## I KNOW JUST HOW YOU FEEL! Even though I'm ready and waiting to go to work for you, my boss is having a mighty tough time trying

to get the necessary wire, poles, transformers and many other accessories needed to bring service to you. It's the first time in over 60 years that customers of Consumers Power Company have had to wait an unreasonably long time for connection to one lines.

Where lines can be run from existing transformers, orders for new electric service are being filled as promptly as the available supply of wire permits. And requests for service requiring the installation of new transformers will be filled in turn as quickly as this material is available.

If you are waiting for electric service, please bear with us. We are doing everything possible to hasten service to you.

# Meet our Boss: MRS. ROE

Who's the Big Boss of any business? That's easy-the person or persons who own the business!

In the case of Michigan Bell, our Big Boss is "Mrs. Richard Roe" and thousands of other thrifty folks who have invested in Bell System securities and provided the money for enlarging the system and improving the service.

Now let's see what Mrs. Roe's investment helped make possible. Here are just a few examples: . From 1020 through 1945, it has permitted the Bell

System to increase the number of telephones in service from 8 million to 22 million - almost 16 telephones for every hundred people in the United States. • It has provided the facilities for handling a recordbreaking billion and a half toll calls in 1945, compared to

360 million in 1920. • It has financed the development and installation of dial telephone equipment so that now 4 out of 5 telephones in Michigan, for example, are dial operated.

• It has paid for the construction of 75 million miles of wire and cable throughout the nation, and accomplished many other improvements too numerous to mention.

If this progress is to continue-more money will have to be obtained from more investors through the sale of additional Bell System securities. And, since investors naturally want a fair return on their savings, telephone rates should be sufficient to permit paying a reasonable rate of return.

Michigan Bell's "cost of living", like yours, has been rising rapidly. If it continues to go up, rate increases may become necessary to insure adequate earnings. In any event, Michigan Bell wants telephone rates no higher-and no lower-than necessary to operate the business efficiently . . . pay good wages . . . give a fair return to investors and, thereby, protect the future quality of the service we give you.
