St. Johns', the first Masonic lodge in Jackson county, was started in Brooklyn in 1838. After a few years it was moved to Brooklyn and was quartered in the old stone tavern there until 1845 when it was returned to Brooklyn; but was disbanded when the grand lodge granted a charter to St. John's Lodge No. 3 at Jackson. Two years later that lodge surrendered its charter, but in about two months a new dispensation was granted and a charter issued in 1848, as Lodge No. 17. The order flourished and a few years later another lodge, No. 50, was started. Some of the prominent men of the growing city were members of one of the lodges. Now all the Masonic orders of the city are quartered in a fine temple on Cortland Street.

NEW AUTO TAX LICENSE PROPOSED

Secretary DeLand Would Use Weight Of Car vs. Horsepower For Basis.

Secretary of State DeLand would readjust the automobile license fees to a weight basis as a substitute for the pending gasoline tax, and Gov. Groesbeck is said to indorse it.

The DeLand plan would disregard horsepower entirely in computing license fees. Small cars would pay at the rate of 80 cents per hundredweight up to 2,000 pounds. Above that the fee would be \$1 per hundreweight hundreweight.

Mr. DeLand estimates his plan would increase from \$7,000,000 to \$12,000,000 the present annual revenue to the state in the automobile license fees. He would readjust the manner of distributing this, giving the county one-third of the to-tal and permitting the state to keep two-thirds, or \$8,000,000, a sum he declares would be adequate to meet this year's highway budget needs.

Plants That Select Homet.

One of the chief popular distinc tions between vegetable and animal life is that the animals have power of choice and of voluntary motion, while regetables and plants grow only me chanically. But the microscope seems move as easily as can animals. There is a plant called volvox globator, so minute that millions of it could be put in a drinking glass, which is seen to whirl like a top across the field of the microscope. Some plants found in ponds; which are still more minute, move habitually, as with an apparent purpose. Naturalists who have given closer study than others to climbing plants state that these seem to exer cise the liberty of choice. Their tendrils, in climbing over pieces of wood with holes, will try one hole after another until they find one that pleases them. One investigator saw a ten-

Perfect Platonic Friendship. The friendship between the great artist, Michelangelo, and the Roman noblewoman, Vittoria Colonna, is one of the world's most illustrious exam ples of platonic friendship, says Oliver Barton in the Mentor Magazine. When they first met, Vittoria Colonna was forty-six and Michelangelo sixty. She became the greatest influence in the life of the flery genius. They were accustomed to meet outside of the church of San Silviestro, and discuss painting and life. The gist of these dialogues was set down by anothe artis, and later published as Michel-angelo's "Dialogues on Painting." After withdrawing to the cloister the

Indian Legend of Rattlesnake

A Texan reports killing a rattle snake in west Texas that measured eight feet and had 24 rattles and button. But in the winter of 1868 60 when the Kansas volunteer regiment joined General Sheridan's command the roving soldiers discovered, in Wichita mountains, a den of rattlesnakes which tops the record.

After the soldlers had taken their souvenirs and had thrown a number of the reptiles into the creek and ornsh, 158 were counted, without their heads and talls, measured eight feet and were six inches in diameter. The sum total was estimated at 200.

As usual, the Indians claimed that the den was a "medicine" den. An aged Aranahoe chief had entered it to die, and had turned into a monster diamond-has he the father of all the snakes in tient country.

Four Reasons Why You Should Buy Your Ford Car This Month

The unprecedented demand for Ford Cars throughout the winter months has taken the entire output of the Ford plans working at capacity, indicating that the demand this Spring will be far in excess of the number of Ford Cars that can possibly be built.

January was the tenth consecutive month in which retail deliveries exceeded 100,000 Ford Cars and Trucks. Requirements for February, the month when preparations are already under way for the Spring business, called for 148,407 Cars and Trucks-more than 24,000 in excess of the number we can possibly produce.
