

WASHTENAW COUNTY

Patrick Coyle, aged 78, died at his home in Northfield Saturday. It appears that Henry Ford has decided to build a factory within three miles of Ypsilanti—perhaps down the river at Tuttle hill.

Mrs. Sarah Jane Mills, wife of Dr. Mills of Ann Arbor, died Sunday after a three years' illness. She leaves a husband and one son.

Sheriff's officers are watching out to prevent parking of cars on any of the roads surrounding the fair grounds, according to the new traffic law.

The several banks of the county subscribed about \$700 to the support of the Washtenaw County Fair. Manchester did her part: The Peoples Bank, \$16.72, and The Union Savings Bank, \$22.87.

Miss Mabel McGuiness, a graduate of the Chelsea high school, and the Normal college at Ypsilanti, afterwards teaching in Colorado, died in a Detroit hospital Tuesday morning following an operation for appendicitis.

The Pullman firm refused to sign the contract for grading and construction for drainage on trunk line M-23 between Clinton and Saline for \$47,026.74 and the contract was awarded to the Sturgis Improvement Co. of Galesburg, who had bid \$51,562.52. But plans have been revised, changing the mileage from 10.665 to 10.267.

More than 2,000 hunting licenses have been issued in the county, and more are on the way for them. The duck season opened on the 16th. It costs a resident of the state \$1 for a license and a non-resident \$10. If you hunt only on your own land you don't have to get a license. Do it have more than 50 ducks or coots in your possession at one time, and don't shoot more than 25 in one day. Only six geese or brant may be shot in one day by a hunter and only 25 during the season.

We have as yet had no harmful frost.

SOCIETIES

MANCHESTER LODGE No. 148, F. & A. M., meets at Masonic Hall, first Tuesday evening of each month. Visiting brothers invited. Fred E. Blosser, W. M., Ed. E. Root, Secretary.

There are two highways of business—one old and one new. The old one is long and rough, winding through the intricacies of business exchanges and strewn with wasted time and effort.

The new highway, made possible by our banking system, is straight and smooth—a veritable shortcut to business transactions, saving time, money, and goods.

Commercial paper, checks, drafts, etc., furnished by this bank make these shortcuts in business open to you. It will be to your advantage to use them whenever possible.

This bank puts these time-saving methods always at your disposal.

EDUCATION IS NOT EXPENSIVE

Students at the U. of M., at Ann Arbor Get Through on \$771 A Year.

According to estimates by Prof. J. A. Bursley, dean of students of the university at Ann Arbor, expenses of a male student, if a resident of Michigan, may be from \$771 to \$961 per college year, depending upon the school or college in which he is enrolled.

Estimates of expenses for the average student in four schools and colleges follow: College of literature, science, and arts, \$771; college of engineering and architecture, \$831; law school, \$841; medical school, \$961. Expenses in the other schools and colleges vary, according to cost of tuition.

None of the estimates includes clothes or traveling expenses. Tuition for Michigan students varies from \$85 in the literary college to \$180 in the medical school. A matriculation fee of \$10 is required in all schools and colleges of the university.

Dean Bursley estimates the cost of books and supplies at \$55 for a literary student, \$90 for a law or engineering student, \$150 for a medical student.

Board is figured at \$7 a week for a period of 37 weeks and room at \$5 a week for the same length of time. Laundry is estimated at \$35 for the school year and amusements at \$10. Dues to clubs and societies are placed at \$35.

TWO WATCHES SOLVE PUZZLE

Sniffens Has No More Trouble Keeping Track of Daylight Saving and Standard Time.

Sniffens is a traveling salesman who is on the road most of the time and whose wanderings take him across the continent a couple of times a year. It will be a week or so before he makes his next trip, but already he has begun to make preparations, and one of the first things he did was to get out what he calls his "second" watch.

With the advent of daylight saving each year Sniffens, who travels to suburban points just to keep his hand in between times, has great difficulty in keeping track of the schedules, due to the difference between railroad timetables and daylight time.

Sniffens has found that his "second" watch, which is of silver, while his regular timepiece is of gold, has solved the problem. He simply sets the silver watch to correspond to daylight saving time while his regular watch is kept at the standard time of the particular section of the country he happens to be in.

The silver watch is used to keep city appointments and to keep tabs on suburban trains, while the gold watch serves the purpose of being always right for trains which run on standard time.—New York Sun.

GIANT OF THE DEEP

The American Museum of Natural History some time ago came into possession of what is believed to be the largest whale ever exhibited on land. It is a female finback, 68 1/2 feet in length. Its body, in life, was 30 feet in circumference. It is estimated that at least 50 men could be inclosed within the interior of this gigantic animal.

The full-grown right whale, which is the species usually hunted for its blubber and whalebone, averages from 45 to 50 feet in length.

MANCHESTER BEATS PALMYRA 8 TO 3

Season Drawing Near Close—Schedule of Last Games Given Below.

Manchester made her 8 scores in the game with Palmyra last Sunday very handily and if it hadn't been for errors on the part of the home team it is doubtful if the visitors would have gotten the three scores they registered. Early in the game it looked as though it might be a close contest, but Manchester soon gained a lead that the visitors could not approach. Following is the box score:

Box score table for Manchester vs Palmyra baseball game. Columns include player names and statistics like runs, hits, errors, etc.

Manchester made her 8 scores in the game with Palmyra last Sunday very handily and if it hadn't been for errors on the part of the home team it is doubtful if the visitors would have gotten the three scores they registered.

NEED GOOD SEED TO BOOST WHEAT PROFIT

Present Price Levels Force Growers To Plant Best Varieties Available in State.

The price farmers are obliged to accept for their wheat may not be satisfactory, may not afford them a profit; but they are "good losers" if that is true. Everywhere they are preparing the soil for seeding. We have read that the acreage sown to wheat this fall will be considerably less than usual. Well, we will see.

In this section most of the farmers lost their seeding on account of dry weather. They had a splendid stand of clover but it needed moisture to push it along.

They get the best seeding with wheat and that is probably why so many acres of ground are being prepared.

We hope that farmers will be careful to select the best yielding varieties of seed wheat to match up with the preparation they have made of the soil for it. Then they may reasonably expect a better yield and that may give them in next year what is a profitable one.

Planting good seed on a good seed bed is the surest way of guaranteeing the best possible returns from the wheat crop, says Prof. Cox of the M. A. C. in discussing the present wheat situation. Fortunately there is an unusually good supply of high-class Red Rock and American Banner seed wheat available in the state.

The Red Rock is a bearded, red winter variety of unusually good wintering ability on fertile loams and clay loams, and is ordinarily known as good wheat land. The variety that is Michigan's leading variety from the standpoint of milling quality.

The American Banner is a winter hardy, beardless white wheat. It is well adapted to Red Rock soils high in organic matter and to soils somewhat deficient in fertility. The Nigger and Egyptian, bearded red winter wheats, are highly esteemed by farmers and millers in many Michigan localities.

For best results, wheat should be planted as early as it is possible in any particular locality in order to avoid the Hessian Fly and get maximum good top growth before winter. The use of from 200 to 300 pounds of acid phosphate nearly always gives excellent returns with wheat.

Use of seed wheat with formaldehyde to prevent smut is a practice that has come into general use among leading wheat growers. Failure to treat for smutting smut exposes the crop to the possibility of serious loss.

Down in the southwest corner of Lake county, not more than 25 miles southeast of Ludington, on Lake Michigan, is Star lake, a beautiful sheet of water surrounded by almost virgin forest. The soil thereabout is sandy and they say that fishin' is good in Star lake. Frank Burtless, a nephew of the late Wm. Burtless of this village, owns a tract of land on the border of the lake and is clearing it and planting it for cottage sites. He is building a home there where himself and his wife will—in fact, are now living. Recently his cousin, B. F. Burtless, and wife, of Lansing, visited there a few days while in that vicinity on business, and they say that they had great fun all by their lonesome.

At a small gathering of people at St. Paul's parish house in Jackson, last Thursday evening, A. W. Smith, a physiologist said: "In a few years we will buy a little instrument to attach to the wrist and with it we will be able to communicate with people across oceans and miles of land." My, we hope it will not cost too much. Mr. Smith is part Indian and strongly upholds the Indian race. "Try and find a case on record where any full-blood American Indian ever told a lie, stole or committed adultery. There isn't any; the Indian's record is clean," he said.

M.A.C. TO OPEN FOR SIXTY-SIXTH YEAR

Early Enrollment Figures Indicate Big Attendance at the College This Year.

The Michigan Agricultural College will open its doors to the young men and women of the state on Wednesday, Sept. 26th, for the 66th consecutive year. The state college was founded in 1857. Registration for freshmen will be held Sept. 24 and for upper classes on Sept. 15th.

Advance registration figures at the office of the college registrar this week indicate that the attendance this year will equal or exceed the best previous mark in the history of the school. More than 1,700 regular four-year students, in addition to several hundred special winter agricultural course and summer school students were enrolled during the past year, an even larger attendance is looked for this fall.

The agricultural course, the oldest at M. A. C., and the one from which the college takes its name, is expected as usual to draw a large proportion of the students, as in the engineering division. These two courses accounted for more than 1,000 of last year's enrollment. Home economics, forestry, veterinary medicine and applied science courses have also had many advance registrations.

The applied science division, first established two years ago, is expected to show the largest percentage increase, while reports show that more girls than ever will elect work under the home economics branch of the institution.

A number of minor changes in the college faculty have been announced for the year, while Miss Jean Krueger, new dean of home economics, and Harrison R. Hunt, newly appointed professor of zoology, will take office with the opening of the college year.

MAY MAKE USE OF AIRPLANE

Test to Be Made to Determine its Value in Campaign to Control Insect Pests.

As a result of experiments carried on during the past two years in spraying trees with poison distributed by an airplane, in the campaign to control insect pests, it has been considered advisable by the United States Department of Agriculture to make a number of tests this summer to determine whether the lighter-than-air machine can be used satisfactorily. Arrangements have been made between the Department of Agriculture and the air service of the War department to use a motorized balloon for this purpose. The work will be conducted in the

FAIR OPENED O. K. DESPITE RAIN

Washtenaw County Spirit Was For A Good Fair and Officials Are Greatly Encouraged.

So many exhibitors were on the grounds Monday evening that the shape for the opening Tuesday morning so the school children would have a good time, that the rain which came was not sufficient to dampen the spirits of the great crowd that braved the downpour.

It could not be expected that everything would be "all set" the first day of the fair, they never are, but exhibitors had worked hard and really convinced everybody that the 1923 fair would be all that its officers had promised that it would be. However, the rain soaked the clay ground and walking about was quite unpleasant, and to drive an auto was more than perplexing.

The official opening of the fair took place and then a general inspection of the buildings and the creditable exhibits already in place was made. The weather the balance of the week will probably be fair and no doubt there will be big crowds in attendance every day to see the big exhibits of stock which have taken prizes at the State fair and the Jackson fair. It is claimed that the special free attractions are especially good and there are to be some exciting horse races Friday afternoon.

Wednesday was Ford Day, Thursday, Homecoming Day and as the judges had put the ribbons on the exhibits, everybody saw who the prize winners were. Friday is Auto Day—but other people will be there. Saturday is Auto Day, with daylight fireworks. And speaking of fireworks, there is a display on four nights of the fair, but perhaps Saturday night will be the best.

Snapshots of an Eclipse. Immense telescopic cameras forty and sixty feet long, gigantic reflectors and a number of smaller instruments will be moved into Mexico for the purpose of photographing the sun during its total eclipse next September, according to plans announced here by Dr. A. E. Douglas of the University of Arizona, says a Tucson correspondent of the New York World.

Doctor Douglas will head an expedition, while a second will be conducted by Prof. W. A. Cogshall of the University of Indiana.

The Douglas expedition will take with it a forty-foot-focus camera which will reproduce the sun with a five-inch diameter. An even larger camera, with a sixty-foot focus, will be taken by the Cogshall expedition.

These cameras will be held in position by means of specially constructed towers. San Felipe, 134 miles south of the international boundary, has been selected as the site of the Cogshall expedition's observation. Doctor Douglas has not definitely selected his location.

Leo Watkins caught a few small fish in the upper pond Monday.

THAT SETTLES IT

Before leaving England for home, President Burton of the Michigan University invited Robert Bridges, post-laureate of England since 1913, to come to America and spend the collegiate year at the University of Michigan in pursuance of the movement for an exchange of lecturers and professors between the two countries, and Mr. Bridges has accepted and is on his way here. He is nearing 80 years of age, but is quite active and hopes to bring something of the atmosphere of English scholarship to the youth of American universities. He will be here to see the first big football game.

Auto Drivers, Remember This. The Michigan uniform-traffic law, which went into effect August 29, provides that it shall be unlawful to park a vehicle on the beaten track or paved surface of any highway outside the limits of any village or city.

Other scores in the league Sunday were: Milan 14, Ann Arbor Grotto 8; Tecumseh 5, Clinton 3.

Milan002016050—14 16 2
Grotto013100201— 8 14 7

The standing of the clubs is as follows:

Table showing standings of clubs: Milan, Grotto, Manchester, Tecumseh, Clinton, Palmyra with columns for Won, Lost, Pct.

The schedule of closing games between Manchester and Tecumseh has been reversed from the original order. The schedule for Sunday, Sept. 23 is: Milan at Clinton, Manchester at Tecumseh, Ann Arbor at Palmyra.

Schedule for last games, Sept. 30: Tecumseh at Manchester, Palmyra at Clinton, Ann Arbor at Milan.

BIG FOOTBALL GAMES AT A. A.

University Team Will Play Six Big Games on Ferry Field This Year.

Unusual opportunities to see some of the best teams in the country in action on Ferry Field, Ann Arbor, will be afforded followers of the U. of M., football activities this fall. Of the eight games scheduled by Michigan, six will be played on the home grounds, and it is expected that all seasonal attendance records will be shattered.

To start off the season, Case Scientific school of Cleveland will act in their usual role as openers, this year on Oct. 6th.

The following week, Oct. 13, Vanderbilt, champions of the south in 1922, will journey to Ann Arbor for an inter-sectional clash. Captain Harry Kipke and his warriors have not yet quite lived down the scare they received at Nashville last year when the southerners held the romping Michiganans to a 0 to 0 score.

From Little Gus, the water boy, both ways, the Michigan squad is looking forward to vanquishing the southern gentlemen and the Tennesseans are said to feel the same way. Their coach, DeW. McLaughlin, is a former Michigan man and played on Yost's Michigan team in 1901 and 1902. He was assistant coach at Michigan in 1903. Incidentally he is related to the Michigan mentor and would consider it a worthy achievement for the year to squelch the Yostmen.

Oct. 20, 1923, the following Saturday, the conference schedule will open in Ann Arbor when the Ohio State team, still bitter from its Dedication day loss last year, will journey north for revenge.

The following Saturday the Michigan Aggies en masse will come to Ann Arbor for the annual battle with the U. S. Marines from Quantico. The service men have been practicing for a month and will give the Wolverines a hard battle. Secretary of War Denby, a former Michigan center, the famous Marine band and about 1,500 other men will follow the team to Ann Arbor.

The following Saturday Michigan will travel to Madison for a game with Wisconsin and will close the season on Ferry field Nov. 24 in the homecoming game with Minnesota.

Useless Brains. A well-known Mississippi printer was fond of playing pranks. One day while riding with an Italian negro he began gravely to chatter Italian to his brunette driver.

The negro looked wildly at him, but said nothing.

Finally the white man in pretended pique, said: "What's the matter, why don't you answer?"

"I don't know what you're talkin' bout."

"What's wrong? Haven't you any brains?"

"Yessah, I got some brains, all right, but dey ain' no use to me now."

Mrs. O'Flarity is a charwoman and she has been absent from her duties for several days. Upon her return her employer asked her the reason for her absence.

"Sure, I 'bin carin' for wan of me sick children," she replied.

"And how many children have you, Mrs. O'Flarity?" she was asked.

"By the third wife of me second husband and three by the second wife of me first."

"Waiter," said a customer after "have you ever been to the zoo?" "have you ever been to the zoo?" "No sir."

"Well, you ought to go. You would enjoy seeing the turtles whizz past."

JACKSON COUNTY

Mrs. Mary E. Ford, aged 71 years, was struck Monday morning at Jackson by an auto driven by William Rothbuss of Wampler lake. The lady was taken to a hospital, but not in a serious condition.

At the examination held Monday before Judge Parkinson, circuit judge, Thomas Gleason, charged with felonious assault on Harley Mote, pleaded guilty, but after consultation with him the judge refused to accept the plea and held him for trial.

Brooklyn was not satisfied with the electric lighting service given them by Mr. Greene, who operated the plant there for many years, and the village bought it, made some changes and improvements, but after running it a few years they find that it is still not satisfactory.

They are figuring with F. D. Avis, manager of the Southern Michigan Light and Power Co., of Hudson, hoping that they or somebody else may be able to furnish sufficient light and power at a reasonable price.

Preliminary plans for establishing a civic center for Jackson county were formulated at a meeting of city and county representatives citizens at the City club in Jackson Monday evening. Every ward and township will have representatives at public meetings for the benefit of the county and growth of Jackson. A nominating committee recommended Harvey T. Woodfield as president; Mrs. C. W. Norman, vice-president; Lewis Atherton, secretary, and Wm. R. Spencer, treasurer, who will act as executive committee with one person from each ward and township.

SHOWS EARMARKS OF AGE

Collector of Genuine Antique Furniture Knows Little Points That Cannot Be Faked.

How long ago was the circular saw invented? If you aspire to become a collector of genuine antique furniture you should know the answer to the question. The circular saw was invented as far back as the year 1777. Therefore, no piece of Seventeenth century furniture should bear the tell-tale curved lines that a bent tooth in a circular saw makes. The maker of false antique furniture may copy the form of the original piece with comparative ease, but he has difficulty in giving it the appearance of genuine age. Boring wormholes is now regarded as dangerous; other methods of aging are preferred. For example, a gentleman who was visiting the shop of a prosperous country dealer in antique furniture noticed several rabbits inside an interesting carved coffee. "You know more about such things than I do," he remarked to his host, but unless I am strangely mistaken that is an original Sixteenth century coffer. How in the world can you put it to such a use? "It will be a Fifteenth century coffer when the rabbits have finished with it," was the cool reply.

Vacation is an annual experience that makes us thankful to stay at home the other 50 weeks.
