LETTERS FROM THE BOYS IN SERVICE

Dutch East Indies—I must write a few lines to let you know that I received the very lovely birthday card and want to thank all the Moms. It was very nice of them all to think of me on my birthday. Now I hadn't thought of it myself. The card helped out a lot.

Dear Mom: I received a very nice remembrance from you the other day and I just want to say that I certainly did appreciate it. A birthday doesn't lose its importance just because a war is going on—although having to spend that milestone birthday from home is a great impediment to the two years that I have been in the Army I have come to see so very clearly that you Moms are the driving force behind every man or woman in the Army. When you boil it right down it's this, I know what my mom and her letters are to me.

Thanking you again—and with great commendation for your cause I remain, respectfully, Forrest Cathey

SENATOR'S DEATH SPEEDS INVESTIGATION

(By Gene Altman) Despite reports of the implied act of corruption arising from the Lansing grand jury investigation, the state legislature received another shock Friday (Jan. 11) when the death of Senator Warren G. Hooper, Alcona Republican, was announced.

Hooper had previously implicated William Burr, executive secretary of the Michigan State Bank, in a bribery case. Hooper was executive secretary of the Michigan Association of Bankers and Trust Companies.

The murder of Hooper, who was found in a burning automobile near Springport, revealed for the first time the extent of the bribery case which had been kept in a "gray" conspiracy case.

MANCHESTER MILK PRODUCERS ASSOCIATION

The following letter was written in order to clear up several questions which were asked concerning the "milk ration" in the Upper pond. We believe it is self explanatory.

Manchester, Mich. Jan. 13, 1945. Dear Bill: I understand some questions have arisen in your mind about the use of War Fund money to maintain a skating pond on the Upper pond. We believe it is self explanatory.

As you know, Manchester raised \$100,000 in its War Fund drive under the chairmanship of Mr. Roy Carver, and \$400 was reserved for the Manchester Boy and Girl Scout organization. Consequently, the \$400 that is being used to maintain the skating pond.

The skating pond was brought before the War Fund Committee for approval, and was approved by the committee for the boys and girls of Manchester. The idea being that the public prefers to do the skating on the pond rather than on the streets.

BUTTER CONTINUES TO BE SCARCE HERE

"Sorry, Madam, no butter to sell," will probably ring in the ears of disappointed housewives for some time to come, despite the fact that milk production in this country has increased by approximately 17 billion pounds since the beginning of the European war, according to Howard F. Simmons, Secretary-Manager of the National Milk Producers' Association. He feels that only drastic changes in the present Federal rationing controlling the milk and dairy industries will relieve the present shortage of butter, as the milk producing farmers have already reached the peak of production with the machinery and livestock available.

"The explanation for the shortage is simple," said Simmons. Early in the war the War Food Administration wanted to increase the production of condensed, evaporated, powdered, and sterilized milk, and powdered skim milk, to take care of the armed forces and the government, and to provide a source of income for the farmer. The explanation for the shortage is simple, said Simmons.
