asked to bring their own table also gave a very interesting talk also gave a very interesting talk are sorted.

Arbor Monday.

Mrs. E. L. Bentschneider of Mapoleon spent Monday with her son and wife, Mr. and Brs.

Bentschneider of material for this art. She has been making an extensive study of this work for the past few years and her rugs were very good examples of her interest in this work.

Undetent Fever in Man Traced to Bracellosis The identical germ that causes the dread brucellosis or Bang's disease in animals is responsible for undulant fever in man," says Dr. Fred E. Allen, University of New Hampshire vetermarian, in answer to one of the most popular questions he is asked about this disease. However, Dr. Allen continues, humans rarely, if ever, transmit the disease to one another. If humans do not carry the disease among themselves, animals obviously are the chief carriers and sources of infection, Cattle, swine and goats seem to be the three main carriers according to the work carried on by the state-federal eradication agency, and the U.S. department of agriculture. According to these scientists, and Dr. Allen agrees, there is strong evidence that unpasteurized mith is responsible for many cases of undulant fever in man, However, allehough undulant fever is often caused by the cattle type of brucellosis, numerous cases have been reported as caused by contact with infected swine and goats. Factual data on the incidence of brucellosis in goats and swine is	MANO PU • WHERE PRIO GROCERIES Ring or Large Bologna Skinless Wieners Smoked Picnics Enriched White	CHESTER, MICHIGAN RE FOOD STORES E TELLS and QUALITY SELLS: MEATS VEGETABLES Lb. Undicinal Fever in Man Traced to Brucollosis "The identical germ that causes the dread brucellosis or Bang's disease in animals is responsible for undulant fever in man," says Dr. Fred E. Allen, University of New Hampshire veterinarian, in answer to one of the most popular questions he is asked about this disease. However, Dr. Allen continues humans rarely, if ever, transmit the disease to one another. If humans do not carry the disease among themselves, animals obviously are the chief carriers and sources of infection. Cattle, swine and goats seem to be the three main carriers according to the work carried on by the state-federal eradication agency, and the U.S. department of agriculture. According to these scientists, and Dr. Allen agrees, there is strong evidence that unpasteurized milk is responsible for many cases of undulant fever in man. However, although undulant fever is often caused by the cattle type of brucellosis, numerous cases have been reported as caused by contact with infected swine and goats. Factual data on the incidence of brucellosis in goats and contact in goats in goats and the present in adequate, but the eradication agencies are working on this problem. At present it is believed that the disease in goats	MANO PU • WHERE PRICE GROCERIES Ring or Large Bologna Skinless Wieners Smoked Picnics Enriched White Bread	CHESTER, MICHIGAN RE FOOD STORES TO TELLS and QUALITY SELLS: MEATS VEGETABLES Lb. governor to "repudiate" the is per cent corporation tax in view of the improved financial outlook.

The federal government's \$5 billion deficit makes Michigan look like a piker. Even a \$25, 000,000 Lansing deficit by June 30, 1950 would be peanuts by comparison. Who's worried about conventional marror.

CUSTOM SLAUGHTERING

It's a good winter idea to find out the mechanical condition of your All-Crop harvester. Worn or broken parts should be located now—while your All-Crop is idle.

We will come to your farm and make a free inspection in your machine shed. You get a detailed record made on the spot.

If your All-Crop needs repairs, we can give you immediate service, save you waiting at harvest time.

Look for the banner on our window...stop in ...

REGISTER NOW for Complete 24 POINT INSPECTION of your All-Crop harvester
