where the dream took on the character of a nightmare, and the bird fell from its perch, and four great authorities say that dreaming becomes so vivid as to lead to somnambulism. Guer gives a case of somnambulistic birds in dreams the songs repeat."

Wonderful Balances.

It was the Italian physician Salvioni who devised a microbalance of such extreme delicacy that it clearly demonstrates the loss of weight of musk by volitalization. Thus the invisible perfume floating off in the air is indirectly weighed. The essential part of the apparatus is a very thin thread of glass fixed at one end and extended horizontally. The microscopic objects to be weighed are placed on the glass thread near its free end and the amount of flexure produced is observed with the microscope magnifying 100 diameters, more weighing one one thousandth a milligram perceptibly behds the

Village Orders Ford Chemical and Hose Truck for Use of Fire Department.

The common council concluded that the chemical truck exhibited here two weeks ago was not quite up to our requirements. It was not large enough to carry the hose that might be needed at hydrants, and the ladders were pretty short. However they have ordered a larger and better truck from the factory at Prospect, Ohio.

The chemical apparatus we have been using will be taken to the muni-

For want of orders the Manchester Handle and Turning Factory closed down temporarily last week. We exbinl, and quotes Seneca and Lucretius, pected that there would be an increased demand for handles this fall as so many politicians had their hatchets ready for the campaign, but it's mud throwing the hullfinch dreams, and gives a case they are indulging in and the handles where the dream took on the characteristic in demand. We trust that the idleness will soon be broken.

Have you noticed how few forest trees there are that show any color watch dog which prowled in search except green. Usually at this date there of pantomimic actions, including has but just begun to show the ripening barking. Dryden says: "The little stage.

NEW AUTO FIRE TRUCK HAD GENIUS FOR INVENTION

Man Who Began Life as a Prairi Sheep Herder Made Most Remarkable Record.

It is probable that Walter Turner was the world's most prolific inventor. Starting life as a shepherd on a prairie sheep ranch in the far West railway engineering. One day, how-ever, while tending his sheep on the of a train were scattered, and among the fragments he picked up as a curiosity a vital part of the Westing Darwin, in the "Descent of Man, Deen using will be lawn to see in the eastern probably all the higher animals, even birds, as is stated on good authority, have vivid dreams, and this is shown by the content of the probably and this is shown by the content of the probably and the new outst. Will cost prairie he would ponder ever the started on the journey to Jackson, mechanism of this brake. His chance the chase a short one, but it was shown came when, having failed as a sheep farmer, he got a job as a wheel tapper on the railway, ultimately being promoted to the engine shops. A series of inventions, improving brakes patented by the company, led to his further advancement. Mr. Westinghouse who took him into his works, finally made him the head of the engineering department Westinghouse patented two hundred inventions, but the shepherd from the prairies patented four hundred. Westinghouse made an airbrake that would control fifty railway carriages; Turner improved it till it would control a hundred. When he gold.

TIRE THIEVES CAUGHT

Manchester Furnished Touch of Ex citement When Tire Thieves Rush Through Town.

The town was all "het up" Wednesday forenoon when five young prairie sheep ranch in the far West men in a big green car cailed through the knew nothing of the mechanics of the village. Everybody seemed to believe they were bank robbers, but it turned out that they had stolen prairie in the neighborhood of a railauto tires at Grass Lake. Officers way, Turner came to where the rains were in pursuit and were joined by captured hear the William Martin as we all know. However, if we try, farm in Bridgewater where they could go no farther onaccount of an don't, we won't overheated motor. After being in Let's seather-force when chase a short one, but it was shown that the old town wakes up in real earnest when semeone shouts "stop thief." It's hard to tell just how many shotguns loaded with buck-shot are standig around in conven-

NEXT JOB IS WHAT COUNTS

Good Thing, to Forget What One Has Done, and Look Forward to Something Else.

James J. Hill, who possessed a phenomenal memory, said it is easy to remember things you are interested

What to do, therefore, is to discern what things are useful, what things one ought to be interested in, and then forget the others.

That sounds easy; but it isn't easy,

Let's see, therefore, what are some the things we ought to forget. First, and most important of all forget that brilliant record you made at school or that wonderful sale you made which caused all the boys to talk, or that remarkable piece of work you did which won your raise of pay and promotion.

Forget the big things you did yes terday or last year.

Forget all about the time you topped the list and were made a fusa

Look at the roads for twenty miles around on a Sunday

HERE isn't any "country" any more. The automobile has brought the most close to the center of things as the next county was in the old days.

To hear some tire dealers talk you might think that nobody knew anything about tires except the fellow from Broadway.

That's not the basis we go on.

cording to the road they have to travel:

In sandy or hilly country, wherever the going is apt to be beavy. The U.S. Nobby.

For ordinary countr roads—The U.S. Chai

U. S. Plain

For front wheels-The

For best results-

everywhere—U.S. Royal Cords.

We give every man credit for knowing what he is spending his money on, whether he drives up here in his small car from ten miles out in the country or is passing through from the capital in his limousine.

That's one thing we like about U.S. Tires.

They make no distinction between the small car owner and the owner of the diggest car in the country.

It's all the same to them. So long as a man owns an automobile - large or small he's entitled to the very best tire they can give him.

Quality has always been the outstanding feature of U. S. Tires. There's no limit on the U.S. guarantee. All U.S. Tires are guaranteed for the life of the tire.

We have given a lot of *thought to this tire proposition. There is some advantage in being the representatives of the oldest and largest rubber concern in the world.

Drop in the next time you're down this way and let us tell you some interesting facts about tires.

United States Tires

PRETTY DRESSES For Juniors

FROM THE LITTLE MAID IN KINDERGARTEN TO THE HIGH SCHOOL GIRLS.

New serge dresses for girls have been unpacked and stvies ar narming and just a bit different. They are "grown up" in matters of workmanship and smartness, still they retain their girlish charm, being simple of line and most beautiful with their chic belts and pockets.

The Peter Thompson and Middy styles are essentially Junior dresses, specially created to set off the charms of youth, and should be tried on to see now perfectly they fulfill their mission.

The moderate prices placed on these dresses mean the most satisfactory sort of buying-\$7.50 to \$15.00.

Another line of more elaborate frocks, embroidered in rich silks or wool yarns—latest Fall models, are selling from \$10.00 to \$22.50.

TWO FIRES IN COUNTRY Fire destroyed a barn on the L book farm on the Chelsea 30.1 11 Sylvan township, Tuesday, night

The farm was long known as the Miller farm. The barn just burned was built four years ago replacing one that was also burned. This is the third fire on the place in recent years, the house having been burned three years, ago. The origin. of Tuesday's fire is unknown. The apple storage house belonging to John Uphaus in Freedom was totally destroyed by fire early Wed-

nesday morning. The building was 20x80 feet in Size, of concrete construction. In the building at the time were 1,200 crates belonging to John and neighbors, also a gasengine, tools, elevator, besides about 70 bushels of apples belonging to neighbors, all of which was lost. The fire was discovered by neighbors at 5:00 in the morning and was then

BABE RUTH AND TED RAY PAIRED AGAINST TY COBB AND H. VARDON

Golfers and ball fans will be interested in a proposed links buttle in the fall with Babe Ruth and Ted Ray partnered on one side and Ty Cobb and Harry Vardon paired against them. Linde Fowler, golf expert, says that this ation is being spoken of, and will probably get together after Vardo and Ray finish their tour of the country.

In addition to attracting thousands of ball fans who have never taken time to visit a golf course, it is believed that those golfers seen Cohb and Ruth will avail themselves of the opportunity of viewing them

in a four-best-ball-and-add-spore contest.

As a money-making affair, this contest will be unique. The giant Ted

Ray, golfers believe, will find his counterpart in the great diamond slugger. Ruth. On the other hand, Ty Cobb, the crafty and cunning star, will have an excellent partner, both as to style and ease of effort, in Vardon. Cobb and Ruth are not strangers to golf courses, as they both believe in the ancient and honored game of the links.

Material to Be Popular in Fall and Winter Garments.

Fabric Needs No Adornment or Additional Trimming to Make it Beautiful.

Velvet is the most subtly becoming of all soft fabrics that are used for women's clothes and there is promise that the coming fall and winter sea will see this material used reat abundance, notes a fashion writer. For draping there is nothing nore lovely, and since draping is an nounced as being one of the salient characteristics of the newer styles then it stamp to reason that this material will have a unique place among the styles. In velvet, too, there are so many lovely and becoming col-ors from which to choose. It offers variety that can hardly be equaled y any other fabric.

Velvet for afternoon gowns has been shown much favor in the past and undoubtedly it will be the mateeason. Here again the material is so very popular because it needs no adornment, no additional trimming to make it beautiful. In itself it is just ight and leaves nothing to be desired. for smocks is also the last word in lashion. There is something about the quality of it that makes it particularly etting for this purpose the more the smock gains in popularity the more velvet seems to be appreciated in this direction.

From the consideration of velvet we pass just naturally into the study of duvetyn and its allied materials, These soft, woolly, precious naterials have seen a great vogue during the werrun the nation again for the winter months. A real duvetyn is an allsilk fabric, a fact which is not gen erally understood by the majority of the buying public. And when it is all silk it is the most beautiful fabric in he world, but not the most wearable It must be looked after in the most careful way or it will give no service t all, and it is, after all, most highly expensive. In these duvetyn materials the colors of taupe and gray and frown are the most effective and the smartest by all odds. They are be-coming because of their color tones and because of the depth of their weaves, and if a woman wants a gown that is smart-and all around satisfac-

Unless a cow is protect- building is a very convenied ed by a modern, substantial home, she the farm building group. For good barns make for contented cows, and contented cows generally lead the field in production.

in the construction of a dairy barn mirably suited and should prove to that will aid in increasing production be an efficient unit in his plant. He and the barn shown here contains many of those features. In the first has all the modern conveniences of place it should be firmly built and pro- the large ultra-modern dairy farm tected against the elements of wind. Constructed of the best material in lightning, etc. If you will notice, this the first place, it will prove an econ-

help; not to mention making the farmer boys dissatisfied and anxious

to go to the city.

All of the stalls are of the modern type, being equipped with the latest kind of stanchlons and drinking cups. Plenty of good fresh water will help increase the milk flow. The trinking cup also does away with the old system of leading the cows to a trough, a task which was not very attractive in the cold winter season. .

At the other end of this barn are located the six horse stalls with a feed running along one end. Two grain bins at the far corner provide storage facilities from whence a supply can be drawn for the daily ra-

At the end of the feeding after run ning between the cow stalls is a feed room where the feed can be ground and loaded onto the carriers for disamong the various stalls. The sile is next to this feed room. It Is built of wooden staves, a type that is very popular in some sections of The staves are interlocked so as to form a continuous wall. The lightning rod at the top is designed to protect it from fire. A short distance from the sile is a small milk house equipped with a cooler where the milk can be kept in good condition building is a very convenient asset to

COMFORTABLE MOTOR CAR OUTFIT

Dr. Alan Foster, airs. Foster, and the little Fosters, have shown Washingperhaps the most complete and comfy motor car camping outfit which ever toured through the national capital. The Fosters live in Dallas, Tex., and spent three weeks coming to Washington by way of Kansas City, St. Louis and They expect to reach Yellowstone park by closing time in Sep tember via Niagara Falls, Chicago, Portland, Ore., and Los Angeles. Their previous touring experience, which has been extensive, has been in Mexico. Kitchen utensils which telescope into the largest one, a phonograph, two electric fans, an electric light plant, fed by two 8-volt bafteries, water and gas tanks, camp stools and folding furniture are some of the things which are packed and unpacked at each stop.

It Should Be Carefully Handled and Lubricated for the First 500 Miles.

RADIATOR ATTENTION

Properly Charged and Full of Distilled Water-First, Learn How to Stop Auto.

When your new car is delivered, remember that all working parts are new, fitted very tights, and should be handled slowly until the car is run-several hundred miles. It is advisable to drive slowly and carefully for the first 500 miles, giving such parts as other parts fitted tightly a chance to has been gone over thoroughly for oil and grease; particularly the motor, transmission; rear axle and all grease cups.

Flush Out-Radiator. .The radiator should be flushed out ments of solder or other foreign mat ter sometimes remain in new radiators and may work into water pump or

other working parts, causing damage. Have the storage battery examined to note that same is properly charged and full enough of distilled water. Often new cars remain in storage be fore delivery is made, which would cause battery to run low from standing. If battery is used in this weakened_condition it often happens the entire battery is ruined

Don't let the man who is teaching you how to drive your new car go until he has explained carefully all of the necessary functions of itst operation and care. The spark lever is mounted on the steering wheel for a purpose. Learn to use it properly. Shifting of gears and the release of the clutch must also be known to operate your car correctly.

Learn How to Stop.

Don't torget to become thoroughly acquainted with the brakes, as it is more important to know how to stop than it is to know how to run. After you have driven a new car

about 200 or 300 miles, it should be gone over and all bolts and nuts tested to see that they are secured and tight. Thereafter your car should have such inspection about every

Your new car should not be kept in a barn or stable and exposed to good grease. fumes, etc. Remember, while the car is still new the varnish is soft, or still green, and if exposed to such un-(avorable conditions will turn dull, the small vents and keeps out the oil. on a new car for a new car will show Road and traffic rules are all-important. Don't fail to post yourself

One of the most essential points in the proper upkeep of a new car is how to keep it olled and greased. Study the chart of lubrication, which is furnished with all makes of automo lies, and be sure to follow instructions. This alone will avoid the payment of big repair bills.
