EDUCATION AT SMALL COST
Writer Urges Publication of Little Books That Could Be Circulated by the Thousands.

In the old days, the books could be had in France for the price of postage stamps—that is, for ten-centures of two-centures. Now, however, the prices are only four or five times as great, and the Frenchman who is young enough to read for an hour's journey can supply himself with "Eugenie Grandet" in two numbers or "Simplicissimus" in three. "The Boy's Own Paper" is issued in this country are much more expensive to be sure, but they are also much more useful. In the matter of price, in America, the books are sold at 20 cents a rank with the popular magazines, rather than with books, and it is consequently with the popular magazines that a series like Arthurs Fayards should be sold. If a rack filled with the people of these countries, it would be worth more than the cost of the material. From the Freeman.

WOOD HAS MANY ADVANTAGES
Reconstructed material that can be molded instead of using costly process of carving.

From shavings and sawdust, combined with suitable binders, there is now being made a reconstructed wood that is said to have many advantages. The process was originated by Prof. George Kemmerer, of the chemistry department of the University of Wisconsin, and the new material has been used commercially since last winter. It was found to be better than wood for certain purposes. The sawdust, after being mixed with a new binder material, is put into a mold, and subjected to a pressure of from 500 to 1,000 pounds per square inch. The resulting product is much tougher and harder than ordinary wood, does not split, and is practically impervious to water. This reconstructed wood takes stains, such as varnish and enamel, very well. Its chief use is in the manufacture of articles of irregular shape, such as carvings, instead of having to undergo the tedious and costly process of carving. The process of ordinary wood, the process pulp can be put into a suitable mold, placed under pressure, and dried. The product is hard, stain-resistant, and seamless. Popular Mechanics Magazine.

Brief News Items

Unless there is more rain farmers say crop prospects are not what they should be.

People today demand homes supplied with modern conveniences and are willing to pay a liberal price for rent.

Several young girls of the village have tried their luck fishing for bullheads and suckers in the river several evenings the past week.

Wm. K. Schaffer has bought the milk business of his father-in-law, B. Lindbert, and is conducting the daily rounds in addition to his farm work, saw-mill, etc.

Some of our citizens would like to see the street in front of the postoffice, open and people going in and out. Dr. E. J. Schaffer has an idea that he will have a car made up for the street, on Sunday, May 13th, Mother's Day.

If any of our readers have an idea that the gas-sawing club work all someone, they might change their minds if they saw some of the proms, dresses, etc. that many of the young girls have made themselves.

It looks more like business to see the Clarkson store next to the postoffice, open and people going in and out. Dr. E. J. Schaffer has an idea that he will have a car made up for the street, on Sunday, May 13th, Mother's Day.

Occasionally a person who has visited the ruins of a prehistoric city in Arizona or New Mexico, or who has seen pictures of them, as well as the ancient habitations of the Indians, etc., ask our citizens if the ruins of the village are something of the sort. They really do resemble such a distance.

UNCLE SAM'S MAIL CARRIES ODD THINGS

Complaints Few Since Parcel Post System Was Adopted a Few Years Ago.

One of the greatest conveniences of the many that the American people enjoy is that of Uncle Sam's postal system, stretching across the continent and reaching every city and hamlet; penetrating forests, climb-mountains, sailing rivers, lakes and ocean to carry messages and articles of food and nourishment, conveniences and comforts to the sons and daughters of a mighty nation.

The postal system has been progressive since its adoption. First, the mail bags were carried on horseback, then on the steam car, and now by the airplane, flying from coast to coast in 27 hours with no stop en route.

When the gold epidemic prevailed in California and thousands of wealth seekers visited the El Dorado there was a demand for expedient mail facilities than before existing and a contract was let for carrying mail by pony express—that was by horseback in relay—and that was the first fast mail. Only letters and other first-class mail was carried that way, but the spirit of progress soon replaced the pony express with a train of steam cars over the Union Pacific, which made the trip across six days, that is from New York to San Francisco. The time has been considerably shortened and now a train carries from one to five mail cars.

Almost everything is now carried by mail—whatever one needs for food, clothing or for business can be forwarded to him, no matter where he is by the express mail carriers. Manufacturers, bankers, printers, mechanics, sportsmen and travelers rely upon them to bring to their very door or hut whatever they may desire.

Arrangements with other national carriers to send and receive letters and parcels for all sections of the globe at a very cheap rate.

SUGAR STRIKE AID TO HEALTH

Too Much Sweets Bad for Digestion—Then Why Buy Candy for Children?

The increase in price of sugar has aroused the women in one of the southern states and they declare they will not stand for it and agreed not to use it. The movement has spread, it is claimed.

Great reduction in the amount of sugar used by the average American is not only a good thing economically but it will tend toward better individual and national health, according to Dr. Henry P. Vaughan, health commissioner. He said too much sugar upsets digestion, and thus tends to maintenance with a weak and bodily resistance to disease.

He said the strike against sugar not only will serve to bring down the price but the average person will benefit in health by reducing his consumption of sugar. From the standpoint of public health, it is heartily in favor of it. The United States is an over-consuming nation. Too much sugar causes indigestion and consequent malnutrition.

The foremen of the sugar industry are foremen of the sugar industry. They lessen the body's resistance to disease by the use of sugar. The body is susceptible to common infections. The inability of the body to assimilate more than its normal sugar frequently causes indigestion and malnutrition.

Over-consumption of sugar also aids in causing decay of teeth. The decaying teeth are the cause of a number of diseases prevalent in this country.

Watch the school children on their way to school and on their frequent trips to the candy store and walk out with "suckers," or other kinds of candy. You see them peeling and nibbling with which well they eat the sweets, yet we know full well that we are doing them too frequent indulgence is harmful.

CERTIFIED POTATOES NOT EXPENSIVE

Good Year to Replace Old Planting Stocks With High-Class Tubers At Low Cost.

The fact that certified potato seed is an excellent time for Michigan growers to get rid of their old seed tubers and plant the pedigreed tubers.

Old potatoes are also bringing a pretty good price on the market, and other factors which help to make the spring a favorable time to switch to certified seed.

Washington farmers have but few potatoes to sell.

An increased production of about 100 per cent is the cause of a number of potatoes grown on 1015 farms in the state.

You cannot select good seed from the ordinary bin. Leaf rot, mosaic and spindle rot are likely to be present without being detected in the tubers. All these show up later in the growing plant, seed and cut down yields every year.

The certified tubers are grown by members of the Michigan Potato Producers Association, under field supervision by extension men from the Agricultural college.

BASEBALL LEAGUE FIRST GAME MAY 20

Season of 1923 to Be Opened With Palmyra Playing in Manchester.

Manchester baseball fans are all ready to shout "play ball," as there is now assurance that the Southern Michigan League will be a "go" and Manchester will be in the game. Everything is all set except the most important matter of a field on which to play. Undoubtedly a diamond will be laid out on the farm of Albert Kiebler, just west of town, but up to a few days ago at least the land had not been returned for the purpose. Otherwise everything is ready and the boys are anxious to go.

Director P. W. Warster attended a meeting of league officers at Clinton on Monday evening at which various matters were talked and decided upon, among them being adoption of the Spalding ball for all games and setting the hour for all games at 7:30 p. m., Eastern Standard time.

Following is the schedule of the season:

May 20—Clinton at Tecumseh, Palmyra at Manchester.

May 27—Manchester at Clinton, Palmyra at Ann Arbor, Milan at Palmyra.

May 30—Ann Arbor at Milan, June 3—Palmyra at Tecumseh, Clinton at Milan, Ann Arbor at Manchester.

June 10—Milan at Clinton, Manchester at Ann Arbor, Tecumseh at Palmyra.

June 17—Ann Arbor at Clinton, Palmyra at Milan, Tecumseh at Manchester.

June 24—Milan at Ann Arbor, Tecumseh at Palmyra, Manchester at Clinton.

July 1—Ann Arbor at Tecumseh, Clinton at Milan, Ann Arbor at Palmyra.

July 8—Palmyra at Tecumseh, Milan at Ann Arbor, Clinton at Manchester.

July 15—Ann Arbor at Clinton, Milan at Manchester, Tecumseh at Palmyra.

July 22—Ann Arbor at Tecumseh, Clinton at Milan, Ann Arbor at Palmyra.

August 5—Manchester at Tecumseh, Clinton at Ann Arbor, Milan at Palmyra.

August 12—Milan at Tecumseh, Clinton at Manchester, Ann Arbor at Palmyra.

August 19—Manchester at Clinton, Tecumseh at Ann Arbor, Palmyra at Milan.

August 26—Clinton at Tecumseh, Palmyra at Ann Arbor, Milan at Manchester.

PUPILS DRAMATIZE TOWNSHIP HISTORY

Pageant Depicting History of Sharon Township by Rural School Pupils Was Fine.

Three teachers and their pupils in Sharon township gave a pageant on Thursday evening, May 4, at the town hall, tracing the history of the township from the Indian days to the present time. Miss Emma Schlich's school presented two Indian scenes, the first picturing squaws grinding corn, while the second showed the coming of the chief and the war dance that followed. Miss Ethel Parr's school presented the next two scenes, the first a pioneer home in which the mother was busily spinning and the father entertaining the children, with a record of the school in which the program of the three acts and the history stick were emphasized.

Mrs. Paradise and Miss Parr's schools presented the next scenes, a husking bee and a pioneer wedding party. Miss Parr's school gave two scenes of early lumber days, the first a day in camp and second an evening around the campfire. Mrs. Paradise's pupils presented a modern school. Patriotic songs and health songs were sung, and the first-grade dramatized two stories.

The pageant was concluded by a song in which the three schools joined. Following this, Mr. Esbery, commissioner of schools, gave a short talk which was much enjoyed.

FORMER VILLAGE GIRL MARRIES

Miss Eva Face Becomes Bride of Wayne E. Frushard at Jackson.

A very pretty wedding took place Wednesday, May 2nd, when Mrs. Eva Face, daughter of Mr. Cora and Mrs. Frushard, of Jackson, was united in marriage by Rev. S. A. Griffith, at the home of the bride's mother, Mrs. Frushard, of Jackson.

The bride was gowned in green Canton crepe and carried American flags. Her bridesmaids were Misses Mrs. Harold Haines, the bridesmaid being dressed in pale blue.

Following the ceremony a wedding breakfast was served. Only one hundred guests were present.

The bride was formerly of Palmyra, where she was a member of the Palmyra church. She is now residing in Jackson.

COUNCIL PROCEEDINGS

Village Hall, May 3, 1923.

Concill met in regular session, called to order by President Breitenbach. Minutes of previous meeting were read and approved.

The following claims were presented and allowed:

John R. Schaeble, \$12.50

Clarence Helm, \$2.90

Wm. C. Jackson, \$30.00

Robert Mahrie, \$5.50

P. D. Kerr, \$112.50

Wm. C. Jackson, \$4.99

The Peoples Bank, half six mos. interest on \$19,000

Union Savings Bank, half six mos. interest on \$19,000

Waterworks bond and half interest on \$19,000

Amanda Schaeble, \$12.00

Western Electric Co., \$32

Wm. Glaz, \$50

Wm. C. Jackson, \$1.00

Sinking fund, \$100.00

Trustees Widmayer and Dresselhouse reported that they had secured a contract for the repair of the electric light plant, and recommended that another outside job be placed in office so that there would not be obliged to call on the contractor for the repair of the building be sealed up so the room would be warmer in winter.

Motion made by Lowery, seconded by Snowman, that the Council call some competent man to look over lighting plant and see what is needed, and to report to the Council.

Moved, approved and carried that Supt. Kiebler be second-hand volt meter to replace one worn out at electric plant.

Moved, approved and carried that the best Wm. Springer would do about to sell the village right of way land for \$250, including last year's rental of \$25. Moved by Snowman, seconded by Dresselhouse and carried, that Council pay \$250 for village right of way land and \$25 per year.

Trustees Breitenbach reported that County Drain Commissioner Deake informed him the actual cost of repairing Sharon sets running through east part of village was \$70 and that the balance of \$300 remained had been retained for future possible repairs. Bill was laid on the table until next meeting.

Street commissioner reported that had been done on the streets because it was too dry.

Agent for road oil was present and suggested saving the village oil tank formerly used and quoted price of heavier oil with 60 cent per gallon and lighter oil with 45 cent per gallon at 7.10 per gallon. Moved by Widmayer, seconded by Snowman and carried, that 12,000 gallons of heavier oil be ordered for the village.

Moved that clerk put notice in Enterprise that be the title payment for all residences petitioning for oil. Representative of H. D. Edwards Co., of Detroit, was present and submitted samples of fire hose.

Moved by Dresselhouse, seconded by Lowery and carried, that Council order 500 feet of hose at \$1.15 per foot with \$5 per foot for carriage if couplings are returned, making price \$1.97 per foot.

Meeting adjourned.

DYNAMITE PROVES HANDY FARM TOOL

South Michigan Farmers' Soc Demonstrations on Use of Explosives in Clean Up Work.

The use of dynamite on Michigan farms is not confined to land clearing operations in new country, but has been shown to be of great value before groups of Jackson and Kalamazoo county farmers who witnessed a series of demonstrations through members of the Michigan Agricultural College extension staff.

Roots were loosened and broken up, ditches were dug, stumps were removed cleanly, and "clean up" work was done for drainage and other operations of great value. The range and adaptability of properly used dynamite in clean-up work on the farm was demonstrated.

Most of the farmers at these meetings showed a surprising lack of knowledge of the use of dynamite and were here shown the possibilities of increasing the efficiency of their farms by clearing up the land.

Every 100 feet of rock from a field which is under cultivation moves increased efficiency in the handling of the material, and a great deal of hot blasting and work of the kind is of great value.

Mr. and Mrs. Thomas Feather of Jackson visited Mrs. Ayres Sunday.

Wm. Fargo of Jackson was in town Sunday.

FARM HOTEL OPENS DANCING MAY 17

Dancing at This Well Known Summer Resort Looked Forward To Each Year by Many.

With the floor of the large dancing pavilion cleaned and waxed to perfection, and decorations renewed in preparation for the season, the Farm Hotel will open its doors to the dancing public on Thursday evening, May 17th.

This popular resort has been a great attraction for dancers for some years and under careful management of Mr. and Mrs. Nisde adds to its popularity each year. Added to the past winter's success was a patronage by the best young people for many miles around the assurance of the best music obtainable being crowded to each dance at the Farm Hotel.

This year will be no exception, evidently, for a most popular jazz orchestra has been engaged, one of the best in the state, and all around the country and during the past winter has even increased in popularity in the city. The music is expected to be all that dancers could wish.

The Farm Hotel itself has for the season been opened for the night, and guests have been accommodated in the best manner possible.

July 15—Ann Arbor at Clinton, Milan at Manchester, Tecumseh at Palmyra.

July 22—Ann Arbor at Tecumseh, Clinton at Milan, Ann Arbor at Palmyra.

August 5—Manchester at Tecumseh, Clinton at Ann Arbor, Milan at Palmyra.

August 12—Milan at Tecumseh, Clinton at Manchester, Ann Arbor at Palmyra.

August 19—Manchester at Clinton, Tecumseh at Ann Arbor, Palmyra at Milan.

August 26—Clinton at Tecumseh, Palmyra at Ann Arbor, Milan at Manchester.

Joe Bacco is laboring to beautify the east shore of the upper pond in the rear of the Smith store. He has seven varieties of peonies and a large collection of other flowers already planted on the sloping bank. Favorable conditions are hoped to add beauty to the locality.

Mourning paper and envelopes at Enterprise office.

LAST ANALYSIS OF SUCCESS

Some Worth-While Thoughts That It May Pay the Bill When We Ponder Over.

It isn't easy if it costs you the companionship and humanness and love of your children. Very often busy, wealthy men of prominence have sacrificed the finest thing in life, the affection of their family. Let me relate an incident recently told me which contains a priceless suggestion for many—a life—business—men.

A prominent public utility executive in Illinois told a friend that he was going to give his young son an unusual Christmas present. "To come," he said, "to write my boy a letter telling him that, as a Christmas present, I'm going to discharge him—leave of absence every day." He added that he had been doing a lot of thinking on the subject, and felt that he owed this to his son.

Alas, he died two weeks later.

I work at least an average of twelve hours a day. I need to find time to tell my little fellows or to tell their stories—legendary ones—written that are ready for bed. I wouldn't forego this pleasure for the sake of any amount of money. Wealth is an excellent thing to possess if earned honestly and utilized sensibly. But wealth won't at the expense of health or family affection last wealth, but poverty, poverty of heart, poverty of soul.—Baltimore American.

PERMANENT ENAMEL BAKED ON STEEL

Eight years ago, when Dodge Brothers originated the all-steel motor car body, they took advantage of the absence of wood in the framework to bake an enamel finish on the surface of the steel.

In a vast series of electric ovens, especially designed and built by Dodge Brothers' engineers for this process, three distinct coats of black enamel are successively baked on the steel at an intensely high temperature.

The result is a finish so hardy and durable that it seldom requires more than a good cleaning and polishing to restore the original brightness.

Even in sections of the Southwest where alkali in the soil is especially destructive to body finishes, Dodge Brothers enamel retains its beautiful lustre after years of wear.

The price of the Touring Car is \$238 delivered.
