Taking Care of Indoor Plants. To make ferns grow rapidly indoors and look fresh and green, chop a few oysters fine and mix with the soil and then water well. This may be done every fortnight. Wash the leaves of your rubber plant with a cloth wet with olive oil. This nourishes the plant and keeps the leaves dark green and velvery. Add a few drops of ammonia to a quart of lukewarm water when you water house plants. The chemical acts as a tonic and fertilizer and makes the foliage fresher. And be careful, when real winter weather. comes, not to water your plants with water too cold. Water running from a faucet in January is far too cold-for tender plants. Add enough hot

Where Discipline and Recreation Combine to Better Service

Work is more than just a living to the girl at central. There is always an abundance of fun and recreation, too, during regular rest periods and whenever she is off duty.

Lots of people who have visited our larger exchanges marvel at their simple, homelike atmosphere—the delightful lounging and read-· ing rooms—the immaculate kitchens and pleasant dining rooms—and, most important of all, their watchful, helpful sensible matrons.

Long ago, your telephone company learned that in order to have efficient operators, their girls must also be happy and healthful. So these comforts, which mean so much to our girls, are, after all only instruments to improve your telephone service.

Our girls health is always carefully guarded. Frequent physical examinations are given and healthful athletics encouraged. In rainy weather dry footwear and stockings are loaned. In the dining room meals are very, very good and are provided at very low prices.

To insure the best service possible, strict discipline it is true, must be maintained in the operating rooms but after hours and during rest periods complete relaxation is encouraged.

We believe that the life of the telephone girl has all the pleasant; clean joys that should surround the life of a normal girl. We believe, too, that you will find that the careful supervision which we maintain over them is being reflected daily in the improved telephone service which they give.

New Telephone Rates

HE Michigan State Telephone Company has been granted an increase in telephone rates of approximately 15%, effective as of November. 1, 1920.

This authorization was received after the November bills were issued. The new rates will, therefore, be billed on the December bills, which statements will carry the increase for November as well as the new rate for December.

The proper charge for the month of November may be paid, however, if you so desire, with the November payment. Information as to the amount may be secured from the local telephone office.

And what could be more effective than a simple chemise dress of this silk, with touches of black? On a model of white crepe de chine elaborately decorated in black, the embroidery serves to accentulate the side panels. These side panels are among the most popular new features in clothes. A charming in effect is obtained by triuming the high collar with a band of sable. Of course, so much embroidery adds greatly to the expense of the dress, but the woman in the home, as well as the professional dressmaker, can see the possibilities in this model. A very simple white silk dress may be made most effective with just a touch of black embroidery and perhaps a sash of black ribbon or a bit of plack fur.

What Happens in the Dark?

The farmer receives on an average only about onethird of what the consumer pays for meats, grains; fruits, wool, vegetables and cotton. Somewhere between producer and consumer an enormous toll is added to the cost of farm-grown necessities.

The city consumer, not seeing the profit-taking along the road to him, blames the farmer for high prices. The local farmer, not knowing just what does happen in the dark, is at the mercy of the system. To turn on the light is one purpose of
