THAN MOST OTHER THINGS YOU BUY

The recent immense in Michigan Bell rates—the first in nearly a quarter of a century—plus the new one now being asked, would boost the average customer's bill only about 25% over prewar telephone rates. Most businesses have had to raise their prices not once but many times. Compared with other prices, as you can see from the chart, telephone rates will still be low.

> MICHIGAN BELL TAKES IN MORE . . . BUT HAS LESS LEFT

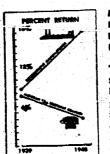

With all the telephones being put in, perhaps you've assumed that we're making a lot of money. With the recent increase in rates, our "revenue"—the money we take in—is up . . . 180% over 1939. But the cost of giving you service has gone up even faster . . . 237%. Wages, for example, make up more than half of our total expense and our wage bill is now over four times as big as in 1939. And the return on the money people have invested in our business is down more than a third.

TODAY EACH NEW TELEPHONE COSTS MORE ... AND EARNS LESS

ADEQUATE TELEPHONE RATES ARE MEEDED

It all boils down to this: The money to provide you with the service you want can be obtained from investors only if their return is adequate. Unfortunately, it's not. So, although we'd rather not be asking for this second rate increase, adequate rates are needed—and needed right away—to protect the future quality of your telephone service.

Big Program

Refreshments, a thin sandwich
and two clives, had just been
served at the town dance in the "Is your program filled?" asked s local Romeo of a hilbidly belle shen the dancing was resumed. "Filled!" glared the girl. "Look sere, young feller, it takes more than a skinny sandwich and two green plums to fill my program."

Tricks of the Trade Tricks of the Trade

The night was dark and the
hour was late as a solitary waytarer passed along the descrice
street. Suddenly three slinking
feares emerged from the shafews, marked their prey, and
hen attacked him.

Three to one is powerful odds,
but the wayfarer held his own.
Due by one his assailants landed
with a thud on the ground, batlered and bruised, their clothing
horn.

A policeman hurried up and surveyed the wreckage.

"Fine work!" he said, addressing the hero, who was calmly lighting a cigarette. "Ju-jitsu!"

"No," answered the hero. "Railing porter."

You can breeze through a good part of your Christmas shopping by simplifying your gift list. It's probably a fact that a good many of your friends enjoy cigarette or pipe smoking. You can easily please these friends by ordering several cartons of mild, mellow Cameis and pound ties of rich-tasting Prance Albert from a local dealer. Both these popular gifts come ready-wrapped in gay holidary dress. No other gift wrapping is necessary. There's even space for your personal greeting.

KEEPING HEALTHY

#### Watching Emotions in Teen-Agers By Dr. James W. Barton

ONE of the problems for parents and physicians is the way the average boy at puberty dislikes admitting that he is not well physical which he must give and take is

his "drawn" appearance or lack of energy.

While the boy who denies any symptoms of illness is a cause of anxiety to his parents, the boy who "leans" on any slight physical disability as the reason for not measuring up in work or play really should be a cause of still greater anxiety.

within himself or berself, avoid playmates, and store up a neurosis.

Instead of the excess fat being "worried" off them, as normal fat is worried off those of normal weight or underweight, the fat deposits increase as the excess food is eaten and there is no work or play to remove it.

HEALTH NOTES ★

\*

As every pound of fat holds three pounds of water, removing a pound of fat by exercise or eating less food means loss of four pounds of weight.

Two conditions which extremely a push recatilessness are eating to much the control of the control of

breathlessness are eating too much abaving a blocked nose which does not allow enough oxygen to reach the lungs and purify like blood.

Best method for inducing sleep is to take a few minutes' exercise or a warm bath immediately before retiring. This generally will bring sleep in most cases.

"I NEED ANOTHER BLANKET!"

which he must give and take is likely to become a dervous or neurotic adult.

Physical disability of any sort is reacted to as a tremendous threat to prestige and in the competitive relationship which characterizes the attitude of the adolescent or teenage bey.

He just does not want to be considered weak enough to be sick or have any physical disability. Yet if he is not well, trying to play hard with thin blood or some infection of the teeth, gums or tonsils, considerable harm can be done physically if his parents fail to notice his "drawn" appearance or lack of energy.

While the boy who denies any which competitive relationship where the property of the competitive relationship which characterizes the attitude of the spent in play is spent in some other way.

Unfortunately, many of those boys and girls at or approaching the paberty age spend much of their spare time is eating rich, starchy feeds. Instead of this extra food being used or burned in play, it is stored in the body as fat.

A fat child, and particularly a very fat girl, is likely to draw playmates, and store up a neurosis.
