Measure Your Figure,-

A Brazilian art scholar claims to have discovered how the old mastern of painting and sculpture worked. He has taken the pictures and shown, by drawing lines and angles on them, how the artists gave their compositions strictly mathematical foundations. Ancient Egyptian artists had a rule of proportions based on the length of the middle fuger, the distance of which was <u>contained</u> nineteen times in the length of the whole body. Greek artists adopted these propor-

tions until it was established that th face must be a tenth part and the hea an eighth part of the total height o the body. The face was divided int three equal parts-from the roots of the hair to the root of the nose; from the root of the nose to its point, and from the end of the nose to the chin

Mind-Laziness. Most of us have, or have had, a te Most of us have, or have had, a ten-dency to be lazy about thinking. That, in itself, is not dangerous; a tendency can be overcome if we are interested in overcoming it. But many people, not realizing what is the matter with their minds, let lazy thinking habits develop unchecked. The slipshod mind has always and output the set derelop unchecked. The slipshod mind has always an excuse ready. It says. "Tm too tired to work now. What I need is a thorough rest to fit me for thinking. Tomorrow I shall be able to do this work easily." Sometimes the excuse is genuine, but we must be on our guard to see that the tired feeling really means overwork. We must be on the lookout for the idle brain that emphatisms of being entrusted.

EVERY important point in Michigan L can again be reached by Long Distance. Poles and wires crushed by storm have been replaced sufficiently to meet demands of business.

It was an appalling task. Nearly 20,000 poles and 6,500 miles of circuits were destroyed, with tremendous losses in money.

But the people of the Telephone Company realized the dependence of the industrial and social welfare of every community on the wires and made every effort to restore service. Not a minute, night or day, did they relax their efforts.

Today, therefore, their first task-that of establishing emergency circuits--is finished. And they appreciate the patience and understanding of their difficulties shown by users of the Toll wires.

We are pleased to announce that Long Distance is again at your service.

are yet rough. -

We team that Robert Leland of Ypsilanti, who spent his summer va-cation last year working at a club-house hotel at Harbor Point, has
 been persuaded to go there this sea-son

son. John Gumpper, Sr., who has been working-in Ypsilanti came home to spend Sunday accompanied by his son John. He says that he likes his work all right and thinks Ypsil a pretty lively place.

Mrs. Essery of Ann Arbor, who came here last Saturday for the final year's meeting of the Saturday club, was escorted home Sunday by Mr. Essery, who drove over accompanied by Mr. and Mrs. C. E. Lewis. All were guests of Mrs. Alleda Tracy.

The Enterprise received a brief call last Thursday afternoon from Mr. and Mrs. E. H. Ahrens and their daughter of Tecumseh. Mr. Ahrens has owned and conducted several newspapers in this section and but recently sold the Blissfield paper. He has made considerable money in buying and celling newspaper plantis and is now looking up prosperts.

Mr. and Mrs. Wm. Schaffer and

Mr. and Mrs. Wm. Schaffer and son Allen accompanied by Mr. and Mrs. F. H. Blosser and children drove to Jackson Sunday to see Miss Ruth Abbott, teacher of missic here last year, who was at Foots Memorial hospital where she is recovering ficely from an operation for appen-dicitis. Miss Abbott is teaching in the Grass Lake schools this year.

the Grass Lake schools this year. Frank Lowery and family accom-panied by Mat D. Blosser took an auto trip Sunday afternoon to Tip-ton, Adrian, Bilssfield and home by way' of Holloway, Tecumseh and Clinton. Considerable plowing has been done along the route where the land is high and sandy, but on low ground there is considerable water standing in the fields. Wheat and grass look good but are growing slowly. Much stock is in pasture but there is little incre to eat. Some proces of oats are beginning to show. Fruit trees are loaded with blossons. Hundreds of young lambs are in past-ure. We saw several farmers plow-old orchards were damized by the recont ice storm. Farmers are not generally preparing to build. Main roads are very good but cross roads-are yet rough.

Large images, of gold and silver were made by the prehistoric gold-smiths. The records of the early Spanish explorers are filled with descriptions of these golden articles, some of which were as large as cart wheels. Mistletoe Has Brains.

One of the most curious illustrations of the working of intelligence in plants is offered by the mistletoe, whose sticky berry, finding lodgment on a. ree branch, throws out a tiny rootle which tries to pierce the bark and thus obtain a foothold. If the bark is oo tough, the rootlet swings the berry over to a fresh spot, and makes another trial. In this way such a berry has been known to make five jumps in two nights ind three days. On on occasion a number of them were dis-covered by a botanist in the act of wire, trying to find places to grow .-
