CREAM PRODUCERS

Do a few cents difference in price paid you for a pound of butter-fat make any difference? Are you satisfied that a few cents be deducted from the actual market value of every pound of butter-fat you sell, to pay the expense of operating some needless cream station? Are not those few cents just as good to you as they are to some middleman?

Did you ever stop to estimate the number of dollars you foolishly give to middlemen in the course of a year for doing something which you can do as easily yourself? If you had these dollars in a lump sum at the end of the year, do you realize what you might do with them? Think it over. And while you are thinking, send a can of cream to us. We pay all transportation charges, mail check and return empty can same day cream is received.
