

**RESPONSIBILITY.**  
 Babson, the well-known statistical authority, recently aptly illustrated the effects of responsibility. His little girl has a cat that often gives birth to a litter of kittens. Across the street lives a lively fox terrier. When the cat has no kittens and the dog appears on the scene, Madame Tabby scurries for the nearest tree and avoids the pup religiously. But when there is a litter of kittens to protect, the procedure is reversed. The cat chases the dog. It's the same cat, the same dog, and the same back yard both times.

But one time the cat has no responsibility. The other time she has. That realization of its responsibility gave the cat its courage, the initiative and vision and resolve to do or die.

In this respect people do not differ from cats. Give a man responsibility, however slight it may be, and impose on him the fact that he is being given responsibility, and soon you will see him develop initiative and vision and resourcefulness. He will, consciously or subconsciously, try to improve and facilitate the methods of doing that for which he is responsible. He knows it must be done right and on time, and that gives him courage and "backbone."

Every last man in your employ should be given some sort of responsibility. He will be worth more to you because of it.

**SEEK COOL BREEZES OF NORTH**  
 Manchester Family Enjoy Life in Open in Northern Trip.

Mr. and Mrs. Lawrence Whitlark and daughter Miss Lucy, also Mrs. Alice Goodell departed the first of the week for an auto trip to Torch Lake in the far northern part of the lower peninsula of the state, where they will spend perhaps a couple of weeks, making probably some side-trips from there. The family constitutes a jolly party who enjoy outdoor life to the fullest extent, and go prepared to camp wherever they choose. Last year Mr. Whitlark arranged the car so the front seat can be folded backward and a comfortable bed made, and with additional equipment all took an extended trip through the East. They intend taking another trip after their return from the north Michigan tour.

**REGAINS HEALTH IN CALIFORNIA**  
 Dr. Klopstein and Family Will Return to Detroit.

Manchester friends of Dr. and Mrs. W. A. Klopstein, who formerly resided here, have received word that they expect to return to Detroit from their sojourn in California about August 1st, and the doctor intends resuming his medical practice. On account of the doctor's poor health they went to California about two years ago, where they purchased a chicken ranch. The doctor's health

is much improved, and having disposed of their ranch, he is now in San Francisco taking a special course to sit in the practice of his profession.

**MARK THE SPOT**  
 Famous Indian Fighter, Gen. Frank Baldwin, Native of Manchester.

We warrant that but a few readers of the Enterprise are aware of the fact that Manchester is the birthplace of one of the famous generals in the United States today—Frank Baldwin, noted Indian fighter, now a resident of Denver, Colorado. General Baldwin was born on the place long known as the Wm. E. Pease farm, now owned by Hazen Leach. It is but a short distance west of the church at Iron Creek. He is a relative of the late Lyman and Douglas Baldwin and of Mrs. E. G. English, her daughter Abaetta, and two sons, A. D. and Elwin English of Manchester.

The general wears decorations that were given him in recognition of distinguished services, but he is a very modest man, not at all boastful nor seeking after notoriety. He is living rather a retired life.

As was stated before in these columns, he has visited the farm owned by his father and would like to erect a suitable monument on the spot where the old log house stood, and as we understand it, would like to have a road leading from the highway in front to surround the stone and have the grounds beautified with flowers and shrubs in the summer time, but the owner of the property, we understand, is not inclined to give his consent to the project.

We are sure that many residents of Manchester, Washtenaw county, and the state would be pleased if the township should be so honored. Other places would be delighted with the carrying out of any scheme that would give distinction to the township. Throughout the east, and we might say all over the country, one sees monuments raised and dedicated in honor of our heroes of the various wars. Even residences that were used as headquarters by distinguished generals are purchased and kept as near as possible exactly as they were. Even replicas of old mansions have been constructed and are maintained as attractive historic spots.

In a few years there will be located a state park at Wampler lake, and no doubt should the birthplace of General Baldwin be marked, many who visit the park would be delighted to drive over here and see the birthplace of the distinguished Indian fighter.

"The true American policy will be found to consist in the exercise of a spirit of justice, to be manifested in the discharge of all our international obligations to the weakest of the family of nations, as well as to the most powerful," said John Tyler, tenth president of the United States.

Miss Bertha Youngmans of Toledo came Saturday to visit her sister, Mrs. Fred Houck. Charles Youngmans came also from Toledo to spend the 4th.

**Who says that "bargain" tires are what the people want**

**THE U. S. CHAIN TREAD**  
 One of the few tires of which it may be said that they deliver economy year in and year out and tire after tire.  
 The U. S. Chain Tread gives sufficient traction on all ordinary road surfaces. It is probably the handsomest, and by all odds the most popular, of the whole U. S. Fabric Tire line.

**United States Tires are Good Tires**  
 U. S. USCO TREAD  
 U. S. CHAIN TREAD  
 U. S. NOBBY TREAD  
 U. S. ROYAL CORD  
 U. S. RED & GREY TUBES

**United States Tires**  
 United States Rubber Company  
**HUBER & WIEDMAN**

**MOST** everybody knows the easy-going sort of man who never takes a tire seriously until he gets a blow-out.

How long he will resist universal tire education is a question.

But this is sure—

More people are finding out every day that between leaving things to luck and getting real economy there is a big difference.

Many a car-owner has come to U. S. Tires because he couldn't afford to keep on paying that difference.

Probably seven out of ten users of U. S. Tires came to them only after they'd had enough of "discounts," "bargain offers," "clearance sales of surplus stocks" and other similar appeals.

They have found economy—and they stick to it.

They pay a net price—not "something off list" that may not mean anything in the first place.

They get fresh, live tires, being made and shipped while this message is being written.

No matter where they live there's a nearby U. S. Dealer with his nearby U. S. Factory Branch.

U. S. Tires keep moving.

No opportunity to get old and dried out. No shifting here and there trying to find a market.

Every U. S. Tire a good tire, wherever you find it anywhere in the country.

Because the U. S. policy is a good policy that serves the car-owner all the time.

Doing the very best for him that human good faith can do.

*"No matter where they live there's a nearby U. S. Dealer with his nearby U. S. Factory Branch."*

**Here's why CAMELS are the quality cigarette**

**BECAUSE** we put the utmost quality into this one brand. Camels are as good as it's possible for skill, money, and lifelong knowledge of fine tobaccos to make a cigarette.

Nothing is too good for Camels. And bear this in mind! Everything is done to make Camels the best cigarette it's possible to buy. Nothing is done simply for show.

Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper—secure foil wrapping—revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows.

Such things do not improve the smoke any more than premiums or coupons. And remember—you must pay their extra cost or get lowered quality.

If you want the smoothest, mellowest, mildest cigarette you can imagine—and one entirely free from cigarettey aftertaste.

It's Camels for you.

# A Man for the Ages

## A Story of the Builders of Democracy

By IRVING BACHELER

ABE, THE FIGHTER.

Samson's success and Sarah's triumph were the result of a long and arduous journey. They had traveled through the wilderness, facing many hardships and dangers. Their journey was a testament to their faith and determination. They had come to a place where they could build a new life for themselves. They had found a place where they could be free and happy. They had found a place where they could be a man for the ages.

### CHAPTER IV—Continued.

The logs for the new house were ready to start after the cutting had been completed. The logs were piled up in a neat row, ready to be used. The men were busy working on the house. They were cutting the logs into the right size and shape. They were also building the foundation for the house. The house was going to be a beautiful one. It was going to be a man for the ages.

Jack, who was the foreman, was very busy. He was making sure that the logs were cut to the right size and shape. He was also making sure that the foundation was built on a solid base. The house was going to be a beautiful one. It was going to be a man for the ages.

Jack, who was the foreman, was very busy. He was making sure that the logs were cut to the right size and shape. He was also making sure that the foundation was built on a solid base. The house was going to be a beautiful one. It was going to be a man for the ages.

Among the special things that Paris has produced are sweaters of artificial silk, silk and wool and in silk and metal. From a standpoint of fashion, she serves a correspondent, woman will not accept the mannish sports sweater. The smart Parisienne wants something more dressy and more becoming. With her the sweater blouse is worn as the piece of a lingerie or sport costume and is not intended to be recognized as her sweaters are, consequently it is made up of such a material as silk, rayon, or a combination of the two.

Abe went with his friends to the door beyond which the two boys from Clary's Grove sat, as if so it were. It is probable, however, that they had heard about Sam's hat and had to see it. Next morning Abe and Samson went for the woods. They were looking for a place to build a house. They were looking for a place where they could be free and happy.
