A Simple Guide to Proper Food Selection

Nourishment- Grape-Nuts with cream or good milk contains every element necessary for perfect nutrition.

Grape-Nuts is partially pre-digested by 20 hours'

baking. It is easily assimilated by child or adult. Grape-Nuts, made of wheat and barley, is sweet with natural sugar self-developed from the grain in the making. It has a delightful, nur-like flavor.

Grape-Nuts is real food-the kind you can de-

pend upon for strength and energy. Its crisp, granules invite thorough mastication, thus help-ing to keep the teeth and gums healthy.

rape-Nuts is so compact that a package con-

ins many servings; and each serving provides unusual nourishment. A portion for the cereal

Looking

at the Sun

Looking into one of the huge ro-

tary kilns where the raw materials for cement are burned into clinker

is just like looking at the noonday

The terrific heat required makes a glare of light so intense that the

glowing flame would temporarily blind you.

But borrow the workman's colored

goggles to protect your eyes while

you take another look into the kiln. Then you will see a tornado of

powdered coal—or gas or spraying

oil-bursting into a sheet of sun-

Into the other end of the kiln flow

As the slowly revolving kiln tumbles the

As the slowly revolving kiln tumbles the materials absolut, they are subjected io gradu-ally increasing heat. During their three-hour journey through this inderno, moisture and gases are first given off. Finally as the powdered-materials reach the sumwhile flame, they half melt into glasshard balls called "clinker." This dilows an earti-index and the subject of the sub-

This clinker, an entirely new chemical com-pound, when finely powdered is portland

Fortland cement kilns consume great quantities of fuel—30 pounds of coal or its equivalent for each 94 pound ack of cement. For the whole cement making process the consumption-off coal is approximately 50 pounds a sack-more than half a ton of coal a ton of coment.
