REDS CONVERT NAZIS
WASHINGTON, Oct. 23.—Intelligence officials have sent the White House a highly important report on Soviet operations in Germany showing how the Russians have converted large segments of the old German army to the Communist banner.

Nucleus of the new Red-Nazi army is the old German Liberation committee, organized by the Russians when they captured general thousand Nazis at Staligrad. Field Marshal Friedrich Von Paulus, who surrendered at Staligrad, was chairman of this committee and appealed by radio to the Nazi army in Germany during the war urging them to desert Hitler and come over to the Russians.

Today thousands of Von Paulus' men and officers have been put through Russian schools designed to set them on sympathy for the Soviet and are ready to govern the Soviet zone of Germany.

Here are other salient points in the U. S. intelligence report:

1. The Russian zone is now more than twice as efficient a production unit as the American zone and three times as productive as the British zone.
2. The Russians are prepared to set up a government of their own in Germany if the British set up an autonomous German government in the western part of the Reich. It will be under Von Paulus.
3. The Russians are not retaining Germans for slave labor as generally expected. They are already setting a million and a half captured Nazis from Russia to the Soviet zone of Germany, where each has completed one year's schooling under Soviet instructors. Only a half million Germans still are being used as slave labor in Russia. These are the leading Nazis whom the Russians know they can't either convert or trust.
4. The U. S. intelligence report strongly recommends against an autonomous German government in the Anglo-American zone, as proposed by the British. It suggests instead agreement with the Russians on the control of Germany. It points out that unless agreement is reached, Germany again will be a source of a new world war in the not too distant future.

MINISTER AT WORK... James W. Carry, 21-year-old minister, contends that ministers should learn at first hand the problems of the working man. He stresses his contention by working on the assembly line of the Ford Rouge plant.

'GOOD FELLOW' Minister Takes Factory Job To Study Workers' Problems

WVU Features
DEARBORN, Mich.—To prove his contention that ministers should learn at first hand the problems of the working man, James W. Carry, 21, of Hastings, Neb., theological student at disciples divinity house, University of Chicago, spent his vacation working on the assembly line at the Rouge plant of Ford Motor company.

Carry, who believes that ministers in middle class parishes should spend more time working alongside their parishioners to learn their problems intimately, was one of four theological students employed at the plant.

Exchanging their ministerial garb for work clothes, the four theological students took their places beside the regular workers on an assembly line in the production factory. Like their fellow workers, they were paid at the regular hourly rate of \$1.25.

To round out their experience in intimate contact with the working man, the students spent a week at the CIO summer camp at Port Huron, Mich., after completing three months' work in the factory. Smart and likable, Carry was

IN THESE UNITED STATES Unique Floating Hospital Combines Gaiety, Health

NEW YORK—Multiply the ecstatic shrieks of any youngster on a boat ride by one hundred and you have some idea of the happy pandemonium which prevails aboard a unique floating hospital which combines a mixture of gaiety and health for thousands of New York youngsters every summer.

For 70 years, hundreds of youngsters should learn at first hand the problems of the working man. He stresses his contention by working on the assembly line of the Ford Rouge plant.

Some three million passengers recommended by various social agencies have contributed to the confusion during the 70 years of the ship's operation by St. John's guild, nonsectarian philanthropic organization.

Mothers preceded by four or five youngsters try vainly to keep their broods together as they board the \$6,000, specially-built Lloyd I. Seaman. The kids are up on the gangplank and hanging over the ship's rails before their mothers have a chance to set foot on board. The corps of old Seaman mariners on hand doubles between making sure no one falls overboard and carrying babies-in-batters out carrying—first step in giving the mothers as well as the children—a complete change of scene and rest.

As the floating hospital is pulled out of its berth by a tug—used to avoid any upsetting vibrations that might make the passengers seasick—there is a chorus of "hurrahs" and "here we go." From that moment until the ship docks again six or seven hours later, there isn't a moment's quiet on board—not even lunchtime.

The more than 900 mothers and children on board include social workers, nurses, clerks, crippled and disabled youngsters, and families recommended by churches, settlement houses and other community agencies. Wherever they come from, the youngsters are in holiday mood and gay.

BEHIND THE FRONT PAGE

Even those who dislike him will admit that Kim Sigler is an unusual candidate. He has demonstrated this by his ability to roll up a huge vote in the primary and also by his tactics of visiting every county in the state. I am afraid that I, among a lot of others, was very lukewarm to Sigler during the primary campaign. True I had heard of him in connection with the Grand Jury's investigations, but the reports circulated about him and his methods seemed to me to be somewhat biased.

THE RECORD SHOWS the REASONS for retaining

JUDGE JAMES R. BREAKEY JR.

Here is Judge Breakey's record:

He has cleared a docket, overcrowded with cases accumulated during Judge Sample's long illness;

Up to October 1, 1946 not one appeal from his decisions had been taken to the Michigan Supreme Court.

He has conducted the grand jury, started originally by Judge Sample, and has crushed the \$1,000,000-a-year gambling combine, 15 racketeers from various Michigan cities pleading guilty.

Judge Breakey's court has collected \$12,000 in costs to offset the \$12,000 appropriated for these investigations. He has turned over \$3,800 in fines to help our county libraries.

Still more important—Judge Breakey has introduced a procedure for psychiatric examination and probation for our wayward boys and girls, the juvenile delinquency cases. He has tempered justice with mercy.

For Washtenaw's bad divorce situation (more than 500 cases per year) Judge Breakey has introduced the pre-trial conference between all the parties, their attorneys and the judge.

Divorce actions make up 52% of the cases before the circuit court. Judge Breakey is married—happily married for 17 years. He presides over divorce cases with a sympathetic understanding of the distressing issues at stake. His decisions are rendered with a complete knowledge of the law and judicial procedure—to which is added full human experience.

Judge Breakey is a graduate of the U. of M. Law School; has practiced in state and county courts, as well as the U. S. Supreme Court. He is a member of the Washtenaw, State Bar of Michigan and American Bar Association; the American Legion and other civic and fraternal organizations.

Retain JUDGE JAMES R. BREAKEY JR.

GREEK TRAGEDY OF THE WAR . . . One of the most tragic ironies of the war through which the world has just passed is the condition in which the Italians left Greece. Today Greece is in worse shape than the nations of the vanquished. Former prosperous farmers are without buildings, few have cattle. One out of every five schools in Greece was destroyed by the invaders.

VEST POCKET WEISSMULLER . . . Duncan Richardson, born in Louisville, Ky., the son of Mr. and Mrs. Marshall Paul Richardson, is now in Hollywood. Duncan could scarcely be more at home in the water if he had been born with it. At four years of age, Duncan is a natural swimmer. He not only has excellent form, but also can do all kinds of aquatic dives, swims the crawl, back stroke, breast stroke and butterfly. He can swim the length of the average pool under water—and he enjoys every minute he is in the water.

VETERANS' PARADISE . . . Hunter college, New York City, largest women's college in the world, broke a Soviet precedent by opening enrollment to men. One thousand G.I.s enrolled. Here Gil Alexander, Jamaica, L. I., N. Y., carries a load of books for some of the girl students—and doesn't seem to mind the job.

SHARE HANDS AND GO IN FIGHTING . . . Joe Cronin, manager of the Boston Red Sox, and Eddie Dyer, manager of the St. Louis Cardinals, right, shake hands before the first game of the 1946 world series get under way—and again as it ended. Both managers were proud of their teams, winners in the National and American leagues, and both were popular with their fans as well as the fans who attended the world series at St. Louis and Boston.

Woman's World Some Extra Skirts Will Make Small Wardrobe Seem Larger

By Erta Haley

Ideal for Travel

THOSE of us who have small clothing budgets are constantly looking for ways to make them appear larger without adding too much extra expense to our allotment. One big help to such a wardrobe is an extra skirt or two, one for sports or casual wear and another one for dress-up occasions. Fortunately, these skirts can be added to the wardrobe if you are handy with a needle and happen to have a coat that is no longer fashionable. Perhaps you have a tweed sports coat that is showing too much wear. This can be ripped apart, and the inside of the material, which is still bright and new-looking—if it has been protected by a lining—can be fashioned into an attractive skirt.

Soft wool spring or fall coats or evening wraps might still be good, although out of date, and they can offer their material for the dressy skirt.

If you've done any amount of sewing, you know that making a skirt is really a simple matter, much easier than a blouse or even a dress. Tailoring and fit are very important, however, and every care should be taken to make the most of the fabric you are using.

If you are using an old coat for the skirt, rip apart all of the seams, since the skirt must be ready to stretch. Use a pattern that gives you attractive lines, and make sure that you have a material which will give the skirt the look you wish to make.

Pleating a Skirt Requires Care

If you have chosen to make a pleated skirt, work on a flat surface and have your basting thread and needles handy, as you will need all these helps.

Place the center of the zipper exactly over the seam line, with the slider down. Pin fastener in place easing fabric slightly and using the pins crosswise.

Basic fastener in place, using large catch stitches and keeping straight and neat. Remove pins and turn over the skirt.

Make a pocket at the top of the placket by stitching the top of the placket to conceal the zipper by basting 1/2 inch below the top of the seam line and make the shaped ends 1/2 of an inch wide across the top. Press needles at the corners when stitching in the zipper.

All sewing authorities tell us that it is much easier to insert the zipper when it is closed. If there is enough material at the opening for this fastener, it may be folded and stitched as above to conceal the zipper. If there is not enough material at the seam to do this, an extra piece will have to be stitched in before putting in the zipper to conceal it.

Do not remove the stitching on the zipper or the seam until the work is completed.

Too much can never be said on the importance of having hems properly sewed. But before this can be done, see that you have selected the proper length for your skirt. Have someone else pin it up for you, if possible, or use one of the hem markers if you must do your own.

Use a binding at the hem so that it can be stitched properly without being too bulky.

Make It Wear!

Careful finishing of a garment means longer wear, whether you are buying a garment or making it yourself. Check the following points to see whether garment is well finished:

1. Stitching on buttonholes should be firm with no sign of fraying. See that buttons are sewed firmly and not slant.

2. Check to see if all plackets are neatly finished, trim and not bulky.

3. Examine stitching to see that it is even and neat, and that all seams are held together. The thread should match the fabric so well that you cannot tell too much of a difference between them.

4. All seams should be at least 1/2 inch deep. Pinned seams are used for firm weaves otherwise fabric will fray. Bound seams are best for loosely woven fabrics. French seams are best for lightweight fabrics while a double stitched seam prevents fraying in a heavier type of fabric.

5. Hemline should be straight and of a length becoming to the wearer. It should be of the same depth all the way around, finished with seam binding or turned under.

Fall Fashion Notes

Necklines have taken to trimming. You'll be in vogue if you have yours trimmed with pearls or sequins, and your bodies show—remember!—diamonds or diamonds.

Long forgotten, ingenious noses are added to many sportswear with elegant sleeves, elegant shoulder lines, and fur. Skirts are slightly shorter in some cases, but the knee will remain well covered.

Black is the smart thing to wear when you go to the city. It always looks neat and smart, and pearl accessories show off well with it. There's much pocket interest in the new suits. Some of them have broad flared collars are deeply curved. There's interesting stitching on some of them too—all of which adds a simple and elegant decorative note to the costume.

IT ALL ADDS UP TO MORE

1 In Michigan Bell central offices, men are busy installing enough telephone equipment this year to serve about 1,000 additional lines, many of them in rural areas.

2 More than 5,000 miles of wire have been added in Michigan Bell's central offices this year. These wires will allow making to the central offices, Michigan Bell will use about 1,200,000 cross-arms on some 60,000 new poles this year.

3 Bringing wire from the road to the house is the most time-consuming step in installing a telephone line. Michigan Bell's new telephone service, particularly in view of the many material shortages which hamper the job.

From where I sit... by Joe Marsh

Friendship—Three Thousand Miles Apart

Ever play chess? It's a great game! One of the strongest friendships I know of started with a game of chess—between Dad Hoshkins in our town, and a man named Dalton Barnes, in England.

They've never seen each other, never met. But for the past eight years they've been playing chess by mail together—Dad puzzling over Dalton's latest letter, while he sends a chart of his next move to England.

Dad always thinks best with a mellow glass of beer beside his

chessboard. And the Englishman writes him that he does the same. "You know, it's almost as if we shared a glass of beer together, too!" says Dad contentedly.

From where I sit, you can talk about diplomacy and foreign policy, but it's often those little things—like a game of chess or a glass of beer—that can make for tolerance and understanding... between people of all nations... between neighbors here at home!
