Postmaster Proclaims Mail Box Week

Postmaster General Arthur E. Summerfield has announced the week beginning May 17th as "Mail Box Improvement Week." This will be the 10th consecutive campaign to tidy up the official mail receptacles.

Postmaster George Merriman is requesting the rural patrons in this area to repair and beautify their mail box equipment and approaches to help lend brightness to the scenic beauty of the highways, roads and drives.

The Post Office Department is the most important agency in keeping the people of the nation informed. The rural delivery is a post office on wheels and many times these services are taken for granted and fully appreciated.

Civil Law Reflects God's Law

By Reverend James J. Connel
 It is not surprising that the citizens of a nation, the women who form the rank and file of the population, determine the stability and happiness of the nation.
 Even though the rulers of our country may not agree with the principles of a higher law, a higher law of God, the citizen must stand for the principles of the higher law.
 It is the duty of every citizen to stand for the principles of the higher law, the law of God.
 The law of God is the basis of all human laws. It is the law of love, the law of justice, the law of mercy.
 The law of God is the law of life, the law of hope, the law of peace.
 The law of God is the law of truth, the law of honesty, the law of integrity.
 The law of God is the law of freedom, the law of democracy, the law of self-government.
 The law of God is the law of service, the law of sacrifice, the law of love.
 The law of God is the law of life, the law of hope, the law of peace, the law of truth, the law of honesty, the law of integrity, the law of freedom, the law of democracy, the law of self-government, the law of service, the law of sacrifice, the law of love.

Crime Caused By Moral Indifference

By J. Edgar Hoover, Director, Federal Bureau of Investigation
 TOO OFTEN the downfall of a nation results when individuals outlaw God, destroy the moral code, and worship at the altar of materialism.
 The ancient glories of Greece and Rome were destroyed by the cancerous growth of moral indifference. Men belied their science, but we allow conditions to exist which produce a materialistic way of life.
 The well-being of our nation is seriously challenged by crime. We take pride in the progress we have made in the arts and sciences, but we allow conditions to exist which produce a materialistic way of life.

Potato Men Urged Not To Boost Acres

Michigan potato growers who increase their acreage this year can expect better from the government's potato purchase program. That's the word from George N. Mott, Michigan State College marketing specialist.
 The purchases are made under the government call "Section 39" funds and the program goes mostly for use by welfare agencies, school lunch programs and other institutions.
 The purchase plan is not a direct price support program. The "Section 39" funds are very limited and are used only to soften the consequences of seasonal market gluts. The U. S. Department of Agriculture's average and marketing guide for Michigan suggests that growers in this state should not increase their potato acreage over that of 1953 in order to help avoid surpluses.

Up Planting Rate For Top Corn Yields

Don't be stingy with your seed when you plant corn if you want the best yields. Michigan State College farm experiment suggests 16,000 plants per acre if you have good corn land. That's in contrast to what farmers on good ground usually plant—about 10,000 plants per acre, on lighter or less productive soil, however, your planter should be adjusted to put out less seeds per acre.

Farm Notes

There's too much corn, too much wheat, too much of all the crops that have been paying best, consequently farmers this year will be growing a lot more grains.
