So Declares Professor—Recommends Smelly Bait for Fishing. Fisherwomen of Michigan have found a champion. No longer will friend husband be able to explain that the noise made by his wife's talking frightened the finny tribe away...

THE GREAT ROAD MEETING AT FLINT

Town, County, State and National Commissioners to Get Together in Interests of Highways.

The Michigan State Good Roads association in conjunction with the Michigan State Highway department will hold its annual meeting at Flint, Aug. 30, 31, and Sept. 1.

This will be the most notable meeting of its kind that has yet been held in the state. Manufacturers of both road machinery and materials made application for assignments early and these already entered in contracts for exhibits surpass the Lansing meeting.

Hon. Frank F. Rogers, state highway commissioner, has a most attractive program, covering 1921 legislative, construction work for 1921, trunk line maintenance, roadside development, experimental road maintenance together with other important subjects including the reports of the commissioners of counties, that will not fail to make this part of the program an institute which every township should attend.

The association has procured the services of men of national reputation as well as state. Dr. S. H. Johnson of Washington, D. C., better known as Pike Johnson, J. A. Rountree, director-general United States good roads association, of Birmingham, Ala.; Hon. J. A. Doelle of Marquette, recently elected member State Board of Agriculture; Dr. P. E. Doolittle.

Ko-Ko in Coming Redpath "Mikado"

be held at the high school building, Manchester, Thursday, Sept. 1; Chelsea, Sept. 2, and Safford, Aug. 31, beginning at 9:30 a. m. Prof. Clyde Ford and Prof. J. M. Hoover will be workers with Commissioner Essery at these institutes, and every teacher is expected to be present at one of them.

The old "Washtenaw" hotel on Broadway in "lower town" Ann Arbor, which was built in 1832 and used for many years as a tavern has been condemned as unsafe and untenantable and will have to go through a thorough overhauling before it can be again inhabited. It is well known that many of the very best there are said to be living and very lively especially nights.

JACKSON COUNTY

Dr. Forman of Clinton will be superintendent of the dental clinic at the Fotee Memorial hospital at Jackson after Sept. 1st.

Jackson Methodists are going to build a new church, and in taking down the walls of the First church, in the corner stone laid in 1867 was found a box filled with documents, papers and a sketch of Methodism back to 1830, with the astonishing assertion that there was a praying man within the boundary of the town at that time. No mention is made of one coming since.

MICHIGANDERS SHOULDN'T SOB

Reports Show That Incomes Have Held Up Well. Increased taxes are not due alone to an increase in prices of things, but to the fact that the state is doing more for its people. Although 78 per cent of the automobiles are manufactured in Michigan, the income tax collected last year was \$183,000,000, against \$187,000,000 the year before, a drop of only two per cent.

LOCAL AND PERSONAL

Mrs. Erwin Grossman of Jackson visited her parents, Mr. and Mrs. Henry Landwehr this week. Mr. and Mrs. Clifford Glover drove to Jackson Saturday accompanied by Edna Hendershot and Alma Landwehr who remained over Sunday to visit Mr. and Mrs. Erwin Grossman. Frank Higgins took his vacation last week and spent the time with his family. They drove to Tecumseh, Clinton and Jackson giving the Unterkincher boys, who were visiting here a good time. We're not doing anything uncommonly big here in Manchester, just holding our own this summer, but it is mighty pleasant to hear the sound of trawls, saws and hammers—used on the new residences and other buildings.

WASHTENAW COUNTY

Look out! A small rattlesnake wearing two rattles and a button was killed on Main street in front of Jos. Doyle's billiard room Wednesday night of last week—Dexter Leader. Dogs Thursday night badly injured four head of sheep owned by John Walsh, and Friday morning Miss Ricka, Kaimbach found that two head of sheep in her flock had been badly injured. All six head were killed and payment made by the township, as provided by law.—Chelsea Tribune. A one-day teachers' institute will

BOY SCOUTS ARE HAVING OUTING

Nearly Whole of Local Organization Go Into Camp as Part of Year's Program.

About 20 Boy Scouts of this village are having a five-day outing in camp at Sweeney lake, northeast of Norvell. Scout Master Gottlieb Jacob being in charge, assisted by Glen Blythe, as Assistant Scout Master Leroy Marx was unable to go. Early Monday morning the boys were out hustling to make final arrangements for the big time and in good season a number of them departed on the hike for the rendezvous. Others went by auto carrying camp equipment, while still others went by train. Frank Leeson made a trip with his car to transport tents, etc. Camp was made on the north shore of the lake on land belonging to Harvey Leeson. The boys recently purchased army tents and other equipment and this is the first real tryout they have had. The rain Wednesday made rather a damp day in camp, but things inside were kept dry and all went well.

CANNING NOTES

To can tomatoes by the cold pack method: Soak 1 1/2 minutes or until skin loosens. Dip in cold water. Remove stems and cores. Pack in hot jars. Press down carefully with a table spoon until juice comes over tomatoes. Fill to within one-fourth inch of top and add no water. Add one teaspoonful of salt to each quart. Put on rubber and cover—screwing cover down as tightly as possible with thumb and little finger. Place in boiler or canner of boiling water with water over tops of jars. Boil 22-minutes. Remove jars and screw cover down tight. If preferred, tomatoes may be cut in quarters before packing into cans, but they preserve their shape better if left whole. Long Telephone Lines in India. Long distance telephone lines in India have recently been greatly extended. A 600-mile line from Simla to Peshawar is finished, but needs modern equipment to be of commercial value. From Simla to Lahore a line over 900 miles long is now in regular service, as is a line west from Calcutta into the Chota Nagpur coal fields. An 80-mile Bombay-Poona line is in official use, though not yet ready for public service.

GRANGERS CAMP AT PLEASANT LAKE

Meeting Began Today—Good Program for Friday Afternoon and Evening.

Those who wish to attend the second day Grange assembly at Pleasant lake, Friday afternoon, will hear a talk and demonstration work by Mrs. Louise Campbell, state home demonstration leader; an address by Ezra Levin; talk and demonstration of life saving and exercise by children by Miss Stoll, in the evening; an address by N. P. Hull, past master of the Grange, and a talk on work of boys' camp, by Prof. Walpole, followed by moving pictures. There will be community singing during the program and a ball game, tug of war, and other sports to keep things lively.

NATIONAL GUARD GETS CAMP CUSTER

Government Transfers 3,000 Acres Used by Troops Training for World War.

Tuesday the Michigan National Guard came into possession of Camp Custer, including artillery and rifle ranges used by the troops in 1917 and 1918. The transfer from the government was effected without cost to the state and came after negotiations extending over several months had been conducted by Major Harry Loomis, ordnance officer of the guard. Units of the guard are expected to make use of the camp next year. The state military board, which is considering plans for locating new armories at Big Rapids and Ypsilanti, will give consideration to a proposal to erect quarters at the camp for the families of officers.

WHO TALKS OF BAILING 'EM?

Michigan has more than 5,000 lakes ranging in size from mere ponds to 31 square miles in area to offer as an attraction for tourists, according to Prof. I. D. Scott of the U. of M., who has made a study of the state's resort possibilities. Most of these lakes are of glacial origin. He urged in a recent natural science lecture that as many as possible of the lakes be kept in the natural state for the vacationists. There are many such near Manchester.

JACKSON COUNTY FAIR 6 Days, Monday to Saturday SEPT. 12 TO 17 4 Nights, Tuesday, Wednesday, Thursday, Friday. Fifteen Big Educational Departments covering 40 acres, consisting of Agricultural, Horticultural, Floracultural, Dairy Products, and miscellaneous exhibits reaching every interest. Amusements covering a MIDWAY 3-4 mile long and consisting of Shows, Concessions, Merry-Go-Rounds, Ferris Wheels, Whips, Aeroplane Rides. Everything up to the last minute to amuse. Grand Stand Attractions the best ever seen in Jackson, afternoon and evening. —20 BIG ACTS— —4 RACES DAILY— —ADMISSION 35c— FILL OUT ENTRY BLANKS AND MAIL TO OFFICE EARLY

Here's why CAMELS are the quality cigarette BECAUSE we put the utmost quality into this one brand. Camels are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette. Nothing is too good for Camels. And bear this in mind! Everything is done to make Camels the best cigarette it's possible to buy. Nothing is done simply for show. Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper—secure foil wrapping—revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows. Such things do not improve the smoke any more than premiums or coupons. And remember—you must pay their extra cost or get lowered quality. If you want the smoothest, mellowest, mildest cigarette you can imagine—and one entirely free from cigarette aftertaste, It's Camels for you. Camel R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.

Michigan News Tensely Told

Funeral—John S. ... result of a fractured skull received when he fell from his bicycle while riding onto a trolley.

Muskegon—Marie DeLore, 15 years old, was drowned in Muskegon Lake when the boat she was in capsized.

SINN FEIN REFUSE BRITISH OFFER

DE VALERA DECLARES NOTHING BUT COMPLETE LIBERTY CAN BE ACCEPTED

DOMINION RULE IS NOT ENOUGH

Irish Negotiations At Dead Lock—Ulster At Odds With Fein—Smuts Urges Acceptance

London—The correspondence between the British prime minister, Mr. Lloyd George, and Eamon de Valera, Irish republican leader, made public by the British government, shows that there is a deadlock on the question of independence for Ireland, the negotiations still are open.

Great Britain offered Ireland complete autonomy in finance and taxation, military forces for home defense, her own police and, among other things, control of the Irish postal services. In his reply to Mr. Lloyd George, Mr. de Valera argued for independence and offered to submit the Ulster questions to arbitration.

In his final letter Mr. Lloyd George denied Ireland's right to secession, refused foreign arbitration for Irish questions and expressed the hope Ireland would accept the British terms, which he declared were the best that could be offered.

Mr. de Valera declared that it is Ireland's desire to be free of imperialistic entanglements which will prove destructive of Irish ideals and be fruitful only of ruinous wars and crushing taxation. He asserted that this is the policy that Irishmen have declared for in plebiscite after plebiscite.

Mr. de Valera declared a dominion status for Ireland is illusory. He says the freedom the British dominions enjoy is less the result of legal enactments or treaties than of the immense distances which separate them from Great Britain and make interference by Great Britain impracticable.

Official light upon the status of the Irish negotiations was given by the form of a letter written by Gen. Jan C. Smuts, the South African Premier, to Eamon de Valera, the Irish republican leader. This letter, reveals that Premier Lloyd George offered the 26 Sinn Fein counties "complete dominion status" subject to certain strategic safeguards.

It is also shown by the text of the letter that Sir James Craig the Ulster Premier, has refused to negotiate with Mr. de Valera, and that Ulster is standing firm for retaining her present government.

Gen. Smuts, however, urged the Republican leader to accept dominion status and leave Ulster to join the South in her own time as he believes that, through the successful running of the Irish state and the pull of economic and peaceful forces, Ulster eventually would be brought into line.

Smuts Urged Acceptance

STORIES from Here and There

How Lake Forest Adores Its Big Neighbor!

LAKE FOREST, ILL.—This wealthy, exclusive, aristocratic, fashionable, and so-on neighbor of Chicago is observing new rules when approaching, sitting beside, and bathing in Lake Michigan. Placards have been posted by the city's park board.

"Joint use of a bathing pool by human beings and dogs may be approved in some places," states the placard with dignity, "but there is a legitimate difference of opinion on the subject, and life guards have been instructed to enforce this rule strictly regarding loss of the class of dog involved. If some dog is allowed all manner to be allowed, and when dogs congregate fights usually result."

Not so democratic is the park board,

however, in regard to the species homo. Hol' Eoloi of Chicago and his three sons—Tom, Dick, and Harry—are effectively banned from debarking from their motor and entering the sacred water which abounds just east of Lake Forest by a parking charge of \$1 on Sundays and holidays. Citizens of the village may get a season parking ticket for 25 cents.

"Many people in Lake Forest," explains the placard, "thought they could not take their wives and children to the lakeside park because at any time they were likely to be subjected to profanity or other improper language. There were booze parties, beach hazards, and others better not mentioned."

"There was a growing tendency on the part of visitors to use their autos for dressing rooms. Many outsiders, both men and women, would undress in shrubbery on the bank."

"Bathing costumes for ladies and gentlemen shall be consistent with ordinary principles of decency. Improper costumes shall be noted by the life guards. Some of the costumes worn by visitors have made this action necessary."

Death Joins in the Play of Two Girls

CEPHEUS GROVE, N. J.—An uncommon accident in an idle grist mill owned by John P. Kneer resulted in injuries which will probably prove fatal to his twelve-year-old daughter, Lillian, and her playmate, Adelaide Widener.

The wheel is fifteen feet in diameter. It is set on a well greased axle so that half of it is above the floor and the other half under. The children climbed around the half above the floor and after a while got the heavy wheel moving slowly. By shoving it they were able to scramble on, ride to the opposite end of the half-circle and then land on the floor. At length they stopped riding for a few minutes, devoting their attention to making the wheel go fast. Then they decided to ride again and jumped on.

The wheel was whirling with much greater rapidity than either child realized. It jerked them around almost instantly, coming to a stop with both jammed against the floor and crushed by its momentum.

Mr. and Mrs. Kneer heard the children's screams and ran to them. Mr. William L. Bird was called and found that Lillian had a fractured jaw, fractured collarbone and internal injuries. The other child had both feet badly crushed, her right leg broken and internal injuries.

Kneer put the injured children in his automobile and, accompanied by his wife and by Dr. Bird, drove to the Easton hospital at Easton, Pa., twenty miles from his mill. It was said at the hospital the children had little chance to recover.

Will Marry Convict and Wait for Him

DENVER.—From behind the counter of a Seventeenth street lunch on a girl lifted heavy-lidded eyes and smiled at her inquisitor, a brave sweet smile.

"There isn't much to tell," she said, "we'll be married in a few days, but there's nothing remarkable about that. Any one would feel as I do under the circumstances and of course we'll be married just the same as if nothing had happened."

The girl was Miss Benah Nay, blond, young and pretty. Before the week is out she expects to become

Mrs. William T. Long, and thereby change the tale.

For her fiancé sits behind the bars of a cell in the county jail awaiting the day when he will be taken to the state prison at Canon City to begin serving a sentence of from five to ten years for robbery with a gun. Long's departure for Canon City has been deferred a few days to permit the nuptial ceremony.

"You see," Miss Nay explained, as she slipped a slice of watermelon before a customer, "I don't care if my whole world 'kinows' how 'I wait' for what I think about it. I wait, my love, to have the consolation of knowing when he goes to that awful penitentiary that I am waiting for him, and that I am his. We were expecting to be married before all this trouble came up and I don't want the wedding to be put off because some people were persuaded to think that he could do such a thing. I want him to know that I'm his through thick and thin and that I still believe in him in spite of everything."

And All This Happens in Eleven Weeks

SEAT PLEASANT, Md.—Once again a Maryland jury has placed its stamp of approval upon the unwritten law which proclaimed anew the "southern gentlemen's doctrine" that the sanctity of the home and the purity of the hearthstone are above the law and freed the slayer of a wife's paramour.

Not only was William E. Goetz, an accountant and tax expert, exonerated by a jury here of all responsibility for the death of Albert J. Byrd, a World War veteran, whom he shot to death a few days ago, but the members of the jury which acquitted him in twenty minutes shook hands with and congratulated him.

Simultaneously with his liberation at the hands of a coroner's jury, Goetz, who had named his victim as co-defendant, was granted an absolute divorce and the custody of his five children.

Within the brief space of eleven weeks a woman happily wed for eight years and the mother of five children had been wooed and won by a chance-met Don Juan, their liaison

had become a matter of village gossip, the husband had slain the intruder and shot for and received a divorce, together with the plaintiffs of a jury for slaying the invader, and resumed the routine of his life as if nothing had happened.

It was while Mrs. Goetz, accompanied by her five children, was en route from Nashville to Washington in a Pullman car that she first met Byrd. They became such good friends that within a day or two Byrd appeared at the Goetz home, about five miles from the national capital and took up quarters in the village.

Wayward Girls Lose Their Best Friend

CHICAGO.—The lifetime of Mrs. Jennie Beals Lathrop had been devoted to doing good for others. She had aided many wayward girls. Some of these girls caused her to end her life. Her body was found by her husband, Frederick Lathrop, manager of the A. J. W. Paper company, in their home at 149 East Ontario street. A bullet had passed through her heart; the revolver was clutched in her hand.

The success of the Chicago Home for Girls, 5024 Indiana avenue, of which Mrs. Lathrop had been patroness and treasurer for thirteen years, was threatened and she had become wor-

ried and broken hearted. She decided to terminate her connection with the home—and live.

Recently the board of directors decided to remove the superintendent, Miss Helen Stevens, who had been in charge for twenty years. Her discipline was not drastic enough, they said.

Then windows were smashed, furniture dishes and decorations were destroyed by the rebellious girls, who demanded that Miss Stevens be returned. A riot call summoned the Hyde Park police, and nine of the ringleaders were taken to the juvenile detention home.

They told pitiful tales of being starved, of hard work and severe punishment, and the loss of their recreations. Mrs. Lathrop, who had opposed the removal of Miss Stevens, succeeded in having the directors agree to reinstate her. Investigation substantiated some of the charges.

Mrs. Lathrop felt that she, as an officer and director, had failed some-

FABER, COVELESKIE AND GRIMES STAND OUT AS WET-BALL ARTISTS

Pitchers Who Use the Speed-Spitter.

Spiral pitchers—dying race in major league baseball—are having trouble with the new lively ball as well as the dry-ball hurlers.

Only the fast-ball spitters are proving effective.

Of the fifteen major league pitchers eligible to moisten the ball, but three in the American League and four in the National League won more than half their starts.

Of these Urban Faber of the White Sox, Stanley Coveleskie of the Indians and Bartelme Grimes of the Dodgers are the real wet-ball men, writes Dean Snyder in the Chicago Post. They all use the speed spitter.

Faber is Ace.

So far this year Faber outranks the great Coveleskie, recognized before as the king of spitters.

What makes Faber's victory record all the more brilliant is the fact that he is backed up by a team—now a mere shell of the defense put up by the old Sox machine.

Covey should hit his stride soon and give the Sox star a race for throne honors by the end of the season.

In the National League Bartelme Grimes is the leading moist ball pitcher. Bill Douglas of the Giants has a better record, but has not worked as many times.

ALEXANDER NEARING END OF HIS CAREER

Explanation of Great Flinger's Failure to Shine.

Worked Too Hard in Endeavor to Win Opening Game From St. Louis Cardinals—Case of Nap Rucker is Recalled.

Grover Cleveland Alexander, the great right-hander of the Cubs, may be near the end of his rope. It has been published in the East how Alexander had his arm injured by a spectator bumping into the arm as Alex was pulling back to deliver the ball in his warm-up before the opening game on April 13, but those familiar with his case offer another explanation of Alex's failure to shine this year as he did last, when he won ten straight early in the campaign.

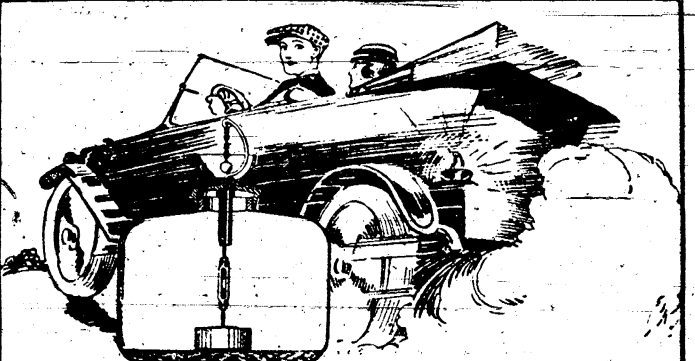

The explanation is that Alexander was all to the good on the opening day, or thought he was, and injured himself by trying too hard. He had not won an opening game for three years, which was rather a sore subject with him.

It was after losing the opener last year that he went ahead and won ten straight. He made it a matter of professional ethics with himself to win the opener this season from the St. Louis Cardinals in St. Louis on the first day of the campaign.

Those who saw the game say Alex whistled the ball to the plate with every ounce of strength he possessed for seven innings, or until something went wrong with his arm and he had to retire. Alex Freeman finished for him, and Chicago won, 5 to 2, but it was a costly victory.

Alexander started again when the Cubs reached Philadelphia and, while

DEVICE WARNS DRIVER THAT GAS SUPPLY NEEDS QUICK ATTENTION

One of the most uncomfortable things in the world is suddenly to discover, when one is motoring far from a supply station, that the gasoline tank is empty or nearly so. Every automobile driver meets with an adventure of this sort at one time or another.

There ought surely to be some contrivance that would give timely advance warning to the motorist of such a happening.

A device newly patented by William Gray of Waterville, O., performs this useful duty admirably. It is very simple, consisting of a float that hangs on the end of a vertical rod which passes upward through the cap of the gasoline tank and with its upper end holds suspended a ball of metal.

As the surface level of the fluid in the tank is lowered the float, of course, descends correspondingly. The rod attached to the float descends with the

Diamond Squibs

"Swat the fly" is the motto of other players besides Babe Ruth.

Des Moines has a new second baseman answering to the name of Tuba.

Bartlett, the young star pitcher for the Athletics, looks like a good ball player.

Manager Jawn Evers sometimes leaves the field during playing hours—by request.

Report has it that the New Orleans club will ship Pitcher Abe Lincoln Bailey back to the Brooklyn Dodgers.

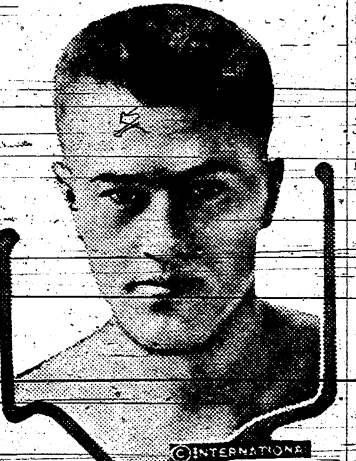

Reports circulated that the Florida State league might close its season earlier than scheduled, time are denied.

MITCHELL WON'T LEAVE RING

Milwaukee Scrapper Has No Intention of Retiring Despite Many Recent Reversals.

Ritchie Mitchell, whose gameness against overwhelming odds has made him the prize fight idol of the central West, has no intention of retiring from the ring despite recent reversals.

Following his sensational losing fight against Champion Benny Leonard in New York, Mitchell met

Ritchie Mitchell.

SCHALK'S BURDEN

Catcher Ray Schalk is working himself thin handling Kid Gleason's kid pitchers.

A great deal of the burden of developing the young Sox moundmen has fallen to the lot of the diminutive Schalk.

There isn't a catcher in the game today who works as hard as the diminutive Ray.

He loses from five to ten pounds during an afternoon's battle royal.

If other players worked as hard as Schalk they'd lose poundage, too. It would do Babe Ruth a lot of good to get Schalk's recipe.

INTERESTING SPORT NOTES

Poughkeepsie regatta will very likely be a four-mile test in 1922.

Vincenzo Richards defeated Ryan T. Hayes for the Western tennis title at Indianapolis.

Frank Troch has won the trapshooting championship of Washington five times in the last six years.

The fond mother who shuddered at the thought of football now is reconciled to tennis at 110 in the sun.

Gordon Morrison, former Harvard football center, has been appointed football coach at Cornell college, Iowa.

Elmer Jones of Baltimore, Md., a star member of Johns Hopkins university football team, has been appointed a cadet at the West Point Military academy.

Charles A. Stoneham and John J. McGraw of the New York Nationals, have disposed of their majority stock holdings in the Cuba-American Jockey and Automobile club.

The Great Rose, a three-year-old filly by Peter the Great, has been sold by Stoughton A. Fletcher of the Laurel Hill farm, Indianapolis, to Tom Taggart, Jr., of French Lick, for \$15,000.

FIX CARBURETOR TO AVOID LEAKS

Difficulties Greater in Cases Where Engines Have Been in Use for Long Time.

CAUSES FOR UNEVEN ACTION

To Remedy Trouble Opening Should Be Narrowed to Give Stream of Entering Air Greater Velocity in Chamber.

Much has been written about the difficulties of carburetion under normal conditions, when the engines under consideration are in good shape; but the difficulties are even greater in the case of engines that have been used for a long time.

Some of the common complaints are of the so-called "chattering engine," inability to throttle to a low speed and an unaccountable missing or skipping.

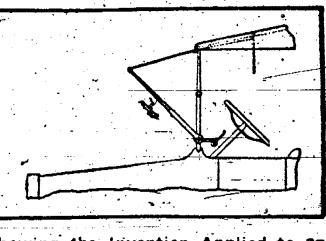

Air-leaks diluting the gasoline vapors are the foremost causes of irregular action. Seldom does the air-leak through a loose gasket, but the hole through which the stem of the throttle

AUTOMOBILE STORM AWNING

Ample Protection Afforded Driver From Rain, Sleet or Snow—Vision Unobscured.

The Scientific American in illustrating and describing an automobile storm awning, the invention of G. H. Huput, Monroe Center, Ill., says:

The invention relates to awnings to be used in connection with the top of an automobile to protect the upper part of the wind shield from rain, snow or sleet so that the vision of the driver will not be obscured, and also for shutting out the rays of the sun

Showing the Invention Applied to an Automobile.

AUTO CARE DURING SUMMER

Radiator Should Always Be Kept Filled and at Intervals Flushed Out and Refilled.

During the summer season motorists should give frequent attention to the radiator, advises a motor car manufacturer. It should always be kept filled, and at intervals it should be flushed out and filled with clean water. In connection with efficient operation of the cooling system, fan belt adjustment should be made, for the fan is needed in summer. The position of the spark-lever should be watched to see that it is kept in an advanced position, thus assuring better cooling of the motor.

Air-Leaks in the Carburetor and the Intake Valves Make the Engine Miss Fire.

valve protrudes due to wear, provides an air-leak that should be remedied. Take the lever off, bush the hole with the shell of a rifle cartridge or similar piece of tubing to keep the air from penetrating at this point. Now remove the intake valves, discard the exhaust valves and use the intake valves in their place. Purchase new intake valves and if these do not fit the holes snugly, ream the extreme ends of the valve guide and place a copper or brass bushing at each end or entirely through, if desired.

Fit a small grease-cup and use a suitable grease, and the leakage of air at this place will be overcome. Remove the piston-rings and fit new ones with tapered ends that will effectively stop all leaks at this place.

In some carburetors a removable tube is used which can be taken out and brushed or given a heavy coating of solder to close the opening. The object is to narrow the opening and to give to the stream of entering air greater velocity. If the carburetor has no preheater, one should be added.

With the carburetor removed, push the butterfly throttle valve to its closed position and note the small opening through which the engine gets its fuel, which will give you some idea of the importance of closing the small openings that give a combined area sufficient to dilute the mixture until it will not burn, which accounts for the skipping of the engine in many cases.—George Luters in Popular Science Monthly.

AUTOMOBILE GOSSIP

Sixty per cent of the production of gasoline is used by motor vehicles.

At one time it was considered unconventional for a woman to drive her own car.

Twelve thousand motor vehicles are operated by rural schools in the United States.

Muffer cutouts are prohibited on any public highway in the state of Pennsylvania.

A motor trip from Paris to Verdun, through the devastated regions and return costs 245 francs.

Street cars have the right of way between cross streets over all privately owned vehicles in Kansas City, Mo.

Since 1899, the first year in which statistics are available, there have been built in the United States 11,839,483 motor vehicles.

During a recent test made in Seattle, Wash., one American-made touring car established a record rate of 36 1/2 miles to a gallon of gasoline.

Motorists in Detroit, who park their cars in forbidden territory find them at the city pound, and are obliged to pay fines of \$1 to \$5 to regain them.

In Phoenix, Ariz., a justice of the peace fines all motorists who are convicted of speeding in his court, \$1 for every mile an hour they are traveling when arrested.

OH, MOTHER!

Says the little one, Let's have some Ice Cream. Then mother is reminded that she, too, would like some, and they all come to the CA-DY KITCHEN, for they know our

ICE CREAM, SODAS, SUNDAES, ETC.

Are just right—pure and clean. Sister also comes here with her young man friend, And Father, he drops in for a cold drink or a cigar.

THEY ALL COME HERE

THURSDAY, AUGUST 18, 1921.

The Irish Republic parliament will reject British offer.

Herbert Hoover wants to keep a firm hand on U. S. supplies in Russia.

Democrats in congress intend to oppose tax measure. They held that measure would benefit largely the rich.

Iowa and Nebraska farmers are threatening to burn their corn in place of coal unless the railroads give them lower freight rates.

Interurban fares will all be three cents a mile from now on and not more than one cent for the first mile traveling on them, and a greater number using autos.

Secretary of the Navy Edwin Denby of Detroit declares that America should not halt its naval program as European powers are continuing such work.

Great Britain announces that they are building a battleship nearly 1000 feet long and large in proportion, with 15 inch guns. That looks like disarmament.

The 20th annual reunion of the famous "Caterpillar" Michigan cavalry brigade association will be held in Lansing, Sept. 14 and 15, and probably some of our Manchester veterans will be present.

A man came aboard a Lansing car a few days ago who had a large cluster of peppermint in his hand and the passengers smiled and wondered what he intended to do with it in these hot-weather days.

One hundred seventy-six deaths, of which 63 were children under 15 years of age, were caused by automobiles in Michigan during the first six months of 1921, reports the division of vital statistics. Of this number 127 were males and 49 females, 46 of the deaths occurring in Detroit and 116 throughout the state.

That the system of parking cars in the middle of the street is the most popular rule rather than the exception, and that eventually the motorist will replace street cars in many American cities are two conclusions reached by the Michigan Auto Car Co. of Lansing, after a study of the exhaustive report by the U. S. Gov. Co. of Chicago.

Because the law now gives a motorist the right to speed his car up to 25 miles an hour on the city highways he must not think he can be stopped by the police or the lives or property of others for that matter. Really there never would have been any objection to a man speeding up to double that mileage if he slowed down when he met or passed other people. Due caution and the rights of others must be observed.

The new state building at Lansing is being completed so rapidly that a contract has been obtained to pay for work. The estimated cost of the building is \$1,000,000 and labor soon absorbed that sum. Then the building will cost \$3,000,000 more than the original appropriation and that was insufficient. It has been the policy of the state commission, which has been occupying the top floor of a downtown building, will move to the new building next month and others will follow as rooms for them are completed.

Dates for the Jackson county fair are set for 1921 to 1924, and as they draw near the management here is securing the country for exhibits. The fair is expected to be one of the largest ever held in Michigan and will be held on the grounds of the fair. The new \$100,000 grand stand seating 10,000 people will give the public ample accommodations and arrangements for the fair.

Brief News Items

People may go putting this fall but they will get no more of it.

Autolists may drive a straight clip now without fear of getting pinched.

The Schlicht-Feldkamp reunion will be held at Pleasant Lake, Michigan, next Thursday, Aug. 25.

All Jaynes and George Schlicht have each bought automobiles and are riding about like nabobs.

Farmers tell us that corn harvest will begin earlier in August than it has in ever known before.

Wm. F. Schable who was laid off when the railroad company became economical, has been restored.

The poem crop is good this year. So is ordinary food crop. Bats are hanging down they are so large and heavy.

Mr. Malady, the barber, has moved his family to the John Moran home lately owned by M. Galgo, on Macomb street.

"The Garter Girl" will be the picture shown on the streets next Wednesday evening by the Welfare association.

Give the children a chance to have some fun from now on, if you haven't done so before, as vacation is drawing to a close.

There appears to be a considerable quantity of pears and plums, but no peaches and cherries. The fruit is in this section of the county.

Ernest Smith has accepted a clerkship in Fred Dow's hardware store. He will live on the farm in Sharon and drives back and forth each day.

Huckberries were most too extensive for pickers, but you can have delicious ones for the picking, and with many people they are preferred to blueberries.

King & Schable have arranged to lease the Manchester Auto garage and take possession Sept. 1st.

The matters between Clarence Lindberg and Charles and Hazel Burgess were the "piece of resistance" cooked with rare skill they proved an extraordinary delict.

Our townsman, John Stenmiller, who was severely injured by a fall in his home recently, has not regained consciousness, neither has he regained sight. It is very restless and requires constant attention though he is apparently "growing weaker."

Mrs. Wm. Burless and daughter Hazel were hostesses to a large party of friends at dinner Saturday night in honor of Mr. and Mrs. B. F. Burton of Lansing. The fish of the finest varieties, the result of a day's angling, by Charles and Hazel Burgess were the "piece of resistance" cooked with rare skill they proved an extraordinary delict.

Mr. and Mrs. B. F. Burton and Dr. Blosser of Lansing came here last Friday night to visit relatives over Sunday. They were accompanied by their niece, Margaret and Elizabeth Lowery who had been visiting them. Returning home Sunday evening they were accompanied by Mrs. Frank Lowery and son who are spending the week with them. Margaret and Elizabeth Lowery are spending the week in Bridgewater and Norvell.

Clifford Kluge returned Tuesday morning from a two weeks' trip to Virginia to see his parents, who reside near Washington. Some Ohio friends accompanied him and they drove to Buffalo, Elyria and the famous Wagoning valley and the Sunbury river. Returning they came up the Potomac by way of Cumberland, Columbia and Toledo. It was a grand outing and "Jim" especially enjoyed it as he has not seen his parents in 11 years.

NEW RECORD SET IN ROAD BUILDING

Miles More of Road Constructed So Far Than in All of Last Year.

The state highway department has so far this year constructed all of road than was constructed all of last year.

It has laid more hard surface road by 35 per cent than was placed last year. Before the start of the highway department will have completed the biggest road building program in the history of the state.

The total federal aid mileage this year is 62.7 miles; trunk line, 24.8 miles; assessment district, 53.8 miles or a grand total of 161 miles of highway. Last year's total was 124 miles and included in that mileage were only 50 miles of hard surfaced roads. In addition to the construction of the highway department has been the public utility work, which has been going on since the beginning of the year.

The department has also been successful in securing the necessary funds to carry out its program. It has secured a total of \$1,000,000 for the year, which is a record for the department.

The department has also been successful in securing the necessary funds to carry out its program. It has secured a total of \$1,000,000 for the year, which is a record for the department.

"Nothing But the Truth," Sparkling Comedy, at Chautauqua

"Nothing But the Truth," widely-known comedy success, will be one of the notable features of the coming Red-Cross Chautauqua. The plot of this great American play is so full of amusing complications and surprises that it keeps you constant state of merriam from first to last.

British aviators have solved the secret how bats avoid obstacles—they cannot see and are applying their discovery to air craft, to safeguard them from collisions. Scientists have discovered a number of bats and released them in a room which was flooded with many wires and partitioned from another room by a grid containing holes just large enough for the bats to fly through. The result was that the flying mammals never touched a wire, and flew through the holes with ease. The experiment revealed the bats' secret. They were found to emit a note, which is a sound of high frequency, which would be back and forth across the grid and enabling it to map out space with exactness. Aeronautical experts now believe that aeroplanes can do the same thing.

ONE DAY AFTER THE ARMISTICE THAT ended the not-so-late war a southern plantation driving down the hills on one of his rare visits to town encountered a whorled squirrel.

"What was that that racket down the hills?" he asked. "It was a whorled squirrel," he inquired. "Red lights and fireworks and sea-like. Sounded like a whorled squirrel. I thought it was a whorled squirrel. Didn't you hear—the war's over?"

"It is," he said, "did we did we?"

"Ho-ho-ho!" shouted the mountain man. "It took a better more time than I expected but I believe that a dove for one dove burnt but what we'd really lick them damnably."

AIN'T NATURE GRAND.

With a view to possibly guiding the cook's mind to a quieter summer day, the hostess of the party, Mrs. Mary Smith, spoke of some of the things she had seen in a nutting's way.

"You've almost exactly like this in our garden," she said. "You've seen those often."

"I have," she said. "I've returned Mary. 'I was after water' then this very morning. Aint't wonderful, for what they did before and since my return from the hospital."

Card of Thanks.

I wish to thank the Auxiliary for the beautiful flowers given to me for fruit. Rev. Schoon for comforting words, and the neighbors and friends for what they did before and since my return from the hospital.

Mrs. Fred Thur.

A Chicago preacher intended to write for his text: "Be ye therefore steadfast." The printer translated the text: "Be ye therefore steadfast."

MANCHESTER Phone 166.

FURNISHERS FOR WELL DRESSED MEN

In our Elgin line of Shirts you will find plenty of snap, quality and style.

The construction of Elgin Shirts appeals to men who want to know how things are made.

You will find more goods across the chest, resulting in neater shoulders and a better hanging sleeve. You will find the collar band to be four-ply around the button holes at front and back. You will find a continuous facing on the sleeves that prevents ripping. You will find five buttons down the front, which makes a dresser front. No other shirt on the market has so many quality features as has the Elgin. You will be interested in the values we are offering.

ALL DRESS SHIRTS

Saturday and Wednesday, Aug. 20 and 24, at 20% DISCOUNT From the new Reduced Prices.

YOCUM & MARX

The Store of Great Values.

A MAN FOR THE AGES A STORY OF THE BUILDERS OF DEMOCRACY BY IRVING BACHELLER

BOOK TWO. CHAPTER X. In Which Abe and Samson Wrestle and Some Raiders Come to Burn and Stay to Repent.

Within a week after their return the election came off and Abe was defeated, although in his precinct two hundred and twenty-seven out of a total of three hundred votes had been cast for him.

John McNeill, who for a short time had shared his military adventures, had become a partner of Samuel Hill in a store larger and better stocked than any the village had known.

Upon these people who knew and respected him Abe Lincoln based his hopes. Among them he had found his vision and future had not dimmed or dimmed it.

The career of the firm began on a hot day late in August with Bill Berry smoking his pipe in the fit-

"Here Comes Steve Nuckles on His Old Mare." the veranda of the store and Abe Lincoln sprawled in the shade of a tree that partly overhung its roof, reading a law book.

his back-knife, put it into his mouth and sat down on the doorstep. "Where did Samson Traylor live?" Abe took him to the road and pointed the way.

"I was going to warn 'em to help 'em out," Abe said. "Well, go on, but don't stir 'em up."

"I'll not trade. Let the rest of Traylor's friends go over. There's enough of 'em."

"No, just to hang around 'em," Abe said. "This time it's a heart warmer," Jack Kelson averred.

"Give 'em a try," Abe modestly stepped forward. "In the last year he had grown less inclined to that kind of fun."

"I can't rattle like I used to could, but I be willin' to give ye a try," Abe said the minister.

"That ar done popped my wind bag," said the minister as he got up. "I reckon my dog'll keep 'em there."

At last the thing which had long been a subject of talk and argument in the stores and houses of New Salem was about to come to pass—a trial of strength and agility between two great lions of Sangamoon county.

They struggled across the doorway, the ground trembling beneath their feet. Shaking it with the force of their impact, Samson had broken the grip of one of Abe's hands and now had his feet in the air again but the young giant clung to his shoulder and wriggled back to his foothold.

"It ain't a fair election, Abe," Samson laughed. "If you were razzing for the right you could top me. This little brush was nothing. Your heart wasn't in it, and by thunder, Abe, it'll come on tonight."

"I was going to warn 'em to help 'em out," Abe said. "Well, go on, but don't stir 'em up."

"I'll not trade. Let the rest of Traylor's friends go over. There's enough of 'em."

"No, just to hang around 'em," Abe said. "This time it's a heart warmer," Jack Kelson averred.

"Give 'em a try," Abe modestly stepped forward. "In the last year he had grown less inclined to that kind of fun."

"I can't rattle like I used to could, but I be willin' to give ye a try," Abe said the minister.

At last the thing which had long been a subject of talk and argument in the stores and houses of New Salem was about to come to pass—a trial of strength and agility between two great lions of Sangamoon county.

done said you hated the South an were hopin' niggers to run away. here and burn this house and run Traylor out of the county, didn't he?" Abe asked.

"I thought so," Abe rejoined. "You tacked a big job on my friend. Did you know that every one of you could be sent to prison for a term of years, and I've a good mind to see that you go there. You men have got to begin fight now to behave yourselves mightly proper or you'll begin to sup sorrow."

"I was going to warn 'em to help 'em out," Abe said. "Well, go on, but don't stir 'em up."

"I'll not trade. Let the rest of Traylor's friends go over. There's enough of 'em."

"No, just to hang around 'em," Abe said. "This time it's a heart warmer," Jack Kelson averred.

"Give 'em a try," Abe modestly stepped forward. "In the last year he had grown less inclined to that kind of fun."

At last the thing which had long been a subject of talk and argument in the stores and houses of New Salem was about to come to pass—a trial of strength and agility between two great lions of Sangamoon county.

Lingerie Dress Craze in Paris

The handsome lingerie dress is a veritable craze in Paris this summer. Every great dressmaker writes a fashion correspondent, is tearing; these types and quantities of them have been exported to America.

Under the influence of the craze for crepe (or waxed) things even the sheer summer fabrics have not escaped. Mousselines, chiffons and laces all are waxed. In fact, every sort of material is being creped.

Great success is predicted for mousseline crepe, which is being used by very many important French houses. A lovely dress in satin crepe made by Agnes of Paris shows the bodice of the dress in black satin with little fluted frills of white mousseline crepe.

A lovely dress from Doucet shows the use of white crepe georgette and black satin crepe, the white georgette forming the overdress and the black crepe satin the foundation. The overdress is beautifully embroidered in white crystal beads threaded on a rather coarse black thread which results in a charming effect.

Among the cool summer frocks the black lace dress still is immensely popular, and second only in favor is the black lace wrap. In many instances one matches the other. A very smart French model is a cape developed in black lace, jet sprangles and embroidered tulle with lovely bands of jet trimming the shoulder cape yoke.

The Straight-Line Frock. Sheer summer frocks should be said to be of two general types—the straight-line dress of clinging material with nothing to distinguish it in the way of cut, but a great deal in the way of simple hand trimming, or they may be what are termed picture dresses. The latter are much unusual than the former and not nearly so wearable.

ONE NEIGHBOR TELLS ANOTHER

Points the Way to Comfort and Health. Other Women Please Read

Moundsville, W. Va.—"I had taken doctor's medicine for nearly two years because my periods were irregular, came every two weeks, and I would suffer with bearing-down pains."

How many young girls suffer as Mrs. Tegarden did and do not know where to turn for advice or help. They often are obliged to earn their living by toiling day in and day out no matter how hard the pain they have to bear.

ASTHMA DR. J. D. KELLOGG'S ASTHMA REMEDY for the prompt relief of Asthma and Hay Fever. Write for FREE SAMPLE.

Cuticura Talcum is Fragrant and Very Healthful Soap 25c, Ointment 25 and 50c, Talcum 25c.

GENUINE "BULL" DURHAM tobacco makes 50 good cigarettes for 10c.

Probably Not. Jimmy was playing in a neighbor's yard with other children. In the midst of their fun, Jimmie's mother came out and said, "Jimmie, what did I tell you about the lawn?"

SWAMP-ROOT FOR KIDNEY AILMENTS There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Effective Toothbrush. To eliminate a great number of petty inconveniences that generally go with washing the teeth in the morning, a fountain toothbrush is a practical recent invention.

IMPROVED UNIFORM INTERNATIONAL Sunday School Lesson

By REV. F. B. FITZGERALD, D. D., Teacher of English Bible in the Moody Bible Institute of Chicago.

LESSON FOR AUGUST 21.

PAUL PREPARES FOR WORLD CONQUEST.

LESSON TEXT.—Acts 13: 1-16. GOLDEN TEXT.—But we believe that through the grace of the Lord Jesus Christ we shall be saved. Acts 1: 1-11. REFERENCE MATERIAL.—Act 2: 21-22; Eph. 2: 4-5.

1. The Controversy in the Church at Antioch (vs. 1-5).

This difficulty was a most serious one, for it threatened the disruption of the church into Jewish and Gentile divisions. It was not a question of the admission of the Gentiles into the church; that had been settled some years before when Peter received Cornelius into his household.

II. The Deliberations of the Council (vs. 6-21).

After some desultory discussion (v. 7), the conference proceeded to serious business. 1. Peter's Speech (vs. 7-11). He argued that God had borne witness to His acceptance of the Gentiles by giving the Holy Spirit to them the same as unto the Jews.

2. Paul and Barnabas rehearse their experience (vs. 12).

They told how God had set His seal of approval upon their preaching of salvation by grace through faith apart from works by the working of signs and wonders through them.

3. The argument of James (vs. 14-21).

He took the fact declared by Peter and showed how it harmonized with the prophecy of Amos. He showed that the reception of the Gentiles was not in conflict with God's plan, but in strict harmony therewith.

III. The Decision (vs. 22-25).

The mother church at Jerusalem came to a unanimous agreement and accepted the resolution offered by James. They not only sent a letter stating the decision of the conference, but took the wise precaution to send influential men along with Paul and Barnabas to bear the same testimony by word of mouth.

IV. The Second Missionary Journey (vs. 15: 36-41).

Paul was suspicious of Mark because of his desertion on the former journey. Barnabas took Mark and sailed to Cyprus. Paul chose Silas and went through Syria and Cilicia confirming the churches.

Our Strength and Our Victory.

Our times are disturbed by vast and stupendous problems. On every side the latch is lifting, and the door of opportunity stands ajar.

The KITCHEN CABINET

He who would bring home the wealth of the Indies must carry the wealth of the Indies with him, says the Spaniard proverb. So it is in traveling; a man must carry knowledge with him if he would bring home knowledge.

HOT, WEATHER GOOD THINGS.

MAKING PUB.

A good-sized fowl is not always made tender by ordinary cooking. The following method is a good one: Cut the fowl in pieces at the joints, wash and dry, roll in seasoned flour and fry brown in hot fat.

Watermelon Cocktail.

Cut a chilled melon into thick slices, remove the seeds and cut out with a vegetable stamp or a potato cutter into balls or shapes. Sprinkle with a little powdered sugar and serve in stemmed glasses as a beginning for a luncheon or dinner.

Peach Betty.

Use the soft crumbs from the center of a stale loaf of bread. Mix three cupsful of crumbs with one-half cupful of melted butter. Have ready a pint and a half of sliced peaches. Put the buttered crumbs and fruit in layers in a baking dish.

Quinces are delicious baked in a casserole.

Add boiling water, orange peel and sugar, filling the centers with sugar and butter. There's a dance of leaves in that aspen bower. There's a titter of winds in that beechen tree.

WHAT TO EAT.

It is not necessary to be a graduate of household economics to understand planning a well-balanced ration of palatable and nutritious food.

1. Foods which provide protein which builds muscle; these are milk, eggs, cheese, meat, poultry, dried peas, beans and lentils, as well as fish.

2. Foods which furnish us starch and sugar; these are cereals, meals, flour, bread, macaroni, potatoes and such starchy foods.

3. Foods which furnish fat. Supplied by butter, cream, olive oil, corn oil, bacon, salt pork, lard and other cooking fats.

4. Foods which supply mineral salts, vegetable acids and body-regulating substances.

5. Foods which supply vitamins in apples, pears, berries, melons, oranges, lemons and other fruits; in salads of green vegetables, such as lettuce and cress; in greens; like spinach, green peas, tomatoes and squash.

If these four divisions are included in the diet there will be no lack of the necessities for growth and health.

When purchasing supplies for the family table think in terms of these groups.

Observations Have Shown That Ordinary Varieties of Ants Are Really Highly Developed Mentally.

If ants do not reason, they have some mental process allied to reasoning, remarks the Indianapolis News.

Paid in His Own Coin.

The village tailor received only occasional orders from the vicar for such articles as hats, collars, or handkerchiefs.

Care for Spraying Machine.

The time to care for the spraying machine and give it a thorough overhauling is when its work for the season is finished.

Soil for Bush Fruits.

Ground that will produce good corn and potatoes will yield good currants, gooseberries and other bush fruits.

Get After Peach-Borers.

Go after the peach-borers, if you still dig them out. If you do the work with gas, wait until September.

PLEASING DESIGN FOR FARM HOUSE

Frame Building Provides Accommodations for Large Family. ROOMS ARE WELL ARRANGED

Practical Farm Home That Complies With the Old Saying That Ideal Home Is "Small House With Many Large Rooms."

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper.

Second Floor Plan.

Off this hall are five bedrooms and the bathroom. How these rooms are arranged and their sizes are shown by the floor plans.

Good Quality of Product and Abundant Supply Must Be Back of Advertising Campaign.

Shipment of standard products the use of advertising in moving certain farm crops in increasing demand, and in obtaining wide distribution has been tried out, and in many instances found successful.

Luscious melons, juicy peaches, oranges, apples, melons, grapes, peaches, in myriad colors and tints, greet the eye upon every post-in magazine page and street-car display.

Through loyal organization, energetic salesmanship, and judicious advertising the cranberry season during recent years has been extended from two months to six.

The outstanding examples of successful large-scale agricultural production, coupled with standardization and advertising, are found in the citrus fruit industry of Florida and California and the boxed apple industry of the Northwest.

Even when conditions were such that nation-wide advertising would not pay, products from small farms have been so carefully graded and packed that when shipped and sold under brands and labels an increased demand for the product by name has resulted, with consequent increase of acreage and extension of business on a profitable basis.

The success of these campaigns has been so great that growers everywhere are becoming interested in the possibility of securing new and increased outlets for their commodities by advertising.

Standardization is the basis of the most successful advertising, and growers should carefully appraise their products in meeting this fundamental requirement.

Marketing officials was formed for the purpose of harmonizing marketing practices in the various states. This organization is co-operating with the bureau of markets, and one of the problems under consideration is the elimination, as far as possible, of conflicting grades and containers.

SOMEWHAT HARD TO BELIEVE

Pointed Comment From the Audience Would Seem to Be Justified Under the Circumstances.

An earnest young man from a college settlement was addressing a company of fathers and mothers in the slums of Chicago on the subject of "Christmas in the Home," telling them of the ways in which the day might be made bright although money was not plentiful.

"I'm not talking about what other people have told me," he said generally; "it's what I know from my personal experience. I have seen over a hundred Christmas celebrations and

"Me dear young man," came in a rich Irish-American voice from the rear of the room, "it's wonderfully preserved we are for a man that old!

Strew is sometimes golden and sometimes it indicates gull.

MOST-DREADED INSECT PEST

San Jose Scale Attacks All Parts of Fruit Trees and is Hard to Hit With Spray.

San Jose scale attacks all parts of fruit trees, even the fruit. It is one of the most dreaded insect pests we have to contend with.

Care for Spraying Machine.

The time to care for the spraying machine and give it a thorough overhauling is when its work for the season is finished.

Soil for Bush Fruits.

Ground that will produce good corn and potatoes will yield good currants, gooseberries and other bush fruits.

Get After Peach-Borers.

Go after the peach-borers, if you still dig them out. If you do the work with gas, wait until September.

AROUND ORCHARD

Advertising is Great Help. Has Been Found Successful in Increasing Demand and Obtaining Wide Distribution.

(Prepared by the United States Department of Agriculture.)

It is not so long ago that advertising of farm products was regarded as ineffectual to increase their sale and consumption.

Advertising authorities had learned from experience that it paid to advertise on a wide basis, only such articles as measured up to high standards of quality and that could be supplied in dependable quantities.

Farm products did not meet these requirements. But with the subsequent development of co-operative marketing associations and the estab-

lishment of standard products the use of advertising in moving certain farm crops in increasing demand, and in obtaining wide distribution has been tried out, and in many instances found successful.

Luscious melons, juicy peaches, oranges, apples, melons, grapes, peaches, in myriad colors and tints, greet the eye upon every post-in magazine page and street-car display.

Through loyal organization, energetic salesmanship, and judicious advertising the cranberry season during recent years has been extended from two months to six.

The melon growers of the Imperial valley of California have utilized much the same methods to obtain the nation-wide distribution which their highly perishable fruit now enjoys.

Rocky Ford became so well known for its melons that the name is now applied to melons from practically all of Colorado.

The outstanding examples of successful large-scale agricultural production, coupled with standardization and advertising, are found in the citrus fruit industry of Florida and California and the boxed apple industry of the Northwest.

For the products of these regions have not only established nation-wide distribution but have successfully entered the markets of the world.

Even when conditions were such that nation-wide advertising would not pay, products from small farms have been so carefully graded and packed that when shipped and sold under brands and labels an increased demand for the product by name has resulted, with consequent increase of acreage and extension of business on a profitable basis.

The success of these campaigns has been so great that growers everywhere are becoming interested in the possibility of securing new and increased outlets for their commodities by advertising.

But before planning an advertising campaign conditions of supply must be carefully studied, say marketing specialists of the United States Department of Agriculture.

Good advertising will awaken expectations which only good quality will satisfy, and there is little use to create a demand for an article that can not be supplied when asked for.

Standardization is the basis of the most successful advertising, and growers should carefully appraise their products in meeting this fundamental requirement.

The bureau of markets of the Department of Agriculture has recommended standards for various farm products and will be glad to assist producers with regard to standardization, branding and labeling.

Recently a National Association of State Marketing officials was formed for the purpose of harmonizing marketing practices in the various states. This organization is co-operating with the bureau of markets, and one of the problems under consideration is the elimination, as far as possible, of conflicting grades and containers.

Close Approach to Reason

Observations Have Shown That Ordinary Varieties of Ants Are Really Highly Developed Mentally.

If ants do not reason, they have some mental process allied to reasoning, remarks the Indianapolis News.

A North side householder became interested in watching a colony of large ants foraging on his lawn for food.

The ants were about a quarter of an inch long, yet many of them were carrying insects much larger than themselves to their home in the ground.

Up and down over the grass stalks they traveled with their burdens.

The spectator became interested in particular in one which was transporting the body of a green grasshopper, at least twice the size of the ant.

The grasshopper's long hind legs, armed with hooks, were continually catching on obstructions. The ant would stop, reconnoiter, change its grasp and go ahead.

When the burden bearer reached the entrance to the ant domicile complications arose. In attempting to take

the grasshopper down sideways the hind legs caught on the edges of the opening. After considerable worry on the part of the ant that had brought the food thus far, a second ant came up out of the ground. It looked the situation over carefully, then it deliberately set to work severing the offending legs, and the rest was easy.

The grasshopper was soon resting in the ant lair, far below the surface of the ground.

Paid in His Own Coin.

The village tailor received only occasional orders from the vicar for such articles as hats, collars, or handkerchiefs.

"You see," remarked the reverend gentleman, one day, having called with his usual order, "when I went a suit I go to London. They make them there."

Calling against a few weeks later, the vicar remarked that he had not seen the tailor at church lately.

"No," replied the tailor, "when I want to hear a good sermon, I go to London. They preach them there."

Soil for Bush Fruits.

Ground that will produce good corn and potatoes will yield good currants, gooseberries and other bush fruits.

Get After Peach-Borers.

Go after the peach-borers, if you still dig them out. If you do the work with gas, wait until September.

ASPIRIN

Name "Bayer" on Genuine. BAYER logo.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions.

Take Aspirin only as told in the Bayer package for Colds, Headache, Toothache, Rheumatism, Earache, Toothache, Lumbago and Tor-Pain.

Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

A Bad Outlook.

Wife (with newspaper)—It says here that a New York bridegroom fainted at his wedding.

Hub—The poor fish! What will happen to him when the first month's bills come in?—Boston Transcript.

Cuticura for Sore Hands.

Soak hands on retiring in the hot sud of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes. Advertisement.

Too Early.

"I have but one regret," exclaimed Caesar as he crossed the Rubicon, "I didn't have a chance to spin a tiddle too."

Advertisement of standard products

the use of advertising in moving certain farm crops in increasing demand, and in obtaining wide distribution has been tried out, and in many instances found successful.

Luscious melons, juicy peaches, oranges, apples, melons, grapes, peaches, in myriad colors and tints, greet the eye upon every post-in magazine page and street-car display.

Through loyal organization, energetic salesmanship, and judicious advertising the cranberry season during recent years has been extended from two months to six.

The melon growers of the Imperial valley of California have utilized much the same methods to obtain the nation-wide distribution which their highly perishable fruit now enjoys.

Rocky Ford became so well known for its melons that the name is now applied to melons from practically all of Colorado.

The outstanding examples of successful large-scale agricultural production, coupled with standardization and advertising, are found in the citrus fruit industry of Florida and California and the boxed apple industry of the Northwest.

For the products of these regions have not only established nation-wide distribution but have successfully entered the markets of the world.

Even when conditions were such that nation-wide advertising would not pay, products from small farms have been so carefully graded and packed that when shipped and sold under brands and labels an increased demand for the product by name has resulted, with consequent increase of acreage and extension of business on a profitable basis.

The success of these campaigns has been so great that growers everywhere are becoming interested in the possibility of securing new and increased outlets for their commodities by advertising.

But before planning an advertising campaign conditions of supply must be carefully studied, say marketing specialists of the United States Department of Agriculture.

Good advertising will awaken expectations which only good quality will satisfy, and there is little use to create a demand for an article that can not be supplied when asked for.

Standardization is the basis of the most successful advertising, and growers should carefully appraise their products in meeting this fundamental requirement.

The bureau of markets of the Department of Agriculture has recommended standards for various farm products and will be glad to assist producers with regard to standardization, branding and labeling.

Recently a National Association of State Marketing officials was formed for the purpose of harmonizing marketing practices in the various states. This organization is co-operating with the bureau of markets, and one of the problems under consideration is the elimination, as far as possible, of conflicting grades and containers.
