Exchange Club To Plan Economy Run Set For Sunday, October 24 Here

At the Exchange club meeting Monday night Robert Hamilton, chairman of the Steer Club committee gave a full report on a successful steer club season, to the 32 members and 4 guests present. Robert stated that the group that any excess money taken at the football games would be turned over to the club for payment of ward the fence.

Frank Reck was named chairman for the annual Economy Run which is slated for Sunday, October 24 and he reported that Brooks Clinton, Tecumseh and Detroit schools have indicated that they will be asked to join.

Driver training leaders in schools will lay out routes. The Exchange club will sponsor the local group and offer scholastic winners prizes.

The club voted to send a delegation to next year's State Exchange club convention, which will be held at the Great Lakes Hotel in Ann Arbor to join with townspeople and University of Michigan students to eat a piece of birthday cake and pay homage to the President, James Locks from Grandville, a student at the University, has been named general chairman of the event. Mr. Locks is also the campaign manager of the Young Republicans for the Second Congressional District.

Gale Koebke, a senior in the high school, is reported to be ill with pneumonia.

Frida's game will be with Hartland here.

Smitty's Not-So-Silent Partner

Dropped into Smitty's gas station last week and met his new partner who turned out to be a real talker.

"What'll it be?" asked Smitty. Before I had a chance to answer I heard a strange voice "I'll be up! I'll be up!" And there was Smitty's partner—one of those parakeets perched next to the gas pump.

"Look me a mouth," Smitty said. "I finally taught him to say those magic words. It's sure paid off—he's had a good influence on my customer."

Joe Marsh

Pres. Eisenhower Birthday Party

The Young Republican Club of the University of Michigan announced plans to hold a birthday party in honor of President Eisenhower on Oct. 13. The celebration in the form of a state-of-the-art political rally will be held in the ballroom of the Michigan Union. Young Republicans from all over the state are expected to gather in Ann Arbor to join with townspeople and University of Michigan students to eat a piece of birthday cake and pay homage to the President, James Locks from Grandville, a student at the University, has been named general chairman of the event. Mr. Locks is also the campaign manager of the Young Republicans for the Second Congressional District.

L. C. Reimann Dem. Candidate State Senator

Mr. Lewis C. Reimann of 1725 Lansdowne, Ann Arbor, announced his candidacy for State Senator on June 8, 1954. He previously was a candidate for mayor of Ann Arbor in the spring election of 1951.

A native of the Upper Peninsula, Mr. Reimann came to Westland County in 1912, graduated from the University in 1916 and remained in Ann Arbor to make it his permanent home. While at the University he played tackle under the late Fielding H. Yost and took a year in the law school. He was also Big Ten champion heavyweight wrestler.

For 22 years, Mr. Reimann was the owner and director of summer camps for youth. Since 1948, he has been a national camp consultant and writer. Three of his books on early Michigan have become best sellers in their fields.

Very active in community affairs, Mr. Reimann is now president of the Protestant Foundation for International Students and alumni representative on the Board of the Student Reliance Association.

Check Grains For Insects

Don't forget that stored grain. Examining it often, says Dr. R. J. Lovett, county agricultural agent. Extension entomologist Ray Jones has warned that early fall can be a time of great insect damage to stored grain—no matter as the weather stays moderate.

Fumigation is the only method to control the grain pests, he says. Some grain stores (chloride and carbon tetrachloride) and others use this same mixture with the addition of methyl bromide.

Both are effective, Jones indicates, and can be purchased at an elevator or farm supply house.

Follow manufacturers' directions to the letter, he warns, because the mixture can harm the person using it.

Be sure to check the upper portion of the grain to see if it's matted. Jones suggests, if it is matted, treat that area carefully because damage is being done by moths. And he adds this other precaution:

Dr. Lovett states that the methyl bromide referred to in the above story may not be readily available in Michigan. It would be better to substitute the chemical ethylene dibromide.

BOAST DUCK WITH NUT DRESSING

Some folks prefer to pick their ducks dry while others choose the wet-pick method. Dipping the game birds in scalding water time and again to loosen the feathers.

Since some ducks seem to have better feather pinions than others, the birds are actually partly cooked in the wet-pick process. This inadvertent steaming is harmless if the birds are to be used immediately. However, if they are to be kept for several days or frozen, it is advisable to dry pick them—or at least hold dunking in hot water to a very minimum.

Here is a delicious nut dressing for roast wild duck. Chop 1/2 cup pecans, 1/4 cup pecans and 1/4 cup almonds very fine and mix with 1 1/2 cups cracker crumbs and 1 small onion chopped fine. Season with 1/2 teaspoon salt, 1/4 teaspoon cayenne pepper and 1/4 teaspoon cayenne pepper. Work in 3 tablespoons soft butter, then stir in 1/4 cup full cream. Stuff duck. Cover breast with strips of bacon and roast in hot oven (425 degrees) 15 to 20 minutes for small ducks and 30 to 60 minutes for large.

When you feed corn silage, make allowance for the corn in the silage when you feed. Never get off the tractor seat while harvesting corn without first throwing the picker out of gear. M. S. C. safety special.

Boysville To Hold Open House

In grounds and rooms shine like a diamond's facets, Columbus (Charles), now engaged in a much more modest promotion to make funds for Boysville. This event takes place in November at the thousands of distinguished visitors.

Moisture is the biggest problem in a drier and is solved in several ways. Sometimes, water is vented outdoors. Because this will be included in the installation, you should want to consider this feature when you make your choice.

If not vented, excess moisture, the moisture that is in the laundered clothes is thrown out into the room. This is harmful to paint and wooden surfaces. However, some driers avoid this by using a stream of cold water to condense the moisture and carry it to the drain. This requires a plumbing installation.

Still another drier condenses the moisture by a cold air draft. The water is collected in a pan at the bottom of the drier. The pan is emptied after each use. Or the water may be piped to the drain.

You may choose between a gas and an electric drier. Cost of operation will depend on the type of power you use most in your home and the power rates in your locality in which you live. Usually, Miss Ketchum says, a gas drier is less expensive, operates than an electric one.

SOIL DISTRICT SPEAKERS VISIT: \$2,400 OFFERED

An all-expense-paid trip to San Diego plus prizes amounting to \$2,400.

Candidates like giveaway contest and that's what it is—only this time the prizes are for farmers only.

A thousand dollars in prize money and a trip to the West Coast is the award for the winner of a public speaking contest on "Water Problems in My Soil Conservation District and On My Farm."

The contest is sponsored by the National Association of Soil Conservation Districts and is open only to cooperators of soil conservation programs. The awards were announced by Russell G. Hill, extension specialist in soil conservation at Michigan State College and executive secretary of the State Soil Conservation Committee in person.

The winner will go to the National Soil Conservation Convention at San Diego, Feb. 1-3, 1955. The U. S. has been divided into 7 regions with the winner to represent his region.

Michigan is required to submit tape recordings with their written entries if they cannot appear before the state judging committee in person.

Entries must be received by the committee at 412 Agricultural Hall, M. S. C., East Lansing, not later than Nov. 15. The Michigan Association of Soil Conservation Districts will provide cash awards to the top two state winners.

WANT CLOTHES DRIER? SAVE THIS OFFER!

What should you look for in an automatic clothes drier? That's what you should look for when they think of the sunnier winter washdays ahead.

Lucille Ketchum, extension home management specialist at Michigan State College has 3 suggestions:

Moisture is the biggest problem in a drier and is solved in several ways. Sometimes, water is vented outdoors. Because this will be included in the installation, you should want to consider this feature when you make your choice.

If not vented, excess moisture, the moisture that is in the laundered clothes is thrown out into the room. This is harmful to paint and wooden surfaces. However, some driers avoid this by using a stream of cold water to condense the moisture and carry it to the drain. This requires a plumbing installation.

Still another drier condenses the moisture by a cold air draft. The water is collected in a pan at the bottom of the drier. The pan is emptied after each use. Or the water may be piped to the drain.

You may choose between a gas and an electric drier. Cost of operation will depend on the type of power you use most in your home and the power rates in your locality in which you live. Usually, Miss Ketchum says, a gas drier is less expensive, operates than an electric one.

Knowing Your Skin Tone Helps Give You Glamour

American women may be beauty-conscious—but many are not beauty-wise, according to a nationwide survey which revealed that many women do not know their own skin tones.

Today's beauty-women, according to Madame Helena Rubinstein, who selected six New York models to demonstrate the six basic skin tones, can enhance their appearance by selecting makeup, apparel and holiday shades to complement their skin tones.

"Determine your skin tone," she says, "and you will find the right shades for your face, hair, eyes and wardrobe."

Madame Rubinstein, who has been called the "queen of cosmetics," says that a woman's skin tone is determined by the amount of melanin in her skin. She says that a woman with a fair complexion should use light shades, while a woman with a dark complexion should use dark shades.

She also says that a woman's skin tone can be improved by using a good skin cream and by avoiding excessive sunbathing.

Setting the Record Straight

1954 will see nine toll road projects, with a total of 1,100 miles, costing one and one-half million dollars, added to the nation's highway network.

And within the next year or so it is probable that six other toll roads costing nearly one billion dollars will be constructed.

In another five years those who champion toll roads assert that a motorist will be able to leave New York City and travel all the way across the nation via these super-highways.

Today toll roads are in operation in New York, New Jersey, Pennsylvania, Florida, Connecticut, Maine, New Hampshire, Colorado and Oklahoma. They measure a total of 640 miles.

Under construction are toll roads in Maine, New Hampshire, New York, New Jersey, Pennsylvania, Ohio and West Virginia. These total 1,081 miles.

If financing can be arranged, 3,056 miles of additional toll roads are to be built in New Hampshire, Massachusetts, New York, New Jersey, Pennsylvania, Indiana, Wisconsin, Virginia, North Carolina, Georgia, Florida, Kentucky, Kansas, Oklahoma, Texas and Washington.

While these new superroads will be welcomed by motorist and trucker alike one significant fact stands out. This was best said recently when the Engineering News-Record Magazine commented: "Construction of toll highways is not the answer to this country's highway problem. The answer must lie in an expanded program of construction of free highways."

IS FISH A 'BRAIN FOOD'?
NOT ENTIRELY FISH, LIKE ANY OTHER FOOD, HELPS ALL PARTS OF THE BODY NOT JUST THE BRAIN.

ENRICHED BREAD IS NOT 'RICHER'
ENRICHED BREAD IS WHITE BREAD WITH ADDED B VITAMINS AND IRON. ENRICHMENT AID TO HEALTH, BUT NOT TO WEIGHT. THE AVERAGE SLICE OF ENRICHED BREAD CONTAINS ONLY 63 CALORIES.

ENTIRE BIBLE IS RETOLD IN PICTURES FOR SUNDAY SCHOOLS

The Creation

EXCELLENT for refreshment! After television or a party, this pineapple poke cake gives form and delicateness to the custard, cottage cheese and whipped cream mixture.

No-bake cheese cake, though elaborate of looks, requires only 20 minutes preparation time. With unflavored gelatin holding the ingredients together, the refrigerator takes over to give a texture very similar to that of baked cheese cake. Graham cracker crumbs make the frosting.

Pineapple No-Bake Cheese Cake (Party Size 10-12 servings)

Crust Topping:

- 1 1/2 cups graham cracker crumbs
- 1/4 cup butter
- 1/4 cup sugar
- 1/4 teaspoon salt

Mix together all ingredients. Turn cheese cake mixture into an 8-inch spring form pan; sprinkle with crumbs. If desired, top with sliced pineapple or a 3 X 5-inch loaf pan may be used; line with waxed paper. Press crust mixture in bottom of round pan or 9-inch pie plate.

Remove from heat; add lemon rind, cool. Stir in sliced cottage cheese, lemon juice and drained pineapple. Chill, stirring occasionally, until mixture mounds slightly when dropped from a spoon. Beat egg whites until stiff, but not dry. Gradually add remaining 1/2 cup sugar and beat until very stiff. Fold into gelatin-cheese mixture with whipped cream. Turn into prepared pan; chill until firm. To serve, garnish with pineapple. If desired, (Family Size 4 servings) Use 1/2 gelatin recipe but full amount crust mixture in an 8-inch round pan or 9-inch pie plate.

Festive Cheese Cake the No-Bake Way

After television or a party, this pineapple poke cake gives form and delicateness to the custard, cottage cheese and whipped cream mixture.

YOUR HIGHWAYS by JAY SCOTT

Toll superhighways with their overpasses and underpasses, complex cloverleafs and huge river bridges are beginning to unravel across our land.

1954 will see nine toll road projects, with a total of 1,100 miles, costing one and one-half million dollars, added to the nation's highway network.

And within the next year or so it is probable that six other toll roads costing nearly one billion dollars will be constructed.

In another five years those who champion toll roads assert that a motorist will be able to leave New York City and travel all the way across the nation via these super-highways.

Today toll roads are in operation in New York, New Jersey, Pennsylvania, Florida, Connecticut, Maine, New Hampshire, Colorado and Oklahoma. They measure a total of 640 miles.

This was best said recently when the Engineering News-Record Magazine commented: "Construction of toll highways is not the answer to this country's highway problem. The answer must lie in an expanded program of construction of free highways."

Grow Christmas Flowers with Bulbs in Bowls

Growing flowers for Christmas in a living room is not easy, but it can be done if Paper White Narcissus bulbs are started now. These bulbs are carefully selected and temperature-controlled, so they are ready to grow. When started, they first must produce roots, since top growth without good roots is weak and seldom flowers.

"Forcing" is the florist's word for making a plant flower out of season; and the formula for accomplishing this is much the same with all bulbs. Bulbs develop, even in storage, and continue to grow during the winter. They are ready to grow. When started, they first must produce roots, since top growth without good roots is weak and seldom flowers.

Paper White narcissal, planted in bowls filled with water, should be kept away from radiators and steam pipes, and kept in a temperature below 60 degrees for four weeks; preferably in dim light. When roots are sufficient, top growth will begin, and then they should be kept merely in light. Best flowers will result when the temperature never exceeds 70 degrees. Keep them away from radiators and steam pipes, and keep in a temperature below 60 degrees. When roots are sufficient, top growth will begin, and then they should be kept merely in light. Best flowers will result when the temperature never exceeds 70 degrees. Keep them away from radiators and steam pipes, and keep in a temperature below 60 degrees. When roots are sufficient, top growth will begin, and then they should be kept merely in light. Best flowers will result when the temperature never exceeds 70 degrees. Keep them away from radiators and steam pipes, and keep in a temperature below 60 degrees.

Things Are Getting Easier Down on the Farm

PAPER BAGS HELP POULTRYMEN

Always alert to better methods of poultry management, American farmers have found an answer to one of their big problems—quickly detecting declining feed consumption when their birds go off their feed.

From feed store to farm, multi-wall paper bags offer the farmer many advantages. The bags are completely clean—no emptying sifter through. They empty completely as no feed sticks to the inside of the bags. Disease is effectively checked since low-cost multi-wall paper bags, used but once, and can easily be destroyed after using.

In the barn, the uniform shape of multi-wall paper bags, produced by Union Bag & Paper Corp., allows easy economical storage in a minimum of space—and even the ladies have no trouble handling them.

The answer lies in the use of easy to handle 50 lb. multi-wall paper feed bags. A 50 lb. bag saves a day or more over the ordinary 100 lb. pack.

While these new superroads will be welcomed by motorist and trucker alike one significant fact stands out. This was best said recently when the Engineering News-Record Magazine commented: "Construction of toll highways is not the answer to this country's highway problem. The answer must lie in an expanded program of construction of free highways."

Choose Go-Together furnishings for that Made-to-Order Look

GRACEFUL SCROLL SHAPES are repeated on every level of this harmonious French Provincial setting. Richly textured scroll topped chairs in the Aron Park carpet, is echoed in the flowing lines of warm fruitwood pieces and accented with carved paneling. Fine art console are followed through with brass lamps, and a final flourish is given by the elegant touch of the fruit arrangement.

HANDSOME CROSSHATCH DESIGN sets the theme for a modern room. Square chests with tabular legs in step-down lines and bar pattern of chair seats, made to order for the luxurious geometric motif of the Royal carpet. Linear waves of curtain fabric, floor lampshade, and simple accessory boxes are carefully chosen to point-up the crosshatch scheme.

The pastor Rev. J. A. Boardley will be attending a Homecoming at South Haven where he is a speaker.

Varied Schedule Provided At U. of M. Art Museum

ANN ARBOR — A varied schedule, featuring exhibits of industrial design, photography, painting, sculpture, textiles and prints, and drawings will be presented in 1954 at the University of Michigan's Museum of Art.

Announcement of the series, to be shown in the galleries on the second floor of the museum's building, was made by the museum's director, Prof. Jean Paul Sluover.

Opening the fall art exhibit program will be "Design in Industry and Photography," both to run from September 13 through October 24.

The first, organized by the Museum of Modern Art, New York, is an exhibition of product design, graphic design, and architecture of the Divetti Company of New Italy.

The photographic exhibit includes approximately 150 works by well-known European photographers. It is assembled by the Director of the Department of Photography of the Museum of Modern Art, N. Y.

Two exhibits will be shown in October: "The Classical Modernist," and "French Painting, 1870-1910." The latter, organized by the University of Michigan, will feature a selection of the work of Whistler, Manet, and other Impressionist painters.

The "Classical Modernist" exhibit will feature "Michigan Design," a collection of varying styles, will provide a contemporary view of the design scene in Michigan.

Community Chest Drive To Complete In Two Weeks; Thermometer On Main Street

With the goal set at \$4,000 Manchester's big drive of the year started with a kick-off dinner at the Rowan Corners church, Herbert Jacob, drive chairman, urged everyone to get behind the drive, and help the committee complete their work in the two week period allotted to it.

The four classes of the Home Economic department of Manchester high school, under the direction of Mrs. Jean Rhoades, will for the first time in Manchester the Red Cross in joining in the local drive in the business men's and industrial solicitation. Fifteen per cent of the money collected in these two divisions will go directly to the Red Cross and there will be no separate drive at the factories or business houses in the spring. However, there will be the regular house-to-house collection which the Red Cross launches its spring drive. A membership card will be given to businesses or plant employees by the Red Cross of 15 per cent of their total contribution at \$1.00 or more. These will be given out during the Community Chest solicitors.

William Mann, Exchange club president, pledged the support of his group in this drive. He asked that everyone make this a season of generosity and goodwill. In comparing this time to Christmas he said that, "at Christmas friends give to family and friends and most of this comes back. At this season we give—and expect no return." In closing he said that his thoughts were expressed clearly in the slogan of this year's campaign, "Everyone shares."

Ralph Sharp, Jaycee president, told the group that the youngsters of Manchester's organizations are "both happy and proud to be able to take an active part in such a worthwhile cause."

Mrs. Louis Vogel, chairman of the Pleasant Lake area told the group that "friends, smiles and acts of assistance to others pay dividends." She explained how the Pleasant Lake school project was aided by the drive last year and how the drive reaches out to help many people and organizations in a great many ways during the year. She told the solicitors to put their best foot forward—and even then sometimes someone will step out. But she added, "people, like chickens, do best when they have to scratch for it."

Fred Atkinson, Supt. of schools here, told the group of the many benefits which the school organizations derive during the year from the Community Chest. He mentioned the donations to the band, the student council and the Year Book. He added too, that he was happy to see the Red Cross joining in—if only in a partial way with the Community Chest.

He noted that a great many benefits are made possible through the Red Cross, adding that he was clothed and fed for 21 months by this organization when he was imprisoned in a German prison camp.

The various captains of the teams introduced their workers. James Hendley is chairman of the business men's drive and Mrs. Allen Schaefer of the house-to-house solicitation.

It was pointed out that membership cards for the Red Cross for business and industry will be given out in the spring—in March. No contributions for the Red Cross should be given to solicitors in the house-to-house campaign at this time. The solicitors are open suggestions and opinions but have been instructed to accept no money for the Red Cross now. A few representatives are Mrs. James Cannon, Jr., and Harry Diebrow, and Double A Products

Home Ec. Dept. To Sponsor Movies

The four classes of the Home Economic department of Manchester high school, under the direction of Mrs. Jean Rhoades, will for the first time in the history of the school, sponsor movies to be shown at the school.

The money which the group hopes to make on the project will be used by the classes to purchase furniture and equipment for the home living room which will be part of the high school under construction here. Plans call for the school to be open next September. With this in mind the group is planning to raise the money for the furniture and equipment as soon as possible.

The films shown will be selected by the Home Economic department, they will do their own shopping and run their project. The movies will be shown in the regular school equipment.

Harold Strayer, history teacher in the school has been chosen to direct the girls the operation of the project.

The first movie, "Family Homecoming" and a cartoon will be shown on Saturday, October 23 from 7 to 9 p. m. at the high school gym. It is believed that the movie will be a part of this kind will be run, as Manchester does not have a theatre.

Committee named to choose films include Kay Ayres and Joan Mobley with Barbara Steinway, Barbara Pratt and Darlene Dunny. Those ushering are Joyce Kommer and Ruth Trois; Pauline Bus, and Gaus assisting. On the ticket committee is Joan Emlinger aided by Janet Hand, Margaret Leason, Ruth Trois and Sharon Kryworucko.

Freedom Club Discusses New Fabrics

The Freedom Ideal Homemakers Extrusion club met at the home of Mrs. John Nelhaus Friday evening with 11 members and two guests. The leader was on the care and sewing of new fabrics, and was Mrs. William Starr.

The program books for the year were filled out and plans were made for the club exhibit at the Craft Tea which will be held Thursday, Oct. 21.

Refreshments were served by Mrs. Nelhaus co-hostess. The hostess assisted by Mrs. Arthur Kuhl; on Friday, Nov. 12.

Michigan Bishop Sets Forth Reasons Why Gambling Is Bad

In a pamphlet written by Richard S. M. Ehrlich, Episcopal Bishop of Michigan, set forth reasons why he feels that the proposed constitutional amendment, Proposition 13, should be defeated in the November 2 general election. The pamphlet which is entitled, "The Easy Money Boys," reads as follows:

One of the pressing problems facing our society today is that of gambling, and as a people we need to consider carefully our moral implications. Because of the rapid growth of many of our leaders in Church, State, and Business consider it a serious menace.

Let's begin in the obvious level of community welfare by stating that the great gambling interests are a parasitical group living off the labor of others and contributing nothing to the community. The gambler, because of the anti-social nature of gambling, stand, and always will stand either in, or on the edges of the underworld. We can expect to see again and again their attempted corruption of athletes and politicians.

What Gambling Does

The gambling interests corrupt youth, breed crime, and deteriorate the character of all who come under their influence. When the bookies, the numbers racket, or the slot machines make their appearance in a community, you know that there is trouble ahead. By their very nature the gambling interests are parasitical and anti-social, and a menace to the order of our life.

The first reason, then, why everyone is because money paid for a bet often goes to support this corrupting and worthless side of society. It is, therefore, sheer reasoning to say that because you can afford a few dollars there is nothing wrong for you betting.

If there is nothing wrong in contributing to the support of a parasitical group that stands in, or on the edges of the underworld? Is this responsible citizenship? Should not every

Poultry Division Manchester Fair

Below is the list of the winners of the Poultry Division at the Manchester Community Fair. Best egg production pen in show, first place was Merward Kemmer and Richard Wolff was in second place. White Rocks, Fred Flaider, Hyland, Bernard Kemmer, New Hampshire Reds, Richard Wolff, and Leghorn, Erwin Bus; Miscellaneous Breeds, White Rocks, Erwin Bus; and second place Leroy Cummings; New Hampshire Reds, Erwin Bus; and second place to James Baldwin.

The best display pen in the show was the Leghorn, Erwin Bus; place went to Mike Rossette and second place to James Baldwin.

Dutchmen Lose To Hartland 14-16 Hope Seen In Brokaw

The Dutchmen ran into stronger competition than they had expected last Friday night against Hartland as they were defeated 14-16.

Grant, a Dutchman, bucked over from the two-yard line to give Manchester a quick 6-0 lead. Following runs by Tom Sweeten and Gary Brokaw. The extra-point attempt was no good.

Later, Ernest Sweeten hit Jack Becker with a six-yard pass for the first Hartland touchdown, clinching a 66-yard game. The Dutchmen booted the extra point.

With minutes left in the game, J. Summers intercepted a Manchester pass and ran for a 10-yard gain. This was his brother, Jerry Summers, carried the ball over for the touchdown. He then kicked the point for the final tally.

Although the Dutchmen failed to win, they uncovered new stars as Gary Brokaw rushed for 116 yards in 18 tries, and showed great potential as a half-back.

Three of their passes were intercepted by Jerry Ekin for 32 yards. The next game will be at South Lyons on October 15, as the Dutchmen engage in their second league game. South Lyons won their first game, 20-0, against Hartland two weeks ago, so another exciting contest is promised.

Coming Events

Altar Society meeting at the home of Mrs. Walter Schindler Thursday, Oct. 14 at 8 p. m.

The Young People's League of Emmanuel will meet Thursday, Oct. 14, 8 p. m. at the parish hall.

Macabees regular meeting will be October 18 (Monday) at 8 p. m. at the Legion hall. All Policy Holders are urged to attend. No cards will be sent out.

The initiatory team from Ypsilanti and Ann Arbor will be at the meeting to practice for the Washtenaw and Lenawee County Association meeting which will be held at the Charles McKenney Hall at Ypsilanti Thursday, Oct. 21, starting at 10 a. m. Dinner will be in the cafeteria.

Card Party for the public will be held Thursday, Oct. 17, from 2 to 4 p. m. at Arbetter hall. Goodwill Industries truck will be in Manchester Wednesday, Oct. 27. Call Mrs. Francis Cargo for pickup. Phone GA-5063.

The Beacon Light Extension will meet with Mrs. Ellis Pratt on Tuesday, Oct. 19.

Septic Tank Cleaning Explained by Dept. of Health

Don't be fooled by people who pretend to sell you this new method of keeping septic tanks sweet and clean.

That's advice from Walter L. Hoffman, a bacteriologist at Michigan State College. He says that many such so-called "miraculous" products have appeared on the market from time to time.

The latest is a "highly concentrated mixture of enzymes." It is supposed to reduce "rot" or worm out bacteria, will new bacterial cultures. It is supposed to speed up the reduction of solid waste matter for easier drainage.

In the first place, says Hoffman, the rotting of bacteria are in normal raw sewage. In the second place, he says, they don't become lost or worn out. They reproduce by dividing themselves. "I don't know of any substance on the market," he insists, "that will speed up the bacteria in doing their job."

New Juvenile Home On County Ballot

One of the most significant of the issues facing voters on November 2 is that which would authorize a new juvenile home for Washtenaw county. Suitable quarters for the care of youngsters under 17 who are delinquent are being sought by public and private groups in the county.

The Board of Supervisors of the county has long been in search of a new juvenile home. The need for such a home is serious. \$45 new cases of neglected and delinquent children, same before the Probate Court in 1953; it is estimated that 1954 new cases will total 500.

About 70 per cent of these cases should be handled by the county. The fact that there are no suitable quarters for the care of youngsters under 17 who are delinquent are being sought by public and private groups in the county.
