MICHIGAN MIRROR HOW'S BUSINESS IN MICHIGAN? Industrial employment is off 6 per cent as a state average...

AT A CAPITOL conference on Michigan economic trends, Gov. G. Mennen Williams reported that Michigan's center of critical industrial activity was first in the Nation as a war boom town...

It is interesting to note that the state's total of employed citizens, despite the current deflation in industry, is pretty much the same today as it was one year ago...

HOW'S THE tourist business? Reflecting the general business downturn, tourist patronage is reported to be less than one year ago...

MERCHANTS CANNOT complain unduly, either. Retail trade corrected for price level on a national scale has dipped only a trifling 1 per cent below its 1948 peak...

MAURICE EVELAND, banking commissioner, reports that the 357 state banks are bulging with savings deposits...

GOVERNOR WILLIAMS has indicated he is sending up a program, perhaps along the line of President Truman's "Fair Deal" for the legislature to consider...

VOLUME EIGHTY-TWO MANCHESTER, MICHIGAN THURSDAY, JULY 21, 1949 NO. 44

**Hardware And Implement News**  
By Dresselhouse & Davitt

THE Weather continues hot and the flies and mosquitoes are bad and to help out we have obtained a quantity of Fly Spray made by the National Oil Co. in bulk that we will sell for 99c a gallon. Be sure and bring your container.

BY THE time that this rolls off the press we will have a John Deere Model MT Tractor. In the past it has been next to impossible to get a spray nozzle that would stand up to pressure and not leak but at which last we have found one which

we can guarantee not to and if it does, bring it back and we will give you one that will not. These are lever action nozzles that you can set to spray any amount of water that you want.

FOR the balance of the season we will sell all the lawn mowers that we have in stock, both hand and power, at a discount of 15 percent. So here is your chance to buy a good mower at a greatly reduced price.

Watch for woody plants one to two feet high with leaf stalks each bearing three separate leaflets, he says, it also occurs as a climbing vine in trees and fence poles. New leaves are usually shiny green on top and lighter on the underside. The leaves are rounded at the base, tapering to a sharp point.

An effective control method is the use of ester forms of 2,4-D, sprayed according to directions. The 2,4-D should be kept away from vegetable plants and similar crops and should not be sprayed on ivy or under or around trees, due to the possibility of injuring the other vegetation. A relative of 2,4-D known as 2,4,5-T is more effective on ivy but is about twice as expensive.

A solution of three-fourths to one pound of ammonium sulfamate (ammate) per gallon of water sprayed on the leaves is also effective. If the area can be treated without injuring other useful or decorative plants, sprinkle crude borax on the ground around the plants. Use 15 pounds of borax for each square rod. Since poison ivy is a perennial, repeated applications of water sprayed on the leaves are necessary. For severe cases see a doctor. Baking soda or epsom salts dissolved in warm water will used as a soak treatment sometimes ease the discomfort.

What's that wonderful new "feel" you hear everyone raving about? It's the result of many things.

It's the ground-hugging, level "feel" of Ford's new "Mid Ship" Ride. You sit cradled between shafts—not over them—in the new lower center section.

It's the smooth cart-stopping "feel" of Ford's new "Magic Action" Brakes. Only Ford in its field offers you 176 square inches of lining area. Only Ford brakes that are fully self-energizing to stop you 35% faster.

It's the "feel" of surging power in Ford's new 100-hp. V-8 and 95-hp. 6-cylinder engines. Only Ford in its field offers you this choice of power... only Ford, a V-type engine (the type used in America's costlier cars)... only Ford, 8 cylinders... only Ford, 100 horsepower.

And behind that new "feel" are many other Ford "feels". New "Hydra-Goil" and "Para-Flex" Springs that smooth out the bumps. The new "Life-guard" Body and frame structure—50% more rigid. New "Solo-Wide" Seat—more body and shoulder room than any other car in its field. New "Finger-Tip" Control gives you the "feel" of easy steering.

And with the new "feel" comes new class-smooth styling. The famed New York Fashion Academy judged Ford the "Fashion Car of the Year."

Come in for a ride and see why you should order your Ford now.

**2 12-inch plows, cultivate two rows of corn and has two Touch-O-Matic Hydraulic controls, one for each side of the cultivator. If you are in the market, it will pay you to look this one over. Yours truly until next time.**

**Every Michigan farm family should use Farm Safety Week, July 24 to 30, to check up on and repair unsafe farm machinery, brakes, seats and steps are in safe condition. Do not try to adjust or unclog machinery while it is operating. Keep an alert watchful eye on combines, threshing machines, corn pickers and shredders, cutting equipment, shafting, bolting and gears. Don't wear loose, floppy or torn clothing which may catch in revolving machinery. Keep your small children away from tractors and harvesting machinery.**

Careless handling of farm animals results in many painful injuries each year. Domestic horses, bulls and cows are dangerous animals. Approach all horses and cows with a reassuring word or pat. Keep feet away from cow's hooves. See that harnesses are safe. Have a sturdy bull pen.

Falls down loose steps, open hay chutes, off hay wagons, down dark or cluttered barn steps and from cracked ladder rungs disable farmers every day. Dr. Heustis advised: "Knowing that a hazard exists, is not enough, the hazard must be eliminated. An injury to yourself or your farm hand costs your family its security. Harvest time is especially on your tractor; inspect and repair your harvesting machine. Michigan can be cut drastically."

Watch for woody plants one to two feet high with leaf stalks each bearing three separate leaflets, he says, it also occurs as a climbing vine in trees and fence poles. New leaves are usually shiny green on top and lighter on the underside. The leaves are rounded at the base, tapering to a sharp point.

An effective control method is the use of ester forms of D.D. sprayed according to directions. The 2-4-D should be kept away from vegetable plants and similar crops and should not be sprayed on ivy or under or in the shade of trees, due to the possibility of injuring the other vegetation. A relative of 2-4-D known as 2,4,5-T is more effective on ivy but is about twice as expensive.

A solution of three-fourths to one pound of ammonium sulfamate (ammate) per gallon of water sprayed on the leaves is also effective. If the area can be treated without injuring other useful or decorative plants, sprinkle crude borax on the ground around the plants. Use 15 pounds of borax for each square rod. Since poison ivy is a perennial, repeated applications of water sprayed on the leaves are necessary. For severe cases see a doctor. Baking soda or epsom salts dissolved in warm water will used as a soak treatment sometimes ease the discomfort.

2 12-inch plows, cultivate two rows of corn and has two tools. O-Matic Hydraulic controls, one for each side of the cultivator. If you are in the market, it will pay you to look this one over. Yours truly until next time.

Every Michigan farm family should use Farm Safety Week, July 24 to 30, to check up on and repair unsafe farm machinery, brakes, seats and steps are in safe condition. Do not try to adjust or unclog machinery while it is operating. Keep an alert watchful eye on combines, threshing machines, corn pickers and shredders, cutting equipment, shafting, bolting and gears. Don't wear loose, floppy or torn clothing which may catch in revolving machinery. Keep your small children away from tractors and harvesting machinery.

Careless handling of farm animals results in many painful injuries each year. Domestic horses, bulls and cows are dangerous animals. Approach all horses and cows with a reassuring word or pat. Keep feet away from cow's hooves. See that harnesses are safe. Have a sturdy bull pen.

Falls down loose steps, open hay chutes, off hay wagons, down dark or cluttered barn steps and from cracked ladder rungs disable farmers every day. Dr. Heustis advised: "Knowing that a hazard exists, is not enough, the hazard must be eliminated. An injury to yourself or your farm hand cost your family its security. Harvest time is especially on your tractor; inspect and repair your harvesting machine. Michigan can be cut drastically."

**What's that wonderful new Ford "feel" you hear everyone raving about? It's the result of many things.**

It's the ground-hugging, level "feel" of Ford's new "Mid Ship" Ride. You sit cradled between shafts—not over them—in the new lower center section.

It's the smooth care-stopping "feel" of Ford's new "Magic Action" Brakes. Only Ford in its field offers you 176 square inches of lining area. Only Ford brakes that are fully self-energizing to stop you 35% faster.

It's the "feel" of surging power in Ford's new 100-hp. V-8 and 95-hp. 6-cylinder engines. Only Ford in its field offers you this choice of power . . . only Ford, a V-type engine (the type used in America's costlier cars) . . . only Ford, 8 cylinders . . . only Ford, 100 horsepower.

And behind that new Ford "feel" are many other Ford "feels". New "Hydra-Guid" and "Para-Flex" Springs that smooth out the bumps. The new "Life-guard" Body and frame structure—50% more rigid. New "Solo-Wide" Seat—more body and shoulder room than any other car in its field. New "Finger-Tip" Control gives you the "feel" of easy steering.

And with the new "feel" comes new class-smooth styling. The famed New York Fashion Academy judged Ford the "Fashion Car of the Year."

Come in for a ride and see why you should order your Ford now.

**Michigan Is Slipping As A Tourist State**

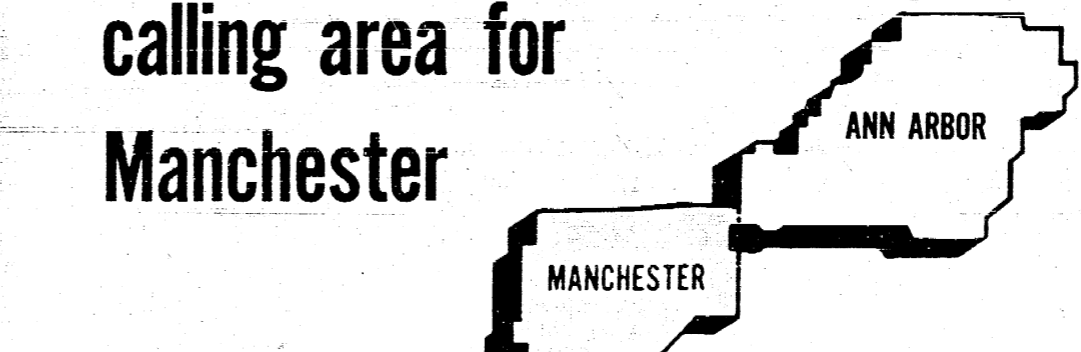

Michigan slipping as a tourist state? The Michigan Press Association's annual survey of the state's tourism industry reveals that Michigan is slipping as a tourist state. The survey, which is the most comprehensive of its kind in the nation, shows that Michigan's tourism industry is losing ground to other states. The survey is based on a questionnaire sent to 100 leading tourism organizations in Michigan and other states. The results show that Michigan's tourism industry is losing ground to other states. The survey is based on a questionnaire sent to 100 leading tourism organizations in Michigan and other states. The results show that Michigan's tourism industry is losing ground to other states.

**See Your FORD Dealer!**

**Coming July 31**

**A LARGER local telephone calling area for Manchester**

**MICHIGAN BELL TELEPHONE COMPANY**

JULY 31 will mark an important improvement in telephone service for Manchester... the introduction of extended area service.

On that day, Manchester's local, toll-free calling area will be enlarged. Manchester telephone subscribers will be able to reach nearly 17,000 telephones without toll charges—22 times as many as they can today.

Manchester telephone subscribers will be able to call and be called by ANN ARBOR subscribers without toll charges.

Through the years, a natural community of interest has been built up between Manchester and Ann Arbor. Friendships have developed. People buy and sell back and forth. The life of Manchester has become linked with that of Ann Arbor.

In communities where extended area service already has been introduced, the number of calls between the communities involved has increased 2 to 5 times. With Manchester's enlarged local calling area, telephone service will be geared to modern telephone needs and will become more valuable and useful than ever.

New rates, based on the increased number of telephones you will be able to reach toll-free, have been approved by the Michigan Public Service Commission and will become effective July 31.

Prior to that date, Manchester telephone subscribers will receive complete information on extended area service, including the new rates. A new Ann Arbor telephone directory also will be sent to subscribers. Watch for this material!

**Record Tourist Trade Seen for State in '49**

LANSING—Tourist travel in Michigan during the 1949 season is expected to hit a new post-war peak, surpassing even the bonanza vacation trade of 1947 and 1948, a survey of the latest seasonal trends by the International Geneva association, world-wide hotel employees' organization, discloses.

The bright outlook for the 1949 summer season, explains Frank A. Ludwig, I.G.A. executive, is based on such factors as the 100 per cent increase in the number of vacation inquiries pouring into the office of the Michigan Tourist Council and four regional tourist associations in the state.

Last year, when just half as many vacation inquiries had been received in the corresponding period, traffic on main highways rose nine per cent over 1947 traffic at the Straits of Mackinac increased 10 per cent, bus lines serving resort areas carried five per cent more passengers and the railroad reported a 10 to 12 per cent increase in the number of visitors to Mackinac Island reached an all-time high in 1948 and at the same time Michigan's state parks were up three per cent.

Michigan's resort, motel, cabin and hotel operators may lower their rates this year as a result of the general downward trend in labor, food and material costs. The survey indicated, Michigan vacationers will find some lower prices for quality liquors, especially in the Lake Huron area.
